CREEK FIRE

CA-SNF-001391
P5 NJ3F (0515)

0700 - Operations Briefing

1700 - Planning Meeting

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Creek Fire	2. Operational Period:	Date From: 10/25/2020	Date To: 10/25/2020	
		Time From: 0700	Time To: 1900	

3. Objective(s):

- Leaders Intent:**
- Suppress and repair the Creek Fire using a full range of management tactics & strategies that minimize exposure to firefighters, communities and reduce the risk to COVID19.
- Management Objectives:**
- Ensure safety of emergency responders & public utilizing strategies & risk management processes with the highest probability of success.
 - Protect natural and cultural resources, commercial timber and critical infrastructure while utilizing resource and agency advisors.
 - Repair areas disturbed by fire suppression activities to minimize potential for excessive erosion and impacts to natural and cultural resources.
 - Foster and maintain good relationships with local cooperators, stakeholders and public while providing coordinated, accurate and timely information.
 - Effectively manage cost and track accountable property to assist with financial reconciliation.

Control Objectives

- Keep the fire south of the South Fork of Merced River and the Minarets Range.
- Keep the fire south and west of Pond Lily Lake and the Silver Divide.
- Keep the fire within the existing fire footprint.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Creek Fire Weather Forecast (Above 5000 FT)

FORECAST NO: 48
PREDICTION FOR: 0600 Sun to 0600 Mon
SHIFT DATE: 10/25/20
TIME/DATE FORECAST ISSUED: 1800 10/24/20

NAME OF FIRE: Creek Fire
UNIT: CA-SNF-001391
Incident Meteorologist – Angie Enyedi
904-318-4041

RED FLAG CONDITIONS TONIGHT THROUGH TUESDAY - VERY WINDY & COLD SUNDAY NIGHT

Breezier WNW to NNW today with increasing cloud cover into the afternoon ahead of an approaching cold front. A few light showers or snow showers could impact areas mainly above 6 kft later this afternoon and evening as the cold front moves across the area. Very strong NNE winds will increase across ridges Sunday night trailing the cold front. The strong winds will plummet humidity at elevation overnight with critically low values in the teens by Monday morning with wind chills in the teens.

SUNDAY: Mostly clear with morning smoke. Increasing clouds, breezy with a few showers after 1600.

Rain Chance: 15%

Stability: Moderate morning valley inversion with smoke in drainages. Inversion lifting to higher terrain midday with improved visibility due to stronger winds and better mixing.

Location	Maximum Temperature (F) & Minimum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	Low 60s 25-35%	Downslope 2-4 early, then upslope 6-10 into afternoon with gusts 15-20 aligned drainages.
Ridges & Peaks	Low 50s 20-30%	WNW 10-15, gusts 25 morning. Winds decrease 5-10, gusts 15 midday. Winds increase to NNW 15-20, gusts 30 through late afternoon. Strongest winds in aligned drainages.

SUNDAY NIGHT: Cloudy and windy. Passing showers/snow showers through midnight, then clearing skies.

Chance of Precipitation: 20%

Stability: Weak – mixing expected. Some smoke may remain in very sheltered drainages.

Location	Minimum Temperature (F) & Maximum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	25-35 40-60% evening, then falling to 20-30% dawn	Downslope/canyon 5-10 evening, gusts 15. Winds increasing to NNE 10-15, gusts 25-35 after midnight within aligned drainages.
Ridges + Peaks	15-25 40-60% evening, then falling to 10-20% dawn	NNE 15-25, gusts 30-40 through midnight. Winds increasing to NE 30-40 gusts 50-60 through sunrise. Gusts near 70 highest ridges.

MON AND TUE: RED FLAG CONDITIONS with critically low humidity and strong NE winds Monday. Much cooler. Winds decrease Tue with warming trend & continued critically low humidity.

WED AND THU: Warm & dry, poor RH recovery. Terrain driven winds.

Key RAWs Locations:

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 48	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire	OPERATIONAL PERIOD: Day Shift 10/25/20 0700-1900
DATE ISSUED: 10/24/2020	TIME ISSUED: 1830
UNIT: Sierra NF (CA-SNF-001391)	SIGNED: /s/ Patrick Doyle, FBAN-t; <i>Patrick Doyle</i> /s/ Patty Johnson, LTAN/SOPL

INPUTS

WEATHER SUMMARY: *See Fire Weather Forecast for Specifics*
** RED FLAG WARNING – MONO WINDS **

FUELS:

Grass	GS1, GS2
Shrub	SH1
Timber	TU5, TL2, TL4, TL7
FDFM (1hr)	5
10-hr (%)	6
100-hr (%)	4
1000-hr(%)	6
Live Fuels	2/3 cured

Duff depth under pine is deep (12”).

With the drought conditions, live fuels are available to burn.

TOPOGRAPHY:

- Smoke inversion height (above sea level): ~7,000 ft.
- Elevation: 3,000-9,500. Higher elevations are starting to see cold nighttime temps. Nighttime humidity recoveries will begin to rise (35-40%).
- Slopes: 10%-50%. With general winds being low, wind direction and speed are being determined by terrain.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Heavy fuels will burn readily and hold heat. Resistant to control. Interior creeping and smoldering in the duff and heavy fuels.
- Fire behavior will moderate slightly until evening winds pick up, potentially significant increase in fire activity with strong cold front passage (Mono Wind). Extreme fire behavior possible.
- Nighttime humidity will be high enough (above 40%) to dampen fire behavior slightly, taking longer to heat up during the day, and shortening the burn period. Establishment of Mono Wind will drop Sunday night Rh recovery and persist thru Tuesday night.

Probability of Ignition (4-8,000’): 60%/40%
(Unshaded/Shaded)

Spotting Potential: Minimal

Spotting Distance: .10-.20 mile (short range)

Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-8	ERC	86	99th
TL7	2-4	6-12	BI	78	86th
SH1	2-4	4-8	High Sierra RAWS (44520)		

SPECIFIC:

- DIV M: Fire near Junction Bluffs backing towards the Middle Fork and Fish Creek. Satellite IR (VIIRS) shows potential spot on northside. Expect continued surface spread, single tree torching, and short-range spotting as fire spreads southeast, closing the gap along the South Fork of San Joaquin River, west of Lake Edison along the Onion Springs OHV road. Area east of Vermillion Camp, north of Edison Lake will remain most active with spread in the Graveyard Meadows area. Expect the direction of spread to switch from heading NE-E to S-SW with frontal passage (winds).
- DIV J – Little fire activity, continues to move slowly up in the wilderness. Edged in by rocks at higher elevations, following green vegetation and timber stringers. In the Middle Fork of San Joaquin River near the Lion Fire there is little potential for fire to spread east.
- DIVS E – DIVS I: Larger interior fuels and deep duff are continuing to consume and burn out. Expect to see this continue, with creeping/smoldering near interior islands of fuel or mosaics. Area in DIV E, watch out for area by Little Shuteye Peak where heat exists.
- DIVS (C–A, Z–N): No known activity near line, but with scattered heat throughout interior of divisions, creeping and smoldering where fuels exist. Potential torching and spotting if exposed to the sun.

SAFETY

Mop up should be more extensive in areas that could generate wind-blown embers across the line.

ORGANIZATION ASSIGNMENT LIST (ICS 203)

6. Work Assignments:

DIVISION I:
Task: Continue to hold and mop up control lines south of Red Top Mountain down to DP57. Continue snagging hazard trees in work areas and adjacent to the fire lines.
Purpose: Limit fire spread to the north and west protecting values at risk in those areas.
End State: Direct attack was successful stopping fire progression to the north and west.

DIVISION J:
Task: Monitor fire activity from the air and IR as smoke conditions allow. Identify opportunities to limit fire spread towards Red's Meadow and Devils Postpile. Protect private inholdings and government property where fire conditions allow and resources can safely engage.
Purpose: Protect private inholdings with minimal fire damage and there is a high probability of success.
End State: Reduce fire spread towards Yosemite National Park, Devils Postpile and Red's Meadow. Damage to private and government property is minimal.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems. Send a picture of the label, LAT/LONG and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

6. Work Assignments:
Task: Mop up and patrol fire edge, mop up around Central Camp. Continue road improvement, snagging hazard trees in work areas and adjacent to the fire lines. Continue structural protection throughout division. Backhaul hose and trash. Identify suppression repair needs and accomplish objectives as established by suppression repair plan.
Purpose: Protect life and property with minimal fire spread threatening North Fork and Bass Lake and other private inholdings. Keep roads open for fire traffic. Provide safe access for firefighting resources, cooperators, and the public.
End State: Control lines are completed and no threat of fire spread. Bass Lake and adjacent communities are not impacted. No damage to private property. Major roads are clear of hazards. Firefighters, cooperators, and the public can travel major roads with minimal risk. Roads are kept open and access into the fire area is not compromised.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems. Send a picture of the label, LAT/LONG and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Operations: **October 25, 2020**

As we are preparing for an upcoming WEATHER EVENT that will be bringing
HIGH WINDS, COLD TEMPERATURES, and RED FLAG WARNINGS

Here Are Things to Think About

The Dangers of Mono Winds...

Mono Winds can easily reach speeds in excess of 50 mph. Typically Mono Winds are most common between October and April, and especially around December and January when the cold air that drives them is most common.

The most common danger from Mono Winds are trees falling down. Fallen trees can easily strike personnel as well as obstruct traveling on routes and make navigating difficult. Now take in consideration tree mortality and fire weakened trees. *What is your escape route? Where is your safety zone?*

In addition to the risk of trees falling down, Mono Winds can also cause other loose objects to be blown. Even the most secure tent is at risk when wind speeds reach 50 mph or greater.

Lastly, there is always a risk for fires to spread when strong winds blow.

Cold Weather -

- ~ Minimize exposure to wind chill.
- ~ Watch for signs of hypothermia & frostbite.
- ~ Maintain water/electrolyte ratio of 3 to 1.
- ~ Seek shelter if not able to maintain warmth.
- ~ Seek lower elevations if current elevation becomes to extreme.
- ~ Use cold weather clothing to maintain body temperatures

RED FLAG WARNING:

A Red Flag Warning is a forecast warning issued by the National Weather Service to inform the public, firefighters, and land management agencies that conditions are ideal for wildland fire ***combustion***, and ***rapid spread***. After drought conditions, when humidity is very low, and especially when there are high or erratic winds, the Red Flag Warning becomes a critical statement for firefighting agencies.

Prepared By (Communications Unit Leader) *Kody Kerwin* Incident Location **Sierra National Forest** County: LAC State: CA Latitude: " N Longitude: W

Kody Kerwin Routine (916) 591-9026 and EMERGENCY (925) 532-5464

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

DAILY COVID QUESTIONS:

Have all employees apply this self-assessment prior to entering any work location every day.

Can you answer "YES" to either question? If so, report to the Medical Unit immediately:

- 1) In the last 14 days have you had a fever or chills, shortness of breath, body-aches, coughing or new loss of taste or smell (not attributable to something else, e.g. allergies)?
- 2) In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms.

• Cough	• Muscle or Body Aches	• Fatigue
• Shortness of breath	• Sore Throat	• Nausea/Vomiting
• Fever (100.4 or more) or Chills	• Cough	• Diarrhea
• New loss of Taste or Smell	• Headache	• Congestion/Runny Nose

Persons who are displaying symptoms that the medical unit feels are suspicious for COVID-19 will be tested. This will be coordinated by the incident COVID taskforce and the local public health department.

If a person has mild symptoms that might be caused by other conditions (like heat illness, dehydration, etc.), the medical unit may isolate, treat and observe for up to 24 hrs. to determine if COVID testing is needed.

DMOB process for the Creek Fire

China Peak, Auberry School and Vermilion Camps

All Resources, including CalFire Contractors (Except Cal Fire) will report to DMOB at China Peak at their assigned times to start the DMOB Process.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

CalFire Resources will DMOB at Auberry Elementary School.

- Contact Matt Dunham (559) 281-4312 to start the DMOB process
- Resources will have to have a Mechanical Inspection and we wash, contact Billy Greenwood (559) 218-4330
- All Cal Fire resources (including contract) need to call CalFire Finance before leaving incident (925) 532-5446
- All CalFire resources (including contract) need to call FKU expanded (559) 294-6818 to be released from the incident
- FKU expanded will notify Creek DMOB (916) 591-9008 to notify which resources have been released

ECCO Camp

All resources will report to Episcopal Conference Center, Oakhurst to DMOB (no ICS 221 Demobilization Checkout Sheet will be provided). Return any checkout supply items to the Base Camp Manger, go through Ground Support, Comms and finish at Finance. When complete use the QR code located at finance to complete the DMOB process in order to be released from incident.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

The DMOB list can be found by scanning the QR Code on the cover of the IAP and clicking on the DMOB list Button.

Any questions call DMOB at (916) 591-9008

CODE OF CONDUCT

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Other violations of USDA and Forest Service standards of conduct

Each firefighter is expected to be physically and mentally prepared to perform emergency duties at any time.

Human Resources Message

LISTEN

A wise man once told me that we have 2 ears and 1 mouth for a reason – to listen twice as much as we speak; and if you notice, our ears always stay open, while our mouths have a hinge so it can be closed.

Also, note that “listen” and “silent” are spelled with the same letters. Is that just a coincidence, or is it that you need to be silent in order to be able to really listen? Check that out and think about it!

Let's try really listening to each other more and see if we can resolve our issues and/or concerns that we may have much faster.

Tony Torres - HRSP
505-239-0041 or Anthony.torres@usda.gov

\$\$\$ Finance \$\$\$

You may either turn in your CTR or shift ticket hardcopy or take a picture of in and send it electronically to this email address.

2020.creek.finance@firenet.gov

Please turn in your CTR or shift ticket at least every other day and make sure it is legible, includes your resource order number and is signed by your supervisor.

Call Clovis ICP at 951-205-3819 if you have questions.

Training Specialist - Creek Fire

The Training Specialist is working remotely. Training Specialist Contact Information:

- Bob Rivelle (Available daily between 0630 and 2200 Hours)
- Call/Text: 707.498.1761
- Email: robert_rivelle@nps.gov

How to register as a Trainee:

- Use the QR code below. If you're unable to register using the QR code, please call 707.498.1761.
- Once registered, you will receive text and email updates.

To close-out your training assignment:

1. **Trainer:** Complete and Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
2. **Trainer:** Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
3. **Trainee:** Complete the Trainee Exit Questions located at the QR Code below.
4. **Trainee:** Text or email the individual performance rating (ICS 225) to the Training Specialist.
5. Once completed, the Trainee and the Training Specialist will have a brief conversation.

MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority

- RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE**
Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.
- YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.**
Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.
- GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport**
Ex: Sprains, strains, minor heat-related illness.

Nature of Injury or Illness & Mechanism of Injury

Brief Summary of Injury or Illness
(Ex: Unconscious, Struck by Falling Tree)

Transport Request

*Air Ambulance / Short Haul/Hoist
Ground Ambulance / Other*

Patient Location

*Descriptive Location & Lat. / Long.
(WGS84)*

Incident Name

*Geographic Name + "Medical"
(Ex: Trout Meadow Medical)*

On-Scene Incident Commander

*Name of on-scene IC of Incident within an
Incident (Ex: TFLD Jones)*

Patient Care

*Name of Care Provider
(Ex: EMT Smith)*

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, et c.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
