Creek South Zone Fire Weather Forecast

FORECAST NO: 20

NAME OF FIRE: Creek Fire

PREDICTION FOR: 0700 Sat – 0700 Sun

UNIT: CA-SNF-001391

SHIFT DATE: 09/27-09/28

SIGNED: *Mark Pellerito*
Incident Meteorologist - Mark Pellerito
IMET PHONE: 240-205-4030

TIME/DATE FORECAST ISSUED: 1900 09/26/20

WEATHER DISCUSSION:

****Wind Shift Arrives From Northeast This Afternoon-Early Evening****

A much warmer air mass is building into the area, which will persist many days. Meanwhile, much cooler air is dropping into the Great Basin. This difference in air masses will cause winds to press over the Sierra from the northeast this afternoon through especially tonight-Monday. Winds will not be that strong, but they will be gustier and from a different direction from recent days. Through midday, expect typical terrain-driven winds/becoming light upslope-upcanyon. However, **an earlier-than-usual switch to downslope-downcanyon (northeasterly for ridges) is anticipated to work its way down first from highest elevations (Divs N-P) this afternoon, across the rest of Creek Fire-South zone by evening.** Downsloping continues tonight-Monday morning, causing lower humidity, too.

WEATHER FORECAST FOR SUNDAY: Sunny; warmer. ***Watch out for the wind shift this afternoon-evening***

TEMPERATURES: Max 2500-5000' 82-90 F ...above 5000' 70-82 F **24 HR Trend:** 2-5° warmer.

HUMIDITY: Min 2500-5000' 25-35% ...above 5000' 22-32% **24 HR Trend:** Little change.

20-FOOT WIND:

RIDGETOP - Variable 2-4 mph to 1000; then southwest-west 5-10 mph through early afternoon; switching out of northeast 8-12 mph (gusts 16-20 mph) between mid afternoon-early evening.

SLOPE/VALLEY - Downslope/downcanyon 2-4 mph early, becoming upslope/upcanyon 3-6 mph with gusts to 10 mph in the afternoon. Wind direction erratic in mid-afternoon; becoming downcanyon or northeast late.

STABILITY/INVERSION: Smoke will again be tough to mix out, but will then drift southwest across much of the fireground this afternoon. Clean air may move much of the smoke out of the northeastern perimeter this afternoon.

WEATHER FOR SUNDAY NIGHT: Clear with downsloping winds; humidity falling overnight-early morning.

TEMPERATURES: Min 2500-5000' 58-66 F ...above 5000' 44-54 F. **24 HR Trend:** 2-4° warmer.

HUMIDITY: Max 2500-5000' 30-40%; 20s% late. ...above 5000' 40-50%; 30s% late. **24 HR Trend:** 5-10% lower.

20-FOOT WIND:

RIDGETOP - Variable early; becoming northeast overnight 5-8 mph with gusts to 12 mph.

SLOPE/VALLEY - Downslope/downcanyon 8-12 mph; gusts as much as 20-25 mph especially in northeast-to-southwest aligned drainages (Huntington Lake; perhaps Lake Thomas Edison).

EXTENDED FORECAST:

MONDAY... Sunny, hot, and dry. Max temps 72-92 F (1-3° warmer). Min RH 14-24% (down 7-11%). Winds northeast 5-10 mph gusts 15 mph in morning, then upslope to northwest 3-6 mph with gusts to 12 mph in afternoon.

Creek Fire-South Zone- Safety Message

INCIDENT# CA-SNF-001391

DATE: 9-27/28-20 Day/Night Shift
TIME: 0700-0700

DANGER/ HAZARD TREES & SNAGS:

All trees & snags, especially large ones are potentially dangerous.

- They do not tell when they are going to fall, they just fall. Be heads up!
- Minimize your exposure time and resources around hazard trees & snags.
- This forest has an extremely high concentration of tree mortality.
- Use extra caution while working in forested areas during windy periods, helicopter water drops, and air tanker drops.
- Never work around trees/snags until they have been evaluated and the hazards have been mitigated. Continue to re-evaluate periodically, conditions constantly change in burn areas.
- Use the Hazard Tree Safety guidelines in the IRPG, page 22-23.
- Always eliminate the hazards with qualified sawyers or heavy equipment.
- Modify suppression tactics or fireline location to avoid high-risk areas.

Weather and Fire Behavior Forecast

- Pay close attention to the weather and fire behavior forecasts in the IAP.
- There is the potential for change that could bring increased activity & large fire growth.

Ensure LCES is in place....for worst case Fire Behavior.)

DRIVING

- When driving, keep speed at or **below** the posted speed limit. **Speed limit is 35mph on HWY 168. CHP will cite you too.**
- Expect more civilian vehicles on the road with more re-population occurring every day.
- Drive defensively! Expect the unexpected around every curve.
- Watch out for debris and wildlife on the roads.
- Do not tail gate, keep a safe distance between vehicles on dirt roads.
- Always fasten your seat belt.
- Use a "backer" when backing your vehicle. Do a walk around if a "backer" is not available.
- Watch your position on the roadway since the roads are narrow: there may be another vehicle also entering a corner.
- Lastly, please put your phone down while you're driving. Bad things happen in split seconds.

Safety Officers: B. Savage, SOF1
D. Welch, SOF1

Escape Route/Safety Zone Checklist **Escape Routes:**

- Designate primary and back-up escape routes
- Scouted – soils, vegetation, slope
- Timed – slowest person, fatigue, dozer speed
- Marked – flagged for day and night use

Safety Zones:

- Survivable without a shelter
- Natural – clean burn, water, bare soil/rock
- Man-made – constructed sites, roads, etc.
- Scouted for size and hazards
- Close enough considering escape time needed

Remember and Follow:

- The 10 Standard Fire Orders
- The Common Denominators of Fire Behavior on Tragedy Fires
- The Downhill Line Construction Guidelines

INCIDENT RISK ANALYSIS

CA-SNF-001391

(ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Traffic volume is high in the area. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Conduct thorough assessments before starting work. Ensure LCES is in place. Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. Increase the level of SA. Provide additional briefing for new resources and maintain communications.
ALL	WEATHER	<ul style="list-style-type: none"> Be aware of changing weather conditions. Watch out for increasing winds and instability. Anticipate increased fire behavior conditions. Communicate any observed changes in weather and fire behavior. "Base all actions on current and expected behavior of the fire."
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Use caution and communicate when working above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	LINECONSTRUCTION	<ul style="list-style-type: none"> Follow the line construction protocols and safety precautions for direct and indirect line construction. Watch footing and spacing between firefighters, especially those working below. Make sure LCES is in place. Follow the "Downhill Line Construction Checklist" on IRPG page 9.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, deer, rattlesnakes, bees, and BEARS. Watch footing and hand placement around rocks. Use caution around gas and power lines. Personal hygiene is #1 when it comes to Poison Oak Prevention. Watch for agitated cattle that may charge. Follow all CDC and Agency COVID 19 protocols. Watch for unmarked mine shafts.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	MOP UP	<ul style="list-style-type: none"> Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Provide motivation to workers to maintain situational awareness. Carefully evaluate proposed mop up distances and evaluate hazards. Only mop up to the degree necessary to accomplish the desired end state when safe to do so. Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p.3-4).

5. Special Instructions: Sometimes the closest repeater is not the best. If you have poor command communications, try another command repeater (Channels 1-4). They are all linked. If you must hand program go exactly off the 205, including tones. The use of receive and transmit tones removes other, nearby radio traffic from other fires.

WATER USAGE REPORT

DATE: _____

Division / Group: _____

AGENCY ID / VENDOR: _____

I.e., Strike Team 1110C, Acme Water Tenders

REQUEST # _____

TURN INTO FINANCE DAILY

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**Please note if you made contact with property owner and their contact.

(Use reverse side if needed.)

Information: _____

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not inten ded to review the performance of equipment using the water on an incident.

Wildland Fire COVID-19 Screening Tool

Interim Standard Operating Procedures – 4/15/2020

NOTE: This Screening Tool represents interim guidance. Additional clarification will be coming as soon as it is defined.

DO YOU HAVE ANY OF THESE SYMPTOMS?

Today or in the past 24 hours, have you had any of the following symptoms listed below, **in addition to your normal work-related issues?**

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

If in doubt about any of these symptoms, consult a Physician.

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

Take temperature with touchless thermometer if available

INSTRUCTIONS FOR SCREENING

- If resource is positive for any symptoms prior to mobilization **DO NOT MOBILIZE.**
- At Entries – Consider the adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.
 - o If resource is positive for any symptoms including fever (over 100.4) at entry **DO NOT ANNOUNCE-** ask to step aside.
 - o Escort sick individual to isolation area.
 - o Isolation support personnel should begin documentation. Have sick individual contact Supervisor for further direction.
 - o Notify public health officials.
 - o Have individual transported as appropriate.
 - o Protect and secure any collected Personal Identifiable Information or Personal Health Information.

CAL FIRE IMT COVID-19 ACTIONS

PERSONNEL WITH COVID-19 SYMPTOMS

- **Symptoms per the CDC's current guidelines include the following:**
 - Cough, fever(100.4), chills, muscle pain, shortness of breath, sore throat, new loss of taste or smell
- **Incident Base or Fire Line**
 - Maintain appropriate face covering
 - Notify supervisor and proceed to CALMAT
 - Isolate and assess patient
 - Medical direction to test, return patient to home unit/agency for testing

CONTACTED OR EXPOSED PERSONNEL AND ASYMPTOMATIC

- Notify supervisor
- Maintain appropriate face covering
- Self-monitor for symptoms
- Employee will continue assignment with preventative measures

PREVENTATIVE MEASURES TO SLOW THE TRANSMISSION COVID-19:

- Wash your hands regularly with soap and water, or clean them with alcohol-based hand rub.
 - Maintain at least six feet distance between you and people coughing or sneezing.
 - Avoid touching your face.
 - Cover your mouth and nose when coughing or sneezing.
 - Stay home if you feel unwell.
 - Refrain from smoking and other activities that weaken the lungs.
 - Practice physical distancing by avoiding unnecessary travel and staying away from large groups of people.
 - Maintain proper personal care (healthy diet and rest)
-

CAL FIRE IMT 1 COVID SELF CHECK

[illegible]

SCREENING QUESTIONS

1. Are you feeling ill?
2. Are you having chills?
3. Do you have a new or worsening cough?
4. Do you have a new or worsening shortness of breath?
5. If thermometer is available, Check temperature. If >100.4

Contact supervisor immediately
IF YES to ANY of these questions!

REMINDE EMPLOYEES AFTER THE SCREENING TO:

- Wash their hands or use alcohol-based hand sanitizer often
- Do not shake hands, touch or hug others.
- Use physical distancing of 6 feet or greater whenever possible.

CREEK INCIDENT FINANCE

- **This fire is under Cost Apportionment**, All DIVS and OPBD will need to do a daily de-brief with the Cost Apportionment Team by calling 925-588-6902 or visit them in Room 7.
- Cal Fire Finance is located in the school library
- Federal CTRs, Shift Tickets, Manifests, Cost reports, Casual Hire forms and Claims can be emailed to 2020.creek.finance@firenet.gov or dropped off in Room 30.
- Local Government please check in with OES Agency Representative
- Please go by the Cal Fire Time Unit and start your time and update your FC-33
- Vendors please drop off your agreements and shift tickets to the appropriate ordering agency
- All injuries need to be reported to the appropriate COMP/CLAIMS Unit
- All property damage must be reported and documented
- Please report any Vehicle Damage, this includes Rental Vehicles

Training Specialist Message

****SOUTH ZONE ONLY****

All State, Federal and local government agency trainees working on Position Task Books need to be registered with the Incident Training Specialist. This will ensure that each trainee receives proper credit and documentation for their assignment.

The Training Specialist is located next to Check-In.

Before trainees start the Demob process, please close out with the Training Specialist. Trainees will need to bring:

- Position Task Book
- ICS-225 Incident Personnel Performance Rating
- Evaluation Record

KIMBERLY BUNDY

Training Specialist

(530) 739-5833

Human Resource Message

Andrea Cabida, I am the Human Resource Specialist assigned to the incident with CA Team 5. As the Human Resource Specialist, I am available to incident personnel to provide work environment information and assist with conflict resolution if needed. If I can be of assistance to you, please let me know. You can contact me by cell phone at 707-330-9939 or via e-mail at andrea.cabida@usda.gov. You can call, text, or email anytime.

As a reminder, we have a zero tolerance for illegal drugs, alcohol, sexual harassment, and any other type of inappropriate behavior. We expect all incident personnel to treat each other with dignity and respect, and to work as a team to support a positive work environment.

Be Safe! Keep your positive attitude and have a great day!

Hours are 0600 to 2200
Andrea Cabida- HRSP- 707-330-9939;
andrea.cabida@usda.gov

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a few people on the incident for any peer support related needs. The best way to get a hold of them is to call them directly.

Amber Henderson 805 794-1690

Mike DeLeo 805 573-2419

or

CAL FIRE Peer Support/Helpline

916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543

Mike Aiello 916-584-0548

Warren Parrish 916-823-6641

Shawna Powell-530 717-0667

Nikole Schutz 916-709-0434

Jeremy Sanders- 916 281-6472

Amy Head 916-956-3277

Chris Lomanto 916-247-6974

Connie Quarisa 916-213-8697

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

Stay Out! – Flagging Combinations for Sensitive Areas

- READs will be using flagging for areas to avoid suppression activities. There are two pieces to watch for.
 - Strip of white and a strip of blue/black.
- For more information, please consult with a READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and could bring about a dangerous situation to others on the line.

Riparian Areas

- Meadows are natural barriers. Tie the line to them and not through them.
- Stream and creeks should be approached with care. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through.

Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

Tree Felling During Fire Line Creation

- Only cut down trees that are necessary during line construction.
 - Ask yourself, "do I really need to remove this tree? Would removal of lower hanging limbs be sufficient?"
- Avoid cutting hardwoods like black oaks when possible.

Removing Fuels in the Forest

Trees across the Sierra National Forest have a monetary value. If this can be done safely and without compromising the line, consider creating a shaded fuel break. A shaded fuel break means some trees will remain with a certain spacing as stated below. This more commonly applies to indirect and contingency lines.

1. Cut trees with a 20' x 20' crown spacing. This means leave one tree untouched every 20 feet with all other trees removed. The 20 feet spacing is measured from the edge of the untouched tree's branches to the next untouched tree (see image to the right). The single tree left should be undamaged and appear healthy. *Healthy = no dead tops, multi tops or obvious signs of disease*
2. Deck all trees cut over a 10" DBH. Decking is to stack the trees in a linear fashion.

* = 20 Feet Spacing

RESOURCE ADVISOR MESSAGE

Removal of Fire Burnt Trees on Federal Land along Roadways

Clearing trees along the roadways on National Forest land needs to follow the following guidelines:

Cut trees that:

- No longer have any needles left or remaining needles are black, charred and dry
- Have 60% or more of the green crown (branches with needles) that is scorched
- Have deeply charred bark that no longer has any defining characteristics such as bark shows no grooves, no fissures, and no possible puzzle like appearance and/or natural coloration.

Keep trees that are:

- Vigorous and most likely to survive. These should have green, pliable needles, and have 40% or more of a green crown.
- If a tree has 40% or more of a green crown and the bole of the tree is not burnt through, consider leaving the tree.
- Tree has defining characteristics like bark shows grooves, fissures, and may have a puzzle like appearance and/or natural coloration.
- Not a hazard to the road.

Trees that are painted with a green letter "L" are NOT to be cut. They are "Leave" trees.

OHV Routes (Brewer, Red Mtn, & Coyote Lakes Areas)

- Do not use heavy equipment on these routes. They will also likely damage the heavy equipment due to large cobbles and boulders. These are highly prized 4x4 routes that attract people from all over the country.
- Constructing line to meet up with the OHV routes is allowed.
- Using existing OHV routes as a firing line is allowed.

Keep up the good work for cultural and natural resources by doing the following:

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing suppression information and working alongside READs.
- To the extent possible, when moving on to a new area leave the former better than you found it.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
