INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Dolan Fire	2. Operational Period:	Date From: 10/5/2020	Date To: 10/6/2020
		Time From: 0700	Time To: 0700

3. Objective(s):

STRATEGIC FRAMEWORK

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, National Scenic Byway (Highway 1), Fort Hunter Liggett improvements, and wilderness values. Apply tactics that offer the highest probability of success. Identify, develop and prepare contingency measures in a proactive fashion. Develop and maintain an accurate and timely information sharing process for high value vineyard operations.

MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and risk management.
- Manage risk to infrastructure and resource values through effective use of technology, including infrared and Unstaffed Aircraft Systems (drones) to guide aggressive mop up and control tactics.
- Minimize risk and limit exposure by following COVID-19 best management practices.
- Minimize or avoid impacts to wilderness values by applying minimum impact suppression tactics (MIST).
- Utilize incident resource advisors to minimize impacts on natural and cultural resources.
- Distribute accurate and timely fire information to cooperators, the public, and stakeholders.
- Manage resources to meet protection objectives while maintaining fiscal accountability.
- Provide for suppression repair where most advantageous with existing resources.
- Provide for effective information exchange and training in the shadowing and transfer of command to the FDNY all hazard team
- Provide for a safe, smooth and well-coordinated move of ICP from King City to Pacific Valley.

CONTROL OBJECTIVES

Minimize risk to private property, surrounding communities, and resource values by:

- Maintaining the Dolan Fire within existing perimeter

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 44	TYPE OF FIRE: Wildfire

Weather Summary

****Please see attached Fire Weather Forecast****

High Temps: 88-96 (inland), 62°-68° (coast) Min RH's: 18-25% (inland), 45-50%(coast)
Winds: SW 6-8 mph, Gusts to 12 mph on upper elevations

FIRE BEHAVIOR

GENERAL:

Although it will remain dry at the upper elevations, a gradual cooling trend should be felt across the entirety of the fire. A deepening marine layer should help limit fire behavior along the coast to smoldering heavies in the drainage bottoms. The upper elevations will continue to see dry fuel conditions, although minimal fire behavior across the fire is expected. Continue to assess any smokes that show themselves and aggressively suppress any which could compromise the line.

An analysis was completed with the following chances of a season slowing event by date:
October 12th – 25%, October 20th – 50%, November 3rd – 75%, November 18th – 90%

Probability of ignition peak burn period (1200-1600): 80% Burning Index: Yesterday: 187, Today: 149

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

SPECIFIC:

All Divisions: There was little heat found across the fire perimeter during yesterday afternoon's IR flight. The major drainages off Highway 1 in Div Y/Z (Limekiln, Hare, Mill) are full of heavy fuels. The terrain makes it impossible to do much in there but pray for rain (which will come eventually). The 68,000 gal of water the helicopters put on the hot area around Bridge Dip seemed to do the trick. The fuels are very scabby in this area and the Arroyo Seco River holds a fair amount of water. Monitoring from lookouts and by air will continue to be the best strategy along this entire flank of the fire.

Initial Attack: We are in peak fire season for Southern California due to the dryness of the fuels and the periodic offshore wind events. Be prepared to switch from mop-up to initial attack to support new fire.

AIR OPERATIONS:

A deepening marine layer will impact the coastal areas early in the day. This marine layer should start to recede by late morning. However, it may come and go throughout the day impacting flights into Pacific Valley.

SAFETY

Be methodical in your actions. The fire has not seen perimeter growth since Sept. 21st. Take your time while traveling and completing your work assignment.

6. Work Assignments:

TASK: Identify and mitigate roadside hazard trees. Patrol and mop up (where possible), utilize IR to cold trail and patrol the fires edge in inaccessible locations.

PURPOSE: Keep fire within existing containment lines and erosion control providing for public safety.

END STATE: Community and Fort Hunter Liggett protected.

RISK ASSESSMENT: Stay alert for drivers in the fire area and in restricted areas. Watch for snags and rollout onto roads.

7. Special Instructions:

- All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.
- Ambulances will be located on paved roads for patient transport only.
- READS and the BAER Team will check in and out with Division.
- Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.
- For Mop up and Patrol – Do not go off the road (UXO).
- Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.
- Use call outs when traveling on Nacimiento Ferguson Road.

6. Work Assignments:

TASK: Mitigate slope to prefire drainage patterns. Minimize visual impacts to the extent feasible. Mitigate fire suppression to roads, trails and dozer lines. Work with READ's and REAF's to implement the suppression repair plan.

PURPOSE: Minimize potential for erosion and sediment delivery to water courses.

END STATE: To restore landscape back to prefire conditions as reasonably possible.

RISK ASSESSMENT: Stay alert for drivers in the fire area and in restricted areas. Watch for snags and rollout onto roads and working around heavy equipment.

7. Special Instructions:

- All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.
- Ambulances will be located on paved roads for patient transport only.
- READs and the BAER Team will check in and out with Division.
- Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.
- For Mop up and Patrol – Do not go off the road (UXO).
- Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.
- Use call outs when traveling on Nacimiento Ferguson Road.

DOLAN FIRE SAFETY MESSAGE

INCIDENT: Dolan Fire

DATE: October 5, 2020

TIME: 0700-0700

Major Hazards and Risks:

- **DRIVING** - Keep your speeds down. Drive like your life depends on it.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for boulders that can roll out.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure **LCES**. Heat and Wind are here.
- **DEHYDRATION** - Fill up early and often.
- **FATIGUE** - Look for signs of fatigue and mitigate them.
- **WORKING UNDER HELICOPTERS** - Stay engaged if helicopters are in the area.
- **SNAGS AND FIRE WEAKENED TREES** - Look up and live.
- **COVID IS A RISK** - Use COVID precautions.
- **POSION OAK** - Avoid, Avoid, Avoid.
- **ASH PITS** - Watch out for ash pits while in mop up phase.
- **UNEXPLODED ORDNANCE** - Stay on road system while on Fort Hunter Liggett.

Narrative: Historically transitions are a time when communication break downs occur and situational awareness is lost. As new faces begin to appear, take the time to engage in conversations that will ensure everyone understands the mission, what success looks like, the hazards specific to your area, and mitigations that are in place. Before going out on the line take a few extra minutes to make sure everyone that needs to be able to communicate can communicate.

IT'S LIKE RIDING A BIKE

Strive to make adhering to the 10's, 18's and LCES as natural as riding a bike. They should act as a filter for everything you do, think about and plan.

TRANSITION DAY

Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel.
- Lack of fire weather and behavior information, both forecast and observed.
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type, and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all Resources know who is in command

Incident Safety Officers: Rick Bertram SOF2 - Tom Zeulner SOF2

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (<i>Ex: Unconscious, Struck by Falling Tree</i>)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (<i>Ex: Trout Meadow Medical</i>)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (<i>Ex: TFLD Jones</i>)
Patient Care		Name of Care Provider (<i>Ex: EMT Smith</i>)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your "module of one" for potential contact tracing (on your 214 Unit Activity Log)

Examples of when & what to document:

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

Arrive healthy, go home healthy!
