INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">CREEK</p>	2. Operational Period:	Date From: 10/5/2020 Time From: 0700	Date To: 10/6/2020 Time To: 0700
--	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, communities, businesses, and critical infrastructure.
- Establish and strengthen cooperators, partners, and stakeholder relationships.
- Minimize the threat of exposure to COVID-19 within the incident and surrounding communities by adhering to the CDC COVID-19 Guidelines.
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

- Keep the fire north of Pine Flat Lake
- Keep the fire south of the South Fork of Merced River and the Minarets Range
- Keep the fire east of Highway 41
- Keep the fire west of the Mono and Silver Divide Range

General Situational Awareness:

- Utilize IRPG checklists to manage risk.
- Ensure Lookouts are established, Escape Routes and Safety Zones are clearly identified.
- Ensure effective communications are occurring by giving clear instructions and asking clarifying questions.
- Continue to adhere to COVID 19 preventative measures.
- Potential for increased fire behavior when the air clears.

5. Site Safety Plan Required? Yes No

Creek South Zone Fire Weather Forecast

FORECAST NO: 28

NAME OF FIRE: Creek Fire

PREDICTION FOR: 0700 Mon – 0700 Tue

UNIT: CA-SNF-001391

SHIFT DATE: 10/05-10/06

SIGNED: *Mark Pellerito*
Incident Meteorologist - Mark Pellerito
IMET PHONE: 240-499-6649

TIME/DATE FORECAST ISSUED: 1900 10/04/20

WEATHER DISCUSSION: Very poor humidity recoveries continue, with single digit relative humidity for ridges expected by midday. What is different: For the first time in quite awhile, some high thin clouds will drift through the area. Sun will still filter through, but this will take a bit of the edge off the ridgetop instability and gustiness. Smoke remains trapped in the San Joaquin Canyon, but at least some mid-late afternoon thinning will occur. Above the inversion, there will be smoke simply from more fire activity – just not as thick as below. Winds today/tonight through Tuesday night will be terrain-driven - downslope/downcanyon nights-early mornings; upslope/upcanyon late mornings-afternoons; gusts into teens for ridges and west-to-east aligned canyons such as the San Joaquin South Fork. Temperatures drop closer to normal mid-late week; potential being monitored for rain chances next weekend.

WEATHER FORECAST FOR MONDAY: Mixed sun/high clouds. VERY dry, even with temperatures down slightly.

TEMPERATURES: Max 2500-5000' 82-90° ...above 5000' 68-82° **24 HR Trend:** Down 1-2° (still warm).

HUMIDITY: Min 2500-5000' 8-18% ...above 5000' 5-15% **24 HR Trend:** 1-3% lower.

20-FOOT WIND:

RIDGETOP - East-northeast 3-6 mph to mid morning, then southwest 6-12 mph; gusts 14-18 mph.

SLOPE/VALLEY - Downslope/downcanyon 2-4 mph early, then upslope/upcanyon 5-9 mph; gusts 12 mph.

STABILITY/INVERSION: Smoke thins 1300-1600 but not fully. Inversion/trapped smoke lifts to ~5000 ft.

WEATHER FOR MONDAY NIGHT: A few high thin clouds at times. Terrain-driven downslope winds. Poor RH recovery again in mid-to-upper slopes (thermal belts/ridges). Smoke dense/higher humidity in low cold spots.

MINIMUM TEMPERATURES:

2500-5000' 60-65° ...Above 5000' 48-58° except drainage spots 39-45°. **24 HR Trend:** Down 1-3°

MAXIMUM HUMIDITY:

2500-5000' 25-35% ...Above 5000' 20-30%; 12-20% late (drainage spots higher). **24 HR Trend:** Up 2-4%.

20-FOOT WIND:

RIDGETOP - Variable early, then east-southeast 3-6 mph with gusts to 10 mph.

SLOPE/VALLEY - Downslope/downcanyon 2-5 mph; gusts as much as 12 mph in east-to-west aligned drainages (Huntington Lake; South Fork San Joaquin).

EXTENDED FORECAST:

TUESDAY... Warm & very dry, but with some high thin sun-filtering clouds drifting by. Max temps 67-89° (little change). Min RH 9-19% (Up 2-4%). Winds downcanyon 2-5 mph early; then upslope to west-southwest 5-10 mph; gusts (especially ridges) 14-18 mph. Inversion around 5000 feet.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 007	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire South Zone	OPERATIONAL PERIOD: 10/05/20 0700-0700
DATE ISSUED: October 4, 2020	TIME ISSUED: 19:00
UNIT: CA-SNF-001391	SIGNED:  Typed/printed: Jeff Shelton (LTAN)

INPUTS

WEATHER SUMMARY: ***** Continued Very Dry...Breezy, Afternoon Winds *****
 Slowly transitioning regional high-pressure system will again inhibit vertical motion at and below roughly the 5000' level. Above the inversion, more unstable air will support localized column development. Terrain winds will provide the steering mechanism for any column that does develop above the inversion. Overnight RH recoveries leading into the burn period will again be very poor.

Max. Temperature: 82-90 degrees **Min. Humidity:** 6-8% **Winds(Day):** Terrain Driven/ SW to 9 Gusts 18
Min. Temperature: 45-60 degrees **Max. Humidity:** 20-30% **Winds(Night):** Downslope/ East to 12 Up High

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Slope reversal coming?...***Identify and Plan For, "The Next Big Change" in the Fire's Path!***
- This fire remains fuels driven...***But Ventilation Dependent...Read Your Smoke Often!***
- PIGs- 90%-Respect all tree torching-***Especially in Drainages and on Exposed Ridgelines!***
- Fine Dead Fuel Moistures Down to 3%... ***Unbroken Chain of Fuels... Litter to Timber!***
- Dry, large fuels (<8%-1000 hr.) are catching and carrying fire...***Slowly... but Relentlessly!***
- If you can see blue sky, fire behavior will soon spike...***Improved Visibility=Increased Lift!***
- Fire is now in more continuous fuels...***Alter Your Perception...Higher Energy Potential!***

SPECIFIC:

**All Divisions: Lower Slopes-Well Established, *Moderate Intensity*, Fuels Driven, Surface Fire...
 Isolated Torching, and Short Runs in Steep, Aligned Topography...
 Upper Slopes- Ventilation Enhanced, *High Intensity*, Fuels Driven Surface Fire
 Group Torching, Short Runs, Short Range Spotting...**

Flame Lengths- Up to 2 ft. in Litter, 6 ft. in Grass, and 30 ft. in Brush...Remaining Active Overnight!

Rate of Spread- Up to 60 chains/hour in Grass, Up to 80 chains/hour in Brush... Slowing Overnight.

Spotting Distances- Up to .1 miles in Grass/Brush, Up to .3 miles in Timber (From Torching)

Probability of Ignition- 60% Shaded, 90% Unshaded; Down to around 30% overnight

AIR OPERATIONS:

Sunrise: 0657 Sunset: 1838

Expect fair to poor smoke dispersion with minimal clearing from light diurnal transport winds. Mixing heights will raise to 5000' by 1400. Anticipate greatly reduced visibility in the sheltered valleys early. Above the inversion, anticipate early enhanced visibility. Without strong upper level winds, smoke above the inversion could quickly obscure visibility.

SAFETY

***ERC Values are NOW Securely Parked in Record Setting Territory!
 Fire Behavior IS NOT Correlated to the Calendar! Think August....Not October!
 Think Before You Engage!....What is the Reward to Your Risk?***

Fuels and Fire Behavior Advisory

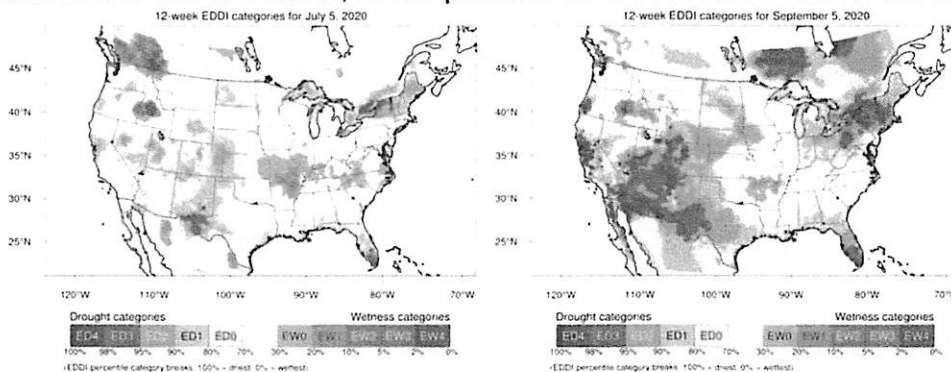

Southern California Geographic Area

September 11, 2020

Subject: Live and dead fuels are extremely dry across the mountain predictive service areas (PSAs). Extreme fire behavior and rapid rates of spread are occurring in these areas, even when winds are light. The chance for extreme fire behavior will increase over the next couple of months as winds increase and become more prevalent. Fire behavior will remain elevated across the mountains of southern and central California, until significant rainfall occurs.

Discussion: A progressive pattern brought near to slightly below normal temperatures from June through August 11th and fire activity was below normal. High pressure became strong and dominant from August 12th into September, bringing well above normal temperatures and very low humidities. Live and dead fuel moisture over the mountains are much lower than normal, due to the absence of monsoonal showers and thunderstorms, combined with very warm and dry conditions.

Difference from normal conditions: Rainfall was 50% to 70% of normal this year in the Sierras, while the rest of the mountainous areas in Southern California received slightly above normal rainfall. Due to hot and dry conditions and little to no rainfall this summer, the dead fuel moistures across all mountain areas are near or below the 3rd percentile and live fuel moistures are between 50% and 70%. ERC's are running near or above the 97th percentile. Computer models indicate high pressure will dominate through at least the end of October, so the potential for extreme fire behavior will increase.

The Evaporative Demand Drought Index (EDDI) is an experimental drought monitoring and early warning guidance tool. It examines how anomalous the atmospheric evaporative demand (E_0 ; also known as "the thirst of the atmosphere") is for a given location and across a time period of interest. The figures show the 12 week period preceding July 5 (left) and Sep 5 (right).
<https://psl.noaa.gov/eddi/>

Concerns to Firefighters and the Public:

- Firefighters need to be prepared for possible extreme fire behavior and dangerous rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All firefighters need to remain aware of current and expected weather and burning conditions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at: <https://gacc.nifc.gov/oscc/predictive/weather/index.htm>.
- Red Flag conditions from the National Weather Service and weather at: <https://www.wrh.noaa.gov/fire2/cafw/>.
- Monitor the Santa Ana Wildfire Threat index during the season at: <https://fsapps.nwcg.gov/psp/sawti>

Area of Concern: The mountains are the driest area in the region and are the main concern heading forward. The associated PSAs are SC01, SC02, SC03, SC09, SC10, and SC11.

Creek Incident/South Zone – Safety Message

INCIDENT # CA-SNF-001391

DATE:10/5-6/20 TIME:0700-0700 Day/Night

Driver Safety/Traffic Safety

With continued repopulation expect increased distracted civilian drivers. Take the following steps to increase driver and traffic safety:

- ✓ *Many roads are steep. Avoid heating up your vehicle's brakes!! Use the transmission's gears when possible.*
- ✓ Driving conditions and stopping distances will change when the roads are dusty, wet, or muddy.
- ✓ Be familiar with the traffic plan for your division, and any division you may travel in.
- ✓ Stop and look at all unmarked intersections before proceeding.
- ✓ Use extra caution and be aware of cross traffic and pedestrian traffic when entering/exiting the ICP or base camps.
- ✓ Beware of congested vehicle and pedestrian conditions in the Base Camp parking lots and sleeping areas.

REMAIN FIRE FOCUSED!!...COVID AWARE!

Air Operations

- Follow aviation watch out situations on page 46 of the IRPG.
- Do not plan on air resources for medical transport or resupply.
- Refer to page 58 of the IRPG for properly directing retardant and bucket drops.
- Ensure positive communications with all air resources.
- Look for flying objects and debris from nearby retardant and water drops.
- Be sure to always monitor the air to ground frequency so that you are not caught off guard.

Safety Officers: B. Savage, SOF1
D. Welch, SOF1

Safety zones and escape routes...

NOT IDENTIFIED

INCIDENT RISK ANALYSIS

CA-SNF-001391

(ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Traffic volume is high in the area. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Conduct thorough assessments before starting work. Ensure LCES is in place. Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. Increase the level of SA. Provide additional briefing for new resources and maintain communications.
ALL	WEATHER	<ul style="list-style-type: none"> Be aware of changing weather conditions. Watch out for increasing winds and instability. Anticipate increased fire behavior conditions. Communicate any observed changes in weather and fire behavior. "Base all actions on current and expected behavior of the fire."
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Use caution and communicate when working above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> Follow the line construction protocols and safety precautions for direct and indirect line construction. Watch footing and spacing between firefighters, especially those working below. Make sure LCES is in place. Follow the "Downhill Line Construction Checklist" on IRPG page 9.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, deer, rattlesnakes, bees, coyotes and BEARS. Watch footing and hand placement around rocks. Use caution around gas and power lines. There are numerous power lines down within the fire area. Treat all lines as live!! Every line has the potential to be energized through back-feed by civilian generators or solar power systems in the area. Follow all CDC and Agency COVID 19 protocols.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	MOP UP	<ul style="list-style-type: none"> Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Provide motivation to workers to maintain situational awareness. Carefully evaluate proposed mop up distances and evaluate hazards. Only mop up to the degree necessary to accomplish the desired end state when safe to do so. Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p.3-4).

6. Work Assignments:
Execute defensive firing as needed to defend values at risk. Continue primary line construction along Kaiser Road north toward Vermillion Valley Resort in preparation for firing. Identify area for indirect line south of the 80 / Kaiser Pass Road.

7. Special Instructions:
NIFC C-32 is the preferred Command Channel within this Division. Call out on TAC when traveling east of Kaiser Pass along 1-way road. REAFs will check in during briefing breakout sessions with DIVS if working in that division for that shift
Coordinate structure wrap mission of Heitz Cabin with Auberry Heli-base.
Backhaul all trash and excess supplies & equipment
Identify sensitive archaeological and historic resource sites. Utilize MIST tactics when in Wilderness areas
Coordinate with REAFs for ground disturbing activities in pre-identified areas to protect the Yosemite Toad

FALM O-71		10/7	D. Robles	2	O-71	0700-1900	DP 22

6. Work Assignments:
Secure fire's edge to the extent necessary to prevent any further fire spread. Focus efforts at the Division break between Sierra and Romeo.

7. Special Instructions:
NIFC C-46 or NIFC C-5 are the preferred Command Channels to use within this Division
REAFs will check in during briefing breakout sessions with DIVS if working in that division for that shift
Backhaul all trash and excess supplies & equipment

8. Communications

5. Special Instructions:		Sometimes the closest repeater is not the best. If you have poor command communications, try another command repeater (Channels 1-4). They are all linked. If you must hand program go exactly off the 205, including tones. The use of receive and transmit tones removes other, nearby radio traffic from other fires.

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

Wildland Fire COVID-19 Screening Tool

Interim Standard Operating Procedures – 4/15/2020

NOTE: This Screening Tool represents interim guidance. Additional clarification will be coming as soon as it is defined.

DO YOU HAVE ANY OF THESE SYMPTOMS?

Today or in the past 24 hours, have you had any of the following symptoms listed below, in addition to your normal work-related issues?

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

If in doubt about any of these symptoms, consult a Physician.

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

Take temperature with touchless thermometer if available

INSTRUCTIONS FOR SCREENING

- If resource is positive for any symptoms prior to mobilization **DO NOT MOBILIZE.**
- At Entries – Consider the adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.
 - o If resource is positive for any symptoms including fever (over 100.4) at entry **DO NOT ANNOUNCE-** ask to step aside.
 - o Escort sick individual to isolation area.
 - o Isolation support personnel should begin documentation. Have sick individual contact Supervisor for further direction.
 - o Notify public health officials.
 - o Have individual transported as appropriate.
 - o Protect and secure any collected Personal Identifiable Information or Personal Health Information.

FINANCE MESSAGE

AVAILABLE OPTIONS FOR SUBMITTING TIME:

Resources can submit time electronically (email below) or hard copy. There will be drop boxes for CTRs and shift tickets in each spike camp and at ICP. Documents will be picked up daily at spike camps and ICP and transported to Finance.

If you opt to use the fillable PDF CTR or Shift Ticket you have a couple of options for submitting them to Finance:

Option 1- Resource fills out fillable PDF and submits to Supervisor for signature. Supervisor digitally signs PDF, sends signed copy back to Resource AND on to Finance.

Option2 - Resource fills out fillable PDF, Supervisor (if comfortable) signs directly on the same device. Resource e-mails the PDF directly to Finance.

Crews: Please submit a copy of your manifest to Finance – it can be electronic or hard copy. Please note any AD crew members on the manifest with their position code and ECI number if known.

Single Resource ADs: Please submit your Single Resource Casual Hire form to Finance – it can be electronic or hard copy.

Cooperators: Please submit your agreement and resource order to Finance – either electronically or hard copy. Please don't skip any pages and assure that the signature page is shown.

ALL OVERHEAD, CREWS (INCLUDING AGENCY ENGINE, AIRCRAFT AND HAND CREWS) AND COOPERATORS FROM BOTH THE NORTH AND SOUTH ZONE WILL HAVE THEIR TIME PROCESSED BY NORTH ZONE FINANCE.

Contractors: Please submit the finance portion of your contract/agreement and resource order to Finance – either electronically or hard copy. Please don't skip any pages and assure that the signature page is shown.

ALL PRIVATE VENDORS FROM BOTH THE NORTH AND SOUTH ZONE WILL HAVE THEIR TIME PROCESSED BY SOUTH ZONE FINANCE.

Please try to submit time at least every other day. You may choose from any of the options above as long as the copy we receive in finance is legible. What works best for you, will work for us.

This fire is under Cost Apportionment, All DIVS and OPBD will need to do a daily de-brief with the Cost Apportionment Team by calling 925-588-6902.

Human Resource Message

FATIGUE

Fatigue affects your physical and emotional state! It can have a negative impact on your concentration, your conduct, and speech. In the unprecedented times we are in with COVID-19, a severe fire year, and the civil unrest, it can be emotionally taxing. This can have all sorts of consequences so please make an effort to rest up and be cognizant of your responses to others.

“In matters of style, swim with the current; in matters of principle, stand like a rock.” - Thomas Jefferson

“Fatigue, discomfort and discouragement are merely symptoms of effort. – Morgan Freeman

Andrea Cabida- HRSP- 707-330-9939; andrea.cabida@usda.gov; I am located at the China Peak Camp. Call, Text or email me if you need anything.

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a few people on the incident for any peer support related needs. The best way to get a hold of them is to call them directly.

Amber Henderson 805 794-1690

Mike DeLeo 805 573-2419

or

CAL FIRE Peer Support/Helpline

916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543

Mike Aiello 916-584-0548

Warren Parrish 916-823-6641

Shawna Powell-530 717-0667

Nikole Schutz 916-709-0434

Jeremy Sanders- 916 281-6472

Amy Head 916-956-3277

Chris Lomanto 916-247-6974

Connie Quarisa 916-213-8697

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

Stay Out! – Flagging Combinations for Sensitive Areas

- READs will be using flagging for areas to avoid suppression activities. There are two pieces to watch for.
 - Strip of white and a strip of blue/black.
- For more information, please consult with a READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and could bring about a dangerous situation to others on the line.

Riparian Areas

- Meadows are natural barriers. Tie the line to them and not through them.
- Stream and creeks should be approached with care. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through.

Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

Tree Felling During Fire Line Creation

- Only cut down trees that are necessary during line construction.
 - Ask yourself, "do I really need to remove this tree? Would removal of lower hanging limbs be sufficient?"
- Avoid cutting hardwoods like black oaks when possible.

Removing Fuels in the Forest

Trees across the Sierra National Forest have a monetary value. If this can be done safely and without compromising the line, consider creating a shaded fuel break. A shaded fuel break means some trees will remain with a certain spacing as stated below. This more commonly applies to indirect and contingency lines.

1. Cut trees with a 20' x 20' crown spacing. This means leave one tree untouched every 20 feet with all other trees removed. The 20 feet spacing is measured from the edge of the untouched tree's branches to the next untouched tree (see image to the right). The single tree left should be undamaged and appear healthy. *Healthy = no dead tops, multi tops or obvious signs of disease*
2. Deck all trees cut over a 10" DBH. Decking is to stack the trees in a linear fashion.

RESOURCE ADVISOR MESSAGE

Removal of Fire Burnt Trees on Federal Land along Roadways

Clearing trees along the roadways on National Forest land needs to follow the following guidelines:

Cut trees that:

- No longer have any needles left or remaining needles are black, charred and dry
- Have 60% or more of the green crown (branches with needles) that is scorched
- Have deeply charred bark that no longer has any defining characteristics such as bark shows no grooves, no fissures, and no possible puzzle like appearance and/or natural coloration.

Keep trees that are:

- Vigorous and most likely to survive. These should have green, pliable needles, and have 40% or more of a green crown.
- If a tree has 40% or more of a green crown and the bole of the tree is not burnt through, consider leaving the tree.
- Tree has defining characteristics like bark shows grooves, fissures, and may have a puzzle like appearance and/or natural coloration.
- Not a hazard to the road.

Trees that are painted with a green letter "L" are NOT to be cut. They are "Leave" trees.

OHV Routes (Brewer, Red Mtn, & Coyote Lakes Areas)

- Do not use heavy equipment on these routes. They will also likely damage the heavy equipment due to large cobbles and boulders. These are highly prized 4x4 routes that attract people from all over the country.
- Constructing line to meet up with the OHV routes is allowed.
- Using existing OHV routes as a firing line is allowed.

Keep up the good work for cultural and natural resources by doing the following:

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing suppression information and working alongside READs.
- To the extent possible, when moving on to a new area leave the former better than you found it.

PUBLIC INFORMATION SECTION/ CREEK FIRE
PUBLIC INFORMATION: (844)-668-3473
NORTH ZONE MEDIA: (844)-668-3473
SOUTH ZONE MEDIA: (559)-790-6374

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts reflect on the professionalism of your crew, your agency and the Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as a leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the Fireline as well as online. When assigned to a federal fire you are considered a federal employee under the delegation of authority by the host agency. Even if you are a contractor, AD or from a partner agency we recommend that follow professional guidelines and ethical best practice standards which apply to federal employees all the time.

CAL FIRE SOCIAL MEDIA POLICY

When assigned to a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691.

MEDIA

Section 409.5 (d) of the California State Penal Code allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media shall not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

LOST AND FOUND

Lost & Found remains at Sierra High School 33326 Lodge Rd, Tollhouse, CA 93667. Items will be located in the Fire Preventions Logo Trailer that is staffed by PIO's assigned to the Creek Fire. The trailer is in the front parking lot between the two gyms at the High School.

Mail continues to be accepted at: CAL FIRE FKU – 210 S. Academy Ave. Sanger, CA 93657

SAFE TRAVELS

**Demob Process for South Zone
Federal, State, County & Local Resources**

Start at China Peak:

- 1) Get DEMOB form ICS 221, contact Frank Baker in Demob.
- 2) Check out of Supply at China Peak.
- 3) If you are a Federal Resource call North Zone Finance at 940-783-2965
- 4) Go to Ground Support (vehicle inspection) 33337 Auberry Rd.
All tactical equipment and AOV's must go through ground support. If you're in a rental you can skip this.
- 5) Go to Weed Wash. All resources coming off the line **MUST** go through Weed Wash. (Located at Hwy 168 and Lodge Road on the north/east side of the road.)
You will have to return back to ground support and weed wash if you do not get inspected and washed before coming down to ICP!!!
- 6) State, go to CalFire Finance at: Hilton Hotel Fresno Convention Center 2233 Ventura St. Fresno. County, Local Gov't, OES Resources, stop by OES @ Sierra High School or bring F42 to South Zone Finance at Veterans Memorial Building 808 N. 4th St. Clovis.
- 7) Go to Veterans Memorial 808 N. 4th St. Clovis
 - a) Go to Comm Unit
 - b) Go to Demob

All resources that require an OF-288 (FTR) **MUST** clear TIMES with North Zone Finance before leaving the Creek Fire. For questions call 682-220-4332

Extensions: You must get approval from both the Division Supervisor and your agency. Bring extension form to check in at Veterans Memorial Clovis.

Questions Demob South (916) 591-9008

Training Specialist Creek – South Zone (Remote)

The Training Specialist is working remotely. Training Specialist Contact Information:

- Bob Rivelle
- Call/Text: 707.498.1761
- Email: robert_rivelle@nps.gov
- Available between 0630-2200 (Daily)

How to register as a Trainee:

- Use the QR code below. If you're unable to register using the QR code, please call 707.498.1761.
- If you registered with a different Training Specialist during this assignment, you will need to re-register.
- Once registered, you will receive text and email updates.

To close-out your training assignment:

1. **Trainer:** Complete and Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
2. **Trainer:** Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
3. **Trainee:** Complete the Exit Interview.
4. Once completed, the Trainee and the Training Specialist will have a brief conversation to discuss the Position Task Book.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat/Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening Injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(if pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
