## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 1	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Mountain View	<b>OPERATIONAL PERIOD:</b> November 19, 2020 Day 0700-1900 hrs.
<b>DATE ISSUED:</b> November 18	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> NV-OVD	<b>Prepared:</b> /s/ Dan Felix, FBAN

### INPUTS

**WEATHER SUMMARY:**            **\*\* See Spot Weather Forecast for discussion and specific weather. \*\***

Sunny, becoming partly cloudy

**Temp:** Highs of 44-48 degrees

**RH:** Minimum 38%

**Winds:** South winds 9-13 mph. in the morning becoming upslope 4 to 8 mph.

**GENERAL:** The fire has burnt in grass, sage, and Pinyon Juniper primarily. There are also areas of riparian vegetation that has been affected. Terrain ranges from relatively flat around 5000 ft. elevation to steep slopes up to around 8300 ft. The fire spread rapidly due to very high winds with gusts reportedly into the 80 mph. range. Seasonally dry fuels also contributed to the rapid growth. Most of the fire area received significant precipitation with snow in the higher terrain. This has arrested fire spread. Remaining fire is primarily smoldering ground fire in stump holes, heavy material, and debris piles. The is an active area in the Desert Creek area.

#### Specific:

**DIV A/M** – Most of the line in these divisions has been completed up to the snow line. Debris piles in the transfer station could still present some issues until fully extinguished.

**DIV P** - The Desert Creek area is still active in 'old growth' Pinyon/Juniper and some timber. It is in steep and rocky terrain. The activity suggests that this area may not have had as much precipitation as the rest of the fire area.

**DIV R** – Line has been completed to the snow line. Some heavy fuels are still active, but no significant spread is expected until the fuels dry out.

**DIV Z** – This area near the point of origin should be in patrol status, but any remaining hot spots need to be sought out and dealt with.

**Air Operations:** No major issues are anticipated.

### SAFETY

While no significant spread is anticipated due to recent precipitation, they may be areas that did not receive much rain that could remain active and cause some surface fire, torching and slope runs.

## **SAFETY MESSAGE**

### **Mountain View Fire**

**Rolling Material** – Expect rocks and logs to break loose and start rolling on the steeper slopes, especially in the burned over areas where the helicopters are working. Keep your head up and your ears on. In most cases you'll hear the rolling object before you see it. Know your escape route!!

**Snags** – Make sure you survey the area around you before working or taking breaks. Make all snag locations known to all and flag safety circles around high potential snags.

**Vehicle Operation** – After coming off extremely long shifts on the line ensure your drivers are in good condition to drive. Keep your speed down and your braking distance up and communicate traffic flow on narrow roads. Request relief drivers if needed. Be aware of icy conditions on the highway, and slick surfaces on dirt roads.

#### **Other Stuff to Remember:**

Keep hydrated throughout the day. Remember to drink water all day even if you don't feel thirsty. If you wait until you're thirsty you are already behind the hydration curve.

Do your best to stay warm and dry throughout the shift, this will aid in warding off colds, flues and the camp crud.

#### **Safety Thought for the Day**

Today is a transition day, get to know your new supervision on the line, ensure instructions and assignments are clear.

Have a safe day!!

Safety Officer: Chris Fogle
