CREEK FIRE

CA-SNF-001391
P5 NJ3F (0515)

0700 - Operations Briefing

1700 - Planning Meeting

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Creek Fire	2. Operational Period: Date From: 10/22/2020 Date To: 10/22/2020 Time From: 0700 Time To: 1900
--	---

3. Objective(s):

Leaders Intent:

- Suppress and repair the Creek Fire using a full range of management tactics & strategies that minimize exposure to firefighters, communities and reduce the risk to COVID19.

Management Objectives:

- Ensure safety of emergency responders & public utilizing strategies & risk management processes with the highest probability of success.
- Protect natural and cultural resources, commercial timber and critical infrastructure while utilizing resource and agency advisors.
- Repair areas disturbed by fire suppression activities to minimize potential for excessive erosion and impacts to natural and cultural resources.
- Foster and maintain good relationships with local cooperators, stakeholders and public while providing coordinated, accurate and timely information.
- Effectively manage cost and track accountable property to assist with financial reconciliation.

Control Objectives

- Keep the fire south of the South Fork of Merced River and the Minarets Range.
- Keep the fire south and west of Pond Lily Lake and the Silver Divide.
- Keep the fire within the existing fire footprint.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Creek Fire Weather Forecast (Above 5000 FT)

FORECAST NO: 45

NAME OF FIRE: Creek Fire

PREDICTION FOR: 0600 Thu to 2000 Fri

UNIT: CA-SNF-001391

SHIFT DATE: 10/22/20

SIGNED: *John Pendergrast*

TIME/DATE FORECAST ISSUED: 1800 10/21/20

Incident Meteorologist - John Pendergrast
IMET PHONE: 240-499-6649

WEATHER DISCUSSION: Gradually cooling temperatures will occur with near normal by late in the week. With generally light winds, smoke will accumulate near fires and adjacent valleys due to strong nighttime inversions. General winds will remain light and slope oriented day and overnights. After a dry afternoon, limited RH recovery will occur nightly upper slopes.

WEATHER FORECAST FOR THURSDAY: Mostly sunny. Mixed haze/smoke with some afternoon improvement.

TEMPERATURES: Max 64° to 68 **24 HR Trend:** Lower.

HUMIDITY: Min 15 to 21% **24 HR Trend:** Same.

20-FOOT WIND: Variable 2 to 4 mph, becoming West to Southwest 4-7 mph with afternoon gusts 12 mph upper slopes and ridges in afternoon.

SLOPE/VALLEY – Downslope 1-3 mph early, becoming upslope 5-9 mph mid to late afternoon; ridge gusts 12 mph in aligned drainages.

STABILITY/INVERSION: Moderate to strong with smoke remaining in drainages near fire in morning. Inversion lifts to higher elevations by around 1400. Haines 4

WEATHER FOR THURSDAY NIGHT: Southwest winds 4 to 7 mph through dusk then diminishing and becoming light down drainage overnight. Smoke and reduced air quality near fires due to developing inversion.

MINIMUM TEMPERATURES:
40 to 46° except elevated drainages 29-34°. **24 HR Trend:** Lower.

MAXIMUM HUMIDITY:
36 to 41%; (upper drainages up to 70 %). **24 HR Trend:** Higher.

20-FOOT WIND: RIDGETOP – Southwest 7 to 11 mph early, becoming Northwest 3 to 7 mph late.

UPPER SLOPES/VALLEY - Downslope/downcanyon 3 to 6 mph; gusts 10 mph evening in east-to-west aligned drainages (Huntington Lake; South Fork San Joaquin).

EXTENDED FORECAST:

FRIDAY...Mixed smoke and haze then mild. Max temps 61 to 67 (lower). Min RH 15 to 21% (same). Winds down canyon 3-5 mph early; then Southwest 6 to 10 mph with higher gusts to 12 mph (especially ridges mid to late afternoon).

Key RAWS Locations:

Devils Postpile 5600'
Div M Mt. Tom 9000'

Div M High Sierra 7431'
Div M Kaiser Ridge 8250'

Live Fuels	2/3 cured																

OUTPUTS

<p>FIRE BEHAVIOR</p> <p>GENERAL:</p> <ul style="list-style-type: none"> • Heavy fuels are very dry and can hold heat for long time. Interior creeping and smoldering in the duff and heavy fuels. • Expect spots outside the perimeter or new starts to spread rapidly, torch and spot. This is elevation and fuel type dependent. At higher elevations spots, will establish in timber litter, creep, torch, and spot again. In lower elevations spots will establish in grass/brush, rapidly spread with surface fire, torch, and spot. • The smoke inversion is impacting fire behavior. Fire above the inversion will become active during the day when exposed to the sun. Fuels are burning through the night above the inversion where there is heat near available fuels. Below the inversion, smoke is dense enough to shade fuels and reduce fire behavior. 	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td colspan="6">Probability of Ignition (4-8,000'):</td> </tr> <tr> <td colspan="6">90%/80% (Unshaded/Shaded)</td> </tr> <tr> <td colspan="6">Spotting Potential: Minimal</td> </tr> <tr> <td colspan="6">Spotting Distance: less than ¼ mile (short range)</td> </tr> <tr> <th>Fuel Model</th> <th>FL (Ft.)</th> <th>ROS (Ch/Hr)</th> <th>NFDR Index</th> <th>Value</th> <th>%</th> </tr> <tr> <td>TU5</td> <td>10</td> <td>14</td> <td>ERC</td> <td>84</td> <td>97th</td> </tr> <tr> <td>TL7</td> <td>3</td> <td>4</td> <td>BI</td> <td>67</td> <td>90th</td> </tr> <tr> <td>SH1</td> <td>4</td> <td>16</td> <td colspan="3">High Sierra RAWS (44520)</td> </tr> </table>	Probability of Ignition (4-8,000'):						90%/80% (Unshaded/Shaded)						Spotting Potential: Minimal						Spotting Distance: less than ¼ mile (short range)						Fuel Model	FL (Ft.) SPECIFIC:

- DIV M: Fire behavior near Junction Bluffs backing, flanking and some short-range spotting from individual & group torching. South of Pincushion Peak, surface spread, single tree torching, and short-range spotting as fire spreads Southeast, west of Lake Edison along the Onion Springs OHV road.
- DIV J - Fire continues to move slowly up in the wilderness and rocks at higher elevations following green vegetation and timber stringers. In the Middle Fork of San Joaquin River near the Lion Fire there is potential for fire to spread east.
- DIVS E – DIVS I: Larger interior fuels and deep duff are continuing to consume and burn out. Expect to see this continue, with creeping/smoldering near interior islands of fuel or mosaics.
- DIVS (C–A, Z–N): Very little to zero activity near line with scattered heat throughout interior of divisions, creeping and smoldering where fuels exist. Potential torching and spotting if exposed to the sun.

SAFETY

WATCH OUT SITUATION #12: Cannot see main fire; not in contact with someone who can.

6. Work Assignments:
DIVISION E/F/G
Task: Monitor and secure line where needed from Grizzly Road to Little Shuteye. Continue to secure and mop-up from 5S10 to Grizzly Road. Secure unburned islands that have spotting potential.
Purpose: Protect private inholdings, government buildings, and developments
End State: No further damage to private and government property.

6. Work Assignments:

DIVISION I:
Task: Continue to hold and mop up control lines south of Red Top Mountain down to DP57. Continue snagging hazard trees in work areas and adjacent to the fire lines.
Purpose: Limit fire spread to the north and west protecting values at risk in those areas.
End State: Direct attack was successful stopping fire progression to the north and west.

DIVISION J:
Task: Monitor fire activity from the air and IR as smoke conditions allow. Identify opportunities to limit fire spread towards Red's Meadow and Devils Postpile. Protect private inholdings and government property where fire conditions allow and resources can safely engage.
Purpose: Protect private inholdings with minimal fire damage and there is a high probability of success.
End State: Reduce fire spread towards Yosemite National Park, Devils Postpile and Red's Meadow. Damage to private and government property is minimal.

SOFR(t) Woods		10/25	Fredric Woods	1	O-200787	0700- 1900	Anwahnee Camp

6. Work Assignments:
Task: Mop up and patrol fire edge, mop up around Central Camp. Continue road improvement, snagging hazard trees in work areas and adjacent to the fire lines. Continue structural protection throughout division. Backhaul hose and trash. Identify suppression repair needs and accomplish objectives as established by suppression repair plan.
Purpose: Protect life and property with minimal fire spread threatening North Fork and Bass Lake and other private inholdings. Keep roads open for fire traffic. Provide safe access for firefighting resources, cooperators, and the public.
End State: Control lines are completed and no threat of fire spread. Bass Lake and adjacent communities are not impacted. No damage to private property. Major roads are clear of hazards. Firefighters, cooperators, and the public can travel major roads with minimal risk. Roads are kept open and access into the fire area is not compromised.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Operations: **October 22, 2020**

INCIDENT: **Creek Fire** Date Prepared: **October 21, 2020** TIME: **1600**

Major Hazards and Risks:

- **SEASONAL WEATHER CHANGE**
- **FIRE SEASONAL BURN OUT**

Seasonal Weather Change

Why do I get sick every time the weather changes?

-colder weather causes many detrimental physiological changes to the respiratory system that limit the ability of the lungs to clear secretions, thus allowing bacteria or viruses that may cause acute respiratory illnesses.

Here are 5 ways to prevent you from getting sick during the transition to cold weather:

1. Wash Your Hands. You hear this all the time.
2. Gargle Water.
3. Stay Active.
4. Manage your Sleep.
5. **Get A Flu Vaccine.**

How do you treat weather related headaches?
Try these:

- Get 7 to 8 hours of sleep each night.
- Drink a minimum of eight glasses of water per day.
- Exercise most days of the week.
- Eat a balanced diet and avoid skipping meals.
- Practice relaxation techniques if you're experiencing stress.

Seasonal Burn Out

The Fire Season that dosen't end!
Are you starting to feel BURN OUT, from a long fire season?

What are early stages of Burn Out:
8 signs you may be experiencing burnout:

1. **Exhaustion.** ...
2. **Lack of Motivation.** ...
3. Frustration, Cynicism and Other Negative Emotions. ...
4. **Cognitive Problems.** ...
5. Slipping Job Performance. ...
6. Interpersonal Problems at Home and at Work. ...
7. Not Taking Care of Yourself. ...
8. Being Preoccupied With Work. ...

How do you treat burnout syndrome?

1. Evaluate your options. Discuss specific concerns with your supervisor. ...
2. Seek support. Whether you reach out to co-workers, friends or loved ones, support and collaboration might help you cope. ...
3. Try a relaxing activity. ...
4. Get some exercise. ...
5. Get some sleep. ...
6. Mindfulness.

Thanks from your Safety Team!!

John Nickey SOF1, Matthew Lipson, SOF2(T), Mike Seymour SOF2(T)

Driving & Traffic	MVA - Other Vehicles	Likely	Critical	Extremely High	Likely	Critical	Extremely High	YES	Individuals
		<p>13. Identify hazard mitigations & controls</p> <ul style="list-style-type: none"> - Practice "Defensive Driving" techniques traveling on all roads and city streets. Travel on the "41 Road" and "81 Road" should be slow and cautious. - Use spotters & honk horn to alert personnel when backing. - Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). - Always use headlights. - Yield to pedestrians and bicycles. - Observe posted speed limits. - Use the 3 second rule for following distance when driving. - Use chock blocks. Turn wheels into hill. - Avoid distractions (texting, cell phones, radio). - Ensure that windshields are kept clean of dust and bugs. - Refer to "Smoke and Transportation Safety" IRPG Pg 31 - Refer to "Roadside Response Safety" IRPG Pg 26 - Drink 1/2 quart of water each hour during and after work. - Rotate crews out of smoky areas - Set a reasonable work pace and allow adequate rest breaks. - Stagger work crews start time to limit fatigue. - Use buddy system to monitor personnel or heat related fatigue. - Follow work/rest guidelines - Follow "Hazard Tree Safety" guidelines. IRPG page 22. - Post lookouts or use a spotter in mop-up areas with personnel. - Don't park vehicles or take breaks in high concentrations of hazard trees. - Establish trigger points for disengagement during high wind events - Hazard zone is a minimum of 2 1/2 tree heights. - Refer to "Working with Heavy Equipment" IRPG Pg 86 - Ensure communications are established with operators. - Use hand signals if other communications are unavailable. - Maintain a 50-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in limber. - Use a spotter when backing. - Avoid working below heavy equipment. - Do not work above or below personnel during reambush ops. - Alert personnel of rolling debris by yelling to affected individuals. - Position debris that could roll vertically on stops. - Wear eye protection. - Canvas crew members for those with allergic reactions to stings. - Ensure crew members have medication pens if needed - Perform daily self inspection. - Use repellents as necessary. - Advanced Life Support, multi-dose eye and airway protection. - Keep affected area clean and bagged. - Be careful when eating and/or drinking to avoid stings to mouth and throat. - Refer to "Smoke Hazards and Mitigation" IRPG Pg 30 - Use warning lights and provide traffic control on roadways during smoky and night operations. - Rotate crews out of smoky areas during firing and mop-up operations. Consider breaks to ensure quality sleep out of smoke. - Contact Communications when firing operations are initiated. 							
Fatigue & Over Exertion	Human Factors - Fatigue & Overexertion	Likely	Catastrophic	Extremely High	Likely	Critical	Extremely High	YES	Individuals
Hazard Trees	Hit by Tree/Snag/Branch	Likely	Catastrophic	Extremely High	Likely	Critical	Extremely High	YES	Individuals
Heavy Equipment Operations	Equipment - Crushed by Heavy Equipment/Rollover	Likely	Catastrophic	Extremely High	Likely	Critical	Extremely High	YES	Individuals
Mop-up/Repair	Burns - Ash Pile/Stamp Holes	Likely	Critical	Extremely High	Likely	Critical	Extremely High	YES	Individuals/CRW/IE NGB
Bees, Ticks, Mosquitoes	Allergic Reaction - Insects/Animals	Likely	Critical	Extremely High	Likely	Moderate	High	YES	Individuals
Firefighter & Public Smoke Exposure	Smoke Inhalation	Likely	Critical	Extremely High	Likely	Moderate	High	YES	Individuals

INCIDENT ACTION PLAN RISK ASSESSMENT (ICS 215A)

Heat Related Illness (HRI) & Dehydration	Medical - Heat Related Illness	Likely	Critical	Extremely High	<ul style="list-style-type: none"> - Refer to Heat Related Illness information, IRPG Pg 106 - Drink Fluids throughout operational period (6-8 qt/shift). - Maintain water/electrolyte ratio of 3 to 1. - Carry extra water on life and canteen water at drop points. - Take frequent breaks, minimum of 10 minutes every hour. - Allow out of area resources time to acclimatize before expecting peak performance. - Recognize symptoms of HEAT RELATED ILLNESS. - Be aware of camp medical and evacuation plans - Wear closed toe footwear with acceptable support. Be aware of potential for uneven footing and loose rocks. - Loading and carrying: lift with legs, not back. Use cart/dolly if needed. - Drive slowly. Max 5 MPH. Signal, watch for pedestrian traffic. - Wheel Backing: Use a Spotter. - Use truck blocks, especially if parked on uneven ground. - Guy ropes and stakes: flag/mark with fluorescent lighting. - Be Aware of "Widow Makers" in camp and sleeping area. - Wear Masks, Distance. Wash hands after toilet use and prior to sealing - Be Aware there may be Snakes, Insects and Poison Oak in camp. - Alcohol and/or illegal drugs are prohibited in camp. 	Likely	Moderate	High	YES	Individuals/CRWB
Incident Camp	Camp Hazards	Likely	Critical	Extremely High	<ul style="list-style-type: none"> - Refer to "Fireline Location" considerations, IRPG Pg B4 - Do not work directly above or below personnel during firing and mop-up operations - Watch for falling and/or rolling debris on sleep slopes - Alert crew personnel of rolling debris by yelling to affected individuals. - Position debris that could roll vertically on slope. - Avoid stepping over debris that could roll by walking around object - Avoid radiant heat by wearing appropriate PPE correctly. - Use correct tool for task assigned. - Flag/isolate all HAZMAT & alert all personnel working in Division. - Ensure equipment is inspected and safe to use. - Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. - Ensure operator is trained and certified to operate. - Ensure operator has proper PPE according to the Redbook/RMA - Question if it is mission critical. 	Likely	Moderate	High	YES	Individuals/CRWB/ NGB
Fireline Hazards	Hit by Rolling Material in Sleep Terrain	Likely	Moderate	High	<ul style="list-style-type: none"> - Be sure to know what frequency your division is on - Know your command tone frequency - Check the 205 communication plan 	Likely	Moderate	Moderate	YES	Individuals/CRWB
ATV/UTV Use	Equipment - ATV/UTV Rollover	Likely	Moderate	High	<ul style="list-style-type: none"> - Follow basic Hygiene, handwashing for 20 seconds, Clean PPE. - Stay home if exposes or feeling ill, inform supervisors if feeling ill or possible exposure. - Maintain 5 feet separation, outside facemask if unable to maintain social distancing. - Refrain from touching surfaces you haven't disinfected 	Possible	Moderate	Moderate	YES	Individuals
Communications	SIN/ Communications	Possible	Critical	High	<ul style="list-style-type: none"> - Ensure positive communication with all air resources - Don't plan on air resources for medical transport or resupply - Follow "Aviation Watch-Out Situations" IRPG Pg 45 - Refer to "Directing Buckets or Retardant Drops IRPG Pg 58 - Refer to "Aerial Retardant Safety" IRPG Pg 57 - Refer to "Aircraft Messag Response Procedure" IRPG Pg 62 - Identify and Avoid hazard areas. - Laundry clothing. - Shower frequently. Kody Kerwin Routine (916) 591-9026 and EMERGENCY (925) 532-5464				County: LAC State: CA				Latitude: " N Longitude: W			
The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

DAILY COVID QUESTIONS:

Have all employees apply this self-assessment prior to entering any work location every day.

Can you answer "YES" to either question? If so, report to the Medical Unit immediately:

- 1) In the last 14 days have you had a fever or chills, shortness of breath, body-aches, coughing or new loss of taste or smell (not attributable to something else, e.g. allergies)?
- 2) In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms.

• Cough	• Muscle or Body Aches	• Fatigue
• Shortness of breath	• Sore Throat	• Nausea/Vomiting
• Fever (100.4 or more) or Chills	• Cough	• Diarrhea
• New loss of Taste or Smell	• Headache	• Congestion/Runny Nose

Persons who are displaying symptoms that the medical unit feels are suspicious for COVID-19 will be tested. This will be coordinated by the incident COVID taskforce and the local public health department.

If a person has mild symptoms that might be caused by other conditions (like heat illness, dehydration, etc.), the medical unit may isolate, treat and observe for up to 24 hrs. to determine if COVID testing is needed.

MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority

- RED / PRIORITY 1** Life or limb threatening injury or illness. Evacuation need is **IMMEDIATE**
Ex: Unconscious, difficulty breathing, bleeding severely, 2nd - 3rd burns more than 4 palm sizes, heat stroke, disoriented.
- YELLOW / PRIORITY 2** Serious Injury or illness. Evacuation may be **DELAYED** if necessary.
Ex: Significant trauma, unable to walk, 2nd - 3rd burns not more than 1-3 palm sizes.
- GREEN / PRIORITY 3** Minor Injury or illness. **Non-Emergency transport**
Ex: Sprains, strains, minor heat-related illness.

Nature of Injury or illness & Mechanism of Injury

Brief Summary of Injury or Illness
(Ex: Unconscious, Struck by Falling Tree)

Transport Request

Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Descriptive Location & Lat. / Long. (WGS84)

Patient Location

Incident Name

Geographic Name + "Medical"
(Ex: Trout Meadow Medical)

On-Scene Incident Commander

Name of on-scene IC of Incident within an Incident
(Ex: TFLD Jones)

Patient Care

Name of Care Provider
(Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, et c.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
