CREEK FIRE

CA-SNF-001391
P5 NJ3F (0515)

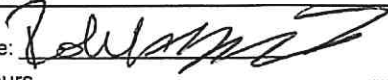

0700 - Operations Briefing

1700 - Planning Meeting

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Creek Fire	2. Operational Period:	Date From: 10/30/2020 Time From: 0700	Date To: 10/30/2020 Time To: 1900
3. Objective(s):			
<u>Leaders Intent:</u>			
<ul style="list-style-type: none"> - Suppress and repair the Creek Fire using a full range of management tactics & strategies that minimize exposure to firefighters, communities and reduce the risk to COVID19. 			
<u>Management Objectives:</u>			
<ul style="list-style-type: none"> - Ensure safety of emergency responders & public utilizing strategies & risk management processes with the highest probability of success. - Protect natural and cultural resources, commercial timber and critical infrastructure while utilizing resource and agency advisors. - Repair areas disturbed by fire suppression activities to minimize potential for excessive erosion and impacts to natural and cultural resources. - Foster and maintain good relationships with local cooperators, stakeholders and public while providing coordinated, accurate and timely information. - Effectively manage cost and track accountable property to assist with financial reconciliation. 			
<u>Control Objectives</u>			
<ul style="list-style-type: none"> - Keep the fire south of the South Fork of Merced River and the Minarets Range. - Keep the fire south and west of Pond Lily Lake and the Silver Divide. - Keep the fire within the existing fire footprint. 			
General Situational Awareness:			
Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.			
In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.			
Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

Creek Fire Weather Forecast (above 5000 ft)

FORECAST NO: 53
PREDICTION FOR: 0600 Fri to 0600 Sat
SHIFT DATE: 10/30/20
TIME/DATE FORECAST ISSUED: 1800 10/29/20

NAME OF FIRE: Creek Fire
UNIT: CA-SNF-001391
Incident Meteorologist: Angie Enyedi
904-318-4041

EXTENDED PERIOD OF CRITICALLY LOW HUMIDITY

High pressure offshore of the CA coast will nudge farther south Fri into Fri night as a mid-level trough moves onshore the Pacific NW Coast. This slight pattern shift will transition local general winds from ENE Fri morning to NNW Fri night. Terrain driven winds will continue across lower elevations, with some wind channeling Fri afternoon and evening within aligned NNW to ESE drainages (including Junction Butte area). Extended durations of critically low humidity with poor recovery will continue as inversion strength increases, resulting in more persistent and widespread smoke. NOTE: *General* drainage flow directions: ENE down-drainage, up-drainage WSW to SSW.

FRIDAY: Mostly clear, but hazy & smoky. Warm & very dry. Up-drainage flow by midday.
Stability: Stronger morning inversion with more smoke coverage, visibility improvement into afternoon.

Location	Maximum Temperature (F) & Minimum Humidity (%)	20-ft Winds (mph)
Low Slopes & Valleys	70s 7-17%	Down-drainage 2-5 early morning, gusts 10. Winds becoming up-drainage 6-10, gusts 18.
Ridges & Peak	60s 5-15%	NNE 10 gusts 15-20 early morning. Winds becoming NNW to WNW 10-15, gusts 20 into afternoon.

FRIDAY NIGHT: Clear, cool with continued poor humidity recovery. Down-drainage winds.
Stability: Stronger nighttime inversions in drainages. Mid-slope thermal belt generally 5-7 kft.

Location	Minimum Temperature (F) & Maximum Humidity (%)	20-ft Winds (mph)
Low Slopes & Valleys	35-45 10-20%	Up-drainage early evening 3-7, gusts 12. Winds becoming down drainage 2-5, gusts 10 by midnight.
Ridges + Peaks	40s to near 50 5-15%	NNW 10, gusts 15-20.

WEATHER OUTLOOK:

- SAT – MON: Warm & dry, poor RH recovery. Terrain driven winds. Stronger inversions = more smoke.
- TUE – THU: Passing clouds, slightly cooler, & some RH increase under southerly general winds.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 53	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire	OPERATIONAL PERIOD: Day Shift 10/30/20 0700-1900
DATE ISSUED: 10/29/2020	TIME ISSUED: 1830
UNIT: Sierra NF (CA-SNF-001391)	SIGNED: <i>1st Patrick Doyle, FBAN-t</i> 

INPUTS

WEATHER SUMMARY: *See Fire Weather Forecast for Specifics*
** EXTENDED PERIOD OF CRITICALLY LOW HUMIDITY **

FUELS:

Grass	GS1, GS2
Shrub	SH1
Timber	TU5, TL2, TL4, TL7
FDPM (1hr)	2
10-hr (%)	2
100-hr (%)	5
1000-hr(%)	6
Live Fuels	2/3 cured

Very low fuel moistures (FM) increase spotting receptiveness. Seasonal low FM and amplified by critically low Rh.

TOPOGRAPHY:

- Elevation: 3,000-9,500. Higher elevations will see cold nighttime temps. Nighttime humidity recovery to remain extreme to very low (5-20%).
- Slopes: 10%-50%. Expect NNW-WNW winds near ridgetops, and terrain driven elsewhere with wind direction and speed greatest when slope and fuels align.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Currently very low fuel moistures, from dry grass/needle-cast (1-hr) on up to heavy 1000-hour (3"-8" dia.) fuels are receptive to spotting and carrying fire.
- Heavy fuels will burn readily and hold heat. Resist control. Creeping and smoldering in the duff and heavy fuels. Some individual & group tree torching contributing to spotting.
- Expect fire behavior where alignment of slope and fuels align, and potentially spotting ahead up to 0.10 mile (528 ft.).
- Nighttime humidity recovery will do little (down to 5% ridges) to moderate fire activity and diminish overnight activity. Shorter day-lengths will continue to reduce active burn period.

Probability of Ignition (4-8,000'): 100%/60%
(Unshaded/Shaded)

Spotting Potential: Minimal-Low

Spotting Distance: .10-.20 mile (short range)

Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-20	ERC	91	100th
TL7	2-4	4-12	BI	89	96th
SH1	2-7	6-25	High Sierra RAWs (44520) Years 2000-2020 (present)		

SPECIFIC:

- DIV M: Activity near confluence of Middle Fork and Fish Creek, spotting and spreading intermittently through the rocks and patchy fuels. Individual and group tree torching and spotting factor for all of DIV M; smoldering/creeping in areas with less fuels or slope. Areas north and east of Vermillion Camp, north of Edison Lake will remain most active with spread to the NE. Spread dependent on terrain will primarily to the E-NE.
- DIV J – Little fire activity, edged in by rocks at higher elevations where fire is following green vegetation and timber stringers. Low to moderate activity in clumps of remaining island of fuels, very low potential to move. Active fire spread along the southern edge 2018 Lion Fire, moving east through pockets and sparse fuels near confluence of Middle Fork & Fish Creek.
- DIVS E – DIVS I: Little activity, with few interior fuels and deep duff consuming and burning. Expect to see this continue, with increased consumption with lower Rh and dry fuels. Area in DIV E, smoldering and creeping in area by Little Shuteye Peak.
- DIVS (C-A, Z-N): No activity near line except what is near Cascadel Point, but with scattered heat throughout interior of divisions, creeping and smoldering where fuels exist.

SAFETY

Watch out when working recently burned forested areas for unidentified overhead hazards.

6. Work Assignments:
 The task of suppression repair is for operational resources to systematically move resources aligned with local forest priorities to complete suppression repair.
 The purpose behind the repair is to restore the lands following suppression activity that has both damaged and created hazards on impacted
 The end state is completion of repair with Resource Advisor approval of work completed and documentation.

7. Special Instructions:
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems.
 Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

6. Work Assignments:
 The task of suppression repair is for operational resources to systematically move resources aligned with local forest priorities to complete suppression repair.
 The purpose behind the repair is to restore the lands following suppression activity that has both damaged and created hazards on impacted
 The end state is completion of repair with Resource Advisor approval of work completed and documentation.

7. Special Instructions:
 Backhaul all trash and excess supplies and equipment.
 Use the Accountable Property report to identify or return incident property. ie. Mark III pumps, water tanks, UTVs, sprinkler systems.
 Send a picture of the label, LAT/LONG or add to collector map and location to Josh_Ramsey@firenet.gov or text to 530.277.1213

Creek Fire

October 30, 2020

LOOKOUTS, **C**OMMUNICATIONS, **E**SCAPE ROUTES, **S**AFETY ZONES

Transportation

- ✓ One way traffic control on Kaiser Pass road.
 - See traffic plan instructions in IAP.
 - Drive slow and expect opposing traffic that might not know radio protocols.
- ✓ Power company and their contractors have been observed driving fast throughout the incident. Be diligent even on open roads.
- ✓ Watch speeds when returning to camp from Branch XX area. Long downhill runs on lower part of Kaiser pass require concentration to keep speeds from creeping up.

Weather

- ✓ Very low RH's predicted to last throughout the week.
- ✓ Drink plenty of fluids. Even though mild temperatures seem comfortable, the dry air will exacerbate dehydration.
- ✓ Days are getting warmer, but nights are still chilly. Dress accordingly.

Fireline

- ✓ Life jackets are required for all personnel traveling in boats (Silver Group).
- ✓ Lots of folks demobing and checking into the incident. Make sure all new folks to the division get a thorough, site specific in-brief when they arrive.
- ✓ Snags are still a huge concern. It never hurts to review hazard tree safety and mitigation again. Check your worksite each day for new conditions.

Prepared by: Doug McKelvey/Mike Seymour

Date: Prepared 10/29/2020

We are ALL accountable for SAFE driving behaviors

Kaiser Pass Road Traffic Plan

Traffic pattern for Branch XXV Kaiser Pass road:

For Divisions N/P/R call out each Drop Point on Tac-5 vehicle heading from

1. DP-36 to DP-30,
2. DP-30 to DP-31,
3. DP-31 to Tennessee Point,
4. Tennessee Point to Forebay,
5. Forebay to 01/80 Break,
6. 01/80 Break to Mono Hot Springs,
7. Mono Hot Springs to Division Break
8. November/Mike Tac-7 Division Break to Vermillion

Prepared By (Communications Unit Leader) *Kody Kerwin*

Sierra National Forest
 County: LAC State: CA Latitude: " N Longitude: W

Kody Kerwin Routine (916) 591-9026 and EMERGENCY (925) 532-5464

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

DAILY COVID QUESTIONS:

Have all employees apply this self-assessment prior to entering any work location every day.

Can you answer “YES” to either question? If so, report to the Medical Unit immediately:

- 1) In the last 14 days have you had a fever or chills, shortness of breath, body-aches, coughing or new loss of taste or smell (not attributable to something else, e.g. allergies)?
- 2) In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms.

- | | | |
|--|-------------------------------|--------------------------------|
| • Cough | • Muscle or Body Aches | • Fatigue |
| • Shortness of breath | • Sore Throat | • Nausea/Vomiting |
| • Fever (100.4 or more) or Chills | • Cough | • Diarrhea |
| • New loss of Taste or Smell | • Headache | • Congestion/Runny Nose |

Persons who are displaying symptoms that the medical unit feels are suspicious for COVID-19 will be tested. This will be coordinated by the incident COVID taskforce and the local public health department.

If a person has mild symptoms that might be caused by other conditions (like heat illness, dehydration, etc.), the medical unit may isolate, treat and observe for up to 24 hrs. to determine if COVID testing is needed.

Pump Tracker (10/30/2020)

DMOB process for the Creek Fire

China Peak, Auberry School and Vermilion Camps

All Resources, including CalFire Contractors (Except Cal Fire) will report to DMOB at China Peak at their assigned times to start the DMOB Process.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

CalFire Resources will DMOB at Auberry Elementary School.

- Contact Matt Dunham (559) 281-4312 to start the DMOB process
- Resources will have to have a Mechanical Inspection and we wash, contact Billy Greenwood (559) 218-4330
- All Cal Fire resources (including contract) need to call CalFire Finance before leaving incident (925) 532-5446
- All CalFire resources (including contract) need to call FKU expanded (559) 294-6818 to be released from the incident
- FKU expanded will notify Creek DMOB (916) 591-9008 to notify which resources have been released

ECCO Camp

All resources will report to Episcopal Conference Center, Oakhurst to DMOB (no ICS 221 Demobilization Checkout Sheet will be provided). Return any checkout supply items to the Base Camp Manger, go through Ground Support, Comms and finish at Finance. When complete use the QR code located at finance to complete the DMOB process in order to be released from incident.

Resources requiring a OES 42 for time keeping will have to report to Clovis ICP to get the OES 42 signed by the OES Rep.

The DMOB list can be found by scanning the QR Code on the cover of the IAP and clicking on the DMOB list Button.

Any questions call DMOB at (916) 591-9008

CODE OF CONDUCT

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Other violations of USDA and Forest Service standards of conduct

Each firefighter is expected to be physically and mentally prepared to perform emergency duties at any time.

Human Resources Message

Thought for the Day

Just as accident rates increase when you become a little complacent, so do human resource contacts and complaints of inappropriate behavior, harassment, and discrimination.

- The fire has been going on for awhile
- People are starting to get tired, and some ready to go home
- People have a little more time to think about things that upset them during a fire
- People are more easily irritated

Be aware of these facts and make the necessary effort to recognize and deal with human resource situations before they become conflicts that are painful and out of control.

Tony Torres – HRSP
505-239-0041 or Anthony.torres@usda.gov

\$\$\$ Finance \$\$\$

You may either turn in your CTR or shift ticket hardcopy or take a picture of in and send it electronically to this email address.

2020.creek.finance@firenet.gov

Please turn in your CTR or shift ticket at least every other day and make sure it is legible, includes your resource order number and is signed by your supervisor.

Call Clovis ICP at 951-205-3819 if you have questions.

Training Specialist - Creek Fire

The Training Specialist is working remotely. Training Specialist Contact Information:

- Bob Rivelle (Available daily between 0630 and 2200 Hours)
- Call/Text: 707.498.1761
- Email: robert_rivelle@nps.gov

How to register as a Trainee:

- Use the QR code below. If you're unable to register using the QR code, please call 707.498.1761.
- Once registered, you will receive text and email updates.

To close-out your training assignment:

1. **Trainer:** Complete and Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
2. **Trainer:** Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
3. **Trainee:** Complete the Trainee Exit Questions located at the QR Code below.
4. **Trainee:** Text or email the individual performance rating (ICS 225) to the Training Specialist.
5. Once completed, the Trainee and the Training Specialist will have a brief conversation.

Training Registration QR Code:

MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG PAGE 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): <i>(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, et c.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
