CREEK FIRE

CA-SNF-001391
P5 NJ3F (0515)

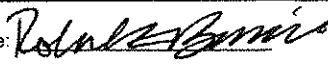

0700 - Operations Briefing
1700 - Planning Meeting

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Creek Fire</p>	2. Operational Period:	Date From: 10/26/2020 Date To: 10/26/2020 Time From: 0700 Time To: 1900
3. Objective(s): <u>Leaders Intent:</u> <ul style="list-style-type: none"> - Suppress and repair the Creek Fire using a full range of management tactics & strategies that minimize exposure to firefighters, communities and reduce the risk to COVID19. <u>Management Objectives:</u> <ul style="list-style-type: none"> - Ensure safety of emergency responders & public utilizing strategies & risk management processes with the highest probability of success. - Protect natural and cultural resources, commercial timber and critical infrastructure while utilizing resource and agency advisors. - Repair areas disturbed by fire suppression activities to minimize potential for excessive erosion and impacts to natural and cultural resources. - Foster and maintain good relationships with local cooperators, stakeholders and public while providing coordinated, accurate and timely information. - Effectively manage cost and track accountable property to assist with financial reconciliation. <u>Control Objectives</u> <ul style="list-style-type: none"> - Keep the fire south of the South Fork of Merced River and the Minarets Range. - Keep the fire south and west of Pond Lily Lake and the Silver Divide. - Keep the fire within the existing fire footprint. 		
General Situational Awareness: <p>Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.</p> <p>In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.</p> <p>Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.</p>

Creek Fire Weather Forecast (Above 5000 FT)

FORECAST NO: 49
PREDICTION FOR: 0600 Mon to 0600 Tue
SHIFT DATE: 10/26/20
TIME/DATE FORECAST ISSUED: 1800 10/25/20

NAME OF FIRE: Creek Fire
UNIT: CA-SNF-001391
Incident Meteorologist: Angie Enyedi
904-318-4041

RED FLAG WARNING THROUGH TUE

Blustery NE winds combined with critically low humidity will create Red Flag conditions through Tue. Peak winds are expected Mon morning, then winds will only gradually decrease in magnitude Mon night into Tue. Very low humidity in the teens to single digits is expected for much of Mon, with gradual recovery into Mon evening with some passing clouds Mon night. The strongest NE winds will impact ridges, upper slopes and channel within aligned NE to SW drainages. Below normal temperatures are expected with highs only in the upper 30s to 40s Mon with lows in the 20s to 30s Mon night.

MONDAY: Windy, very dry and colder. Mostly sunny with some clouds in the late afternoon.

Precipitation Chance: 0%

Stability: Stable conditions trailing frontal passage. Improved visibility with less smoke.

Location	Maximum Temperature (F) & Minimum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	40s 8-18%	Variable 6-10 in sheltered drainages, gusts 15-20. NE 15-20, gusts 30-40 in aligned drainages.
Ridges & Peaks	30s 6-16%	NE 30-40, gusts 50-60. Gusts near 70 highest ridges through early afternoon. NE winds decrease 20-30, gusts 40-50 into early evening.

MONDAY NIGHT: Breezy with passing clouds.

Precipitation Chance: 0%

Stability: Elevated with less lingering smoke, better visibility.

Location	Minimum Temperature (F) & Maximum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	25-35 30-40%	Down drainage in sheltered areas, variable 4-8 gusts 15. NE 10-15, gusts 20-30 in aligned NE to SW drainages.
Ridges + Peaks	20-30 20-30%	NE 20-30, gusts 40-50. Wind weaken further after midnight to 15-20, gusts 30-40.

TUE: RED FLAG CONDITIONS. Critically low humidity, warmer temperatures & gusty NE winds.

WED & THU: Warm & dry, poor RH recovery. Weaker, mainly terrain driven winds.

FRI & SAT: Continued warm, terrain driven winds with slight RH increase.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 49	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire	OPERATIONAL PERIOD: Day Shift 10/26/20 0700-1900
DATE ISSUED: 10/25/2020	TIME ISSUED: 1830
UNIT: Sierra NF (CA-SNF-001391)	SIGNED: 1st Patrick Doyle, FBAN-t; <i>Patrick Doyle</i> 1st/Patty Johnson, LTAN/SOPL

INPUTS

WEATHER SUMMARY: *See Fire Weather Forecast for Specifics*
** RED FLAG WARNING – MONO WINDS **

FUELS:

Grass	GS1, GS2
Shrub	SH1
Timber	TU5, TL2, TL4, TL7
FDFM (1hr)	6
10-hr (%)	6
100-hr (%)	6
1000-hr (%)	6
Live Fuels	2/3 cured

Duff depth under pine is deep (12").

With the drought conditions, live fuels are available to burn.

TOPOGRAPHY:

- Smoke inversion height (above sea level): N/A
- Elevation: 3,000-9,500. Higher elevations will see cold nighttime temps. Nighttime humidity recoveries will begin to rise (20-30%).
- Slopes: 10%-50%. With general winds being low, wind direction and speed are being determined by terrain.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Establishment of Mono Wind Sunday will drop night Rh recovery and persist thru Tuesday night.
- Heavy fuels will burn readily and hold heat. Resistant to control. Interior creeping and smoldering in the duff and heavy fuels.
- Expect fire behavior with stronger winds and lower Rh to significantly increase fire activity with strong cold front passage (Mono Wind). Extreme fire behavior possible. Potential torching and group tree crowning, spotting up to 0.5 mile.
- Nighttime humidity will drop (down to 20%) and not diminish fire activity overnight. Shorter daylengths will continue to reduce active burn period.

Probability of Ignition (4-8,000'): 90%/80% (Unshaded/Shaded)					
Spotting Potential: Minimal-Low					
Spotting Distance: .10-30 mile (short range)					
Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-8	ERC	82	95th
TL7	2-4	6-12	BI	74	75th
SH1	2-4	4-8	High Sierra RAWs (44520)		

SPECIFIC:

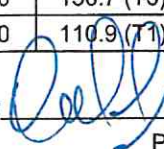

- DIV M: Fire near Junction Bluffs backing towards the Middle Fork and Fish Creek will continue to consume fuels. Expect continued surface spread, single and group tree torching, and short-range spotting as fire spreads W-SW with strong winds. Potential for small crown runs where aligned. Most of fire in DIV M will be pushed back onto the main fire. Areas west, north, and east of Vermillion Camp, north of Edison Lake will remain most active with spread in the Graveyard Meadows area. Direction of spread dependent on terrain will primarily to the SW-W with Mono Wind.
- DIV J – Little fire activity, continues to move slowly up in the wilderness. Edged in by rocks at higher elevations, following green vegetation and timber stringers. Expect increased activity, very low potential to move.
- DIVS E – DIVS I: Larger interior fuels and deep duff are continuing to consume and burn out. Expect to see this continue, with increased consumption with lower Rh and stronger winds. Creeping/smoldering near interior islands of fuel or mosaics, torching possible. Area in DIV E, watch out for area by Little Shuteye Peak where heat exists.
- DIVS (C-A, Z-N): No known activity near line, but with scattered heat throughout interior of divisions, creeping and smoldering where fuels exist. Potential torching and spotting if exposed to the sun.

SAFETY

Increased winds and lower Rh, watch out for alignment of active fire with fuels and where you are working. Make sure you have plan, LCES in place, and aware of hazard trees in your area.

DIVISION I:
Task: Continue to hold and mop up control lines south of Red Top Mountain down to DP57. Continue snagging hazard trees in work areas and adjacent to the fire lines.
Purpose: Limit fire spread to the north and west protecting values at risk in those areas.
End State: Direct attack was successful stopping fire progression to the north and west.

DIVISION J:
Task: Monitor fire activity from the air and IR as smoke conditions allow. Identify opportunities to limit fire spread towards Red's Meadow and Devils Postpile. Protect private inholdings and government property where fire conditions allow and resources can safely engage.
Purpose: Protect private inholdings with minimal fire damage and there is a high probability of success.
End State: Reduce fire spread towards Yosemite National Park, Devils Postpile and Red's Meadow. Damage to private and government property is minimal.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems. Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

6. Work Assignments:
Task: Mop up and patrol fire edge, mop up around Central Camp. Continue road improvement, snagging hazard trees in work areas and adjacent to the fire lines. Continue structural protection throughout division. Backhaul hose and trash. Identify suppression repair needs and accomplish objectives as established by suppression repair plan.
Purpose: Protect life and property with minimal fire spread threatening North Fork and Bass Lake and other private inholdings. Keep roads open for fire traffic. Provide safe access for firefighting resources, cooperators, and the public.
End State: Control lines are completed and no threat of fire spread. Bass Lake and adjacent communities are not impacted. No damage to private property. Major roads are clear of hazards. Firefighters, cooperators, and the public can travel major roads with minimal risk. Roads are kept open and access into the fire area is not compromised.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems. Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

6. Work Assignments:									
Continue structure defense measures and point protection.									
Conduct defensive firing operations around Vermillion Resort and Pack Station when necessary to protect values at risk.									
7. Special Instructions:									
Backhaul all trash and excess supplies and equipment.									
Identify sensitive archeological and historical resource sites.									
Utilize MIST tactics when in the Wilderness areas.									
Bear sightings have been reported around Vermillion Spike. Secure all rations, do NOT leave food out. Report any issues to Line SOFR									
Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems.									
Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Operations: **October 26, 2020**

INCIDENT: Creek Fire | Date Prepared: October 25, 2020 | TIME: 1600

Major Hazards and Risks:

- **COMPLACENCY AND FATIGUE**
- **HUMAN FACTORS OF ACCIDENTS**

COMPLACENCY AND FATIGUE

- ✓ **Watch for hazardous attitudes**—complacency (just another routine fire), resigned (we can't make a difference), impulsive (do something even if it is wrong), invincible (it can't happen to us), and group think (afraid to speak-up or disagree). We could also add cocky, know-it-all, and "we have always done it that way"...
- ✓ One of the standard fire orders stresses the importance of staying alert. Complacency and staying alert are not compatible. The hazards haven't gone away so we need to stay focused on them. It only takes a second of complacency for an accident to occur.
- ✓ Fatigue - Get adequate rest before beginning the next work day. Remember that fatigue is cumulative- a little bit every day adds up to reduced immune function, impaired thinking and decision-making. Fatigue prevention includes hydration and temperature control, it is recommended for a person to drink at least two gallons of water per shift. Pace yourself on the job. Heat/cold tolerance differs among personnel, if you push too hard to keep up with others, you may not last the shift.

HUMAN FACTORS OF ACCIDENTS

Personality and Safety Attitude issues-

- Reckless operation.
- Anger or frustration on the job.
- Social pressure to operate in hazardous situation or condition.
- Failure to report or act upon incidents of misconduct.
- Toleration of unsafe acts and behaviors.

Personality and Safety Attitude Mitigations-

- ✓ Take personal responsibility for your own safety and that of your co-workers.
- ✓ Know and follow safety rules.
- ✓ Use required personal protective equipment.
- ✓ Keep an eye out for hazards. Always ask, "What could go wrong here?"
- ✓ Put your personal feelings and problems aside while you're working.
- ✓ Urge your co-workers to follow safety procedures.
- ✓ Know what to do in an emergency.
- ✓ Report any safety hazards you can't fix.

Thanks from your Safety Team!!

Prepared By (Communications Unit Leader)				Incident Location		Sierra National Forest		County: LAC State: CA		Latitude: " N Longitude: W		
Scott La Rue Routine (916) 591-9026 and EMERGENCY (925) 532-5464												

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

DAILY COVID QUESTIONS:

Have all employees apply this self-assessment prior to entering any work location every day.

Can you answer "YES" to either question? If so, report to the Medical Unit immediately:

- 1) In the last 14 days have you had a fever or chills, shortness of breath, body-aches, coughing or new loss of taste or smell (not attributable to something else, e.g. allergies)?
- 2) In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms.

- | | | |
|-----------------------------------|------------------------|-------------------------|
| • Cough | • Muscle or Body Aches | • Fatigue |
| • Shortness of breath | • Sore Throat | • Nausea/Vomiting |
| • Fever (100.4 or more) or Chills | • Cough | • Diarrhea |
| • New loss of Taste or Smell | • Headache | • Congestion/Runny Nose |

Persons who are displaying symptoms that the medical unit feels are suspicious for COVID-19 will be tested. This will be coordinated by the incident COVID taskforce and the local public health department.

If a person has mild symptoms that might be caused by other conditions (like heat illness, dehydration, etc.), the medical unit may isolate, treat and observe for up to 24 hrs. to determine if COVID testing is needed.

DMOB process for the Creek Fire

China Peak, Auberry School and Vermilion Camps

All Resources, including CalFire Contractors (Except Cal Fire) will report to DMOB at China Peak at their assigned times to start the DMOB Process.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

CalFire Resources will DMOB at Auberry Elementary School.

- Contact Matt Dunham (559) 281-4312 to start the DMOB process
- Resources will have to have a Mechanical Inspection and we wash, contact Billy Greenwood (559) 218-4330
- All Cal Fire resources (including contract) need to call CalFire Finance before leaving incident (925) 532-5446
- All CalFire resources (including contract) need to call FKU expanded (559) 294-6818 to be released from the incident
- FKU expanded will notify Creek DMOB (916) 591-9008 to notify which resources have been released

ECCO Camp

All resources will report to Episcopal Conference Center, Oakhurst to DMOB (no ICS 221 Demobilization Checkout Sheet will be provided). Return any checkout supply items to the Base Camp Manger, go through Ground Support, Comms and finish at Finance. When complete use the QR code located at finance to complete the DMOB process in order to be released from incident.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

The DMOB list can be found by scanning the QR Code on the cover of the IAP and clicking on the DMOB list Button.

Any questions call DMOB at (916) 591-9008

CODE OF CONDUCT

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Other violations of USDA and Forest Service standards of conduct

Each firefighter is expected to be physically and mentally prepared to perform emergency duties at any time.

Human Resources Message

COMMUNICATION

Communication is a two-way street. When communication becomes a one way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.

Whatever it is, clear communication lines in a respectful manner and make it a smooth sage flowing two-way street!

Tony Torres – HRSP

\$\$\$ Finance \$\$\$

You may either turn in your CTR or shift ticket hardcopy or take a picture of in and send it electronically to this email address.

2020.creek.finance@firenet.gov

Please turn in your CTR or shift ticket at least every other day and make sure it is legible, includes your resource order number and is signed by your supervisor.

Call Clovis ICP at 951-205-3819 if you have questions.

Training Specialist - Creek Fire

The Training Specialist is working remotely. Training Specialist Contact Information:

- Bob Rivelle (Available daily between 0630 and 2200 Hours)
- Call/Text: 707.498.1761
- Email: robert_rivelle@nps.gov

How to register as a Trainee:

- Use the QR code below. If you're unable to register using the QR code, please call 707.498.1761.
- Once registered, you will receive text and email updates.

To close-out your training assignment:

1. **Trainer:** Complete and Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
2. **Trainer:** Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
3. **Trainee:** Complete the Trainee Exit Questions located at the QR Code below.
4. **Trainee:** Text or email the individual performance rating (ICS 225) to the Training Specialist.
5. Once completed, the Trainee and the Training Specialist will have a brief conversation.

MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other																										
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>																										
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>																										
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG PAGE 106</p>																													
Treatment:																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:</p>																													
Helispot / Extraction Site Size and Hazards:																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extermination</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Function</th> <th style="width: 25%;">Channel Name/Number</th> <th style="width: 15%;">Receive (RX)</th> <th style="width: 15%;">Tone/NAC *</th> <th style="width: 15%;">Transmit (TX)</th> <th style="width: 15%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND																													
TACTICAL																													
<p>7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p>																													
<p>8. ADDITIONAL INFORMATION: Updates/Changes, et c.</p>																													
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
