3. Objective(s): <p>Strategic Framework:</p> <p>Implement a full suppression strategy on the Apple Fire. Values at risk include human safety, private property, critical infrastructure, associated improvements and wilderness values. Apply tactics that offer the highest probability of success.</p> <p>Leader's Intent:</p> <p>Provide the highest level of customer service to all involved with, or impacted by the Apple Fire. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be prepared to take the appropriate actions regarding:</p> <ul style="list-style-type: none"> • Professional behavior, conduct and timely effective communications. • Personal safety and the safety of others, including driving slow, safe and defensively. • Manage fatigue by taking breaks and maintaining work/ rest cycles. • Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing Module of One Concept. <p>Management Objectives:</p> <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard recognition and application of the Risk Management Process. • Provide critical infrastructure including but not limited to transmission and communication towers, water systems, natural gas, railroads and highways. • Ensure resource allocation and mission are documented for cost apportionment. • Minimize impact to aquatic and wildland scenic rivers by utilizing retardant avoidance. • Reduce the impact to Sand to Snow Monument and San Geronio Wilderness values by utilizing Minimum Impact Suppression Tactics (MIST). <p>Control Objectives:</p> <ul style="list-style-type: none"> • Keep the fire North of Interstate 10 to protect the communities of Cherry Valley, Beaumont and Banning. • Keep the fire East of Oak Glen Road to protect the communities of Yucaipa, Oak Glen and Cherry Valley. • Keep the fire South of Hwy 38 to limit extension into the San Geronio Wilderness and to protect the communities of Mountain Home, Forest Falls and Angeles Oaks. • Keep the fire West of Hwy 62 to protect the communities of Desert Hot Springs and Joshua Tree National Park. <p>General Situational Awareness:</p> <ul style="list-style-type: none"> • Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees. • In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing. • Enhanced hygiene (especially handwashing), PPE & monitoring practices limiting the infection rate of first responders.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Minimal forward fire progression is expected on any of the branches. Expect active backing and flanking mainly in unburned interior islands. Fire whirls and dust devils are probable on the lower slopes, the flats and at intersecting drainages. Make sure lookouts have a good view of the fire. When the winds pick up in the morning and the sky begins to clear, expect fire activity to increase. At night, expect the fire to remain active as the peak RH occurs in the early evening then drops again, early in the morning.

With the dry fuel, spotting will be problematic it should be short range less than 400ft and from rollout.

1000hr fuels are at 6%FM and are receptive to spots

Probability of Ignition will be 80-90%

Expect Flame lengths 1-4 feet in the grass, 4-25feet in the brush.

SPECIFIC:

Branch I: The fire is holding at the top of Yucaipa Ridge and has the potential to start flanking west of Wilshire Peak. Any spotting would be from rollout but would back slowly into the Forest Falls drainage. Night crews need to continually assess down canyon winds.

Branch III: Minimal fire progression is expected in the northeast corner. What fire there is on the Branch is in sparse fuels and shows little potential for spread during the shift. Pockets of Manzanita will readily burn and will be a source of visible smoke.

Branch V: No forward fire progression is expected. If the fire becomes established on the east side of Millard Canyon expect the fire to progress to the northeast. Interior islands from the burn operation will continue to actively burn and are a potential source for spot fires.

Branch VII: No forward progression expected along the south side of the Branch.

AIR OPERATIONS: Smoke and fog will limit air operations until the inversion mixes out around 0900hrs.

SAFETY

Most of our fire is situated on extremely steep slopes; assess your work area for rollout potential.

COVID-19 SAFETY MESSAGE

Protect Your Health, Protect the Health of Others

Wear a Face covering: Masks help prevent people who have COVID-19 from spreading the virus to others. Wearing a mask will help protect people around you.

Performing hand hygiene: When soap and water are available all fire personnel should wash their hands often for at least 20 seconds, especially after coughing or sneezing.

Following respiratory hygiene/cough etiquette principles: Cover your cough, wash your hands.

Keeping hands away from face: Fire personnel should practice not touching their eyes, nose, or mouth. While it may seem simple, germs often spread this way.

Cleaning and disinfecting the environment appropriately: Clean all high touch surfaces such as radios and door knobs with disinfectant.

HEALTH AND SAFETY MESSAGE

We Are ALL accountable for SAFE behaviors

INCIDENT: APPLE CA-RRU-096640

DATE: 08/08/2020 TIME: 0700-0700

Major Hazards and Risks: DRIVING, FIRING OPERATIONS, SPIKE CAMP

- **DRIVING:** Headlights on, slow down, do that safety circle/dance prior to moving
- **FIRING OPERATIONS:** Have a plan (GO/NO GO), starting and stopping point well communicated, have enough holding resources in place prior to dropping fire. LCES IS PARAMOUNT FOR A SUCCESSFUL BURN SHOW.
- **SPIKE CAMP:** Anything that can go wrong will be much more demanding/intense when you are spiked out. Understand the medical and extraction plan. Proper hygiene and hand washing will limit the camp crud and potential covid issues.
- **COMMUNICATION:** Ensure that your radios are cloned to the current load. Verify your Division 204 communications plan matches the 205
- **HEAVY EQUIPMENT:** Operators have limited vision. Have proper communications or use hand signals. Work outside of the 100" safety circle and never work below heavy equipment.
- **HAZARD TREES:** Hazard tree safety guidelines on page 22 in the IRPG, post lookouts or use a spotter in mop-up area with personnel. Establish trigger points when winds increase.
- **FATIGUE:** Many of us have been going from fire to fire without much rest. This fatigue will cause poor judgement and decreased work performance, affecting safety of yourself and your crew. Take frequent breaks and rest when you can. Also drink plenty of fluids to avoid dehydration.

Lookouts, **C**ommunication, **E**scape routes, **S**afety zones

INCIDENT MESSAGES

TRAINING SPECIALIST

An Incident Training Specialist is assigned and will be performing the duties "virtually".

To assure proper documentation for your assignment:

- 1) Scan Incident QR Code (On IAP and posted around camp).
- 2) Go to Training Folder.
- 3) Complete Trainee Registration Form.

At the end of your assignment:

- 1) Trainee: Complete the exit interview found in the Training Folder. Use QR code to access document.
- 2) Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3) Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's signed by both the Trainer and Trainee. Take a picture of the ICS 225 and send it to imt2training@gmail.com.

The Training Specialist will send the training documents to the email address you provided.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>
