**3. Objective(s):**

STRATEGIC FRAMEWORK

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, National Scenic Byway (Highway 1), Fort Hunter Liggett improvements, and wilderness values. Apply tactics that offer the highest probability of success. Identify, develop and prepare contingency measures in a proactive fashion. Develop and maintain an accurate and timely information sharing process for high value vineyard operations.

MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and risk management.
- Reduce the threat to private property, residences, and infrastructure through effective suppression tactics.
- Minimize risk and limit exposure to COVID-19 by following best management practices.
- Reduce the impacts to Wilderness values by applying minimum impact suppression tactics (MIST).
- Coordinate with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Distribute accurate and timely fire information to cooperators, the public, and stakeholders.
- Manage resources to meet protection objectives while maintaining fiscal accountability.

CONTROL OBJECTIVES

Minimize risk to private property, surrounding communities, and resource values by:

- Maintaining the fire within the existing perimeter along the Highway 1 corridor;
- Keeping the fire south of the Marble Peak Trail (Willow Creek) from Anderson Peak to Arroyo Seco and south of the 19S09 Road (Arroyo Seco River);
- Keeping the fire west of the 19S01 Road (Vaqueros River) and the 19S08 (Reliz River) Road; and

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 41	TYPE OF FIRE: Wildfire
FIRE NAME: Dolan	OPERATIONAL PERIOD: October 1, 2020
DATE ISSUED: September 30, 2020	TIME ISSUED: 1900 hours
UNIT: CA-LPF	SIGNED: 
Typed/printed: Nic Elmquist, FBAN	

### Weather Summary

\*\*Please see attached Fire Weather Forecast\*\*

### RED FLAG WARNING IN EFFECT

High Temps: 95<sup>o</sup>-105<sup>o</sup> (inland), 66<sup>o</sup>-70<sup>o</sup> (coast)                      Min RH's: 15-22% (inland), 45-50%(coast)  
Winds: Terrain driven 2-4 mph becoming upvalley 5-7 mph by 1200. Gust to 25 mph along ridges.

### FIRE BEHAVIOR

#### GENERAL:

The live fuel moistures in chaparral during this time of the year in southern California are always at critical levels. Another main driver of fire behavior, and the one whose moisture contents are controlled solely by changing weather conditions, is the fine dead fuel moistures. Yesterday, the 1-hour and 10-hour fuel moistures fell on their face and did not recover overnight. Today any fuel bed exposed to a heat source will consume. The overnight warm and dry conditions will cause the potential burn period to extend to nearly 24-hours a day until we get weather recovery on Saturday. Expect all four of the local thresholds identified below to be met today and the fire danger readings will be in the 97<sup>th</sup> percentile.

Probability of ignition peak burn period (1200-1600): 90-100%                      Burning Index: Yesterday: 153, Today: 170

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

All Divisions: The extended hot and dry conditions will cause any hold-over heat sources to consume the fuel around it. Hopefully, this will continue to be interior of the perimeter. The solar heating from the extremely hot temperatures will be especially impactful to the southerly aspects.

Initial Attack: A Red Flag Warning for critical fire weather will remain over the area until Friday. Live ammunition operations have been known to start wildfires at Fort Hunter Liggett. Be prepared to shift from mop-up to initial attack.

#### AIR OPERATIONS:

Air operations will be impacted by the forecasted windy conditions. This is especially the case for the UAS and the VETS IR missions.

#### SAFETY

High winds will be blowing in and around the fire area. This is a watchout when working around trees, especially after they have been weakened by fire. Wear your hard hats anytime you get out of the vehicle and stay heads up.

**6. Work Assignments:**  
 TASK: Identify and mitigate roadside hazard trees. Patrol and mop up (where possible), utilize IR and UAS to cold trail and patrol the fires edge in inaccessible locations. Document and map all hand and dozer line utilizing Collector. Provide the Situation Unit with prioritization and documentation of repair needs for all roads, culverts, rolling dips, and low water crossings.  
 PURPOSE: Keep fire within existing containment lines and erosion control providing for public safety.  
 END STATE: Community and Fort Hunter Liggett protected.  
 RISK ASSESSMENT: Stay alert for drivers in the fire area and in restricted areas. Watch for snags and rollout onto roads.

**7. Special Instructions:**  
 -All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.  
 -Ambulances will be located on paved roads for patient transport only.  
 -READs and the BAER Team will check in and out with Division.  
 -Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.  
 -For Mop up and Patrol – Do not go off the road (UXO).  
 -Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.  
 -Use call outs when traveling on Nacimiento Ferguson Road.

# DOLAN FIRE SAFETY MESSAGE

INCIDENT: Dolan Fire

DATE: October 1, 2020

TIME: 0700-0700

## Major Hazards and Risks:

- **DRIVING** - Keep your speeds down. Drive like your life depends on it.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for boulders that can roll out.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure LCES. Heat and Wind are here.
- **DEHYDRATION** – Fill up early and often.
- **FATIGUE** – Look for signs of fatigue and mitigate them.
- **WORKING UNDER HELICOPTERS** – Stay engaged if helicopters are in the area.
- **SNAGS AND FIRE WEAKENED TREES** – Look up and live.
- **COVID IS A RISK** – Use COVID precautions.
- **POSION OAK** – Avoid, Avoid, Avoid.
- **ASH PITS** – Watch out for ash pits while in mop up phase.
- **UNEXPLODED ORDINENCE** – Stay on road system while on Fort Hunter Liggett. Don't touch.

**Narrative:** As this fire starts to wind down, people are timing out and demobing. People are heading home and some are going to new fires. It is so important that before driving home people rest up and get a good night's sleep. Fatigue is vicious, spiteful, malicious, brutal, venomous, nasty and cruel. Make sure you make it home, if sleepy, pull over and take a short nap. Your family wants you home.

## **Demob...before you hit the road... Check this out...**

- Walk around the vehicle.
- Check the windshield, wipers, and wiper fluid level.
- Keep windows, mirrors, and lights clean to better see and be seen.
- Check headlights, turn signals, tail lights, reflectors and running lights.
- Adjust mirrors.
- Check front and back tires (including wheels and lug nuts).
- Under the hood, check all fluid levels and especially the Air Filter.
- Drivers to be rested up prior to driving.
- All personnel should get their temperature taken prior to leaving for home (B Covid free).

## **Things that bite**

### **Rattle Snakes:**

This picture was taken on Division W on September 26 by Safety Officer Dunn.

### **Ticks:**

Yes, there are ticks in the area. A person staying at Pacific Valley Spike told the safety officer that he checked for ticks and he had "3" on him. If you get that weird – "something is crawling on me" feeling, check yourself out.

### Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications / dispatch.

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)**

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea

*\* Take temperature with no-touch thermometer, if available \**

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
