3. Objective(s):

STRATEGIC FRAMEWORK

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, National Scenic Byway (Highway 1), Fort Hunter Liggett improvements, and wilderness values. Apply tactics that offer the highest probability of success. Identify, develop and prepare contingency measures in a proactive fashion. Develop and maintain an accurate and timely information sharing process for high value vineyard operations.

MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and risk management.
- Manage risk to infrastructure and resource values through effective use of technology, including infrared and Unstaffed Aircraft Systems (drones) to guide aggressive mop up and control tactics.
- Minimize risk and limit exposure by following COVID-19 best management practices.
- Minimize or avoid impacts to wilderness values by applying minimum impact suppression tactics (MIST).
- Utilize incident resource advisors to minimize impacts on natural and cultural resources.
- Distribute accurate and timely fire information to cooperators, the public, and stakeholders.
- Manage resources to meet protection objectives while maintaining fiscal accountability.
- Provide for suppression repair where most advantageous with existing resources.
- Provide for effective information exchange and training in the shadowing and transfer of command to the FDNY all hazard team
- Provide for a safe, smooth and well-coordinated move of ICP from King City to Pacific Valley.

CONTROL OBJECTIVES

Minimize risk to private property, surrounding communities, and resource values by:

- Maintaining the Dolan Fire within existing perimeter

Fire Weather Forecast

SATURDAY, OCTOBER 3, 2020

FORECAST NO: 42
PREDICTION FOR: Saturday
SHIFT DATE: October 3, 2020
ISSUED: 1900 Friday, Oct 2, 2020

NAME OF FIRE:
UNIT:
Incident Meteorologist:

Dolan
USFS/LPNF
Kurt Van Speybroeck
(240) 778-5301

DISCUSSION: The hot, dry and wind pattern will continue to transition to a more onshore or zonal influence with maximum temperatures in the 90s and a deepening marine layer overnight. Minimum relative humidity values (both during peak heating and in the higher elevations overnight) will drop to around 20% with mostly clear but hazy skies. **Winds are expected to gradually decrease through sunrise and become terrain driven during the day.** Overnight relative humidity recoveries will be fair in the higher elevations with moderate to good recoveries in the lower elevations and along the coast.

TODAY:

- WEATHER: Mostly Clear.
- WIND (20 FT):

Coast:	Onshore 4-6 mph.
Inland:	NE wind 3-6 mph. Above 2000 ft N 8 - 10 mph gusting to 21 mph.
Arroyo Seco:	WSW 6-8 mph then ENE 10 mph gusting to 20 mph morning.
- MAX TEMPERATURES: Highs 62-68 near the coast. 90-97 inland and Arroyo Seco. 85-90 above 2000 feet MSL
- MIN RH: 45-50% near the coast. 15-22% inland.
- MARINE LAYER: None

SATURDAY NIGHT:

- WEATHER: Clear above 1500 feet.
- WIND (20 FT): Terrain driven 4-6 mph. Above 2000 ft wind NNE 8-13 mph gusting to 18 mph.
- MIN TEMPERATURES: 55-60 near the coast, 50-55 inland and Arroyo Seco, 65-70 above 1500 feet MSL.
- MAX RH: 70-80% near the coast and Arroyo Seco. 50-70% inland areas, 20% higher terrain.
- MARINE LAYER: 1000 FT coastal branch and Salinas Valley

SUNDAY:

- WEATHER: Mostly Clear.
- WIND (20 FT):

Coast:	Onshore 4-6 mph.
Inland:	NE wind 3-6 mph. Above 2000 ft N 6 - 10 mph gusting to 15 mph.
Arroyo Seco:	WSW 6-8 mph then ENE 10 mph gusting to 18 mph morning.
- MAX TEMPERATURES: Highs 62-68 near the coast. 90-97 inland and Arroyo Seco. 82-89 above 2000 feet MSL
- MIN RH: 45-50% near the coast. 18-25% inland.
- MARINE LAYER: None

Planning forecast: Cooler conditions are expected to return to the Salinas Valley and Dolan Fire area today and extend through next week.

- Monday...Mostly clear. Max Temp: 82 – 93 inland; cooler at coast. S wind 4 - 6 mph gusting 11 mph at ridgelines
- Tuesday...Partly cloudy. Max Temp: 80 – 88 inland; cooler at coast. S wind 4 - 6 mph gusting 10 mph at ridgelines.
- Wednesday...Partly cloudy. Max Temp: 80 – 88 inland; cooler at coast. SW wind 4 - 6 mph gusting 10 mph at ridgelines.

Weather Summary

Please see attached Fire Weather Forecast

High Temps: 90^o-97^o (inland), 62^o-68^o (coast) Min RH's: 15-22% (inland), 45-50%(coast)
Winds: N 8-10 mph, Gusts to 21 mph on upper elevations

FIRE BEHAVIOR

GENERAL:

Good work keeping the gorilla in the cage through the last several operational periods of red flag warning conditions. There will be noticeable relief over the fire area starting tomorrow. Anticipate the known problem areas to continue to poke up in the afternoons. Fire activity should be mostly smoldering snags (standing and on the ground) and logs smoldering in drainages. Live and dead fuel moistures are at critically low levels so the potential of one of the unburned islands to catch fire like we saw several days ago in Div. W still exists.

An analysis was completed with the following chances of a season slowing event by date:

October 12th – 25%, October 20th – 50%, November 3rd – 75%, November 18th – 90%

Probability of ignition peak burn period (1200-1600): 80% Burning Index: Yesterday: 204, Today: 145

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

SPECIFIC:

All Divisions: The returning marine layer should help moderate the pieces of heat crews have been working on the west side, especially on the lower elevations. This will include Limekiln Creek, Mill Creek, and along Highway 1. The active fire near Nacimiento C.G. should burn itself out in the next day. Pay particular attention to any snags along the Nacimiento Fergusson road which may still be holding fire. Continue to snag this road so it can be safely travelled.

Initial Attack: We are in peak fire season for Southern California due to the dryness of the fuels and the periodic offshore wind events. Be prepared to switch from mop-up to initial attack to support new fire.

AIR OPERATIONS:

A marine layer will start to impact the coastal areas in the morning. Hazy conditions will continue to exist in and around the fire area due to drift smoke from fires to the north. Do not make assumptions when working with aircraft. Communicate any hazards that you see in the drop area or their flight path.

SAFETY

Fire weakened trees are becoming an issue along the Nacimiento Fergusson road. Pay attention to where you are parking and working. Wear your hard hat any time you get out of your vehicle and are within the trees.

DOLAN FIRE SAFETY MESSAGE

INCIDENT: Dolan Fire

DATE: October 3,4 2020

TIME: 0700-0700

Major Hazards and Risks:

- **DRIVING** - Keep your speeds down. Drive like your life depends on it.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for boulders that can roll out.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure **LCES**. Heat and Wind are here.
- **DEHYDRATION** – Fill up early and often.
- **FATIGUE** – Look for signs of fatigue and mitigate them.
- **WORKING UNDER HELICOPTERS** – Stay engaged if helicopters are in the area.
- **SNAGS AND FIRE WEAKENED TREES** – Look up and live.
- **COVID IS A RISK** – Use COVID precautions.
- **POSION OAK** – Avoid, Avoid, Avoid.
- **ASH PITS** – Watch out for ash pits while in mop up phase.
- **UNEXPLODED ORDINENCE** – Stay on road system while on Fort Hunter Liggett.

Narrative: We are moving into a transition with the FDNY IMT. Transition periods are always a watch out. Ensure you understand the plan and all resources are on the same page. Practice “Life First” Stop, Think, Talk and then Act. There is no urgency to complete the tasks at hand and nothing out there is worth getting injured over.

Vegetation Gone

Much of the vegetation above Hwy 1 and Nacimiento Ferguson Rd has been burned away. Gravity will be doing its best to bring rocks from above down onto the road. If you see an unstable area above take a lat/long and get it to Safety. Flag the area and notify your Division and other resources.

Daniel Holmes-Arrowhead HS

On October 2, 2004 Arrowhead Hotshot Daniel Holmes was tragically killed when the top came out of a large White Fir and took his life. That was sixteen years ago on a prescribed fire. During the burn, embers get up into the top of the tree and ignited it. After initially sparing the tree the crew decides it has become a hazard and decided to drop it. Advanced fallers are called over, which Daniel was the swamper for. The area had already been plumbed with hose and now the line would be compromised. As he and others walked over to move the hose lay the top of the tree breaks off. They had not even begun their cut. Others yelled to warn them at which time they ran. Unfortunately as they ran Daniel Holmes was struck and knocked out. He never regained consciousness.

If this can happen to someone of his experience what does that mean for the rest of us. Please do not trust any trees you encounter on this incident.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

**Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

Examples of when & what to document:

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

Arrive healthy, go home healthy!

COVID-19 Response and Employee Notification

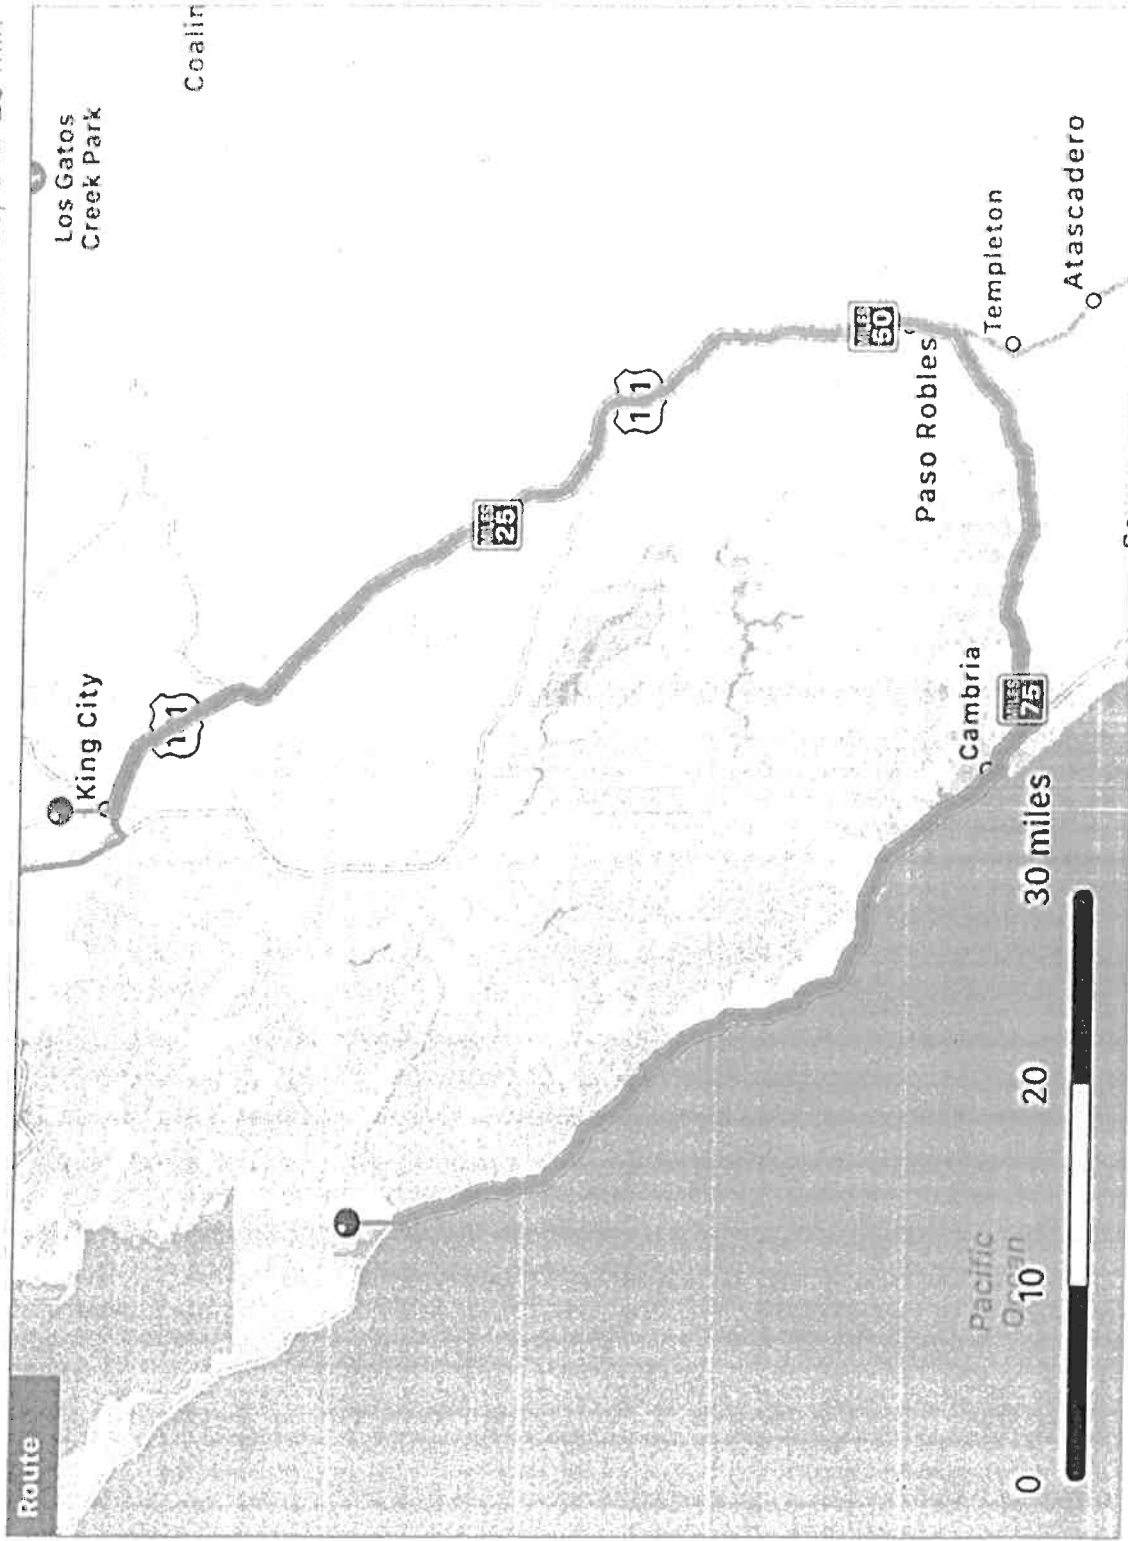

Important Notes:

- * Recovered is defined as 10 days since symptoms first appeared AND 24 hours with no fever without the use of fever-reducing medicines AND other symptoms of COVID-19 are improving.
- Symptoms of COVID-19 include cough, shortness of breath, trouble breathing, fever, chills, repeated shaking with chills, muscle or body aches, headache, sore throat, new loss of taste or smell, congestion or runny nose, nausea or vomiting, or diarrhea.
- Contact Assessment should be conducted to help determine potential exposure of additional employees; conduct assessment for the 2-day period before illness onset or test date of sick employees, whichever came first.
- Close contact is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks. Casual contact is defined as less than 6 feet for less than 15 minutes or more than 6 feet for more than 15 minutes.
- Any employee in "close contact with someone who is sick" may return to the workplace if the sick person is tested for COVID-19 and the test is negative.
- Contact with exposed individuals is classified as secondary contact and does not typically require self-isolation unless the exposed individual tests positive.
- You do not need to self-isolate unless you meet one of the criteria identified.
- Always follow the advice of a medical provider, if given, including any need for isolation or clearance for return-to-duty.
