INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: CREEK	2. Operational Period: Date From: 10/01/2020 Time From: 0700	Date To: 10/2/2020 Time To: 0700
-----------------------------------	---	-------------------------------------

3. Objective(s):

- Management Objectives**
- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
 - Minimize the threat to private property, communities, businesses, and critical infrastructure.
 - Establish and strengthen cooperators, partners, and stakeholder relationships.
 - Minimize the threat of exposure to COVID-19 within the incident and surrounding communities by adhering to the CDC COVID-19 Guidelines.
 - Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

- Control Objectives**
- Keep the fire north of Pine Flat Lake
 - Keep the fire south of the South Fork of Merced River and the Minarets Range
 - Keep the fire east of Highway 41
 - Keep the fire west of the Mono and Silver Divide Range

- General Situational Awareness:**
- Utilize IRPG checklists to manage risk.
 - Ensure Lookouts are established, Escape Routes and Safety Zones are clearly identified.
 - Ensure effective communications are occurring by giving clear instructions and asking clarifying questions.
 - Continue to adhere to COVID 19 preventative measures.
 - Potential for increased fire behavior when the air clears.

5. Site Safety Plan Required? Yes No

Creek South Zone Fire Weather Forecast

FORECAST NO: 24

NAME OF FIRE: Creek Fire

PREDICTION FOR: 0700 Thu – 0700 Fri

UNIT: CA-SNF-001391

SHIFT DATE: 10/01-10/02

SIGNED: *Mark Pellerito*

Incident Meteorologist - Mark Pellerito

TIME/DATE FORECAST ISSUED: 1900 09/30/20

IMET PHONE: 240-205-4030; mark.pellerito@noaa.gov

WEATHER DISCUSSION:

When a hot high pressure dome builds over an area, sinking air occurs aloft. This strengthens an inversion but also lowers its elevation with time. We are now in the mature phase of this heat wave, including a lower inversion that has enhanced thermal belts for midslopes while also really drying out the ridges. The result is a worsening of an already poor nighttime humidity recovery overnight, which will repeat the next few nights. Low humidity will be experienced right at the get-go the next few mornings, and will persist through the daytime hours. The inversion is also still increasingly trapping smoke in the canyons, which will be hard to mix out before 1400. Winds will continue to be simply terrain-driven - downslope/downcanyon nights-early mornings; upslope to upcanyon late mornings-afternoons.

WEATHER FORECAST FOR THURSDAY: Sunny, hot, and dry with typical terrain-driven winds. Unstable at ridges.

TEMPERATURES: Max 2500-5000' 84-94° ...above 5000' 72-84° 24 HR Trend: Little change.

HUMIDITY: Min 2500-5000' 12-22% ...above 5000' 9-19% 24 HR Trend: 3-6% lower.

10-FOOT WIND:

RIDGETOP - East-northeast 3-6 mph to mid morning, then west-northwest 5-9 mph with gusts 12-15 mph.

SLOPE/VALLEY - Downslope/downcanyon 2-4 mph early, then upslope/upcanyon 3-6 mph; gusts 10 mph.

STABILITY/INVERSION: Inversion stronger; smoke thins ~1400. Inversion lifts to ~7000 ft (lower than yesterday).

WEATHER FOR THURSDAY NIGHT: Clear. Terrain-driven downslope winds. Poor RH recovery, especially mid-to-upper slopes (thermal belts and ridges) outside of deep drainages/low spots/lakes. Smoke may be dense in low spots.

MINIMUM TEMPERATURES:

1500-5000' 66-71° ...Above 5000' 56-66° except drainage spots 49-52°. 24 HR Trend: Little change.

MAXIMUM HUMIDITY:

Max 2500-5000' 20-30% ...Above 5000' 20-25%; 14-19% late (drainage spots higher). 24 HR Trend: Little change.

10-FOOT WIND:

RIDGETOP - Variable early, then east-northeast 5-8 mph with gusts to 12 mph.

SLOPE/VALLEY - Downslope/downcanyon 3-6 mph; gusts as much as 12 mph in east-to-west aligned drainages (South Fork San Joaquin; Huntington Lake).

EXTENDED FORECAST:

FRIDAY... Sunny, hot, and dry. Max temps 72-94° (little change). Min RH 9-22% (little change). Winds downcanyon 5-6 mph in morning; then upslope to west 5-8 mph; gusts to 14 mph in afternoon. Inversion similar to Thursday with trapped smoke; lifting to about 7000 feet. Freely mixing unstable air for ridges.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 003	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire South Zone	OPERATIONAL PERIOD: 10/01/20 0600-0600
DATE ISSUED: September 30, 2020	TIME ISSUED: 19:00
UNIT: CA-SNF-001391	SIGNED: 
Typed/printed: Jeff Shelton (LTAN)	

INPUTS

WEATHER SUMMARY: ****Very Dry and Smokey****
A slowly transitioning regional high-pressure system will again support a locally stable atmosphere. Expect overnight RH recoveries leading into the burn period to be very poor. Anticipate completely consuming heavy fuels to provide increased smoke production, and shading, under a strengthening inversion.

Max. Temperature: 84-94 degrees **Min. Humidity:** 9-19% **Winds(Day):** Terrain Driven/ West to 9 Gusts 15
Min. Temperature: 56-66 degrees **Max. Humidity:** 15-30% **Winds(Night):** Downslope/ East to 12 Up High

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- PIG values remain high... ***With VERY Poor RH Recovery... Expect Receptive Fuels 24/7!***
- Respect any tree torching... ***Extensive Bug Kill Above 7000' Requires Full Awareness!***
- Fine Dead Fuel Moistures Down to 3%... ***Constantly Dry Air = Constantly Available Fuels!***
- Dry, large fuels (<8%-1000 hr.) carrying fire... ***Are Moving Slowly... but Relentlessly!***
- Identify Wind, Slope and Fuel Alignment ... ***Expect Short Intense Runs in These Areas!***
- If you can breathe better, so can the fire... ***Improved Visibility=Inversion Breach=Fresh O2!***
- The fireline has become static in many areas ... ***Expect More Rollout... and Tree Failure!***

SPECIFIC:

All Divisions: Lower Slopes- Well Established, *Moderate Intensity*, Fuels Driven, Surface Fire...
Isolated Torching, and Short Runs in Steep, Aligned Topography...
Upper Slopes- Slightly Ventilation Enhanced *Moderate Intensity* Surface Fire...
Isolated Torching, Short Runs, Short Range Spotting...

Flame Lengths- 4 to 6 ft. in Grass, Up to 30 ft. in Brush... Remaining Active Overnight!

Rate of Spread- Up to 40 chains/hour in Grass, Up to 60 chains/hour in Brush... Slowing Overnight.

Spotting Distances- Up to .1 miles in Grass/Brush, Up to .25 miles in Timber (From Torching)

Probability of Ignition- 60% Shaded, 90% Unshaded; Down to around 30% overnight

AIR OPERATIONS: Sunrise: 0653 Sunset: 1842
Expect fair to poor smoke dispersion with minimal clearing from diminished diurnal transport winds. Mixing heights will raise to 7000' by 1400. Anticipate greatly reduced visibility in the sheltered valleys early. Around noon, upslope/upvalley flow may support battling winds in the complex, dissecting terrain commonly found along the entire fire perimeter.

SAFETY

Look Up....Look Down....Look Around

The Current Fire Environment is Unforgiving of Any Underestimation of Fire Potential!

Identify Trigger Points.....And REPECT Them... Don't Just "Check the Box".

Fuels and Fire Behavior Advisory

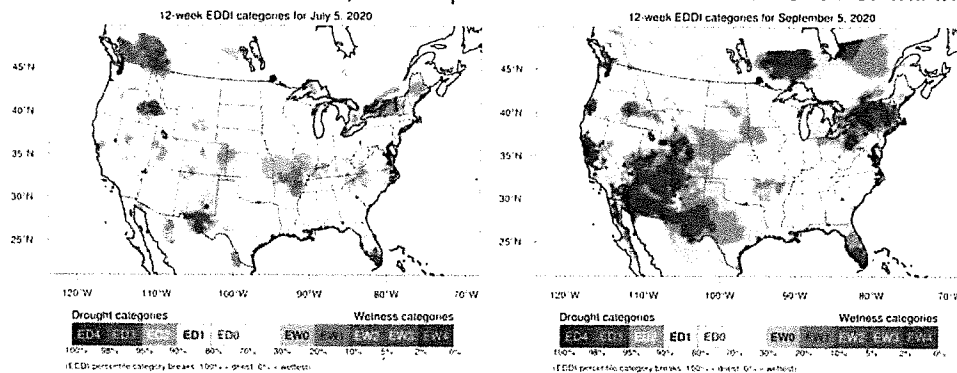

Southern California Geographic Area

September 11, 2020

Subject: Live and dead fuels are extremely dry across the mountain predictive service areas (PSAs). Extreme fire behavior and rapid rates of spread are occurring in these areas, even when winds are light. The chance for extreme fire behavior will increase over the next couple of months as winds increase and become more prevalent. Fire behavior will remain elevated across the mountains of southern and central California, until significant rainfall occurs.

Discussion: A progressive pattern brought near to slightly below normal temperatures from June through August 11th and fire activity was below normal. High pressure became strong and dominant from August 12th into September, bringing well above normal temperatures and very low humidities. Live and dead fuel moisture over the mountains are much lower than normal, due to the absence of monsoonal showers and thunderstorms, combined with very warm and dry conditions.

Difference from normal conditions: Rainfall was 50% to 70% of normal this year in the Sierras, while the rest of the mountainous areas in Southern California received slightly above normal rainfall. Due to hot and dry conditions and little to no rainfall this summer, the dead fuel moistures across all mountain areas are near or below the 3rd percentile and live fuel moistures are between 50% and 70%. ERC's are running near or above the 97th percentile. Computer models indicate high pressure will dominate through at least the end of October, so the potential for extreme fire behavior will increase.

The Evaporative Demand Drought Index (EDDI) is an experimental drought monitoring and early warning guidance tool. It examines how anomalous the atmospheric evaporative demand (E_p ; also known as "the thirst of the atmosphere") is for a given location and across a time period of interest. The figures show the 12 week period preceding July 5 (left) and Sep 5 (right).

<https://psl.noaa.gov/eddi/>

Concerns to Firefighters and the Public:

- Firefighters need to be prepared for possible extreme fire behavior and dangerous rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All firefighters need to remain aware of current and expected weather and burning conditions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at: <https://gacc.nifc.gov/oscc/predictive/weather/index.htm>.
- Red Flag conditions from the National Weather Service and weather at: <https://www.wrh.noaa.gov/fire2/cafw/>.
- Monitor the Santa Ana Wildfire Threat index during the season at: <https://fsapps.nwcg.gov/psp/sawti>

Area of Concern: The mountains are the driest area in the region and are the main concern heading forward. The associated PSAs are SC01, SC02, SC03, SC09, SC10, and SC11.

Creek Incident/South Zone – Safety Message

INCIDENT# CA-SNF-001391

DATE: 10/01-10/02/2020 TIME: 0700-0700

Crew Safety Is Dependent Upon Competent And Confident Leadership

Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known And Observed

- **TAKE CHARGE** of assigned resources
- **MOTIVATE** crew members with a “can do” safety attitude
- **DEMONSTRATE INITIATE** by taking appropriate action in the absence of orders
- **COMMUNICATE** by giving specific instructions and asking for feedback
- **SUPERVISE** at the scene of the action

MAJOR HAZARDS AND RISKS

ROCKY TERRAIN FATIGUE SPOT FIRES	AIR OPERATIONS DEHYDRATION DRIVING	HEAVY EQUIPMENT SNAGS COMPLACENCY
--	--	---

Be sure all elements of your safety plan are in place prior to engagement

COMMUNICATIONS RESPONSIBILITIES

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated “Leader’s Intent.”

Task What is to be done?

Purpose Why it is to be done?

End State How it should look when done?

Safety Officers: B. Savage SOF1, D. Welch SOF1

What was your Leader’s Intent????

16. GETTING FREQUENT SPOT FIRES ACROSS LINE

INCIDENT RISK ANALYSIS

CA-SNF-001391

(ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Traffic volume is high in the area. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Conduct thorough assessments before starting work. Ensure LCES is in place. Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. Increase the level of SA. Provide additional briefing for new resources and maintain communications.
ALL	WEATHER	<ul style="list-style-type: none"> Be aware of changing weather conditions. Watch out for increasing winds and instability. Anticipate increased fire behavior conditions. Communicate any observed changes in weather and fire behavior. "Base all actions on current and expected behavior of the fire."
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Use caution and communicate when working above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> Follow the line construction protocols and safety precautions for direct and indirect line construction. Watch footing and spacing between firefighters, especially those working below. Make sure LCES is in place. Follow the "Downhill Line Construction Checklist" on IRPG page 9.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, deer, rattlesnakes, bees, and BEARS. Watch footing and hand placement around rocks. Use caution around gas and power lines. Personal hygiene is #1 when it comes to Poison Oak Prevention. Watch for agitated cattle that may charge. Follow all CDC and Agency COVID 19 protocols. Watch for unmarked mine shafts.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	MOP UP	<ul style="list-style-type: none"> Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Provide motivation to workers to maintain situational awareness. Carefully evaluate proposed mop up distances and evaluate hazards. Only mop up to the degree necessary to accomplish the desired end state when safe to do so. Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p.3-4).

6. Work Assignments:									
Execute firing plan from Tennessee Point to the DIV N/P break. Fall any hazard trees that threaten firefighter safety, control lines, or road infrastructure.									
Hold fire within current control lines.									
Prepare structure defense plan for Mono Hot Springs Resort, Vermillion Valley Resort and High Sierra Pack Station to prevent any loss to the known values at risk.									
7. Special Instructions:									
NIFC C-32 is the preferred Command Channel within this Division. Call out on TAC when traveling east of Kaiser Pass along 1-way road.									
Coordinate structure wrap mission of Heitz Cabin with Auberry Heli-base.									
Backhaul all trash and excess supplies & equipment									
Identify sensitive archaeological and historic resource sites. Utilize MIST tactics when in Wilderness areas									
Coordinate with REAFs for ground disturbing activities in pre-identified areas to protect the Yosemite Toad

6. Work Assignments:
 Maintain tactical patrol of the structures on the north shore of Huntington Lake from Dowville to China Peak Landing to prevent any further structure loss.
 Crews will construct direct handline from Potter Pass Trail west into the Kaiser Pass Wilderness halting fire spread.
 Scout opportunities for direct and indirect handline/dozer line from Sample Meadow to the Kaiser Wilderness using established lines from the 2013 Aspen fire.

7. Special Instructions:
 NIFC C-32 or NIFC C-5 are the preferred Command Channels to use within this Division
 Backhaul all trash and excess supplies & equipment
 Identify sensitive archaeological and historic resource sites. Utilize MIST tactics when in Wilderness areas
 Coordinate with REAFs for ground disturbing activities in pre-identified areas to protect the Yosemite Toad

5. Special Instructions: Sometimes the closest repeater is not the best. If you have poor command communications, try another command repeater (Channels 1-4). They are all linked. If you must hand program go exactly off the 205, including tones. The use of receive and transmit tones removes other nearby radio traffic from other fires.

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

Wildland Fire COVID-19 Screening Tool

Interim Standard Operating Procedures – 4/15/2020

NOTE: This Screening Tool represents interim guidance. Additional clarification will be coming as soon as it is defined.

DO YOU HAVE ANY OF THESE SYMPTOMS?

Today or in the past 24 hours, have you had any of the following symptoms listed below, **in addition to your normal work-related issues?**

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

If in doubt about any of these symptoms, consult a Physician.

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

Take temperature with touchless thermometer if available

INSTRUCTIONS FOR SCREENING

- If resource is positive for any symptoms prior to mobilization **DO NOT MOBILIZE.**
- At Entries – Consider the adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.
 - o If resource is positive for any symptoms including fever (over 100.4) at entry **DO NOT ANNOUNCE-** ask to step aside.
 - o Escort sick individual to isolation area.
 - o Isolation support personnel should begin documentation. Have sick individual contact Supervisor for further direction.
 - o Notify public health officials.
 - o Have individual transported as appropriate.
 - o Protect and secure any collected Personal Identifiable Information or Personal Health Information.

CAL FIRE IMT COVID-19 ACTIONS

PERSONNEL WITH COVID-19 SYMPTOMS

- **Symptoms per the CDC's current guidelines include the following:**
 - Cough, fever(100.4), chills, muscle pain, shortness of breath, sore throat, new loss of taste or smell
- **Incident Base or Fire Line**
 - Maintain appropriate face covering
 - Notify supervisor and proceed to CALMAT
 - Isolate and assess patient
 - Medical direction to test, return patient to home unit/agency for testing

CONTACTED OR EXPOSED PERSONNEL AND ASYMPTOMATIC

- Notify supervisor
- Maintain appropriate face covering
- Self-monitor for symptoms
- Employee will continue assignment with preventative measures

PREVENTATIVE MEASURES TO SLOW THE TRANSMISSION COVID-19:

- Wash your hands regularly with soap and water, or clean them with alcohol-based hand rub.
- Maintain at least six feet distance between you and people coughing or sneezing.
- Avoid touching your face.
- Cover your mouth and nose when coughing or sneezing.
- Stay home if you feel unwell.
- Refrain from smoking and other activities that weaken the lungs.
- Practice physical distancing by avoiding unnecessary travel and staying away from large groups of people.
- Maintain proper personal care (healthy diet and rest)

CAL FIRE IMT 1 COVID SELF CHECK

DATE	Self Check Completed:	Sanitized:	TIME	COMPLETED BY:

SCREENING QUESTIONS

1. Are you feeling ill?
2. Are you having chills?
3. Do you have a new or worsening cough?
4. Do you have a new or worsening shortness of breath?
5. If thermometer is available, Check temperature. If >100.4

Contact supervisor immediately
 IF YES to ANY of these questions!

REMINDE EMPLOYEES AFTER THE SCREENING TO:

- Wash their hands or use alcohol-based hand sanitizer often
- Do not shake hands, touch or hug others.
- Use physical distancing of 6 feet or greater whenever possible.

FINANCE MESSAGE

AVAILABLE OPTIONS FOR SUBMITTING TIME:

Resources can submit time electronically (email below) or hard copy. There will be drop boxes for CTRs and shift tickets in each spike camp and at ICP. Documents will be picked up daily at spike camps and ICP and transported to Finance.

If you opt to use the fillable PDF CTR or Shift Ticket you have a couple of options for submitting them to Finance:

Option 1- Resource fills out fillable PDF and submits to Supervisor for signature. Supervisor digitally signs PDF, sends signed copy back to Resource **AND** on to Finance.

Option2 - Resource fills out fillable PDF, Supervisor (if comfortable) signs directly on the same device. Resource e-mails the PDF directly to Finance.

Crews: Please submit a copy of your manifest to Finance – it can be electronic or hard copy. Please note any AD crew members on the manifest with their position code and ECI number if known.

Single Resource ADs: Please submit your Single Resource Casual Hire form to Finance – it can be electronic or hard copy.

Cooperators: Please submit your agreement and resource order to Finance – either electronically or hard copy. Please don't skip any pages and assure that the signature page is shown.

ALL OVERHEAD, CREWS (INCLUDING AGENCY ENGINE, AIRCRAFT AND HAND CREWS) AND COOPERATORS FROM BOTH THE NORTH AND SOUTH ZONE WILL HAVE THEIR TIME PROCESSED BY NORTH ZONE FINANCE.

Contractors: Please submit the finance portion of your contract/agreement and resource order to Finance – either electronically or hard copy. Please don't skip any pages and assure that the signature page is shown.

ALL PRIVATE VENDORS FROM BOTH THE NORTH AND SOUTH ZONE WILL HAVE THEIR TIME PROCESSED BY SOUTH ZONE FINANCE.

Please try to submit time at least every other day. You may choose from any of the options above as long as the copy we receive in finance is legible. What works best for you, will work for us.

This fire is under Cost Apportionment, All DIVS and OPBD will need to do a daily de-brief with the Cost Apportionment Team by calling 925-588-6902.

Human Resource Message

YOUR RIGHTS AND RESPONSIBILITIES

Rights:

- To work in a harassment-free environment where people treat one another with dignity, equity, courtesy and respect.
- To say "no" to unwelcome advances or requests for favors.
- To file complaints or grievances through appropriate avenues.

Responsibilities:

- To behave in a manner that treats people with dignity, equity, courtesy and respect.
- To abide by agency and incident ethics and conduct regulations including zero tolerance for drugs and alcohol in the work environment.
- To report any harassment or other inappropriate behavior you observe or experience

Andrea Cabida- HRSP- 707-330-9939; andrea.cabida@usda.gov; I am located at China Peak Camp and am available via calls, texts or email.

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a few people on the incident for any peer support related needs. The best way to get a hold of them is to call them directly.

Amber Henderson 805 794-1690
Mike DeLeo 805 573-2419
or
CAL FIRE Peer Support/Helpline
916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543
Mike Aiello 916-584-0548
Warren Parrish 916-823-6641
Shawna Powell-530 717-0667
Nikole Schutz 916-709-0434
Jeremy Sanders- 916 281-6472
Amy Head 916-956-3277
Chris Lomanto 916-247-6974
Connie Quarisa 916-213-8697

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

Stay Out! – Flagging Combinations for Sensitive Areas

- READs will be using flagging for areas to avoid suppression activities. There are two pieces to watch for.
 - Strip of white and a strip of blue/black.
- For more information, please consult with a READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and could bring about a dangerous situation to others on the line.

Riparian Areas

- Meadows are natural barriers. Tie the line to them and not through them.
- Stream and creeks should be approached with care. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through.

Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

Tree Felling During Fire Line Creation

- Only cut down trees that are necessary during line construction.
 - Ask yourself, "do I really need to remove this tree? Would removal of lower hanging limbs be sufficient?"
- Avoid cutting hardwoods like black oaks when possible.

Removing Fuels in the Forest

Trees across the Sierra National Forest have a monetary value. If this can be done safely and without compromising the line, consider creating a shaded fuel break. A shaded fuel break means some trees will remain with a certain spacing as stated below. This more commonly applies to indirect and contingency lines.

1. Cut trees with a 20' x 20' crown spacing. This means leave one tree untouched every 20 feet with all other trees removed. The 20 feet spacing is measured from the edge of the untouched tree's branches to the next untouched tree (see image to the right). The single tree left should be undamaged and appear healthy. *Healthy = no dead tops, multi tops or obvious signs of disease*
2. Deck all trees cut over a 10" DBH. Decking is to stack the trees in a linear fashion.

RESOURCE ADVISOR MESSAGE

Removal of Fire Burnt Trees on Federal Land along Roadways

Clearing trees along the roadways on National Forest land needs to follow the following guidelines:

Cut trees that:

- No longer have any needles left or remaining needles are black, charred and dry
- Have 60% or more of the green crown (branches with needles) that is scorched
- Have deeply charred bark that no longer has any defining characteristics such as bark shows no grooves, no fissures, and no possible puzzle like appearance and/or natural coloration.

Keep trees that are:

- Vigorous and most likely to survive. These should have green, pliable needles, and have 40% or more of a green crown.
- If a tree has 40% or more of a green crown and the bole of the tree is not burnt through, consider leaving the tree.
- Tree has defining characteristics like bark shows grooves, fissures, and may have a puzzle like appearance and/or natural coloration.
- Not a hazard to the road.

Trees that are painted with a green letter "L" are NOT to be cut. They are "Leave" trees.

OHV Routes (Brewer, Red Mtn, & Coyote Lakes Areas)

- Do not use heavy equipment on these routes. They will also likely damage the heavy equipment due to large cobbles and boulders. These are highly prized 4x4 routes that attract people from all over the country.
- Constructing line to meet up with the OHV routes is allowed.
- Using existing OHV routes as a firing line is allowed.

Keep up the good work for cultural and natural resources by doing the following:

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing suppression information and working alongside READs.
- To the extent possible, when moving on to a new area leave the former better than you found it.

PUBLIC INFORMATION SECTION

INCIDENT INFORMATION LINE: (844) 668-3473

MEDIA LINE: (209) 628-3097

USFS SOCIAL MEDIA POLICY:

Social media posts reflect on the professionalism of your crew, your agency and the Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as a leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the Fireline as well as online. When assigned to a federal fire you are considered a federal employee under the delegation of authority by the host agency. Even if you are a contractor, AD or from a partner agency we recommend that follow professional guidelines and ethical best practice standards which apply to federal employees all the time.

CAL FIRE SOCIAL MEDIA POLICY:

When assigned to a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691.

MEDIA: Section 409.5 (d) of the California State Penal Code allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media shall not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

LOST AND FOUND: The information section will handle lost and found items. Creek Fire ICP South / Room 13, Sierra High School.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i>	
<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>		
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Crew Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*drop point, intersection, helispot, Lat. / Long, hazards*) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
