FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 38	TYPE OF FIRE: Wildfire

Weather Summary

Please see attached Fire Weather Forecast

High Temps: 93^o-99^o (inland), 68^o-75^o (coast) Min RH's: 14-19% (inland), 50-60%(coast)
Winds: Terrain driven 2-4 mph becoming upvalley 5-7 mph by 1200. Gust to 20 mph along ridges.

FIRE BEHAVIOR

GENERAL:

The several new fires which started yesterday to our north showed the conditions that are present to sustain extreme fire behavior and exhibit high resistance to control. The Dolan fire has been held within its current footprint since Sept. 21st. The chance of something along the perimeter kicking up reduces each day. Continue to focus your attention on the known problem areas in your Division. If there is any holdover heat, it would most likely be within dozer berms and in the heavier fuels within the drainages.

Probability of ignition peak burn period (1200-1600): 90% Burning Index: Yesterday: 108, Today: 118

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

SPECIFIC:

All Divisions: Continue to utilize the IR data to mop-up the heat signatures that make sense to do so. Expect more smokes to pop up with the long duration heat wave and minimal overnight recovery. There will be a more southerly flow over the fire. The north flank has steep terrain which will mostly block these winds from adversely impacting the fires edge. Keep up the good work Arroyo Seco Lookout.

Initial Attack: Critical fire conditions will exist for most of the state the next several operational periods. These conditions will include minimal overnight recoveries. The new fire on the Shasta Trinity N.F. had spot fires 3+ miles ahead of itself.

AIR OPERATIONS:

There should not be any factors impacting aerial operations today.

SAFETY

There are large trees throughout the fire area, some of which may have been burning for the last several weeks. Stay particularly heads up when you are in and around the large oaks on the lower elevations and when you are on steep slopes on the upper elevations and within drainages. Even if a tree falls far within the burn, it can kick large material loose down the hill.

INCIDENT: Dolan Fire

DATE: September 28, 2020

TIME: 0700-0700

Major Hazards and Risks:

- **ACCOUNTABILITY**- Make sure everyone is informed and understands the mission and objectives for the operational period.
- **DRIVING**- Keep your speeds down. Visibility is very poor from dust on some dirt roads.
- **POSSIBLE EXTREME FIRE BEHAVIOR POTENTIAL**- All fuels are available and could burn aggressively. Ensure Lookouts, Communications, Escape Routes and Safety Zones are in place at all times and everyone understands the plan.
- **WIND AND HOT WEATHER**- Ensure you and your personnel are staying hydrated.
- **WATCH OUT**- Weather is becoming hotter and dryer.
- **FATIGUE**- Ensure crews are getting enough breaks, nutrition and rest.

Rolling Rocks - - if possible and safe to do so - move them off the road. If too big to move; get lat/lon, flag off area and tell your Division. This pic not from this fire, example of you not moving it.

Snags and Fire Weakened Trees

If found;

- flag them off
- tell your Division

Unexploded Ordnance

If found on Hunter Liggett or in the Forest, stop and get back, get a lat/lon, flag off a large perimeter and contact Dolan Communications and your Division

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location *(if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?

<i>* Take temperature with no-touch thermometer, if available *</i>

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

**Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

Examples of when & what to document:

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

Arrive healthy, go home healthy!
