# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> Apple	<b>2. Operational Period:</b>	Date From: 8/13/2020	Date To: 8/13/2020
		Time From: 0700	Time To: 1900

**3. Objective(s):**

**Strategic Framework:**

Implement a full suppression strategy on the Apple Fire. Values at risk include human safety, private property, critical infrastructure, associated improvements and wilderness values. Apply tactics that offer the highest probability of success.

**Leader's Intent:**

Provide the highest level of customer service to all involved with, or impacted by the Apple Fire. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct and timely, effective communications.
- Personal safety and the safety of others, including driving slow, safe and defensively.
- Manage fatigue by taking breaks and maintaining work/ rest cycles.
- Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing Module of One Concept.

**Management Objectives:**

- Provide for firefighter and public safety through hazard recognition and application of the Risk Management Process.
- Provide critical infrastructure including but not limited to transmission and communication towers, water systems, natural gas, railroads and highways.
- Ensure resource allocation and mission are documented for cost apportionment.
- Minimize impact to aquatic and wildland scenic rivers by utilizing retardant avoidance.
- Reduce the impact to Sand to Snow Monument and San Gorgonio Wilderness values by utilizing Minimum Impact Suppression Tactics (MIST)
- Identify needs for and implement fire suppression damage repair work.

**Control Objectives:**

- Keep the fire North of the established control lines to protect the communities of Cherry Valley, Beaumont and Banning
- Keep the fire East of Oak Glen Road to protect the communities of Yucaipa, Oak Glen and Cherry Valley.
- Keep the fire South of Hwy 38 to limit extension into the San Gorgonio Wilderness and to protect the communities of Mountain Home, Forest Falls and Angeles Oaks.
- Keep the fire West of Hwy 62 and Morongo Valley to protect the communities of Morongo Valley, Desert Hot Springs and Joshua Tree National Park.

**General Situational Awareness:**

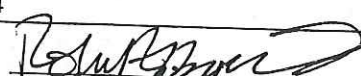

- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.
- In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.
- Enhanced hygiene (especially handwashing), PPE & monitoring practices limiting the infection rate of first responders.

## INPUTS

**WEATHER SUMMARY: Continued very warm with some clouds**  
Temps: Day Valleys 93-103 Ridges 65-75 Night Valleys 66-74 Ridges 65-77  
RH: Day 12-22% Night 30-45%  
Winds: Day Ridges SW 6-12 gusts to 15-20mph Night Ridges SW to S 5-10 gusts to 15mph

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** Minimal forward fire progression is expected on any of the Branches. Expect mainly smoldering fire behavior. Some unburned interior islands may actively burn out with the dryer weather but they are not anticipated to be a threat to any of our lines. Fire whirls and dust devils are probable on the lower slopes, the flats and at intersecting drainages. Make sure lookouts have a good view of the fire. When the winds pick up in the morning and the sky begins to clear, expect fire activity to increase.

At night, expect the fire to remain active as the peak RH occurs in the early evening then drops again, early in the morning.

With the dry fuels, spotting will be problematic it should be short range less than 400ft and from rollout.

1000hr fuels are at 6%FM and are receptive to spots

Probability of Ignition will be 90-100%

If the fire escapes or you become involved with IA, expect Flame lengths 1-4 feet in the grass, 4-25feet in the brush.

### SPECIFIC:

Branch I: The fire is holding at the top of Yucaipa Ridge and no forward progression is expected. Any spotting would be from rollout but would back slowly into the Forest Falls drainage.

Branch III: Minimal fire progression is expected in the northeast corner. What fire there is on the Branch is in sparse fuels and shows little potential for spread during the shift. Pockets of Manzanita will readily burn and will be a source of visible smoke. Rollout will be the primary source of spotting.

Branch V: No forward fire progression is expected. If the fire becomes established on the east side of Millard Canyon expect the fire to progress to the northeast. Interior islands from the burn operation will continue to actively burn and are a potential source for spot fires.

Branch VII: No forward progression expected along the south side of the Branch.

**AIR OPERATIONS:** No anticipated smoke impacts to air ops.

### SAFETY

Most of our fire is situated on extremely steep slopes, assess your work area for rollout potential.

Although no forward progression is expected do not become complacent there is still plenty of heat out there.

# HEALTH AND SAFETY MESSAGE

We Are ALL accountable for SAFE behaviors

INCIDENT: APPLE CA-RRU-096640

DATE: 08/13/2020 TIME: 0700-1900

Major Hazards and Risks: Driving, Heat Exposure/Dehydration, Coyote Ops

➤ ALL BRANCH's

1. **Driving; Our highest exposure to risk has been through driving. City streets and rural roads have many hazards from inattentive drivers to racoons dodging water tenders. SLOW DOWN and drive as if your kids are doing a ride along...**
2. **Bears, bobcats, and other critters have been sighted; Its dry out there in the woods and the local wildlife is looking for some snacks and water. Keep your SA up when you're parked having your lunch or taking that break outside of your vehicle.**
3. **☺ The heat is on ☺; Maintain your hydration, nutrition, and take breaks in the shade or air conditioning if you can. This will help with the fatigue factor.**
4. **Maintain that 6' social distancing, wearing your face covering, and utilizing proper hand washing techniques to keep that covid stuff away from you, your family, and your crew.**

➤ BRANCH I, III, V

1. **SPIKE CAMP; You're a long way from the minute clinic and the convenience store. Make sure you have what you need for the assignment. Confirm your coms and the proper frequency per the 205. Ensure EVERYONE knows the emergency evac plans and have a plan B if things go sideways.**
2. **DIRECT/INDIRECT FIRE LINE; Long days on relatively the same piece of dirt can be a drag. Keep that motivation going with proper nutrition, hydration, and breaks? SA up with reviewing your IRPG and keeping LCES as your primary risk management tool.**
3. **HELICOPTER OPS; Monitor the A/G frequencies, make sure helispot locations are identified and mapped (GPS), and ensure all passengers taking a flight are properly briefed and know emergency procedures (IRPG pgs. 45-56)**
4. **HAZARD TREES; IRPG pg. 22 has some good stuff on hazard trees. LCES is the theme when in the forest of snags. Establish trigger points when the winds are forecasted. Hazard zones are 2 ½ X the tree height.**

➤ SUPPRESSION REPAIR BRANCH

**Good communications (radio and/or hand signals) with all parties keeps the medivac ship away. Never work below heavy equipment and use spotters when backing. Maintain that 100' exclusion safety zone when working with heavy equipment and increase the size to 300' in the front and 100' to the rear of masticators and feller bunchers.**

**IF ITS PREDICTABLE, ITS PREVENTABLE**

**Lookouts, Communication, Escape Routes, Safety Zones**
