

INCIDENT ACTION PLAN

CREEK FIRE

CA-SNF-001391

P5 NJ3F (0515)

Tuesday

OPERATIONAL PERIOD

11/17/2020 0700

to

11/17/2020 1900

Fire Information: (559) 549-3781

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Creek Fire</p>	2. Operational Period:	Date From: 11/17/2020	Date To: 11/17/2020	
		Time From: 0700	Time To: 1900	

3. Objective(s):

Management Objectives

- Provide for the safety of incident responders and the public through the application of sound risk management and the implementation of tactics that have a high probability of success with the least amount of exposure including mitigations for COVID-19.
- Protect critical infrastructure, commercial timber, and natural and cultural resources by proactively engaging agencies and incident resource advisors.
- Maintain and enhance a long term strategic plan by identifying and implementing suppression options considering probability of success, firefighter exposure, risk mitigation, seasonality, and resource prioritization and allocation.
- Develop and implement a long-term repair strategy in a coordinated and systematic manner considering repair priorities, seasonal access, and equipment and personnel availability. Repair area impacted by fire suppression activities to minimize potential for excessive erosion, reduce visual impacts, and protect natural and cultural resources from further damage.
- Build and maintain positive relationships between assigned resources, cooperators, stakeholders, and affected communities through professional engagement.
- Follow CDC, local, state, and federal COVID-19 mitigation guidance and protocols to reduce exposure and protect firefighters and the public from the virus spread.
- Ensure financial and documentation packages are prepared in accordance with agency requirements and agreements are closed out when no longer necessary.

General Situational Awareness:

- Resources should take advantage of improving road conditions to access work areas.
- In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.
- Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

Creek Fire Weather Forecast and Outlook

PREDICTION FOR: 0600 Tue to 0600 Wed
SHIFT DATE: 11/17/20
TIME/DATE FORECAST ISSUED: 1700 11/16/20

UNIT: CA-SNF-001391

.Discussion...

Temperatures will continue to trend up while relative humidities will trend down through Tuesday. A cold front will move through the Central California interior Tuesday night through Wednesday. Rain and higher elevation snow will be likely, primarily from Tulare county north into Yosemite. Temperatures will continue to trend lower through the end of the week.

Detailed forecast for North Kings River

Tuesday

Mostly cloudy. A 20 percent chance of showers in the afternoon. Windy. Highs 57 to 63 at 5000 feet...47 to 53 at 8000 feet. Southwest winds gusting to 35 mph over fire area, decreasing on the western side around 1000.

Tuesday Night

Mostly cloudy. Slight chance of showers in the evening, then chance of showers after midnight. Breezy, colder. Winds gusting to 35 mph. Snow level 6500 feet. Lows 36 to 45 at 5000 feet...28 to 34 at 8000 feet.

Wednesday

Snow showers likely. Chance of precipitation 70 percent. Snow accumulation up to 3 inches. Snow level above 8000 feet. Highs 45 to 51 at 5000 feet...36 to 44 at 8000 feet.

INCIDENT RISK ANALYSIS (ICS 215A) Creek Fire 11/17/2020 Day Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	Hazard Trees/ High Tree Mortality	<ul style="list-style-type: none"> • Large amount of tree mortality (>50%). • Follow "Hazard Tree Safety" guidelines, IRPG pgs. 22- 23. • Post lookouts, road guards, spotters in areas where mop up/felling is happening. • Establish trigger points for disengagement during high wind events. • Limit exposure to work area as much as possible.
ALL	Driving	<ul style="list-style-type: none"> • Long drive to work areas. • Practice Defensive Driving Techniques. • Snow and black ice possible. • Use spotters when backing. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits.
ALL	Weather	<ul style="list-style-type: none"> • Pay attention to predicted forecast • Take frequent weather observations • High winds expected • Establish "trigger points "to withdraw and ensure all know a rally point
ALL	Fatigue/ Complacency	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor resources for level of fatigue. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • <u>Situational awareness must be maintained for the duration of the incident.</u>
ALL	Rough and Narrow Roads	<ul style="list-style-type: none"> • Narrow, steep, unforgiving native surfaced roads within the fire area. • Roads not maintained regularly, muddy, look for holes, dips and road sluff offs. • One-way roads. Scout for access and egress. • Have a plan for if you have traffic coming towards you.
ALL	Heavy Equipment Operations- Dozers/ Masticators/ Excavators/Feller Buncher	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' at a minimum exclusion area around equipment. • Use a spotter when backing.
ALL	Chipping Operations	<ul style="list-style-type: none"> • Ensure JHA is reviewed and signed by all personnel involved in chipping operations. • Only qualified personnel will feed the chipper. • Ensure appropriate PPE is used. • Do not walk in front of chipper discharge.
ALL	ATV/UTV Use	<ul style="list-style-type: none"> • Ensure equipment is inspected and safe to use. • Ensure operator is trained and certified to operate. • Ensure operator has proper PPE according to the redbook/RMA.
ALL	Steep Terrain	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	Air Operations	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 46, IRPG. • Don't plan on air resources for medical transport or resupply. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	Communications	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) with incoming resources. • Answer questions when asked by others. Ask for intel if and when you don't know. • Ensure all personnel are familiar with the incident and IA communications plans.
ALL	COVID	<ul style="list-style-type: none"> • Maintain 6' foot distance whenever possible. • Utilize masks, frequent handwashing/sanitizing, disinfect common surfaces. • Follow County Public Health guidelines. Monitor for symptoms. • Notify COVID coordinator if any symptoms arise.
ALL	Public in area	<ul style="list-style-type: none"> • Hunting season. Be aware of public in fire area. • Educate and advise public of fire area closure. • Use chain of command to request Law Enforcement if needed.

CREEK FIRE

Operation Period: 11/17/2020 Day Shift

SAFETY MESSAGE

YOUR SAFETY IS DEPENDENT UPON YOUR ABILITY TO:

- **FORECAST** the future and how it will affect your safety.
- **PREDICT** how the weather could influence your plan of operations.
- **ANTICIPATE** problems and needs, finding solutions in advance.
- **RECOGNIZE** hazards and minimize risk exposure.

Please try and operate in a proactive mode, not a reactionary mode!

MAJOR HAZARDS AND RISKS

DRIVING ROAD CONDITIONS FATIGUE	HAZARD TREES PUBLIC IN FIRE AREA COVID	HEAVY EQUIPMENT CHIPPING OPERATIONS COMPLACENCY
---	---	---

Be sure all elements of your safety plan are in place prior to engagement

Working with Heavy Equipment

- When working around heavy equipment stay at least 100 ft. in front and 50 ft. behind the equipment. In timber, distances should be 2 ½ times the canopy height.
- Never approach equipment until you have eye contact with the operator, all implements have been lowered to the ground, and equipment is idled down.
- Establish visual and radio communications methods prior to engaging.
- Communicate all hazards to the operator.
- Equipment operators have difficulty seeing ground personnel; take responsibility for your own safety and all those around you.

Steps To Protect Yourself From Illnesses

- Wash your hands often
- Avoid touching your eyes, nose, or mouth, germs spread this way
- Try to avoid close contact with sick people
- Practice good health habits. Get plenty of sleep drink plenty of fluids, and eat healthy food
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
- If you are sick with flu-like illness, separate that person from the rest of your crew and others, seek treatment at the medical unit.

CIIMT 10 Safety Officers: Frank Pingiczer, Robert Hilfer(t)

IMT COVID-19 INTENT for the Creek Fire

If you are feeling COVID like symptoms, first call COVID Coordinator

925-532-5564

All wildland firefighters must take COVID-19 messaging seriously and demonstrate consistent, preventative measures known to be effective in limiting viral spread. California Team 10 is reminding firefighters to apply the core values of wildland fire management community of “Duty, Respect, and Integrity” and apply these values to the COVID mitigation requirements:

- **Duty:** To provide a workforce safe from known hazards such as disease transmission, and keep us, our fellow firefighters, and the public safe, on and off the clock.
- **Respect:** To demonstrate respect to oneself and to each other by taking routine precautions as guided, such as wearing a mask and social distancing.
- **Integrity:** To do the right thing when at home, while travelling, or on assignment. Undertake the precautions to keep ourselves and the rest of the workforce healthy and able to respond, then we are not the source of an outbreak within the public we are assigned to protect.

Concept of “Module as One:”

Team members, crews, and other resources should use a “Module as One” approach to insulate as one unit and reduce exposure to the public and other crews. If each member within a unit is monitored, screened, and healthy, then proximity, when necessary, is not an issue.

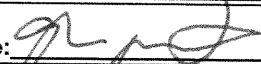

By insulating as a unit, crews and modules can limit outside viral exposure and may safely complete operational tasks in closer proximity, and ride in vehicles without face coverings when working within their “**Module as One**” concept:

- As often as practical, the same team members should travel in the same vehicle, work together in the same space, and ensure module members are conscientious regarding mitigations.
- Identify select individuals on a crew or module that will interact with the public, ensuring this person relies on social distancing, wears a cloth face covering, and practices hand hygiene during or after every interaction.
- When the “Module as One” has been established, minimize contact with public and outside community. This is to protect every crew member, their family, and the community we serve.

Essential Mitigations:

- **Pre-Screening and Regular Monitoring:** Individuals should measure temperature and assess symptoms each day prior to starting work. Ideally, temperature checks should happen before the individual enters the facility or interacts with others on staff or the crew.
- **Social/Physical Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- **Wearing a Mask:** Employees should always wear a facemask or face covering when social distancing cannot be maintained. When facemasks cannot be worn during arduous work tasks, social distancing practices should be implemented.
- **Disinfect and Clean:** Clean and disinfect all areas, particularly “high touch surfaces” such as engine compartments, bathrooms, common areas and shared electronic equipment routinely.
- **Empower** all individuals to ask co-workers to follow social distancing guidelines.

Creek Fire

Incident Training Program

Today, Tuesday, 11-17 is the last day to register a training assignment under the Type 2 complexity on the Creek Fire.

Evaluations and electronic Final Interview forms, must be completed and submitted to the TNSP by Wednesday, 11-18. Date your Close-Out Documents to coincide with your projected demob date.

Trainees needing to register their assignment, scan the QR Code or click on the link below to access and complete the Trainee Registration Form. Once registered, you and your trainer will receive electronic evaluation forms and a link for your Final Interview by email and text.

For training related questions, call Brad Smith (TNSP) at 209-770-4809 or email bradley_smith@firenet.gov

Nonverbal Cues

- **Talking and listening is only part of communication. Nonverbal cues play a big role in effective communication.**

Facial expressions. The human face is extremely expressive, able to convey countless emotions without saying a word. And unlike some forms of nonverbal communication, facial expressions are universal. The facial expressions for happiness, sadness, anger, surprise, fear, and disgust are the same across cultures.

Body movement and posture. Consider how your perceptions of people are affected by the way they sit, walk, stand, or hold their head. The way you move and carry yourself communicates a wealth of information to the world. This type of nonverbal communication includes your posture, bearing, stance, and the subtle movements you make.

Gestures. Gestures are woven into the fabric of our daily lives. You may wave, point, beckon, or use your hands when arguing or speaking animatedly, often expressing yourself with gestures without thinking. However, the meaning of some gestures can be very different across cultures. While the “OK” sign made with the hand, for example, usually conveys a positive message in English-speaking countries, it’s considered offensive in countries such as Germany, Russia, and Brazil.

Eye contact. Since the visual sense is dominant for most people, eye contact is an especially important type of nonverbal communication. The way you look at someone can communicate many things, including interest, affection, hostility, or attraction. Eye contact is also important in maintaining the flow of conversation and for gauging the other person’s interest and response.

Touch. We communicate a great deal through touch. Think about the very different messages given by a weak handshake, a warm bear hug, a patronizing pat on the head, or a controlling grip on the arm, for example.

Space. Have you ever felt uncomfortable during a conversation because the other person was standing too close and invading your space? We all have a need for physical space, although that need differs depending on the culture, the situation, and the closeness of the relationship.

Voice. It’s not just what you say, it’s *how* you say it. When you speak, other people “read” your voice in addition to listening to your words. Things they pay attention to include your timing and pace, how loud you speak, your tone and inflection, and sounds that convey understanding, such as “ahh” and “uh-huh.” Think about how your tone of voice can indicate sarcasm, anger, affection, or confidence.

Janine Summy, Human Resource Specialist, (509)429-1206

Eric Bracken, HRSP (trainee), 509-207-0677

FINANCE MESSAGE

All incident personnel (crews, engines, overhead and contractor resources) need to turn in daily CTRs and Shift Tickets either electronically or via hardcopy.

ELECTRONICALLY: Email to 2020.creek.finance@firenet.gov

In the email subject line, please put resource order number, your company/engine name, followed by the date

Example: E-400005 American Fire Rescue 11/13/20

HARDCOPY: Drop at either:

Mill FOB – Equipment or Personnel Trailers

Auberry Camp – Briefing Area Drop Box

Shift Ticket Requirements:

If you have equipment or an engine that has a secondary rate for mileage, additional operators, and/or a lowboy (or other transport), please ensure your shift tickets reflect the necessary justification. You need to also write your resource order number in the upper right corner of the ticket.

CTR Requirements:

Please accurately notate any travel time, hazard pay, excess shift hours or meal breaks with proper justifications as needed.

Finance is unable to sign for travel – it must be signed by an incident supervisor

Contact Finance with any questions at 2020.creek.finance@firenet.gov or via phone 925-532-5492

DMOB process for the Creek Fire

Resources flying home need to contact DMOB 3-4 days prior to their demob date so that their flight can be arranged. We will need: Your Name as it appears on the picture ID you use at airport security, your Date of Birth, Gender, and a few other questions. Call: **DMOB at (916) 591-9008** if you have any questions.

Mill Forward Operating Base (FOB)/Auberry

All Resources will report to DMOB at Mill FOB at Auberry to pickup the ICS221 DMOB checkout sheet and start the DMOB process. DMOB and Finance are located in trailers.

*****All Resources needing an F42 signed must get one signed before leaving the incident by the Finance Section Chief and OES Rep (if possible) at the Mill in Auberry.*****

ECCO CAMP – updated process

All Resources will report to DMOB at Mill FOB to pickup the ICS221 DMOB checkout sheet and start the DMOB process. DMOB and Finance are located in trailers.

ICP

All Resources will report to DMOB to pickup the ICS221 DMOB checkout sheet and start the DMOB process.

Any questions call DMOB at (916) 591-9008
2020.creek.dmob@firenet.gov

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Agency Affiliation: (NO NAMES OR CREW NAMES) Federal Contractor Local Government					
Assessment: Age: Weight: Chief Complaint:					
(If Pertinent to Injury) Skin Signs: Level of Consciousness: B/P: HR: RR:					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
