**DISCUSSION:** Temperatures will be slightly warmer today over the fire with full sun expected most of the day. Winds will remain light and will be terrain dependent. Humidity values will fall into the upper teens to low 20's with possible rapid and brief decreases in humidity values in the afternoon. Overnight humidity recoveries will be fair to excellent with patchy low clouds and fog along the coastal zone. Multiple inversions will develop overnight with variable temperatures with changes in elevation. Expect additional warming and drying on Wednesday with light winds.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 32</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Dolan</b>	<b>OPERATIONAL PERIOD: Sept. 22, 2020 24hr</b>
<b>DATE ISSUED: 9/21/20</b>	<b>TIME ISSUED: 1930hrs</b>
<b>UNIT: CA-LPF</b>	<b>SIGNED:</b> 
	<b>Typed/printed: Alex Enna, FBAN-t</b>

### Weather Summary

Warm and dry trend continues with terrain driven winds 2-4 mph becoming 5-8 mph by 1200. Gusts to 15 mph along ridges. Wind direction highly dependent on location on fire...don't hesitate to request a spot weather forecast for your work area if needed.

### FIRE BEHAVIOR

#### GENERAL:

The fire is remaining in its footprint but the potential for continued fire growth and active fire behavior remains. 1000 hour fuel moistures continue to trend below average and, with subtle changes in wind and sun exposure, active fire behavior can be expected. Probability of ignition of 80-90% with 1/4 mile spotting distances off of ridgetops.

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph**, relative humidity <17%, temperature over 98, **10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

Branch I (Ocean Group): Minimal fire behavior but keep an eye out for fire weakened trees and rolling material on steep, recently burned slopes.

Branch IV: With areas of scattered heat and an unsecured fire edge, the potential remains for active fire behavior and spread rates of up to 80 chains/hour with wind/terrain alignment.

Branch V: Following recent firing operations, pockets of scattered heat remain adjacent to control lines. Should fire establish on the green side of the line, topography will play a big role in fire growth. Any fire outside the containment line will run uphill rapidly (up to 30 acres of growth within 15 minutes in the brush).

Branch VII: At lower elevations, high humidity values associated with the marine layer will temper burning conditions until later in the day. Above the marine layer, fuels combined with slope/wind alignment are conducive to uphill runs of up to 120 ch/h with 25' flame lengths in the brush.

Night: Humidity recoveries and effects of the marine layer vary widely across the fire area. Above the marine layer, probability of ignitions are at 40-50% with a spotting distances of 0.1 miles.

#### AIR OPERATIONS:

Highly dependent on presence of marine layer and location on fire, inversion forecasted to begin mixing out by 0900 with clear air by late morning.

#### SAFETY

As resources are moved around the fire to meet operational objectives, you may find yourself working in an unfamiliar area. Although the fire is remaining in its footprint, green interior islands continue to burn actively. Make sure you know the fuel types and burning conditions in your work area and more importantly know your ingress/egress routes before fire behavior forces you to use them.

# Human Resource Message

## What is your definition of diversity?

The fact or quality of being different?

A reality created by individuals and groups from a broad spectrum of demographic and philosophical differences?

A dimension that can be used to differentiate groups and people from one another.

Respect for and appreciation of differences in ethnicity, gender, age, national origin, disability, sexual orientation, education, and religion?

We all bring with us diverse perspectives, work experiences, life styles and cultures.

*Every person is unique and has a unique contribution to make.*

We acceptance, respect and understand that each individual is unique and we recognize our individual differences.

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1,2</sup>

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea

\* Take temperature with no-touch thermometer, if available \*

### <sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## King City Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
