Leader's Intent:
 Provide the highest level of customer service to all involved with, or impacted by the Apple Fire. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct and timely, effective communications.
- Personal safety and the safety of others, including driving slow, safe and defensively.
- Manage fatigue by taking breaks and maintaining work/ rest cycles.
- Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing Module of One Concept.

Management Objectives:

- Provide for firefighter and public safety through hazard recognition and application of the Risk Management Process.
- Provide critical infrastructure including but not limited to transmission and communication towers, water systems, natural gas, railroads and highways.
- Ensure resource allocation and mission are documented for cost apportionment.
- Minimize impact to aquatic and wildland scenic rivers by utilizing retardant avoidance.
- Reduce the impact to Sand to Snow Monument and San Gorgonio Wilderness values by utilizing Minimum Impact Suppression Tactics (MIST)
- Identify needs for and implement fire suppression damage repair work.

Control Objectives:

- Keep the fire North of the established control lines to protect the communities of Cherry Valley, Beaumont and Banning
- Keep the fire East of Oak Glen Road to protect the communities of Yucaipa, Oak Glen and Cherry Valley.

- Keep the fire West of Hwy 62 and Morongo Valley to protect the communities of Morongo Valley, Desert Hot Springs and Joshua Tree National Park.

General Situational Awareness:

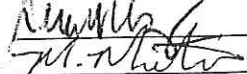

- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.
- In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.
- Enhanced hygiene (especially handwashing), PPE & monitoring practices limiting the infection rate of first responders.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Minimal forward fire progression is expected on any of the Branches. Expect mainly creeping and smoldering fire behavior. Some unburned interior islands may actively burn out with the dryer weather but they are not anticipated to be a threat to any of our lines. Fire whirls and dust devils are probable on the lower slopes, the flats and at intersecting drainages. Make sure lookouts have a good view of the fire. When the winds pick up in the morning and the sky begins to clear, expect fire activity to increase.

At night, expect the fire to remain active as the peak RH occurs in the early evening then drops again, early in the morning.

With the dry fuels, spotting will be problematic it should be short range less than 400ft and from rollout.

1000hr fuels are at 6%FM and are receptive to spots

Probability of Ignition will be 90-100%

If the fire escapes or you become involved with IA, expect Flame lengths 1-4 feet in the grass, 4-25 feet in the brush.

SPECIFIC:

Branch I: The fire is holding at the top of Yucaipa Ridge and no forward progression is expected. Any spotting would be from rollout but would back slowly into the Forest Falls drainage.

Branch III: Minimal fire progression is expected in the northeast corner. What fire there is on the Branch is in sparse fuels and shows little potential for spread during the shift. Pockets of Manzanita will readily burn and will be a source of visible smoke. Rollout will be the primary source of spotting.

Branch V: No forward fire progression is expected. If the fire becomes established on the east side of Millard Canyon expect the fire to progress to the northeast. Interior islands from the burn operation will continue to actively burn and are a potential source for spot fires.

Branch VII: No forward progression expected along the south side of the Branch.

AIR OPERATIONS: No anticipated smoke impacts to air ops.

SAFETY

Most of our fire is situated on extremely steep slopes, assess your work area for rollout potential.

Although no forward progression is expected do not become complacent there is still plenty of heat out there.

APPLE FIRE – SAFETY MESSAGE

INCIDENT: # CA-RRU-096641

DATE: 8/11-12/2020

TIME: 0700-0700

Fight Attitude

One common reason for firefighter injury in the later stages of a fire is when a firefighter acquires an attitude in response to fatigue. Being tired and having an attitude is counterproductive (e.g., it can cause a person to lose situational awareness). This in itself could be a situation that shouts, "WATCH OUT."

Mentally Engaged

Keep your mind engaged and attentive to the task at hand. Continually ask yourself if you are doing the job safely and the way you were trained. Keep an eye on your co-workers, as well. If you see them doing something unsafe, you need to say something **IMMEDIATELY** about their actions.

See Something Say Something — Communicate Safety!

- **Take Charge** of assigned resources.
- **Motivate** firefighters with a "can do safely" attitude.
- **Demonstrate Initiative** by taking action even in the absence of orders.
- **Communicate** by giving specific instructions and asking for feedback!
- **Supervise** the scene of the action.

(from "Operational Leadership" page v of the IRPG)

COMPLACENCY: Keep your mind engaged and attentive to the task; continually ask yourself doing the safely, you were Keep an your fire too. If unsafe practices, YOU are responsible to stop them.

18. TAKING A NAP NEAR THE FIRELINE

if you are job the way trained. eye on fellow firefighter you see

Situation that shouts watch out.
Taking a nap on the fire line

Spike Camp Safety Questions.

- 'Can line spike locations maintain LCES at all times?
- 'Can emergency medical technicians be on the line?
- 'Can a timely medevac plan be implemented?
- 'Can daily communications (verbal and written) be maintained?

Is this an adequate safety zone?

In remote locations, Do you know what the fire is doing around your division?
Have you identified Escapes Routes and Safety Zones?

IF NOT,

- 'Reevaluate Risk verse Gain before you engage.
- 'Do you have a solid communications plan on your division?
- 'Is your crew mentally engaged?

If your answer is no, reevaluate before engaging.
