FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 27	**TYPE OF FIRE: Wildfire**
FIRE NAME: Dolan	**OPERATIONAL PERIOD: Sept, 17, 2020 24hr**
DATE ISSUED: 9/16/20	**TIME ISSUED: 1930hrs**
UNIT: CA-LPF	**SIGNED:** Alex Enna **Typed/printed: /s/ Alex Enna, FBAN-t**

Weather Summary

Forecasted wind switch today with continued hot and dry conditions. Terrain driven winds 2-4 mph becoming NE 5-8 mph by 1200.

FIRE BEHAVIOR

GENERAL:

Fuels continue to be dry with the potential for very active fire behavior above the marine layer, especially when slope and wind align. Previously quiet areas may begin to show fire activity with the wind direction change. Probability of ignition of 70-80% with ½ mile spotting distances off of ridgetops.

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph**, **relative humidity <17%**, temperature over 98, **10-Hour Fuel Moisture less than 6**.

SPECIFIC:

Ocean Group: Minimal fire behavior

Branch IV: Forecasted winds will generally push fire back in on itself with minimal spread threat towards values at risk in the Arroyo Seco and Tassajara areas.

Branch V: The switch to NE winds will increase potential for spotting and other holding concerns in Division Whiskey. Fuel moistures are low and any fire outside the containment line will run uphill rapidly (up to 20 acres of growth within 15 minutes in the brush).

Branch VII: At lower elevations, high humidity values associated with the marine layer will temper burning conditions until later in the day. Above the marine layer, fuels combined with slope/wind alignment are conducive to uphill runs of up to 80 ch/h with 25' flame lengths in the brush.

Night: Humidity recoveries and effects of the marine layer vary widely across the fire area. Above the marine layer, probability of ignitions are at 50-60% with spotting distances of a ¼ mile.

AIR OPERATIONS:

Clear air highly dependent on presence of marine layer, inversion expected to lift around 0900

SAFETY:

Winds are coming from a different direction today. Yesterday's escape routes may not be adequate for today. Establish LCES before you begin your work shift and pay attention to indicators of changes in the fire environment. Pages 3 and 4 in your IRPG provide a great review of those indicators.

INCIDENT: Dolan Fire	OPERATIONAL PERIOD: Day/Night

TOPIC:

Planning for Medical Emergencies

NARRATIVE:

Planning for Medical Emergencies

(see IRPG page 2)

Ask yourself these questions each day before starting work:

1 What am I going to do if someone gets hurt?
Is medical support available?

2 What equipment is available to treat and transport the person?
Who has what equipment and where is it located?
Is equipment accessible on the line or staged at a drop point?

3 How will we get the injured person out of here?
Can you get to a road or a helispot?
Air or ground transportation needed?
Consider smoke, nightfall, fire behavior, mechanical failures

If you don't have the answers, STOP, Reassess and Consider Alternate Strategies and Tactics

Think Ahead
Have a PLAN &
Have a Contingency Plan

When is a Joke – Not a Joke?

Humor and fun need to be part of our teamwork picture, but not when it is at the expense of others.

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

Do your part to minimize your risk of exposure and limit the spread COVID-19.

King City Considerations

⇒ Wear a face covering when in public.

⇒ Wash your hands often.

⇒ Use hand sanitizer after pumping gas.

⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.

⇒ Set the example while in the public eye.

*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **206.940.2913 or 253.222.2464**.

Document all contacts with anyone other than your "module of one" for potential contact tracing (on your 214 Unit Activity Log)

Examples of when & what to document:

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ **RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE** *Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.* ☐ **YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary.** *Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.* ☐ **GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport** *Ex: Sprains, strains, minor heat-related illness.*	
Nature of Injury or Illness & Mechanism of Injury		*Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)*
Transport Request		*Air Ambulance / Short Haul/Hoist Ground Ambulance / Other*
Patient Location		*Descriptive Location & Lat. / Long. (WGS84)*
Incident Name		*Geographic Name + "Medical" (Ex: Trout Meadow Medical)*
On-Scene Incident Commander		*Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)*
Patient Care		*Name of Care Provider (Ex: EMT Smith)*

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*if different*): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: ***Considerations:*** ***If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.***

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
