## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 42</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Dolan</b>	<b>OPERATIONAL PERIOD: October 2, 2020</b>
<b>DATE ISSUED: October 1, 2020</b>	<b>TIME ISSUED: 1900 hours</b>
<b>UNIT: CA-LPF</b>	<b>SIGNED:</b> 
<b>Typed/printed: Nic Elmquist, FBAN</b>	

### Weather Summary

\*\*Please see attached Fire Weather Forecast\*\*

### RED FLAG WARNING IN EFFECT

High Temps: 95<sup>o</sup>-104<sup>o</sup> (inland), 66<sup>o</sup>-70<sup>o</sup> (coast)                      Min RH's: 10-16% (inland), 45-50%(coast)  
Winds: Terrain driven 2-4 mph becoming upvalley 5-7 mph by 1200. Gust to 30 mph along ridges.

### FIRE BEHAVIOR

#### GENERAL:

Red flag conditions are forecasted to persist over the fire area again today. The fire has been tested over the last several days with hot, dry, and breezy conditions and has held within its perimeter. There is potential for the winds to be a tick stronger today out of the north. Do not get complacent. We predict all local thresholds identified below to be met today. Aggressively suppress any heat which could threaten the control lines.

An analysis was completed with the following chances of a season slowing event by date:  
October 12<sup>th</sup> – 25%, October 20<sup>th</sup> – 50%, November 3<sup>rd</sup> – 75%, November 18<sup>th</sup> – 90%

Probability of ignition peak burn period (1200-1600): 90-100%                      Burning Index: Yesterday: 181, Today: 189

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

All Divisions: Another day of vigilance is required. Smoldering heavies will continue to persist in the usual spots, up in Limekiln and Mill creeks and in dozer berms along the fires edge. Coordinate with UR31 and VETS to identify the remaining hotspots. A fire of this size will continue to show heat until there is a significant weather change. The main threat seems to be around DP-58 in Div. W with the continued threat of strong northerly winds and the small flare up which occurred yesterday.

Initial Attack: A Red Flag Warning for critical fire weather will remain over a large portion of the Los Padres NF today. There continues to be a high likelihood of new fires. Be prepared to shift from mop-up to initial attack.

#### AIR OPERATIONS:

Periods of high winds are still in the forecast. Air operations may be interrupted over the highest elevations.

#### SAFETY

We are on the 3<sup>rd</sup> day of excessively hot temperatures. Encourage your crews to keep up with hydration.

# DOLAN FIRE SAFETY MESSAGE

"Accidents hurt, safety doesn't." Anonymous

INCIDENT: Dolan Fire

DATE: October 2, 2020

TIME: 0700-0700

## Major Hazards and Risks:

- **DRIVING** - Keep your speeds down.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for rocks that can roll out on the road.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure **LCES**. Heat and Wind are here.
- **DEHYDRATION** – Fill up early and often.
- **FATIGUE** – Look for signs of fatigue and mitigate them. Watch each other.
- **WORKING UNDER HELICOPTERS** – Stay engaged if helicopters are in the area.
- **SNAGS AND FIRE WEAKENED TREES** – More will come down with higher wind speeds.
- **POSION OAK** – Avoid it, shower, and launder clothing.
- **ASH PITS** – Watch out for ash pits while in mop up phase.
- **UNEXPLODED ORDINENCE** – Stay on road system while on Fort Hunter Liggett. IF UXO are found, get back, flag off area, take Lat/Lon and forward that to Division.

**Narrative:** Another RED FLAG warning for today; for OPERATIONS it means potential for the fire to stand up or new starts and working in extremely hot weather. The hot temperatures and low RHs mean greater potential for heat illness, dehydration, heat stress and possible Rabdo. Take a safety pause when needed for your crew in the heat of the day if possible. Do everything you can to keep people healthy today. With the higher winds today, more snags may fall. Be heads up working around fire damaged trees. For all SUPPORT PERSONNEL it also means to take precautions for the high temps and low RH and to stay hydrated all day.

### Driving and Fire Weakened Trees

These pictures were from a fire last year . The driver walked away with only minor injuries. Picture looks like a tree fell on his truck, but that didn't happen. Now, the rest of the story...

He had been driving on night shift in the dark when his vehicle was speared by a snag that was propped up by a guard rail. One very lucky individual wouldn't you agree?

### Hydration is Important

- You are about 60% water! The brain and heart are composed of 73% water, the lungs are about 83%, the skin is 64%, muscles and kidneys are 79%, and even your bones are 31% water.
- Your blood consists of about 55% plasma and 45% of blood cells. Of the 55% that is plasma, approximately 90% is WATER!
- Sports beverages during and after the shift can help maintain and replenish lost electrolytes as well as jump-start muscle glycogen (energy) stores to refurb for the next shift.
- When water balance is compromised, dehydration can occur. Use these symptoms to monitor yourself and a buddy:
  - Mouth feeling dry
  - Headache
  - Dizziness
  - Rapid heartbeat

Don't be that person that gets dehydrated today!

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-nCoV/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your "module of one" for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
