MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and risk management.
- Reduce the threat to private property, residences, and infrastructure through effective suppression tactics.
- Minimize risk and limit exposure to COVID-19 by following best management practices.
- Reduce the impacts to Wilderness values by applying minimum impact suppression tactics (MIST).
- Coordinate with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Distribute accurate and timely fire information to cooperators, the public, and stakeholders.
- Manage resources to meet protection objectives while maintaining fiscal accountability.

CONTROL OBJECTIVES

Minimize risk to private property, surrounding communities, and resource values by:

- Maintaining the fire within the existing perimeter along the Highway 1 corridor;
- Keeping the fire south of the Marble Peak Trail (Willow Creek) from Anderson Peak to Arroyo Seco and south of the 19S09 Road (Arroyo Seco River);
- Keeping the fire west of the 19S01 Road (Vasqueros River) and the 19S08 (Reliz River) Road; and

## Weather Summary

**\*\*Please see attached Fire Weather Forecast\*\***

High Temps: 85<sup>o</sup>-90<sup>o</sup> (inland), 62<sup>o</sup>-67<sup>o</sup> (coast)                      Min RH's: 17-23% (inland), 60-70%(coast)  
Winds: Terrain driven 2-4 mph becoming E-NE 4-8 mph by 1200. Gust to 17 mph along ridges.

## FIRE BEHAVIOR

### GENERAL:

The Dolan fire footprint covers a large area with complex topography, varying vegetation types (all critically dry) and numerous local weather factors influencing fire behavior. Today is the last day of moderated weather conditions before winds increase on Saturday and a substantial increase in temperature occurs Sunday-Monday. Keep up the good work staying vigilant on the potential problem areas and mitigating any threats to the line.

Probability of ignition during peak burn period (1200-1600): 80-90%; Burning Index: 118

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph**, relative humidity <17%, temperature over 98, **10-Hour Fuel Moisture less than 6.**

### SPECIFIC:

Branch I: There may be a slight marine layer along the immediate coast in the morning. Continue to focus your efforts on securing any unburned islands near the infrastructure at the Hermitage, Mill Creek, Limekiln State Park, and Pacific Valley. Pay attention to the wind direction that will be stronger and from a more northerly direction in the coming days.

Branch IV: The forecasted gustier northerly winds will be unfavorable for the southern flank, especially near DP-67 and DP-69 in Div. W. Air operations is working on getting a UAS with IR capability that will help identify areas with the most potential. Continue your "seek and destroy" missions to secure the perimeter and aggressively suppress any threats to the line. There are limited operational options to the south of the current perimeter.

### AIR OPERATIONS:

There is a higher chance of the marine layer impacting the coastal region tomorrow. If this occurs, it will only be at the lowest elevations and will not impact overall air operations.

### SAFETY

As the days become more routine, pay attention to the details to reduce complacency. We appreciate the weather observations as it helps increase everyone's situational awareness.

**\*\*Please continue calling in your weather observations.**

# DOLAN FIRE SAFETY MESSAGE

INCIDENT: **Dolan Fire**

DATE: September 25, 2020

TIME: 0700-0700

**Narrative:** On September 8<sup>th</sup> and 9<sup>th</sup> the Dolan fire made runs of over 30,000 acres. The environmental conditions during this event were not very different from where they will be this weekend. Temps in the high 90s to over 100 degrees. Relative humidity in the mid -teens, moderate wind out of the north and poor overnight recovery. There has been no significant wetting event since the fire started. Therefore the fuels have continued to be dry. There is a lot of uncontained line and unburned islands of fuel within the fire perimeter. Some relatively close to containment lines. Several "watch out" situations exist on the Dolan Fire. Be aware of the hazards in your specific area. How many Fire Orders and Watch Out situations apply to you today from one moment to the next? Be engaged in your own safety so you can go home happy and healthy.

## HAZARD TREE SAFETY

### Hazard Tree Indicators:

- ✓ Trees that have burned
- ✓ Shallow tree root systems
- ✓ Dead & broken top trees
- ✓ Leaning or hung up trees

## STANDARD FIREFIGHTING ORDERS

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.
4. Identify escape routes and safety zones, and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and be sure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

## WATCH OUT SITUATIONS

1. Fire not scouted and sized up.
2. In country not seen in daylight.
3. Safety zones and escape routes not identified.
4. Unfamiliar with weather and local factors influencing fire behavior.
5. Uninformed on strategy, tactics, and hazards.
6. Instructions and assignments not clear.
7. No communication link with crewmembers or supervisor.
8. Constructing line without safe anchor point.
9. Building fireline downhill with fire below.
10. Attempting frontal assault on fire.
11. Unburned fuel between you and fire.
12. Cannot see main fire; not in contact with someone who can.
13. On a hillside where rolling material can ignite fuel below.
14. Weather becoming hotter and drier.
15. Wind increases and/or changes direction.
16. Getting frequent spot fires across line.
17. Terrain and fuels make escape to safety zones difficult.
18. Taking a nap near fireline.

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

*Examples of when & what to document:*

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

*Arrive healthy, go home healthy!*
