WEATHER DISCUSSION: Strong high pressure will build over the fire area with very hot and dry weather conditions. The marine layer will dissipate leaving the coastal areas and lower slopes fog and cloud free through at least Monday. Relative humidity will trend lower with very poor overnight recoveries over the ridges and higher elevations and marginal even at and near the coast. The hottest and driest day will be Sunday with only a slight downward trend in temperatures on Monday and Tuesday. Winds will be mainly terrain driven through the period however near the coast sea breezes will be very weak or the flow will remain offshore.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 16	TYPE OF FIRE: Wild Fire
FIRE NAME: Dolan	OPERATIONAL PERIOD: Sept, 5, 2020 24hr
DATE ISSUED: 9/4/20	TIME ISSUED: 1930hrs
UNIT: CA-LPF	SIGNED: 
	Typed/printed: /s/ Dana Skelly

Weather Summary

Marine layer no longer present. Ridgetop conditions:

Temps: Day 93-100 Night 80-85

RH: Day 14-19% Night 19-24% (Above inversion)

Winds: Day East 3-6; Night East 5

FIRE BEHAVIOR

GENERAL: Expect fire behavior to be more active than we have seen in weeks. More heat and smoke will be visible at lower elevations across the fire area and fuels are available. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs. Spotting will be up to ¼ mile.

Fire behavior will continue to be active throughout the night. This means that you could see rapid downhill fire runs and spotting distances up to ¼ mile.

Probability of ignition will be 80-90% during the day, 70-80% at night.

SPECIFIC:

Branch I: No forward fire progression is expected. Hot spots like DP17 will remain active. There is still a potential for re-burn along Highway 1, watch for rollout.

Branch V and VII: The easterly component of today's winds will help with containment efforts, but main progression will continue to be to east and southeast. Fire will continue to be active around Cone Mountain and where it has crossed the Santa Lucia Range. Aerial support & continued marine inversion has helped slow growth in Hare Canyon. Once fire gets above the marine layer, expect quick movements to the ridgetop with north wind alignment. Expect rapid intense runs in aligned drainages. From Lucia to the Hermitage no fire spread is expected. Along Highway 1 rollout and re-burn will challenge containment.

AIR OPERATIONS: Small chance of patchy clouds at Big Sur in the morning but otherwise skies will be clear and no limitations expected for air operations.

SAFETY

The fire environment today is substantially different from what you have experienced on previous days. Game on. This is the first of several days of increased activity. Pace yourselves, lookout for your team and anchor in on the fundamentals.
