### ...WARMER AND DRIER TODAY...

**DISCUSSION:** Temperatures will be warming over the fire today, afternoon temperatures reaching the upper 80's in interior locations with mid 60's along the coast. Humidity values will be falling down into the upper-teens in the interior areas. Winds will be moderate over much of the fire as gusts develop in the afternoon as the area is exposed to full sunlight. Expect fair to good recoveries on Saturday night with the lower elevations seeing more humidity recovery. Sunday will continue to see a warming and drying trend.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 29	TYPE OF FIRE: Wildfire
FIRE NAME: Dolan	OPERATIONAL PERIOD: Sept, 19, 2020 24hr
DATE ISSUED: 9/18/20	TIME ISSUED: 1930hrs
UNIT: CA-LPF	SIGNED: 
	Typed/printed: Alex Enna, FBAN-t

### Weather Summary

Mostly sunny with humidity values as low as 18%. Terrain driven winds 2-4 mph becoming NE 5-8 mph by 1200. Gust to 15 mph along ridges.

### FIRE BEHAVIOR

#### GENERAL:

Suppression efforts have tempered fire activity and growth . However, live and 1000 hour fuel moistures continue to trend downward and at the higher elevations are at or near 97<sup>th</sup> percentile conditions. With subtle changes in wind and heating the potential for very active fire behavior remains. Probability of ignition of 60-70% with 1/4 mile spotting distances off of ridgetops.

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph**, relative humidity <17%, temperature over 98, **10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

Branch I (Ocean Group): Minimal fire behavior but keep an eye out for fire weakened trees and rolling material on steep recently burned slopes.

Branch IV: Continued helicopter bucket drops have checked movement towards Arroyo Seco and Tassajara and forecasted winds will likely push any fire back in on itself. Don't get lulled into complacency, there is a great deal of unsecured fire edge in the branch and plenty of scattered heat. If this side of the fire wakes up, spread rates of up to 100 chains/hour are possible with wind/terrain alignment.

Branch V: Recent firing operations have secured the edge but the potential for spotting and other holding concerns remain. Topography will play a big role in fire growth, any fire outside the containment line will run uphill rapidly (up to 15 acres of growth within 15 minutes in the brush).

Branch VII: At lower elevations, high humidity values associated with the marine layer will temper burning conditions until later in the day. Above the marine layer, fuels combined with slope/wind alignment are conducive to uphill runs of up to 80 ch/h with 20' flame lengths in the brush.

Night: Humidity recoveries and effects of the marine layer vary widely across the fire area. Above the marine layer, probability of ignitions are at 40-50% with a spotting distances of 0.1 miles.

#### AIR OPERATIONS:

Clear air highly dependent on presence of marine layer, inversion expected to lift by noon

#### SAFETY:

Keep your head in the game, we are not out of the woods with this fire. With any heat outside the lines the conditions are still conducive to fast moving runs. Establish LCES on potential worst case fire behavior.

NARRATIVE:

Please use the attached QR Code to provide input on Hazards and Mitigations identified for the work you are doing on the fire. Your answers will be anonymous.

1. Are the hazards you see in the field accurate in the IAP?
2. Are the mitigations appropriate to lower the risk where you are working?
3. Is the Risk Assessment in your 204 (High, Medium or Low) and identified hazards accurate?
4. Please provide any safety or risk management feedback.

SAFETY OFFICERS	<i>Laura Livingston/Dave Varon (t)/Marshall Brown</i>
-----------------	---

Deliberate Risk Assessment Hazard Summary  
Dolan Fire, 9/19/20

Hazard	Mitigation
<p><b>Zone and Point Protection:</b> Narrow one way ingress and egress into most structures. Box canyon in Arroyo Seco. Home owners refusing to leave residence in Branch IV &amp; VII. Heavy continuous fuel loading surrounding structures. Burnover or entrapment potential.</p>	<p>Do not engage in structure protection without safety zones, training and proper equipment. Have a reliable exit strategy and give yourself plenty of time to pull out, considering time to exit with one way ingress/egress. Thorough assessment of structure defensibility (triage) and hazards prior to fire impact. Mitigate hazards at structure to the fullest extent possible prior to fire impact. Ensure suppression response is commensurate with value at risk. Know the trigger points in advance to disengage.</p>
<p><b>Air Operations:</b> Aircraft operating with poor visibility due to marine layer and smoke. Increased air traffic over the fire as aircraft are used for ignition, checking actions and on indirect line. Transfer of risk from ground to aviation resources with aerial checking actions (buckets, retardant)</p>	<p>Ensure bucket work and retardant use is in support of suppression activities (Is this flight necessary? IRPG p.1). Follow aviation risk assessment and build a plan knowing that aviation may not be available. Use strobes, panels, and/or signal mirrors to guide helicopters into drop areas. Clear drop areas of people. Maintain good comms with all aircraft.</p>
<p><b>Perimeter Control:</b> Entrapment, extreme fire behavior, unburned fuel between forces and fire, burns, slips trips and falls. Fuel handling. Accidental ignition outside suppression boundary from aerial ignition.</p>	<p>Establish secure anchor points and carry good black with burning. Continually re-evaluate escape routes and safety zones. Utilize the appropriate resources for steep and rugged terrain. Maintain clear communications with aerial resources, suppression resources and adjacent Divisions. Monitor weather conditions and fire behavior. Disengage if conditions warrant.</p>
<p><b>Perimeter Control:</b> Public traffic, heavy fog/smoke and rock slides on Hwy 1. Poor road conditions on N Coast road. Hazard trees and rolling material in all burned areas. Very long extraction times due to topography. Steep areas with limited access. UXO and other hazards on Fort property. Heavy equipment use in slide area, potential for rolling debris. Unrecarded heavy equipment operators.</p>	<p>Drive for road conditions. Expect increased traffic on Hwy 1 and in turnouts. Re-evaluate snags and other gravity hazards throughout the shift. Use call outs on Nac-Ferg road. Avoid soft road shoulders. Ensure all line resources are familiar with med/evac plan. Recognize UTV slope limitations. Stay on roads and do not mop-up interior on fort property. Monitor slide conditions during work. Accompany unrecarded operators with qualified lead with radio comms.</p>
<p><b>Logistical Support:</b> Maintenance required on repeaters. Hazardous driving through fire on Nac-Ferg or by travelling 2 hours via highways. Potential for fire forcing evac of spike camps. Increase in traffic and public interaction in K.C.</p>	<p>If communications fail on the fireline, cease operations until comms is reestablished. Enact Evac plan for spike camps if necessary. Follow transportation plan in K.C. and surrounding area.</p>

## Human Resource Message

### C o m m u n i c a t i o n

Communication is a two way street. When communication becomes a one way, it becomes a traffic jam and turns into an issue. Some examples are:

- ❖ Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- ❖ A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- ❖ It can be like the telephone game. It starts with specific information and by the time it gets to the end it very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

“The single biggest problem in communication is the illusion  
that it has taken place” ....by George Bernard Shaw

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1,2</sup>

### Symptom

Cough more than expected?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside your normal for firefighting?

Sore throat?

New loss of taste or smell?

Fatigue, outside your normal for firefighting?

Headache, outside your normal for firefighting?

Congestion or runny nose, outside your normal for firefighting?

Nausea or vomiting

Diarrhea

\* Take temperature with no-touch thermometer, if available \*

### <sup>1</sup> Symptoms of Coronavirus

<https://www.edc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## King City Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes or greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
