Weather Summary

Please see attached Fire Weather Forecast

High Temps: 95^o-103^o (inland), 66^o-73^o (coast) Min RH's: 15-22% (inland), 45-50%(coast)
Winds: Terrain driven 2-4 mph becoming upvalley 5-7 mph by 1200. Gust to 15 mph along ridges.

FIRE BEHAVIOR

GENERAL:

The heat sources seem to be confined to ash pits, stump holes, logs in drainages, and dozer berms. With that being said, all three components of the fire behavior triangle (fuels, weather, and topography) are at critical thresholds. Our fire danger indices are at their highest levels of the past two weeks. The key will be to continue to evaluate and mop-up/secure any heat source which has potential to get outside the current perimeter.

Probability of ignition peak burn period (1200-1600): 90-100% Burning Index: Yesterday: 142, Today: 118

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

SPECIFIC:

All Divisions: The smoke that showed itself along the perimeter in Div. O yesterday is a good reminder of the "sleepers" that may exist across a 128, 417-acre fire. This is especially the case in the portions of the perimeter that cannot be accessed by humans. Keep up the good work identifying these smokes and taking appropriate action. We can expect this to continue to occur for an extended period.

Initial Attack: Critical fire conditions will exist for most of the state the next several operational periods. These conditions will include minimal overnight recoveries. New large fires are starting each day. Live ammunition operations have been known to start wildfires at Fort Hunter Liggett. Be prepared to shift from mop-up to initial attack.

AIR OPERATIONS:

Other than a marine layer directly along the coast, there should not be any factors impacting aerial operations. Although breezy in the morning, winds should decrease throughout the day making it more favorable for UAS operations and COML repeater missions.

SAFETY

The current heat wave is expected to remain over the fire area for the entire week. Slow is fast in these conditions. Take your time and stay up on your hydration.

DOLAN FIRE SAFETY MESSAGE

INCIDENT: Dolan Fire

DATE: September 29, 2020 TIME: 0700-1900

Major Hazards and Risks:

- **DRIVING** - Keep your speeds down. Drive like your life depends on it.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for boulders that can roll out.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure LCES. Heat and Wind are coming.
- **DEHYDRATION** – Fill up early and often with water. Maintain your electrolytes.
- **FATIGUE** – Look for signs of fatigue and mitigate them.
- **WORKING UNDER HELICOPTERS** – Stay engaged if helicopters are in the area.
- **SNAGS AND FIRE WEAKENED TREES** – Look up and live.
- **HAZARD TREE FELLING** - Ensure LCES, use road guards. Keep out of fall zone.
- **ASH PITS** – Watch out for ash pits while in mop up phase.
- **UNEXPLODED ORDINANCE** – Stay on road system while on Fort Hunter Liggett.
- **BLASTING OPERATIONS** – SW of H52 in upper right corner of section 19 above Nacimiento-Fergusson Rd, just east of the summit. Obey road guards, do not enter area. If involved with the Blasting Group follow the directions of the **BLASTER-IN-CHARGE**. Ensure LCES. Conduct JHA.

Narrative: Fire activity is picking up around the state due to higher than normal temperatures and wind with lower relative humidity. We must remain vigilant on the Dolan Fire to make sure we put this fire to bed. Our resources are needed elsewhere, but we need to stay here until we can absolutely be sure this fire is not going anywhere. Thanks for all your hard work you have invested into the Dolan Fire...Great job.

Fatigue Definition:

A sense of tiredness, either mental or physical, brought on by stress (lack of sleep, physical work, nutritional inadequacies, or mental stresses). Fatigue following work or sleep deprivation is a normal state and can be reversed with adequate recovery or rest.

SNAGS AND HAZARD TREES:

All trees, especially large trees are potentially dangerous.

- Trees don't tell when they are going to fall, they just do. Be heads up!
- Minimize your exposure time and resources around hazard trees.
- How many times do we have a conversation under large trees?

DEHYDRATION:

If you're thirsty, you've waited too long to drink water. You need to drink a minimum of 32 ounces of water per hour during the day shift.

FACT:

- If you lose 3% of your hydration, you will lose 20% of your energy.
- If you lose 5% of your hydration, you lose 50% and you will need to visit medical.

HYDRATE! HYDRATE! HYDRATE!

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Document all contacts with anyone other than your “module of one” for potential contact tracing (on your 214 Unit Activity Log)

Examples of when & what to document:

1. An STL is sitting in a vehicle with a Division Supervisor for 10-15 minutes or greater without wearing a face covering...Document this!
2. Someone from another work group enters your work space without a face covering for 10-15 minutes of greater...Document this!
3. Personnel from Division Alpha ties in with Division Bravo without a face covering and no proper social distancing...Document this!

Arrive healthy, go home healthy!
