3. Objective(s):

STRATEGIC FRAMEWORK

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, National Scenic Byway (Highway 1), Fort Hunter Liggett improvements, and wilderness values. Apply tactics that offer the highest probability of success. Identify, develop and prepare contingency measures in a proactive fashion. Develop and maintain an accurate and timely information sharing process for high value vineyard operations.

MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Provide opportunities for resources assigned to provide their expertise and suggestions for plan development and implementation.
- Reduce the threat to private property, residences and infrastructure through the application of effective suppression tactics.
- Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing module of one concept.
- Reduce the impacts to the Ventana Wilderness values by ensuring minimum impact suppression tactics (MIST) are applied. Utilize historic fire control lines, trails, streams, ridges and natural barriers when possible for control lines.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Distribute accurate and timely fire information to cooperators, the public, and stakeholders pertaining to fire behavior and suppression activities to enhance public awareness.
- Manage resources at a level to meet protection objectives while maintaining fiscal accountability.

CONTROL OBJECTIVES

To prevent the fire spread to private property, surrounding communities, and values at risk, Keep the fire:

- Protect the values at risk along the Highway 1 corridor.
- Keep the fire south of the Marble Peak Trail (Willow Creek) from Anderson Peak to Arroyo Seco and south of the 19S09 Road (Arroyo Seco River).
- Keep the fire west of the 19S01 Road (Vasqueros River) and the 19S08 (Reliz River) Road.
- Keep the fire North of the line from Highway 1 Prewitt Ridge to the Mckern Road, Nacimiento–Ferguson Road to Del Venturi to Milpitas Heights Road.

DISCUSSION: Temperatures will increase once again today with high pressure over the region, allowing for full sun on the fire. Patchy morning fog can be expected along the coastal branch and portions of Arroyo Seco before clearing earlier in the morning. Afternoon humidity values will range in the upper teens to the low 20's with brief and rapid drops in humidity values in the afternoon. Winds will generally be light and dependent on local terrain. Overnight humidities will remain fair to good with the lower values at the higher elevations. Temperatures on Thursday will briefly cool with slightly higher humidities.

WEDNESDAY:

- WEATHER: Patchy morning fog and clouds coastal branch, then mostly sunny. Sunny inland areas and Arroyo Seco.
- WIND (20 FT):

Coast:	Onshore 3-6 mph.
Inland:	Terrain driven 2-4 mph becoming E-NE 5-8 mph by 1200. Gust to 14 mph along ridges. Div W: W-SW 5-8 mph gust to 12 after 1400.
Arroyo Seco:	Terrain driven 2-4 mph then up-valley 5-7 mph by 1200. Gusts to 13 mph After 1400.
- MAX TEMPERATURES: Highs 64-68 near the coast. 88-96 inland and Arroyo Seco.
- MIN RH: 60-70% near the coast. 17-23% inland.
- INVERSION LIFT/MIXING HEIGHT: 0900 hrs/5000 feet MSL
- TRANSPORT WINDS: NW 5 mph
- MARINE LAYER 500 FT Coastal Branch

WEDNESDAY NIGHT:

- WEATHER: Patchy fog and low clouds coastal branch with patchy fog towards sunrise in Arroyo Seco. Mostly clear elsewhere.
- WIND (20 FT): Terrain driven 2-6 mph.
- MIN TEMPERATURES: 55-60 near the coast and Arroyo Seco. 55-65 inland and higher terrain.
- MIN RH: 70-95% near the coast and Arroyo Seco. 55-65% lower inland areas and 35-45% higher terrain.
- INVERSION: 2500 feet MSL / Strong
- TRANSPORT WINDS: N 6 mph
- MARINE LAYER 1000 FT

THURSDAY:

- WEATHER: Morning fog and clouds coastal branch and Arroyo Seco, then mostly sunny. Sunny inland areas.
- WIND (20 FT):

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 33	TYPE OF FIRE: Wildfire

Weather Summary

Please see attached Fire Weather Forecast

High Temps: 88^o-96^o (inland), 64^o-68^o (coast) Min RH's: 17-23% (inland), 60-70%(coast)
Winds: Terrain driven 2-4 mph becoming E-NE 5-8 mph by 1200. Gust to 14 mph along ridges.

FIRE BEHAVIOR

GENERAL:

The Monterey R.D. is notorious for its extremely complex fire environment. Thick vegetation, steep slopes (90%+ in some places), and multiple micro-climates all add to this complexity. Although the fire has been sitting in the current footprint for several days, it is forecasted to be tested this weekend with triple degree temperature. Take advantage of the time before this heat wave to secure areas holding heat that can be accessed safely.

Probability of ignition of 80-90%; Burning Index of 120

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph**, relative humidity <17%, temperature over 98, **10-Hour Fuel Moisture less than 6.**

SPECIFIC:

Branch I (Ocean Group): Minimal fire behavior is expected. Pay particular attention to heavier fuels in the drainages and around structures. Expect more people in and around the area with Highway 1 being open to the public.

Branch IV: This area of the fire has the most potential. There continues to be signs of heat on the north side of Junipero Serra Peak. The thicker fuels in the drainages off the peak can hold heat for quite some time. Work this area with helicopters early and often and seek other options to limit the potential of issues when the weather turns less favorable this coming weekend.

Branch V: The potential for movement out of its current perimeter in this branch decreases each burn period. Continue to aggressively secure the edge in front of the coming heat wave.

Branch VII: Pay attention to the areas in and around the structures within Mill Creek and Lime Kiln State Park. Be heads up and mitigate the potential for roll-out on the steep slopes.

AIR OPERATIONS:

Outside the immediate coastline, there should be clear air for aviation operations if/when they are needed.

SAFETY

No one understands this complex fire environment better than those who have had boots on the ground. As a new team transitions into command, help with their situational awareness by communicating the main drivers of fire growth and any potential problem areas.

6. Work Assignments:
 TASK: Hold and Improve primary line; Establish trigger points for firing operations and secure firing north and east of Del Venturi. Fire and secure control line from McKern Ridge to Nacimiento Road.
 PURPOSE: Keep fire out of AV Ranch, Fort Hunter Liggett and prevent further spread south.
 END STATE: Community and Fort Hunter Liggett protected.
 RISK ASSESSMENT: LCES in area of uncontrolled fire line with the potential for fire growth. Be alert for public traffic. Stay on roads when operating in Fort Hunter Liggett due to UXO.

7. Special Instructions:
 All medical resource MUST check in with Dolan Communications once in place on their assigned divisions. Ambulances will be located on paved roads for patient transport only. READs will check in and out with Division. Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. For Mop up and Patrol – Do not go off the road (UXO)

DOLAN FIRE SAFETY MESSAGE

"At the end of the day, the goals are simple: Safety and Security" – Jodi Rell

INCIDENT: Dolan Fire

DATE: September 23, 2020 TIME: 0700-0700

Major Hazards and Risks:

- **DRIVING** - Keep your speeds down. Be alert for increased public in fire area.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for boulders that can roll out.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure **LCES**.
- **DEHYDRATION** - Ensure you and your personnel are staying hydrated. Fill up early.
- **FATIGUE** – Watch your people today, look for signs of fatigue and mitigate them.
- **WORKING UNDER HELICOPTERS** – Less bucket work today, stay engaged if in the area.
- **SNAGS AND FIRE WEAKENED TREES** – Survey your work area, look up and live.
- **COVID IS A RISK** – Use COVID precautions and mitigations (masks/distancing).
- **POSION OAK** – Avoid, Avoid, Avoid... Launder clothing and shower frequently.
- **ASH PITS** – Watch out for ash pits while in mop up phase.

Narrative: Transition is the word of the day. CA-Interagency Incident Management Team 15 came in to relieve Pacific Northwest Team 2 starting September 22, 2020 at 1800 hours. Pay close attention to Leader's Intent and know who your new boss is and how to communicate with him or her. The new team would like your input on the piece of ground you have been working on...so talk to your new Division.

EXPECTATIONS

- Every person working the incident gets briefed.
- Every person will know who they are working for.
- Every person will work in a safe manner.
- Every person will be respectful of others.
- Every person will follow the COVID protocols.
- Every person will report illness and/or injuries.
- Every person will drive as if your life depends on it.
- Every person will wear a seatbelt while in a vehicle.
- Every person will go home healthy!

WHERE TO FIND ASH PITS

- Extensive root systems of trees and shrubs.
- Deep duff or peat, the organic layer covering mineral soil.
- Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards, or decking areas.
- Small rodent holes that have become filled with decadent, combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
- White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
- With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground.
- Ash pits often give off the smell of incomplete combustion or of creosote burning.

We already had one burn injury on this fire due to someone on mop up who stepped in an Ash Pit.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
2. **INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

COVID-19 OPERATIONAL FLOWCHART

PERSONNEL SHALL BE SCREENED FOR S&S OF COVID-19 AT CHECK-IN.

COVID-19 Response and Employee Notification

Important Notes:

- * Recovered is defined as 10 days since symptoms first appeared AND 24 hours with no fever without the use of fever-reducing medicines AND other symptoms of COVID-19 are improving.
- Symptoms of COVID-19 include cough, shortness of breath, trouble breathing, fever, chills, repeated shaking with chills, muscle or body aches, headache, sore throat, new loss of taste or smell, congestion or runny nose, nausea or vomiting, or diarrhea.
- Contact Assessment should be conducted to help determine potential exposure of additional employees; conduct assessment for the 2-day period before illness onset or test date of sick employees, whichever came first.
- Close contact is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks. Casual contact is defined as less than 6 feet for less than 15 minutes or more than 6 feet for more than 15 minutes.
- Any employee in "close contact with someone who is sick" may return to the workplace if the sick person is tested for COVID-19 and the test is negative.
- Contact with exposed individuals is classified as secondary contact and does not typically require self-isolation unless the exposed individual tests positive.
- You do not need to self-isolate unless you meet one of the criteria identified.
- Always follow the advice of a medical provider, if given, including any need for isolation or clearance for return-to-duty.

This document is subject to change based on CDC guidance.

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

**Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your "module of one" for potential contact tracing (on your 214 Unit Activity Log)

Examples of when & what to document:

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes or greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

Arrive healthy, go home healthy!
