CREEK FIRE

CA-SNF-001391
P5 NJ3F (0515)

0700 - Operations Briefing
1700 - Planning Meeting

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Creek Fire	2. Operational Period:	Date From: 10/28/2020	Date To: 10/28/2020	
		Time From: 0700	Time To: 1900	

3. Objective(s):

Leaders Intent:

- Suppress and repair the Creek Fire using a full range of management tactics & strategies that minimize exposure to firefighters, communities and reduce the risk to COVID19.

Management Objectives:

- Ensure safety of emergency responders & public utilizing strategies & risk management processes with the highest probability of success.
- Protect natural and cultural resources, commercial timber and critical infrastructure while utilizing resource and agency advisors.
- Repair areas disturbed by fire suppression activities to minimize potential for excessive erosion and impacts to natural and cultural resources.
- Foster and maintain good relationships with local cooperators, stakeholders and public while providing coordinated, accurate and timely information.
- Effectively manage cost and track accountable property to assist with financial reconciliation.

Control Objectives

- Keep the fire south of the South Fork of Merced River and the Minarets Range.
- Keep the fire south and west of Pond Lily Lake and the Silver Divide.
- Keep the fire within the existing fire footprint.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Creek Fire Weather Forecast (above 5000 ft)

FORECAST NO: 51
PREDICTION FOR: 0600 Wed to 0600 Thu
SHIFT DATE: 10/28/20
TIME/DATE FORECAST ISSUED: 1800 10/27/20

NAME OF FIRE: Creek Fire
UNIT: CA-SNF-001391
Incident Meteorologist: Angie Enyedi
904-318-4041

EXTENDED PERIOD OF CRITICALLY LOW HUMIDITY

High pressure will build across the region through the weekend with a warming trend and critically low humidity ranging in the teens to single digits at elevation with poor nighttime recovery. Only slight humidity recovery is expected in the afternoon and evening across lower elevations as up-drainage flow develops. Inversion strength will progressively increase each day which will increase both smoke coverage and persistence.

WEDNESDAY: Mostly sunny, more lingering drainage smoke. Up-drainage winds in afternoon.

Stability: Stronger morning inversion, generally below 4 kft.

Location	Maximum Temperature (F) & Minimum Humidity (%)		20-ft Winds (mph)
Slopes & Valleys	Upper 60s	15-25%	Down drainage 2-5 early morning, gusts 12. Winds becoming up-slope/up-canyon by early afternoon WSW 5-8, gusts 15.
Ridges & Peaks	Near 60	5-15%	ENE 10-15, gusts 20 early morning. Winds becoming terrain influenced into afternoon WSW 5-10, gusts 15-20.

WEDNESDAY NIGHT: Clear, cool with poor humidity recovery.

Stability: Stronger nighttime inversion below 5 kft. More smoke accumulation in drainages.

Location	Minimum Temperature (F) & Maximum Humidity (%)		20-ft Winds (mph)
Slopes & Valleys	40s	20-30%	Up drainage early evening WSW 4-8, gusts 10. Winds becoming down drainage NNE to ENE through midnight 2-5, gusts 10.
Ridges + Peaks	Near 40	10-20%	Up-drainage WSW 5-10, gusts 15 early evening. Winds becoming down-drainage ENE to 3-8, gusts 12.

WEATHER OUTLOOK:

- THU – SUN: Warm & dry, poor RH recovery. Terrain driven winds. Stronger inversions = more smoke.
- MON – TUE: Passing clouds, slightly cooler, some RH increase under southerly flow.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 51	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire	OPERATIONAL PERIOD: Day Shift 10/28/20 0700-1900
DATE ISSUED: 10/27/2020	TIME ISSUED: 1830
UNIT: Sierra NF (CA-SNF-001391)	SIGNED: 1st Patrick Doyle, FBAN-t <i>Patrick Doyle</i>

INPUTS

WEATHER SUMMARY: *See Fire Weather Forecast for Specifics*

FUELS:

Grass	GS1, GS2
Shrub	SH1
Timber	TU5, TL2, TL4, TL7
FDPM (1hr)	5
10-hr (%)	5
100-hr (%)	7
1000-hr(%)	6
Live Fuels	2/3 cured

Duff depth under pine is deep (12").

With the drought conditions, live fuels are available to burn.

TOPOGRAPHY:

- Smoke inversion height (above sea level): N/A
- Elevation: 3,000-9,500. Higher elevations will see cold nighttime temps. Nighttime humidity recovery to remain low 10-20%.
- Slopes: 10%-50%. Expect NE winds near ridgetops, and terrain elsewhere, with wind direction and speed potential greatest where slope and fuels align.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Subsiding Mono Winds transition to diurnal wind pattern, will continue low fuel moistures with low daytime and poor nighttime Rh recovery. Maintaining increased fire activity.
- Heavy fuels will burn readily and hold heat. Resistant to control. Increase in activity in interior creeping and smoldering in the duff and heavy fuels.
- Expect fire behavior with lower fuel moistures to remain very active, where fire activity is present. Moderate fire behavior where alignment of slope and fuels align with transition to diurnal wind pattern. Potential torching and group tree crowning, spotting up to 0.5 mile.
- Nighttime humidity will do little (down to 10% ridges) to moderate fire activity and diminish fire activity overnight. Shorter daylengths will continue to reduce active burn period.

Probability of Ignition (4-8,000'): 90%/80% (Unshaded/Shaded)					
Spotting Potential: Minimal-Low					
Spotting Distance: .10-.30 mile (short range)					
Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-8	ERC	87	98th
TL7	2-4	6-12	BI	86	94th
SH1	2-4	4-8	High Sierra RAWS (44520) Years 2000-2020 (present)		

SPECIFIC:

- DIV M: Expect similar fire behavior as yesterday, active surface spread with individual and group tree torching, spotting; less activity smoldering/creeping in areas with less fuels or slope. Areas west, north, and east of Vermillion Camp, north of Edison Lake will remain most active with spread in the Graveyard Meadows area. Spread dependent on terrain will primarily to the E-NE.
- DIV J – Little fire activity, edged in by rocks at higher elevations where fire is following green vegetation and timber stringers. Low to moderate activity in clumps of remaining island of fuels, very low potential to move. Active fire spread along the southern edge 2018 Lion Fire, moving east through pockets of fuel.
- DIVS E – DIVS I: Little activity, with few interior fuels and deep duff consuming and burning. Expect to see this continue, with increased consumption with lower Rh and dry fuels. Area in DIV E, smoldering and creeping in area by Little Shuteye Peak.
- DIVS (C-A, Z-N): No activity near line except near Cascadel Point, but with scattered heat throughout interior of divisions, creeping and smoldering where fuels exist. Potential torching and spotting if exposed to the sun.

SAFETY

When winds are variable or switch direction, watch out for increase or changing fire activity.

6. Work Assignments:
DIVISION E/F/G
Task: Monitor and secure line where needed from Grizzly Road to Little Shuteye. Continue to secure and mop-up from 5S10 to Grizzly Road. Secure unburned islands that have spotting potential.
Purpose: Protect private inholdings, government buildings, and developments
End State: No further damage to private and government property.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems.
 Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

DIVISION I:
Task: Continue to hold and mop up control lines south of Red Top Mountain down to DP57. Continue snagging hazard trees in work areas and adjacent to the fire lines.
Purpose: Limit fire spread to the north and west protecting values at risk in those areas.
End State: Direct attack was successful stopping fire progression to the north and west.

DIVISION J:
Task: Monitor fire activity from the air and IR as smoke conditions allow. Identify opportunities to limit fire spread towards Red's Meadow and Devils Postpile. Protect private inholdings and government property where fire conditions allow and resources can safely engage.
Purpose: Protect private inholdings with minimal fire damage and there is a high probability of success.
End State: Reduce fire spread towards Yosemite National Park, Devils Postpile and Red's Meadow. Damage to private and government property is minimal.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems. Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

6. Work Assignments:

Task: Mop up and patrol fire edge, mop up around Central Camp. Continue road improvement, snagging hazard trees in work areas and adjacent to the fire lines. Continue structural protection throughout division. Backhaul hose and trash. Identify suppression repair needs and accomplish objectives as established by suppression repair plan.

Purpose: Protect life and property with minimal fire spread threatening North Fork and Bass Lake and other private inholdings. Keep roads open for fire traffic. Provide safe access for firefighting resources, cooperators, and the public.

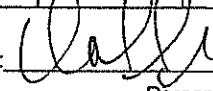

End State: Control lines are completed and no threat of fire spread. Bass Lake and adjacent communities are not impacted. No damage to private property. Major roads are clear of hazards. Firefighters, cooperators, and the public can travel major roads with minimal risk. Roads are kept open and access into the fire area is not compromised.

7. Special Instructions:

Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems. Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

6. Work Assignments:
 Secure fires edge around identified values at risk.
 Continue to mop up and patrol completed handline.
 Construct direct handline where needed.
 Identify and complete suppression repair as needed.

7. Special Instructions:
 Backhaul all trash and excess supplies and equipment.
 Identify sensitive archeological and historical resource sites.
 Utilize MIST tactics when in the Wilderness areas.
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems.
 Send a picture of the label, LAT/LONG and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Operations: **October 28, 2020**

Strong leadership is one of the best safety mitigations we have.

Key points for leadership to create a safe work environment:

- Recognize human factor barriers to situational awareness.
 - Specifically hazardous attitudes -invulnerability & complacency
 - Things can and will happen to you!
 - What may seem routine may end up hurting you!
- Operational leadership
 - Motivate firefighters with a “Can Do Safely” attitude.
 - This is accomplished by leading by example!
- Safety quotes to remember:
 - “Good safety prevents uncomfortable meetings.”
 - “Don’t change the rules by breaking them.”
 - “Doing the right thing is almost never the easiest thing to do, but you must do it anyway.”

Never forget why you’re in the leadership position!

*“Risk Management Process is part of **REPAIR**”*

Prepared By (Communications Unit Leader) *Scott La Rue*

Sierra National Forest
 Incident Location
 County: State: CA Latitude: " N Longitude: W

Scott La Rue Routine (916) 591-9026 and EMERGENCY (925) 532-5464

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

CODE OF CONDUCT

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Other violations of USDA and Forest Service standards of conduct

Each firefighter is expected to be physically and mentally prepared to perform emergency duties at any time.

Human Resources Message

It was
CHARACTER
that got us out of bed,
COMMITMENT
that moved us into action, &
DISCIPLINE
that enabled us to follow through
--Zig Ziglar

\$\$\$ Finance \$\$\$

You may either turn in your CTR or shift ticket hardcopy or take a picture of in and send it electronically to this email address.

2020.creek.finance@firenet.gov

Please turn in your CTR or shift ticket at least every other day and make sure it is legible, includes your resource order number and is signed by your supervisor.

Call Clovis ICP at 951-205-3819 if you have questions.

Training Specialist - Creek Fire

The Training Specialist is working remotely. Training Specialist Contact Information:

- Bob Rivelle (Available daily between 0630 and 2200 Hours)
- Call/Text: 707.498.1761
- Email: robert_rivelle@nps.gov

How to register as a Trainee:

- Use the QR code below. If you're unable to register using the QR code, please call 707.498.1761.
- Once registered, you will receive text and email updates.

To close-out your training assignment:

1. **Trainer:** Complete and Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
2. **Trainer:** Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
3. **Trainee:** Complete the Trainee Exit Questions located at the QR Code below.
4. **Trainee:** Text or email the individual performance rating (ICS 225) to the Training Specialist.
5. Once completed, the Trainee and the Training Specialist will have a brief conversation.

DAILY COVID QUESTIONS:

Have all employees apply this self-assessment prior to entering any work location every day.

Can you answer "YES" to either question? If so, report to the Medical Unit immediately:

- 1) In the last 14 days have you had a fever or chills, shortness of breath, body-aches, coughing or new loss of taste or smell (not attributable to something else, e.g. allergies)?
- 2) In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms.

- | | | |
|-----------------------------------|------------------------|-------------------------|
| • Cough | • Muscle or Body Aches | • Fatigue |
| • Shortness of breath | • Sore Throat | • Nausea/Vomiting |
| • Fever (100.4 or more) or Chills | • Cough | • Diarrhea |
| • New loss of Taste or Smell | • Headache | • Congestion/Runny Nose |

Persons who are displaying symptoms that the medical unit feels are suspicious for COVID-19 will be tested. This will be coordinated by the incident COVID taskforce and the local public health department.

If a person has mild symptoms that might be caused by other conditions (like heat illness, dehydration, etc.), the medical unit may isolate, treat and observe for up to 24 hrs. to determine if COVID testing is needed.

DMOB process for the Creek Fire

China Peak, Auberry School and Vermilion Camps

All Resources, including CalFire Contractors (Except Cal Fire) will report to DMOB at China Peak at their assigned times to start the DMOB Process.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

CalFire Resources will DMOB at Auberry Elementary School.

- Contact Matt Dunham (559) 281-4312 to start the DMOB process
- Resources will have to have a Mechanical Inspection and we wash, contact Billy Greenwood (559) 218-4330
- All Cal Fire resources (including contract) need to call CalFire Finance before leaving incident (925) 532-5446
- All CalFire resources (including contract) need to call FKU expanded (559) 294-6818 to be released from the incident
- FKU expanded will notify Creek DMOB (916) 591-9008 to notify which resources have been released

ECCO Camp

All resources will report to Episcopal Conference Center, Oakhurst to DMOB (no ICS 221 Demobilization Checkout Sheet will be provided). Return any checkout supply items to the Base Camp Manger, go through Ground Support, Comms and finish at Finance. When complete use the QR code located at finance to complete the DMOB process in order to be released from incident.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

The DMOB list can be found by scanning the QR Code on the cover of the IAP and clicking on the DMOB list Button.

Any questions call DMOB at (916) 591-9008

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p>																													
<p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																												
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other																												
Patient Location	Descriptive Location & Lat. / Long. <i>(WGS84)</i>																												
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																												
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>																												
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>																												
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG PAGE 106</p>																													
Treatment:																													
<p>4. TRANSPORT PLAN:</p>																													
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:																													
Helispot / Extraction Site Size and Hazards:																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">Function</th> <th style="width: 20%;">Channel Name/Number</th> <th style="width: 15%;">Receive (RX)</th> <th style="width: 15%;">Tone/NAC *</th> <th style="width: 15%;">Transmit (TX)</th> <th style="width: 15%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND																													
TACTICAL																													
<p>7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p>																													
<p>8. ADDITIONAL INFORMATION: Updates/Changes, et c.</p>																													
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
