CREEK FIRE

CA-SNF-001391
P5 NJ3F (0515)

0700 - Operations Briefing

1700 - Planning Meeting

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Creek Fire</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="padding-right: 10px;">Date From:</td> <td style="padding-right: 10px;">10/21/2020</td> <td style="padding-right: 10px;">Date To:</td> <td>10/21/2020</td> </tr> <tr> <td>Time From:</td> <td>0700</td> <td>Time To:</td> <td>1900</td> </tr> </table>	Date From:	10/21/2020	Date To:	10/21/2020	Time From:	0700	Time To:	1900
Date From:	10/21/2020	Date To:	10/21/2020						
Time From:	0700	Time To:	1900						

3. Objective(s):

Leaders Intent:

- Suppress and repair the Creek Fire using a full range of management tactics & strategies that minimize exposure to firefighters, communities and reduce the risk to COVID19.

Management Objectives:

- Ensure safety of emergency responders & public utilizing strategies & risk management processes with the highest probability of success.
- Protect natural and cultural resources, commercial timber and critical infrastructure while utilizing resource and agency advisors.
- Repair areas disturbed by fire suppression activities to minimize potential for excessive erosion and impacts to natural and cultural resources.
- Foster and maintain good relationships with local cooperators, stakeholders and public while providing coordinated, accurate and timely information.
- Effectively manage cost and track accountable property to assist with financial reconciliation.

Control Objectives

- Keep the fire south of the South Fork of Merced River and the Minarets Range.
- Keep the fire south and west of Pond Lily Lake and the Silver Divide.
- Keep the fire within the existing fire footprint.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Creek Fire Weather Forecast (Above 5000 FT)

FORECAST NO: 44

NAME OF FIRE: Creek Fire

PREDICTION FOR: 0600 Wed To 0600 Thu

UNIT: CA-SNF-001391

SHIFT DATE: 10/21/20

SIGNED: **John Pendergrast**

TIME/DATE FORECAST ISSUED: 1800 10/20/20

Incident Meteorologist - John Pendergrast
IMET PHONE: 240-499-6649

WEATHER DISCUSSION: Gradually cooling temperatures will occur with near normal by late in the week. With generally light winds, smoke will accumulate near fires and adjacent valleys due to strong nighttime inversions. General winds will remain light and slope oriented day and overnights. After a dry afternoon, limited RH recovery will occur nightly upper slopes.

WEATHER FORECAST FOR WEDNESDAY: Mostly sunny. Mixed haze/smoke with some afternoon improvement.

TEMPERATURES: Max 65° to 70 **24 HR Trend:** Lower.

HUMIDITY: Min 15 to 21% **24 HR Trend:** Same.

20-FOOT WIND: Variable 2 to 4 mph, becoming Southwest 4-7 mph with afternoon gusts 12 mph upper slopes and ridges in afternoon.

SLOPE/VALLEY – Downslope 1-3 mph early, then upslope 5-9 mph; ridge gusts 12 mph in aligned drainages.

STABILITY/INVERSION: Moderate to strong with smoke remaining in drainages near fire in morning. Inversion lifts to higher elevations by around 1400. Haines 4

WEATHER FOR WEDNESDAY NIGHT: Southwest winds 4 to 7 mph through dusk then diminishing and becoming light down drainage overnight. Smoke and reduced air quality near fires due to developing inversion.

MINIMUM TEMPERATURES:
42 to 48° except elevated drainages 31-36°. **24 HR Trend:** Same.

MAXIMUM HUMIDITY:
34 to 39%; (upper drainages up to 70 %). **24 HR Trend:** Higher.

20-FOOT WIND: RIDGETOP – Southwest 7 to 11 mph early, becoming variable 2 to 6 mph late.

UPPER SLOPES/VALLEY - Downslope/downcanyon 3 to 6 mph; gusts 10 mph evening in east-to-west aligned drainages (Huntington Lake; South Fork San Joaquin).

EXTENDED FORECAST:

THURSDAY...Mixed smoke and haze then mild. Max temps 63 to 69 (lower). Min RH 15 to 21% (same). Winds down canyon 3-5 mph early; then Southwest 6 to 10 mph with higher gusts to 12 mph (especially ridges mid to late afternoon).

10-hr (%)	4																
100-hr (%)	6																
1000-hr(%)	6																
Live Fuels	2/3 cured																

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Heavy fuels are very dry and holding heat. Expect interior creeping and smoldering in the duff and heavy fuels.
- Expect spots outside the perimeter or new starts to spread rapidly, torch and spot. This is elevation and fuel type dependent. At higher elevations spots, will establish in timber litter, creep, torch, and spot again. In lower elevations spots will establish in grass/brush, rapidly spread with surface fire, torch, and spot.
- The smoke inversion is impacting fire behavior. Fire above the inversion will become active during the day when exposed to the sun. Fuels are burning through the night above the inversion where there is heat near available fuels. Below the inversion, smoke is dense enough to shade fuels and reduce fire behavior.

Probability of Ignition (4-8,000')					
90%/80% (Unshaded/Shaded)					
Spotting Potential: Minimal					
Spotting Distance: less than ¼ mile (short range)					
Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	10	14			
TL7	3	4	ERC	84	97th
SH1	4	16	BI	67	90th

SPECIFIC:

- DIV M: Fire will be active with surface fire, single tree torching, and short-range spotting west of Lake Edison along the Onion Springs OHV road, south of Pincushion Peak, north of the South Fork of the San Joaquin River near Rock Creek, and above the Middle Fork of the San Joaquin River near Junction Bluffs.
- DIVS N – DIVS Z: Larger fuels and deep duff are continuing to burn out. Expect to see interior fuels to burn out with creeping/smoldering.
- DIV J - Fire continues to move slowly up into the wilderness and rocks at higher elevations following green vegetation and timber stringers. In the Middle Fork of San Joaquin River near the Lion Fire there is potential for fire to spread east.
- DIVS E-DIVS I and DIVS N – DIVS Z: Very little activity with scattered heat throughout divisions, creeping and smoldering where fuels exist. Potential torching and spotting if exposed to the sun.

SAFETY

Maintain awareness of areas where fuel continuity from leaf/needle drop could contribute to potential reburn and connecting hot areas to unburned fuels on fire perimeter and interior.

6. Work Assignments:

DIVISION I:
Task: Continue to hold and mop up control lines south of Red Top Mountain down to DP57. Continue snagging hazard trees in work areas and adjacent to the fire lines.
Purpose: Limit fire spread to the north and west protecting values at risk in those areas.
End State: Direct attack was successful stopping fire progression to the north and west.

DIVISION J:
Task: Monitor fire activity from the air and IR as smoke conditions allow. Identify opportunities to limit fire spread towards Red's Meadow and Devils Postpile. Protect private inholdings and government property where fire conditions allow and resources can safely engage.
Purpose: Protect private inholdings with minimal fire damage and there is a high probability of success.
End State: Reduce fire spread towards Yosemite National Park, Devils Postpile and Red's Meadow. Damage to private and government property is minimal.

6. Work Assignments:

Task: Mop up and patrol fire edge, mop up around Central Camp. Continue road improvement, snagging hazard trees in work areas and adjacent to the fire lines. Continue structural protection throughout division. Backhaul hose and trash. Identify suppression repair needs and accomplish objectives as established by suppression repair plan.

Purpose: Protect life and property with minimal fire spread threatening North Fork and Bass Lake and other private inholdings. Keep roads open for fire traffic. Provide safe access for firefighting resources, cooperators, and the public.

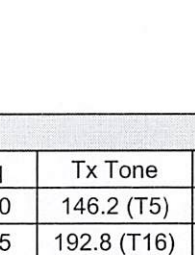

End State: Control lines are completed and no threat of fire spread. Bass Lake and adjacent communities are not impacted. No damage to private property. Major roads are clear of hazards. Firefighters, cooperators, and the public can travel major roads with minimal risk. Roads are kept open and access into the fire area is not compromised.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Operations: **October 21, 2020**

INCIDENT: Creek North	Date Prepared: October 20, 2020 TIME: 1600
Major Hazards and Risks: ➤ TEAM TRANSITION ➤ SITUATIONAL AWARENESS	
<p style="text-align: center;"><u>Team Transition</u></p> <ul style="list-style-type: none"> ✓ Know who you are working for, know who you are working with & obtain leaders intent. ✓ Insure you have the needed information for contacting incoming overhead. <p>Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.</p> <p>Factors for increased risks to fireline personnel.</p> <ul style="list-style-type: none"> ✓ Not all Resources know who is in command. Accepting Increased risk as completion of the task gets near. ✓ Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system. ✓ Not having the proper phone numbers for the new incoming overhead if radio or face to face are not the effective manner for communicating. <p>Mitigation action:</p> <ul style="list-style-type: none"> ➤ <i>Communications:</i> Maintain existing communications with your own and adjacent resources while you are developing communications with incoming resources and your “new” supervisor. 	<p style="text-align: center;"><u>Situational Awareness</u></p> <p><u>Communication:</u> When working in an area where others are working, take a pause. Observe your surroundings & your situational awareness. Is your work or the work of others maintaining a safe work environment.</p> <ul style="list-style-type: none"> • Have you had the conversation or given the heads up to those in your workspace? • The work you are doing could it be affecting someone else’s work environment. • Have you entered a work area that you are not familiar with? • Could you be entering a hazardous work area? • Are you communicating with your adjoining resources any safety concerns? <hr/> <ul style="list-style-type: none"> ➤ Knowing Your Work Location! ➤ Maintain your situational awareness and who you are working with.
<p style="text-align: center;">Thanks from your Safety Team!!</p> 	<p>John Nickey SOF1, Matthew Lipson, SOF2(T), Mike Seymour SOF2(T)</p> <p style="text-align: right;"><i>Mike Seymour</i> SOF2(T)</p>

8. Task	9. Hazard	10. Hazard Probability	11. Severity	12. RAC	13. Identify hazard mitigations & controls <small>(press [alt + enter] to add a line)</small>			14. Hazard Probability	15. Severity	16. RAC	17. Task Necessary?	18. Hazard Control Assigned to:
Driving & Traffic	MVA - Other Vehicles	Likely	Critical	Extremely High	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. Travel on the "41 Road" and "81 Road" should be slow and cautious. ~ Use spotters & Honk horn to alert personnel when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. ~ Refer to "Smoke and Transportation Safety" IRPG Pg 31 			Likely	Critical	Extremely High	YES	Individuals
Fatigue & Over Exertion	Human Factors - Fatigue & Overexertion	Likely	Catastrophic	Extremely High	<ul style="list-style-type: none"> ~ Drink 1 quart of water each hour during and after work. ~ Rotate crews out of smoky areas. ~ Set a reasonable work pace and allow adequate rest breaks. ~ Stagger work crews start time to limit fatigue. ~ Use buddy system to monitor personnel of heat related fatigue. ~ Follow work / rest guidelines. 			Likely	Critical	Extremely High	YES	Individuals
Hazard Trees	Hit by Tree/Snag/Branch	Likely	Catastrophic	Extremely High	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Hazard zone is a minimum of 2 1/2 tree heights. ~ Risk assessment before entering area and ask why. 			Likely	Critical	Extremely High	YES	Individuals
Heavy Equipment Operations	Equipment - Crushed by Heavy Equipment/Rollover	Likely	Catastrophic	Extremely High	<ul style="list-style-type: none"> ~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment. 			Likely	Critical	Extremely High	YES	Individuals
Mop-up/Repair	Burns - Ash Pit/Stump Holes	Likely	Critical	Extremely High	<ul style="list-style-type: none"> ~ Do not work above or below personnel during rehab/mop-up ops. ~ Alert personnel of rolling debris by yelling to affected individuals. ~ Position debris that could roll vertically on slope. ~ Wear eye protection. 			Likely	Critical	Extremely High	YES	Individuals/CRWB/E NGB
Bees, Ticks, Mosquitoes	Allergic Reaction - Insects/Animals	Likely	Critical	Extremely High	<ul style="list-style-type: none"> ~ Canvas crew members for those with allergic reactions to stings. ~ Ensure crew members have medication pens if needed. ~ Perform daily self inspection. ~ Use repellent as necessary. ~ Advanced Life Support, multi-dose epi and airway protection. ~ Keep affected area clean and bandaged. ~ Be careful when eating and/or drinking to avoid stings to mouth and throat. 			Likely	Moderate	High	YES	Individuals
Firefighter & Public Smoke Exposure	Smoke Inhalation	Likely	Critical	Extremely High	<ul style="list-style-type: none"> ~ Refer to "Smoke Hazards and Mitigation" IRPG Pg 30 ~ Use warning lights and provide traffic control on roadways during smoky and night operations. ~ Rotate crews out of smoky areas during firing and mop-up operations. ~ Consider hotels to ensure quality sleep out of smoke. ~ Contact Communications when firing operations are initiated. 			Likely	Moderate	High	YES	Individuals

INCIDENT ACTION PLAN RISK ASSESSMENT (ICS 215A)

Heat Related Illness (HRI)& Dehydration	Medical - Heat Related Illness	Likely	Critical	Extremely High	<ul style="list-style-type: none"> ~ Refer to Heat Related Illness information, IRPG Pg 109 ~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~ Take Frequent breaks, minimum of 10 minutes every hour. ~ Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS. 	Likely	Moderate	High	YES	Individuals/CRWB
Incident Camp	Camp Hazards	Likely	Critical	Extremely High	<ul style="list-style-type: none"> ~ Be aware of camp medical and evacuation plans ~ Wear closed toe footwear with acceptable support. Be aware of potential for uneven footing and loose rocks. ~ Loading and carrying: lift with legs, not back. Use cart / dolly if needed. ~ Drive slowly. Max 5 MPH. Signal, watch for pedestrian traffic. ~ When Backing: Use a Spotter. ~ Use chock blocks, especially if parked on uneven ground. ~ Guy ropes and stakes: flag / mark with fluorescent lighting. ~ Be Aware of "Widow Makers" in camp and sleeping area. ~ Wear Masks, Distance, Wash hands after toilet use and prior to eating ~ Be Aware there may be Snakes, Insects and Poison Oak in camp. ~ Alcohol and / or Illegal drugs are prohibited in camp. 	Likely	Moderate	High	YES	Individuals/CRWB/ENGB
Fireline Hazards	Hit by Rolling Material in Steep Terrain	Likely	Moderate	High	<ul style="list-style-type: none"> ~ Refer to "Fireline Location" considerations, IRPG Pg 84 ~ Do not work directly above or below personnel during firing and mop-up operations. ~ Watch for falling and rolling debris on steep slopes. ~ Alert crew personnel of rolling debris by yelling to affected individuals. ~ Position debris that could roll vertically on slope. ~ Avoid stepping over debris that could roll by walking around object. ~ Avoid radiant heat by wearing appropriate PPE correctly. ~ Use correct tool for task assigned. ~ Flag/isolate all HAZMAT & alert all personnel working in Division. ~ Ensure LCES is in place at all times. 	Likely	Moderate	High	YES	Individuals/CRWB/ENGB
ATV/UTV Use	Equipment - ATV/UTV Rollover	Likely	Moderate	High	<ul style="list-style-type: none"> ~ Ensure equipment is inspected and safe to use. ~ Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. ~ Ensure operator is trained and certified to operate. ~ Ensure operator has proper PPE according to the Redbook/ RMA. ~ Question if it is mission critical. 	Unlikely	Critical	Moderate	YES	Individuals/CRWB
Communications	SNF Communications	Possible	Critical	High	<ul style="list-style-type: none"> Be sure to know what frequency your division is on Know your command tone frequency Check the 205 communication plan 	Possible	Moderate	Moderate	YES	Individuals
All Personnel	COVID-19 Employee Hazard Reduction	Possible	Critical	High	<ul style="list-style-type: none"> •Follow basic Hygiene, handwashing for 20 seconds, Clean PPE. •Stay home if exposed or feeling ill, inform supervisors if feeling ill or possible exposure. •Maintain 6 feet separation, utilize facemask if unable to maintain social distancing. •Refrain from touching surfaces you haven't disinfected. 	Rare	Critical	Moderate	YES	CRWB/ENGB
Air Operations	Aircraft Mishap - General	Unlikely	Critical	Moderate	<ul style="list-style-type: none"> Ensure positive communication with all air resources Don't plan on air resources for medical transport or resupply Follow "Aviation Watch-Out Situations" IRPG Pg 46 Refer to "Directing Bucket or Retardant Drops IRPG Pg 58 Refer to "Aerial Retardant Safety" IRPG Pg 57 Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62 	Rare	Critical	Moderate	YES	Individuals

Incident Location **Sierra National Forest**
 County: LAC State: CA Latitude: " N Longitude: W

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

Human Resources Message

The Importance of Personal Hygiene. Good personal hygiene is important for both health and social reasons. It entails keeping your hands, head and body clean to stop the spread of germs and illness. Your personal hygiene benefits your own health and impacts the lives of those around you, too.

The Human Resources Specialists are here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.

Human Resources Specialist– Tony Torres
[505.239.0041](tel:505.239.0041) (call/text) or email @
Anthony.Torres@usda.gov

DAILY COVID QUESTIONS:

Have all employees apply this self-assessment prior to entering any work location every day.

Can you answer “YES” to either question? If so, report to the Medical Unit immediately:

- 1) In the last 14 days have you had a fever or chills, shortness of breath, body-aches, coughing or new loss of taste or smell (not attributable to something else, e.g. allergies)?
- 2) In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms.

- | | | |
|-----------------------------------|------------------------|-------------------------|
| • Cough | • Muscle or Body Aches | • Fatigue |
| • Shortness of breath | • Sore Throat | • Nausea/Vomiting |
| • Fever (100.4 or more) or Chills | • Cough | • Diarrhea |
| • New loss of Taste or Smell | • Headache | • Congestion/Runny Nose |

Persons who are displaying symptoms that the medical unit feels are suspicious for COVID-19 will be tested. This will be coordinated by the incident COVID taskforce and the local public health department.

If a person has mild symptoms that might be caused by other conditions (like heat illness, dehydration, etc.), the medical unit may isolate, treat and observe for up to 24 hrs. to determine if COVID testing is needed.

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

Stay Out!

- READs will be using flagging for areas to avoid suppression activities. There are two pieces to watch for.
 - Strip of white and a strip of blue/black.
- For more information, please consult with a READ.

Food & Wildlife

- Fall is the “last ditch effort” to get food for winter for wildlife. Wildlife, especially Bears, can be more aggressive. Keeping food off the line and in trash bins minimizes human contact and potential safety issues.
- Throwing away and storing food in proper containers could keep wildlife from future harm.

Riparian Areas

- Meadows are natural barriers. Tie the line to them and not through them. If line is needed, go around the meadow to avoid damage.
- Stream and creeks will not be used as line. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through or along them.

Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

Trees that are painted with a green letter “L” are NOT to be cut. They are “Leave” trees.

Working in Wilderness Areas

- Follow MIST for suppression actions.
- Utilize system trails as much as possible for travel and/or handline.
- Consult with READs for spike camps, helispots, and sling sites locations.
- Practice “Leave No Trace” as much as possible.
- Work with READs to minimize visual impacts to wilderness areas when possible.

Suppression Repair

- Utilize and coordinate with READs when implementing suppression repair plan.
- READs will determine when a line is completed by “approving” the line verbally and/or in ArcGIS Collector.
- Back haul all trash, such as unused flagging, glow sticks, plastic bottles, as you repair an area.

DMOB process for the Creek Fire

South Zone

All Resources, including CalFire Contractors (Except Cal Fire) will report to DMOB at China Peak at their assigned times to start the DMOB Process

CalFire Resources will DMOB at Auberry Elementary School.

- Contact Matt Dunham (559) 281-4312 to start the DMOB process
- Resources will have to have a Mechanical Inspection and we wash, contact Billy Greenwood (559) 218-4330
- All Cal Fire resources (including contract) need to call CalFire Finance before leaving incident (925) 532-5446
- All CalFire resources (including contract) need to call FKU expanded (559) 294-6818 to be released from the incident
- FKU expanded will notify Creek DMOB (916) 591-9008 to notify which resources have been released

North Zone

All resources will report to Ahwahnee to DMOB and go through Weed Wash, Ground Support, Supply, Comms and Finance. When complete use the QR code located at finance to complete the DMOB process in order to be released from incident.

The DMOB list can be found by scanning the QR Code on the cover of the IAP and clicking on the DMOB list Button.

Any questions call DMOB at (916) 591-9008

MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, et c.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
