NAME OF FIRE: Dolan

SIGNED:

Incident Meteorologist

WEATHER DISCUSSION: The marine inversion (around 1000 feet) will once again impact the fire, producing some night and morning low clouds and fog across the west flank of the fire. Otherwise, mostly clear and smoky conditions are expected. With the continued marine influence, relative humidity will be at moderate to high levels below the inversion. However, above the marine inversion, drier conditions will prevail. Minimum humidity, above the inversion, will drop into the teens with poor overnight recovery. Ridgetop winds will remain north to northeast through the operational period with weak diurnal winds at lower elevations.

For the weekend, very hot and dry conditions are expected as high pressure builds overhead and the marine inversion shrinks. Away from the coast, afternoon temperatures will be in the 90s to 110. warmer and drier conditions to the fire along with limited marine layer stratus and fog. In fact, an EXCESSIVE HEAT WATCH is in effect Saturday through Monday.

WEATHER FORECAST:

WEATHER: Mostly clear and smoky except for some night and morning low clouds and fog below 1000 FT.

TEMPERATURES: Maximum: Below 1000 FT: 66-78...Above 1000 FT: 86-96.
 Minimum: Below 1000 FT: 56-66...Above 1000 FT: 67-76.

HUMIDITY: Minimum: Below 1000 FT: 40-60%...Above 1000 FT: 10-25%.
 Maximum: Below 1000 FT: 60-80%...Above 1000 FT: 25-40%.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 15	TYPE OF FIRE: Wild Fire

Weather Summary

Continued warming and drying trend.

Conditions above the Marine Layer (1,000')

Temps: Day 86-96 Night 66-76

RH: Day 10-25% Night 25-40% (Above inversion)

Winds: Day Ridge top N-NE 5-10 Gusts 15mph Night N/NE 3-6 gusts 12mph

FIRE BEHAVIOR

GENERAL: The top of the marine inversion is lowering, today to about 1000ft. This has been a significant drop in the last two days. Expect the fire behavior to moderate below this elevation and remain very active above it.

The main heat in the fire has been to the east, but as the marine layer lowers expect heat you have not seen in several days to begin to show. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs.

Fire behavior will continue to be active throughout the night in the thermal belt. This means that you could see rapid downhill fire runs and spotting distances up to ¼ mile.

Spotting will be short range less than 400 feet and from rollout.

Probability of ignition will be 70-90% during the day, 40-60% at night.

SPECIFIC:

Branch I: No forward fire progression is expected. There is still a potential for re-burn along Highway 1.

Branch V and VII: Main fire progression will continue to the east and southeast. Aerial support & continued marine inversion has helped slow growth in Hare Canyon. Once fire gets above the marine layer, expect quick movements to the ridgetop with north wind alignment. Expect rapid intense runs in aligned drainages. From Lucia to the Hermitage no fire spread is expected. Along Highway 1 rollout and re-burn will continue to challenge containment.

AIR OPERATIONS: The inversion is shallow and below where the fire is mostly burning. It should be the best visibility we have seen in several days.

SAFETY

Attitude is the foundation of everything we do. Model the behaviors you want to see in those above you and below you and you will be inspired by the impacts you will have.

TOPIC:

ATV/UTV Operations

NARRATIVE:

ATV/UTVs are useful tools for firefighters, but there are risks associated with their operation.

Ensure that ATV/UTVs are being utilized on the appropriate roads and areas that do not exceed their capabilities.

When you are the operator, do your best to avoid distractions and keep your focus on the task of driving.

When using UTVs, all passengers must follow their agencies policy regarding appropriate PPE.

When possible, use experienced drivers in difficult terrain. Know your limitations as a driver.

If you feel like there is a high probability of damaging the equipment to complete your mission, consider using different tactics.

COVID Module Message

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms:

- **Cough**
- **Fever / Chills**
- **Shortness of breath**
- Headache
- Nausea / Vomiting
- Diarrhea
- Body ache / fatigue
 - Outside of normal firefighting
- Sore throat
- Loss of taste or smell

If you answered Yes to any of the above, report it to your supervisor immediately, self-isolate away from other people until given direction and call **206.940.2913** or **253.222.2464**.

Do your part to minimize your risk of exposure and limit the spread COVID-19.

- Respect others' personal space of at least 6-ft distance to limit the spread of pathogens
- Routinely wash your hands
- Do not shake hands or hug other people
- Cough or sneeze into your shoulder/elbow rather than your hands
- Avoid touching your face as much as possible
- Wear a face covering during briefings, meetings, and when proper social distancing is not possible
- Wear a face covering when in public

*Document on your 214 all contacts with anyone other than your "module of one" for potential contact tracing (Daily Activity Log)

Arrive healthy, go home healthy!
