**DISCUSSION:** Today will see continued warming temperatures over the fire with highs in the upper 80s to low 90s at many locations over the fire. Afternoon humidity values will once again fall into the upper teens to low 20s much of the inland portions of the fire. Winds today will vary once again with location, but will generally be light with occasionally gusty conditions under clear skies and full sun on the terrain. Overnight will see the development of multiple inversions with fair to excellent humidity recoveries. Expect continued warming Tuesday with slightly lower humidity values.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 31	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Dolan	<b>OPERATIONAL PERIOD:</b> Sept. 21, 2020 24hr
<b>DATE ISSUED:</b> 9/20/20	<b>TIME ISSUED:</b> 1930hrs
<b>UNIT:</b> CA-LPF	<b>SIGNED:</b> 
	<b>Typed/printed:</b> Alex Enna, FBAN-t

### Weather Summary

Warming trend continues with terrain driven winds 2-4 mph becoming 4-8 mph by 1200. Gusts to 15 mph along ridges. Wind direction highly dependent on location on fire...don't hesitate to request a spot weather forecast for your work area if needed.

### FIRE BEHAVIOR

#### GENERAL:

The fire is remaining in its footprint but the potential for continued fire growth and active fire behavior remains. 1000 hour fuel moistures continue to trend below average and with subtle changes in wind and heating active fire behavior can be expected. Probability of ignition of 70-80% with 1/4 mile spotting distances off of ridgetops.

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph**, relative humidity <17%, temperature over 98, **10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

Branch I (Ocean Group): Minimal fire behavior but keep an eye out for fire weakened trees and rolling material on steep recently burned slopes.

Branch IV: There has not been much movement towards the Arroyo Seco and Tassajara areas recently. However, with areas of scattered heat and an unsecured fire edge, the potential remains for active fire behavior and spread rates of up to 80 chains/hour with wind/terrain alignment.

Branch V: Following recent firing operations, pockets of scattered heat remain adjacent to control lines. Should fire establish on the green side of the line, topography will play a big role in fire growth. Any fire outside the containment line will run uphill rapidly (up to 20 acres of growth within 15 minutes in the brush).

Branch VII: At lower elevations, high humidity values associated with the marine layer will temper burning conditions until later in the day. Above the marine layer, fuels combined with slope/wind alignment are conducive to uphill runs of up to 80 ch/h with 20' flame lengths in the brush.

Night: Humidity recoveries and effects of the marine layer vary widely across the fire area. Above the marine layer, probability of ignitions are at 40-50% with a spotting distances of 0.1 miles.

#### AIR OPERATIONS:

Clear air highly dependent on presence of marine layer, inversion expected to lift by noon

#### SAFETY:

Go slow to go fast. Rolling rocks, fire weakened trees, ash pits, and unexpected wind shifts are all present and possible as this fire winds down. Take the time to understand today's weather and assess the potential fire behavior prior to engaging with the fire.

# **SAFETY MESSAGE**

***Pacific Northwest Team 2 September 21, 2020***

<b>INCIDENT:</b> Dolan Fire	<b>OPERATIONAL PERIOD:</b> Day/night
<b>TOPIC:</b> Groundhogs Day	

During slow times or days when we anticipate “more of the same” people tend to “check out” and allow their mind to wander. If the words “groundhogs day” are spoken, this should be a warning that complacency is setting in.

This thought process should also be applied to the theory of “slides”. In this line of work, we regularly reference the need to develop or use “slides” to relate a current situation to a past experience. By focusing on the familiar, we may miss the subtle differences that make each situation unique.

Acknowledging these tendencies can help a person be present in the moment and deliberate in their actions. Accept that each day and each situation is unique. We regularly engage in familiar tasks and situations but, acknowledging that each one has unique nuances will help prevent being caught by surprise.

**Be alert, think clearly and act decisively.**

**Please provide feedback. Thanks, PNW 2**

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting

\* Take temperature with no-touch thermometer, if available \*

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## King City Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes or greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
