**WEATHER DISCUSSION:** The marine layer will remain rather deep in the 1500-2000 foot range for the next couple of days and this will keep the coastal branch and Arroyo Seco cool and moist during the overnight and early morning hours. Inland, the marine affects will be enhanced morning inversions with delayed breakup of inversion conditions. Above the marine layer very different weather conditions will prevail with much drier air both day and night and poor overnight relative humidity recoveries. Winds over the fire will be mainly terrain or oceanic influenced with daily gusty afternoon southwest winds affecting the inland branches of the incident High pressure over the region will move to the east Thursday and a trough of low pressure will push through Northern California Friday and Saturday. No precipitation is anticipated with this weather disturbance however winds will shift around to the north on Friday before returning to a light southeasterly direction by Sunday.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 25	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Dolan	<b>OPERATIONAL PERIOD:</b> Sept, 15, 2020 24hr
<b>DATE ISSUED:</b> 9/14/20	<b>TIME ISSUED:</b> 1930hrs
<b>UNIT:</b> CA-LPF	<b>SIGNED:</b> 
	<b>Typed/printed:</b> /s/ Alex Enna, FBAN-t

### Weather Summary

Warm and dry conditions with southwest winds 10-15 mph with gusts to 22 mph in the afternoon

### FIRE BEHAVIOR

#### GENERAL:

Continued active fire behavior above the marine layer, especially when slope and wind align. When the marine layer weakens, fire activity can quickly escalate in previously quiet areas. Probability of ignition up to 80-90% with ½ mile spotting distances off of ridgetops.

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

Branch I: Minimal fire behavior expected but rolling material and fire weakened trees will continue to be a safety concern.

Branch IV: As the marine layer retreats, the southerly general winds will play a bigger role with wind/topography alignment possible in the Arroyo Seco and Santa Lucia drainages. With alignment and good fuel continuity, runs of up to 100 ch/hr are possible in the brush and grass.

Branch V: Heavy fuels near the line combined with adverse winds lead to a high potential for spotting across established control lines. Fuels moistures are low and any fire outside the containment line will grow rapidly (up to 20 acres within 15 minutes in light flashy fuels).

Branch VII: At lower elevations, high humidity values associated with the marine layer will result in minimal fire behavior. Above the marine layer, fuels combined with slope/wind alignment are conducive to uphill runs of up to 80 ch/h with 25' flame lengths in the brush.

Night: Humidity recoveries and effects of the marine layer vary widely across the fire area. Above the marine layer, probability of ignitions are at 50-60% with spotting distances of a ¼ mile.

#### AIR OPERATIONS:

Good air is not anticipated until late morning as the marine layer recedes.

#### SAFETY:

This fire has shown its potential to produce extreme fire behavior. Continue to monitor weather conditions and be prepared to react to rapidly changing fire behavior. Prior to engaging in indirect line construction and prep, ensure lookouts are in place to monitor the main fire.

# SAFETY MESSAGE

## *Pacific Northwest Incident Team 2*

### *9-15-2020*

**INCIDENT:** Dolan Fire

**OPERATIONAL PERIOD:** Day/Night

**TOPIC:**

**Cumulative Fatigue**

**NARRATIVE:**

**Sleep Deprivation Debts:** The amount of sleep a person needs increases when deprived of sleep in previous days. Getting too little sleep creates a "sleep debt". We don't adapt to getting less sleep. Judgment, reaction time, and other functions are still impaired.

### **Consequences of Too Little Sleep**

- Memory problems and poor judgement
- Poor hand-eye coordination and slower reaction times
- Depression, crankiness, irritability
- Weakening of the immune system
- Increase in perception of pain

**The Dangers of Sleep Deprivation:** Sleep-deprived people perform as badly or worse than those who are intoxicated. Drowsiness is the brain's last step before falling asleep, so driving while drowsy can lead to disaster. Caffeine and other stimulants **CANNOT** overcome the effects of sleep deprivation.

### **You Are Too Drowsy to Drive Safely if You:**

- Have trouble keeping your eyes focused
- Can't stop yawning
- Can't remember driving the last few miles
- Are daydreaming and have wandering thoughts
- Have trouble holding your head up
- Are drifting in and out of lanes

**Only SLEEP can make up for lost sleep.**

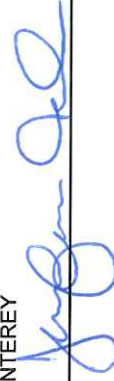

**Monitor 2:1 work/rest and MITIGATE when you go over.**

**SAFETY OFFICERS**

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## King City Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **206.940.2913** or **253.222.2464**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes or greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
