

INCIDENT ACTION PLAN CREEK INCIDENT

CA-SNF-001391
P5NJ3F(0515)

WEDNESDAY

SOUTH ZONE

OPERATIONAL PERIOD

9/30/2020 0700

to

10/1/2020 0700

Briefing on CDF TAC 24
Public Information (844) 668-3473

LIVE STREAM

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">CREEK</p>	2. Operational Period:	Date From: 9/30/2020 Time From: 0700	Date To: 10/1/2020 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, communities, businesses, and critical infrastructure.
- Establish and strengthen cooperator, partner, and stakeholder relationships.
- Minimize the threat of exposure to COVID-19 within the incident and surrounding communities by adhering to the CDC COVID-19 Guidelines.
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

- Keep the fire north of Pine Flat Lake
- Keep the fire south of the South Fork of Merced River and the Minarets Range
- Keep the fire east of Highway 41
- Keep the fire west of the Mono and Silver Divide Range

General Situational Awareness:

- Utilize IRPG checklists to manage risk.
- Ensure Lookouts are established, Escape Routes and Safety Zones are clearly identified.
- Ensure effective communications are occurring by giving clear instructions and asking clarifying questions.
- Continue to adhere to COVID 19 preventative measures.
- Potential for increased fire behavior when the air clears.

5. Site Safety Plan Required? Yes No

Creek South Zone Fire Weather Forecast

FORECAST NO: 23

NAME OF FIRE: Creek Fire

PREDICTION FOR: 0700 Wed – 0700 Thu

UNIT: CA-SNF-001391

SHIFT DATE: 09/30-10/01

SIGNED: *Mark Pellerito*

Incident Meteorologist - Mark Pellerito

TIME/DATE FORECAST ISSUED: 1900 09/29/20

IMET PHONE: 240-205-4030; mark.pellerito@noaa.gov

WEATHER DISCUSSION:

Hot and dry high pressure continues to build. While the inversion aloft will increasingly trap more smoke, it will also gradually lower in altitude with time which will expose more of the ridgetops to free mixing very dry air, especially late tonight into Thursday. This will lead to humidity recoveries becoming very poor, with nighttime thermal belts enhancing for the mid to upper slopes. Winds will continue to be simply terrain-driven; downslope to downcanyon winds for nights-early mornings, and sunlit upslope to upcanyon late mornings through afternoons.

WEATHER FORECAST FOR WEDNESDAY: Sunny, hot, and dry with typical terrain-driven winds.

TEMPERATURES: Max 2500-5000' 84-94° ...above 5000' 72-84° **24 HR Trend:** Little change.

HUMIDITY: Min 2500-5000' 15-25% ...above 5000' 15-25% **24 HR Trend:** Little change.

20-FOOT WIND:

RIDGETOP - East-northeast 3-6 mph to mid morning, then west-northwest 6-12 mph with gusts 15-18 mph.

SLOPE/VALLEY - Downslope/downcanyon 2-5 mph early, becoming upslope/upcanyon 3-6 mph with gusts to 12 mph in the afternoon.

STABILITY/INVERSION: Inversion a bit stronger; smoke thinning out 1200-1400. Inversion lifting to about 8000 ft.

WEATHER FOR WEDNESDAY NIGHT: Clear. Terrain-driven downslope winds. Poor RH recovery, especially mid-to-upper slopes (thermal belts and ridges) outside of deep drainages/low spots/lakes.

MINIMUM TEMPERATURES:

2500-5000' 64-72° ...Above 5000' 55-65° but drainage spots 45-50°. **24 HR Trend:** 1-2° warmer.

MAXIMUM HUMIDITY:

Max 2500-5000' 25-35% ...Above 5000' 25-35%; 17-22% late (drainage spots higher). **24 HR Trend:** 5-10% drier.

20-FOOT WIND:

RIDGETOP - Variable early, then east-northeast 5-10 mph with gusts to 15 mph.

SLOPE/VALLEY - Downslope/downcanyon 3-6 mph; gusts as much as 12 mph in east-to-west aligned drainages (South Fork San Joaquin; Huntington Lake).

EXTENDED FORECAST:

THURSDAY... Sunny, hot, and dry. Max temps 72-94° (little change). Min RH 12-22% (3-5% drier). Winds downcanyon 2-6 mph in morning; then upslope to west 5-8 mph; gusts to 12-14 mph in afternoon. NOTE: Inversion stronger, trapping smoke; yet also lower to about 6500 feet. *Freely mixing unstable air for upper slopes/ridges.*

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 002	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire South Zone	OPERATIONAL PERIOD: 09/30/20 0600-0600
DATE ISSUED: September 29, 2020	TIME ISSUED: 19:00
UNIT: CA-SNF-001391	SIGNED: 
	Typed/printed: Jeff Shelton (LTAN)

INPUTS

WEATHER SUMMARY: ***Continued...Warm, Dry and Smokey***
A strong, nearly stationary regional high-pressure system will again support a locally stable atmosphere. Expect overnight RH recoveries leading into the burn period to be poor. Fully consuming heavy fuels will provide increased smoke production, and shading, under a strengthening inversion.

Max. Temperature: 84-94 degrees **Min. Humidity:** 15-25% **Winds(Day):** Terrain Driven/ West to 12 Gusts 18
Min. Temperature: 55-64 degrees **Max. Humidity:** 17-25% **Winds(Night):** Downslope/ East to 12 Up High

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- PIG values remain high...***With Poor RH Recovery...Expect Receptive Fuels Early!***
- Respect any tree torching... ***Tight Crown Spacing will Support Crown Fire Runs!***
- Fine Dead Fuel Moistures Down to 3%...***All Fuel Size Classes are Available to Burn!***
- Dry, large fuels (<8%-1000 hr.) carrying fire...***Are Moving Slowly... but Relentlessly!***
- Identify Wind, Slope and Fuel Alignment ...***Short Runs Can Happen with Preheating!***
- If you can breathe better, so can the fire...***Improved Visibility Equals More Active Fire!***
- The fireline has become static in many areas ...***Expect More Rollout... and Tree Failure!***

SPECIFIC:

All Divisions: Lower Slopes-Well Established, Moderate Intensity, Fuels Driven, Surface Fire...
Isolated Torching, and Short Runs in Steep, Aligned Topography...

Upper Slopes- Slightly Ventilation Enhanced Moderate Intensity Surface Fire...
Isolated Torching, Short Runs, Short Range Spotting...

Flame Lengths- 4 to 6 ft. in Grass, Up to 30 ft. in Brush...Remaining Active Overnight!

Rate of Spread- Up to 40 chains/hour in Grass, Up to 60 chains/hour in Brush... Slowing Overnight.

Spotting Distances- Up to .1 miles in Grass/Brush, Up to .25 miles in Timber (From Torching)

Probability of Ignition- 60% Shaded, 90% Unshaded; Down to around 30% overnight

AIR OPERATIONS: Sunrise: 0652 Sunset: 1844

Expect fair to poor smoke dispersion with minimal clearing from diminished diurnal transport winds. Mixing heights will raise to 8000' by 1400. Anticipate greatly reduced visibility in the sheltered valleys early. Around noon, upslope/upvalley flow may support battling winds in the complex, dissecting terrain commonly found along the entire fire perimeter.

SAFETY

Don't Live in the Now!
Base All Action on CurrentAND.... Expected Fire Behavior!
To Engage Safely.... Look Ahead...Seconds...Minutes...Hours!

Fuels and Fire Behavior Advisory

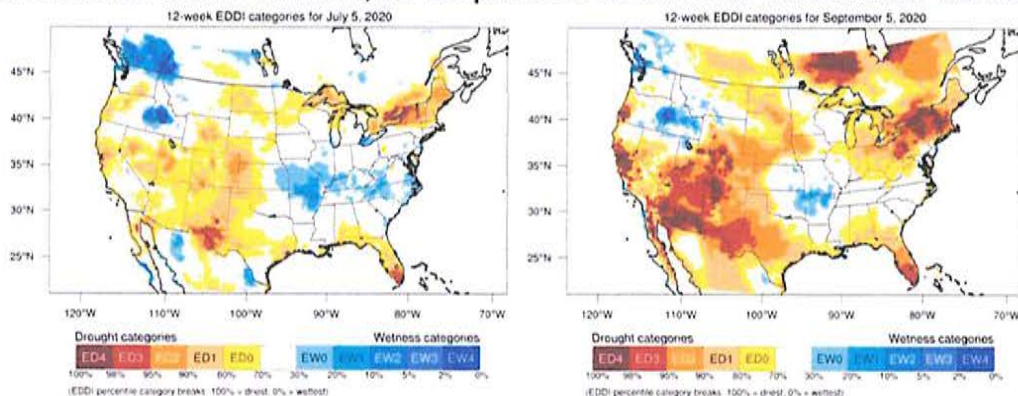

Southern California Geographic Area

September 11, 2020

Subject: Live and dead fuels are extremely dry across the mountain predictive service areas (PSAs). Extreme fire behavior and rapid rates of spread are occurring in these areas, even when winds are light. The chance for extreme fire behavior will increase over the next couple of months as winds increase and become more prevalent. Fire behavior will remain elevated across the mountains of southern and central California, until significant rainfall occurs.

Discussion: A progressive pattern brought near to slightly below normal temperatures from June through August 11th and fire activity was below normal. High pressure became strong and dominant from August 12th into September, bringing well above normal temperatures and very low humidities. Live and dead fuel moisture over the mountains are much lower than normal, due to the absence of monsoonal showers and thunderstorms, combined with very warm and dry conditions.

Difference from normal conditions: Rainfall was 50% to 70% of normal this year in the Sierras, while the rest of the mountainous areas in Southern California received slightly above normal rainfall. Due to hot and dry conditions and little to no rainfall this summer, the dead fuel moistures across all mountain areas are near or below the 3rd percentile and live fuel moistures are between 50% and 70%. ERC's are running near or above the 97th percentile. Computer models indicate high pressure will dominate through at least the end of October, so the potential for extreme fire behavior will increase.

The Evaporative Demand Drought Index (EDDI) is an experimental drought monitoring and early warning guidance tool. It examines how anomalous the atmospheric evaporative demand (E_0 ; also known as "the thirst of the atmosphere") is for a given location and across a time period of interest. The figures show the 12 week period preceding July 5 (left) and Sep 5 (right).

<https://psl.noaa.gov/eddi/>

Concerns to Firefighters and the Public:

- Firefighters need to be prepared for possible extreme fire behavior and dangerous rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All firefighters need to remain aware of current and expected weather and burning conditions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at: <https://gacc.nifc.gov/oscc/predictive/weather/index.htm>.
- Red Flag conditions from the National Weather Service and weather at: <https://www.wrh.noaa.gov/fire2/cafw/>.
- Monitor the Santa Ana Wildfire Threat index during the season at: <https://fsapps.nwcg.gov/psp/sawti>

Area of Concern: The mountains are the driest area in the region and are the main concern heading forward. The associated PSAs are SC01, SC02, SC03, SC09, SC10, and SC11.

SAFETY MESSAGE

CREEK INCIDENT- SOUTH ZONE
CA-SNF-001391

SEPT. 30- OCT. 1, 2020 0700-0700

Major Hazards and Risks:

- HWY 168 is a busy highway, the public is now sharing the road with us. The speed limit on the lower portions of HWY 168 will increase to 60 MPH today.
- Narrow, dusty roads with poor visibility due to dust and smoke.
- Hazardous snags, rolling rocks and debris.
- Hiking/working in rough, extremely steep terrain.
- Spotting and the potential for extreme fire behavior, rapid rates of spread.
- Fatigue and dehydration. Warm weather with low RH's.
- Working around aircraft operations. Bucket drops, possible retardant drops.
- Vehicle operations in camps, some areas have tight clearances.
- Working around heavy equipment.

“SEE IT.....SAY IT!

Watch Out Situation of the Day

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Human Factor Barriers to Situation Awareness and Decision Making

Low Experience Level with Local Factors:

- Unfamiliar with the area or the organizational structure

Distraction from Primary Duty:

- Radio traffic
- Conflict
- Previous errors
- Collateral duties
- Incident within an incident
- Cell phone distractions

Fatigue:

- Carbon Monoxide
- Dehydration
- Heat stress and continuous long shifts during a busy fire season
- Keep an eye on your personnel, make sure they're doing OK.

Safety Officers: Brian Savage, SOF1 & Dave Welch, SOF1

INCIDENT RISK ANALYSIS

CA-SNF-001391

(ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Traffic volume is high in the area. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Conduct thorough assessments before starting work. Ensure LCES is in place. Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. Increase the level of SA. Provide additional briefing for new resources and maintain communications.
ALL	WEATHER	<ul style="list-style-type: none"> Be aware of changing weather conditions. Watch out for increasing winds and instability. Anticipate increased fire behavior conditions. Communicate any observed changes in weather and fire behavior. "Base all actions on current and expected behavior of the fire."
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Use caution and communicate when working above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> Follow the line construction protocols and safety precautions for direct and indirect line construction. Watch footing and spacing between firefighters, especially those working below. Make sure LCES is in place. Follow the "Downhill Line Construction Checklist" on IRPG page 9.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, deer, rattlesnakes, bees, and BEARS. Watch footing and hand placement around rocks. Use caution around gas and power lines. Personal hygiene is #1 when it comes to Poison Oak Prevention. Watch for agitated cattle that may charge. Follow all CDC and Agency COVID 19 protocols. Watch for unmarked mine shafts.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	MOP UP	<ul style="list-style-type: none"> Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Provide motivation to workers to maintain situational awareness. Carefully evaluate proposed mop up distances and evaluate hazards. Only mop up to the degree necessary to accomplish the desired end state when safe to do so. Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p.3-4).

INCIDENT NAME:

**Creek Fire
South Zone**

Operational Period: 0700-0700

5. Special Instructions: Sometimes the closest repeater is not the best. If you have poor command communications, try another command repeater (Channels 1-4). They are all linked. If you must hand program go exactly off the 205, including tones. The use of receive and transmit tones removes other, nearby radio traffic from other fires.

Information: _____

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

Wildland Fire COVID-19 Screening Tool

Interim Standard Operating Procedures – 4/15/2020

NOTE: This Screening Tool represents interim guidance. Additional clarification will be coming as soon as it is defined.

DO YOU HAVE ANY OF THESE SYMPTOMS?

Today or in the past 24 hours, have you had any of the following symptoms listed below, **in addition to your normal work-related issues?**

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

If in doubt about any of these symptoms, consult a Physician.

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

Take temperature with touchless thermometer if available

INSTRUCTIONS FOR SCREENING

- If resource is positive for any symptoms prior to mobilization **DO NOT MOBILIZE.**
- At Entries – Consider the adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.
 - o If resource is positive for any symptoms including fever (over 100.4) at entry **DO NOT ANNOUNCE**- ask to step aside.
 - o Escort sick individual to isolation area.
 - o Isolation support personnel should begin documentation. Have sick individual contact Supervisor for further direction.
 - o Notify public health officials.
 - o Have individual transported as appropriate.
 - o Protect and secure any collected Personal Identifiable Information or Personal Health Information.

CAL FIRE IMT COVID-19 ACTIONS

PERSONNEL WITH COVID-19 SYMPTOMS

- **Symptoms per the CDC's current guidelines include the following:**
 - Cough, fever(100.4), chills, muscle pain, shortness of breath, sore throat, new loss of taste or smell
- **Incident Base or Fire Line**
 - Maintain appropriate face covering
 - Notify supervisor and proceed to CALMAT
 - Isolate and assess patient
 - Medical direction to test, return patient to home unit/agency for testing

CONTACTED OR EXPOSED PERSONNEL AND ASYMPTOMATIC

- Notify supervisor
- Maintain appropriate face covering
- Self-monitor for symptoms
- Employee will continue assignment with preventative measures

PREVENTATIVE MEASURES TO SLOW THE TRANSMISSION COVID-19:

- Wash your hands regularly with soap and water, or clean them with alcohol-based hand rub.
- Maintain at least six feet distance between you and people coughing or sneezing.
- Avoid touching your face.
- Cover your mouth and nose when coughing or sneezing.
- Stay home if you feel unwell.
- Refrain from smoking and other activities that weaken the lungs.
- Practice physical distancing by avoiding unnecessary travel and staying away from large groups of people.
- Maintain proper personal care (healthy diet and rest)

CAL FIRE IMT 1 COVID SELF CHECK

DATE	Self Check Completed:	Sanitized:	TIME	COMPLETED BY:

SCREENING QUESTIONS

1. Are you feeling ill?
2. Are you having chills?
3. Do you have a new or worsening cough?
4. Do you have a new or worsening shortness of breath?
5. If thermometer is available, Check temperature. If >100.4

Contact supervisor immediately
IF YES to ANY of these questions!

REMIND EMPLOYEES AFTER THE SCREENING TO:

- Wash their hands or use alcohol-based hand sanitizer often
- Do not shake hands, touch or hug others.
- Use physical distancing of 6 feet or greater whenever possible.

FINANCE MESSAGE

AVAILABLE OPTIONS FOR SUBMITTING TIME:

Resources can submit time electronically (email below) or hard copy. There will be drop boxes for CTRs and shift tickets in each spike camp and at ICP. Documents will be picked up daily at spike camps and ICP and transported to Finance.

If you opt to use the fillable PDF CTR or Shift Ticket you have a couple of options for submitting them to Finance:

Option 1- Resource fills out fillable PDF and submits to Supervisor for signature. Supervisor digitally signs PDF, sends signed copy back to Resource **AND** on to Finance.

Option 2 - Resource fills out fillable PDF, Supervisor (if comfortable) signs directly on the same device. Resource e-mails the PDF directly to Finance.

Crews: please submit a copy of your manifest to Finance – it can be electronic or hard copy. Please note any AD crew members on the manifest with their position code and ECI number if known.

Single Resource ADs: Please submit your Single Resource Casual Hire form to Finance – it can be electronic or hard copy.

Cooperators: Please submit your agreement and resource order to Finance – either electronically or hard copy. Please don't skip any pages and assure that the signature page is shown.

ALL OVERHEAD, CREWS (INCLUDING AGENCY ENGINE, AIRCRAFT AND HAND CREWS) AND COOPERATORS FROM BOTH THE NORTH AND SOUTH ZONE WILL HAVE THEIR TIME PROCESSED BY NORTH ZONE FINANCE.

Contractors: Please submit the finance portion of your contract/agreement and resource order to Finance – either electronically or hard copy. Please don't skip any pages and assure that the signature page is shown.

ALL PRIVATE VENDORS FROM BOTH THE NORTH AND SOUTH ZONE WILL HAVE THEIR TIME PROCESSED BY SOUTH ZONE FINANCE.

Please try to submit time at least every other day. You may choose from any of the options above as long as the copy we receive in finance is legible. What works best for you, will work for us.

This fire is under Cost Apportionment, All DIVS and OPBD will need to do a daily de-brief with the Cost Apportionment Team by calling 925-588-6902 or visit them in Room 7.

Human Resource Message

Situational Awareness

Situational awareness is a very important skillset! It is also an invaluable tool to enforce and provide to your team. It promotes safety as well as leadership and teamwork. As we move the ICP, set up other work locations and comply with unprecedented mitigations due to COVID-19, it is more important to be aware of your physical and mental health and awareness. Working together, watching out for each other, continuing to make sure we come home healthy and together is the common goal. Thank you for an amazing work ethic and for adding value to the mission!

"Paying attention and awareness are universal capacities of human beings."

Jon Kabat-Zinn

Andrea Cabida- HRSP-707-330-9939 andrea.cabida@usda.gov. I am located at the China Peak Camp. You can call, text or email me if you need anything.

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a few people on the incident for any peer support related needs. The best way to get a hold of them is to call them directly.

Amber Henderson 805 794-1690

Mike DeLeo 805 573-2419

or

CAL FIRE Peer Support/Helpline

916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543

Mike Aiello 916-584-0548

Warren Parrish 916-823-6641

Shawna Powell-530 717-0667

Nikole Schutz 916-709-0434

Jeremy Sanders- 916 281-6472

Amy Head 916-956-3277

Chris Lomanto 916-247-6974

Connie Quarisa 916-213-8697

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

Stay Out! – Flagging Combinations for Sensitive Areas

- READs will be using flagging for areas to avoid suppression activities. There are two pieces to watch for.
 - Strip of white and a strip of blue/black.
- For more information, please consult with a READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and could bring about a dangerous situation to others on the line.

Riparian Areas

- Meadows are natural barriers. Tie the line to them and not through them.
- Stream and creeks should be approached with care. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through.

Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

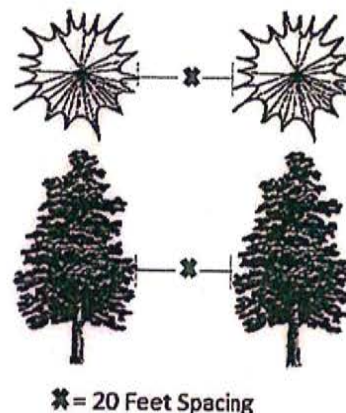

Tree Felling During Fire Line Creation

- Only cut down trees that are necessary during line construction.
 - Ask yourself, "do I really need to remove this tree? Would removal of lower hanging limbs be sufficient?"
- Avoid cutting hardwoods like black oaks when possible.

Removing Fuels in the Forest

Trees across the Sierra National Forest have a monetary value. If this can be done safely and without compromising the line, consider creating a shaded fuel break. A shaded fuel break means some trees will remain with a certain spacing as stated below. This more commonly applies to indirect and contingency lines.

1. Cut trees with a 20' x 20' crown spacing. This means leave one tree untouched every 20 feet with all other trees removed. The 20 feet spacing is measured from the edge of the untouched tree's branches to the next untouched tree (see image to the right). The single tree left should be undamaged and appear healthy. *Healthy = no dead tops, multi tops or obvious signs of disease*
2. Deck all trees cut over a 10" DBH. Decking is to stack the trees in a linear fashion.

RESOURCE ADVISOR MESSAGE

Removal of Fire Burnt Trees on Federal Land along Roadways

Clearing trees along the roadways on National Forest land needs to follow the following guidelines:

Cut trees that:

- No longer have any needles left or remaining needles are black, charred and dry
- Have 60% or more of the green crown (branches with needles) that is scorched
- Have deeply charred bark that no longer has any defining characteristics such as bark shows no grooves, no fissures, and no possible puzzle like appearance and/or natural coloration.

Keep trees that are:

- Vigorous and most likely to survive. These should have green, pliable needles, and have 40% or more of a green crown.
- If a tree has 40% or more of a green crown and the bole of the tree is not burnt through, consider leaving the tree.
- Tree has defining characteristics like bark shows grooves, fissures, and may have a puzzle like appearance and/or natural coloration.
- Not a hazard to the road.

Trees that are painted with a green letter "L" are NOT to be cut. They are "Leave" trees.

OHV Routes (Brewer, Red Mtn, & Coyote Lakes Areas)

- Do not use heavy equipment on these routes. They will also likely damage the heavy equipment due to large cobbles and boulders. These are highly prized 4x4 routes that attract people from all over the country.
- Constructing line to meet up with the OHV routes is allowed.
- Using existing OHV routes as a firing line is allowed.

Keep up the good work for cultural and natural resources by doing the following:

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing suppression information and working alongside READs.
- To the extent possible, when moving on to a new area leave the former better than you found it.

Travel Map

Creek Incident

CA-SNF-001391

East Side of Fire from South ICP

Take Lodge Rd NW 1.1 miles to SR-168. Take a right on SR-168 for approximately 37 miles.

West Side of Fire from South ICP

Take Lodge Rd NW 1.1 miles to SR-168. West on SR-168 for 1.6 miles to Auberry Rd. North on Auberry Rd for 2.9 miles. Right on Tollhouse Rd for 6.3 miles.

West Side of Fire from North ICP

Take Rd 200 NE for 14 miles. Left on Rd 222 for 0.7 miles.

East Side of Fire from South ICP

Take Rd 200 W for 0.4 miles to SR-41. N on SR-41 for 24 miles. Right on Big Sandy Rd for 6.5 miles. Left on Sky Ranch Rd for 2.6 miles. Right on "Save the Rock" Rd for 2.2 miles

South ICP Location

33326 Lodge Rd, Tollhouse, CA 93667

North ICP Location

45077 Road 200, O Neals, CA 93645

Ground Support Location

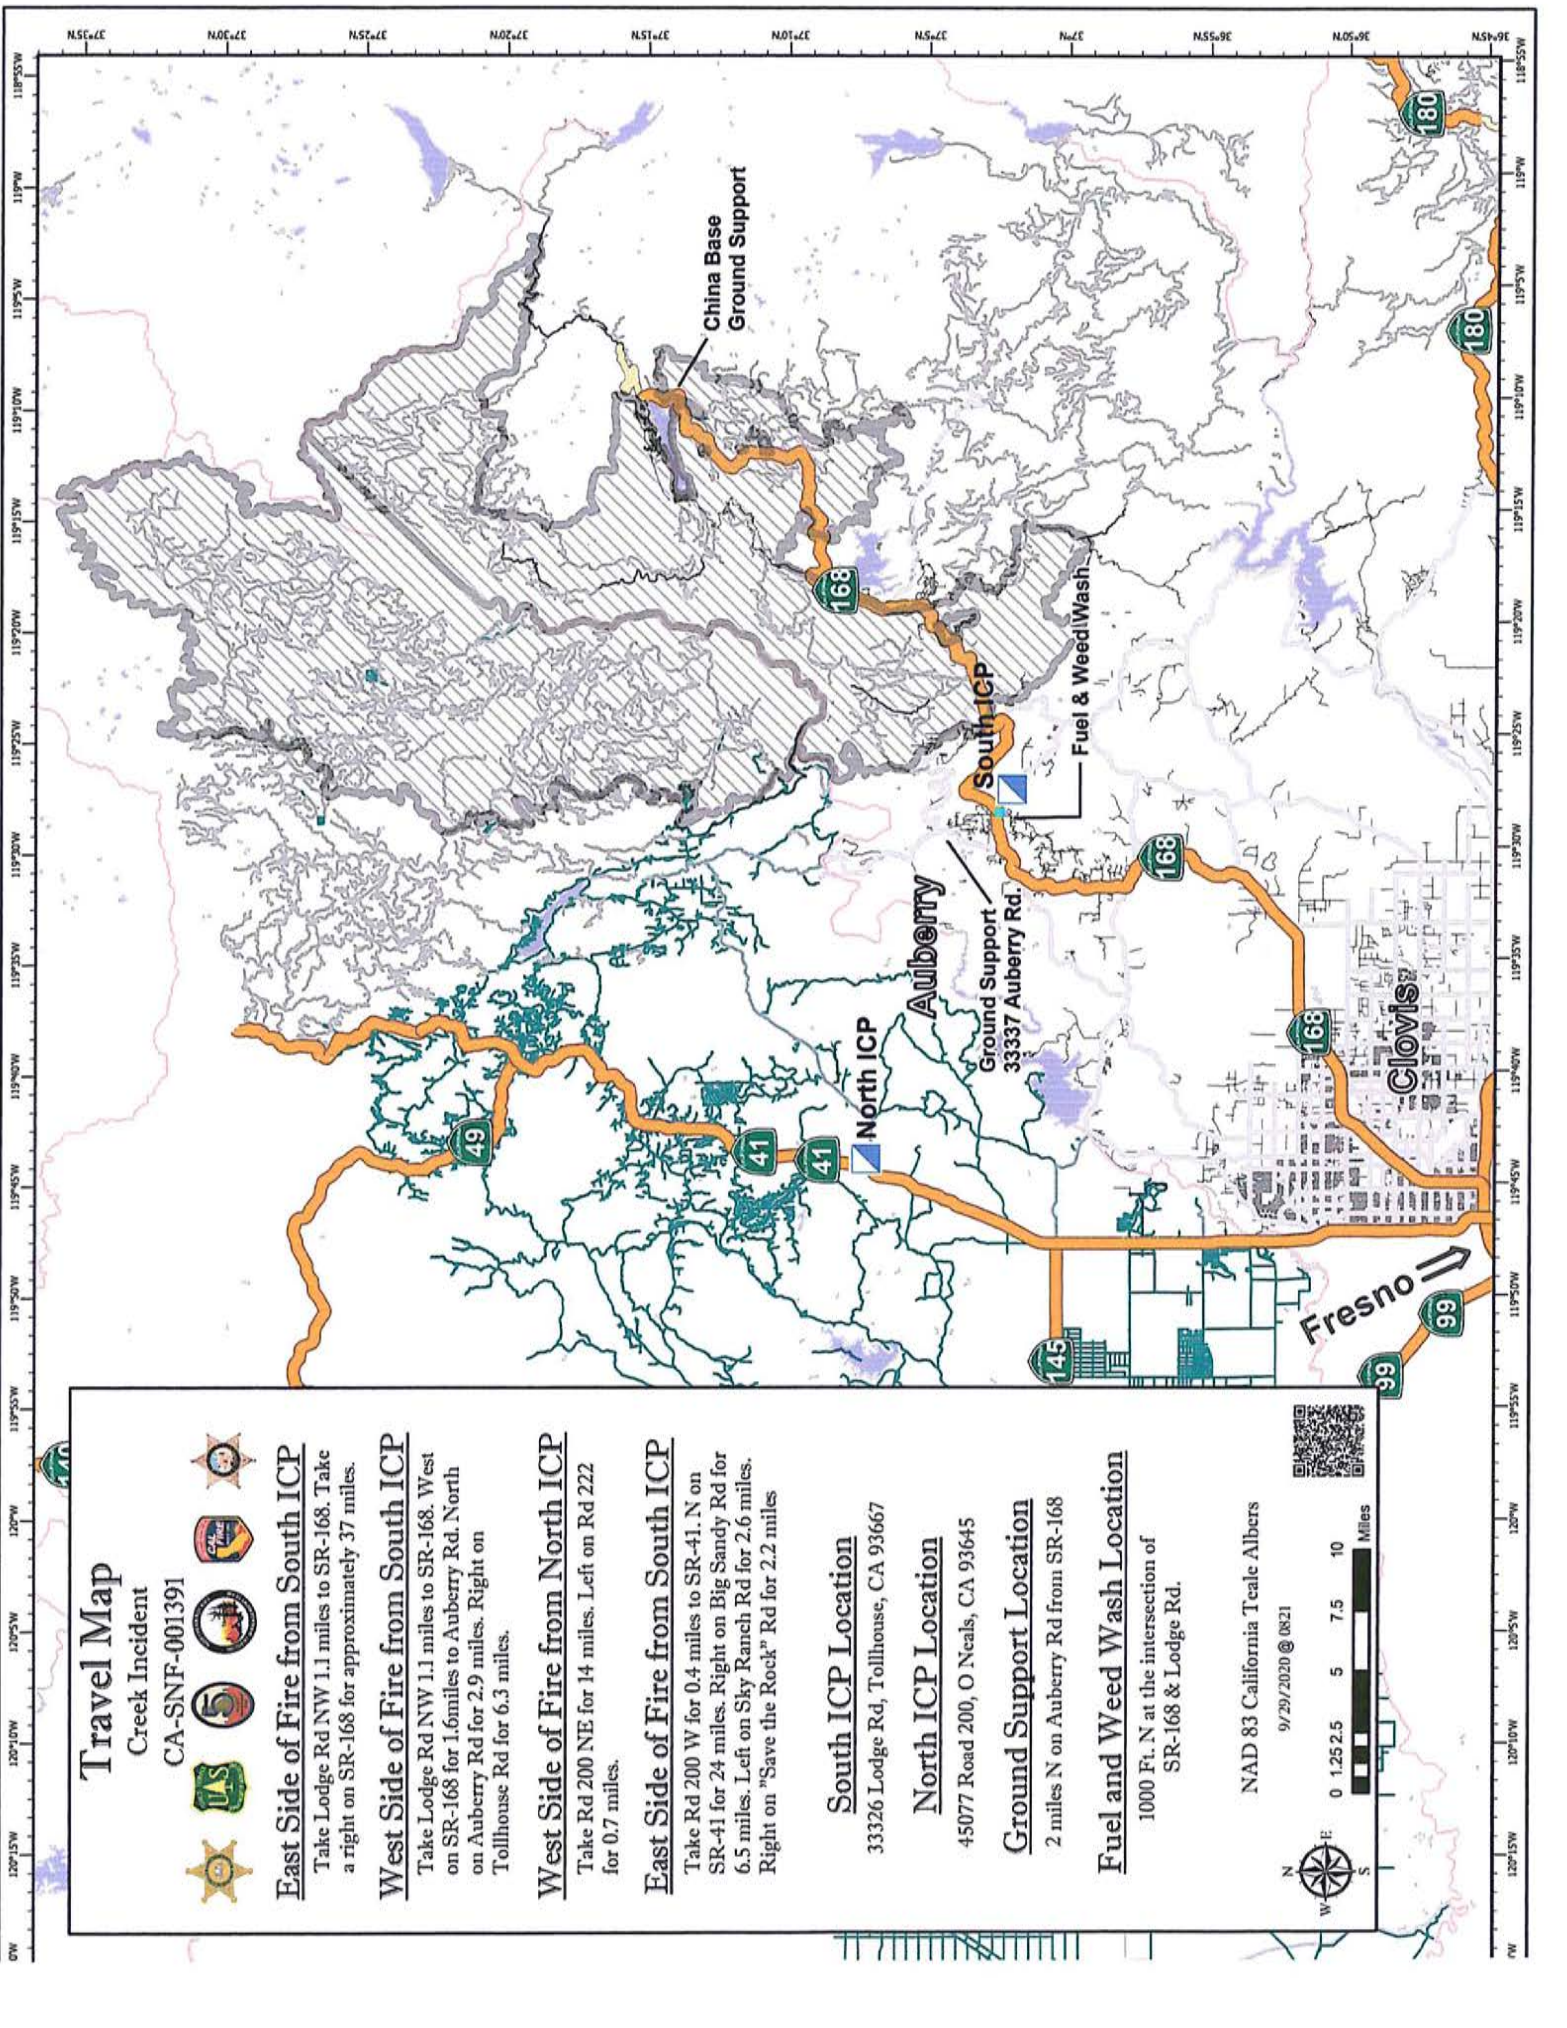

2 miles N on Auberry Rd from SR-168

Fuel and Weed Wash Location

1000 Ft. N at the intersection of SR-168 & Lodge Rd.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*drop point, intersection, helispot, Lat. / Long, hazards*) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
