1. Incident Name: CREEK	2. Operational Period: Date From: 11/4/2020 Date To: 11/4/2020 Time From: 0700 Time To: 1900															
3. Objective(s): <ul style="list-style-type: none"> • Provide for firefighter and public safety by assessing and mitigating risk in order to develop and implement sound tactical operations. Ensure all resources have a clear understanding of assignments and associated hazards. • Protect critical infrastructure, commercial timber, and natural and cultural resources by proactively engaging agencies and incident resource advisors. • Maintain and enhance long-term strategic plan by identifying and implementing suppression options considering probability of success, firefighter exposure, risk mitigation, seasonality, and resource prioritization and allocation. • Repair area impacted by fire suppression activities to minimize potential for excessive erosion, reduce visual impacts, and protect natural and cultural resources from further damage. • Maintain and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated. • Follow CDC, local, state, and federal COVID-19 mitigation guidance and protocols to reduce exposure and protect firefighters and the public from virus spread. • Treat all personnel with dignity and respect by providing a harassment free, zero-tolerance work environment. • Ensure financial and documentation packages are prepared in accordance with agency requirements and agreements 																
4. Operational Period Command Emphasis: Know the standards for suppression repair. Communicate these expectations with heavy equipment operators prior to engaging. Work with Resource Advisors (READs) to determine the end state appearance. Complete approval and documentation prior to moving. READs are reporting good interaction with crews and overhead in meeting standards, timeframes, and suggesting mitigations.																
General Situational Awareness Locate the Medical Plan (ICS 206) in the IAP. Review the content and know the process for establishing priorities, clearing communications, and establishing command. WEDNESDAY: Mostly clear. More smoke and haze.

Stability: Stronger morning inversion below 7 kft with smoke. **Transport Wind:** WNW 5.

Location	Maximum Temperature (F) & Minimum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	Upper 60s to mid 70s 13-23%	Down-drainage 2-5 early morning, gusts 8. Winds becoming up-drainage by late morning, 6-10, gusts 15-20. Stronger gusts within aligned SW to NW drainages (San Joaquin basin).

WEATHER SUMMARY: *See Fire Weather Forecast for Specifics*
**** EXTENDED PERIOD OF CRITICALLY LOW HUMIDITY ****

FUELS:

Grass	GR1
Shrub	SH1
Timber	TU1, TU5, TL2, TL4, TL7
FDPM (1hr)	5
10-hr (%)	4
100-hr (%)	7
1000-hr (%)	7
Live Fuels	2/3 cured

Very low fuel moistures (FM) increase spotting receptiveness.

Seasonal low FM and amplified by critically low Rh.

TOPOGRAPHY:

- Elevation: 3,000-9,500. Higher elevations will see cold nighttime temps. Nighttime humidity recovery very poor to moderate (20-35%).
- Slopes: 10%-50%. Expect WSW winds near ridgetops, and terrain driven elsewhere with wind direction and speed greatest when slope and fuels align.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- All fuel classes very dry, dead fuels are all single digit, live fuel moistures are at critical levels, entire fuel profile available
- Heavy fuels will burn readily and hold heat. Resist control. Creeping and smoldering in the duff and heavy fuels. Some individual & group tree torching contributing to spotting.
- Expect fire behavior where alignment of slope and fuels align, and potentially spotting ahead up to 0.10 mile (528 ft.).
- Nighttime humidity recovery starting to (20-35%) to moderate fire activity and diminish overnight activity. Shorter day-lengths will continue to reduce active burn period.

Probability of Ignition (4-8,000'): 60%/60% (Unshaded/Shaded)					
Spotting Potential: Minimal-Low					
Spotting Distance: .10-.20 mile (short range)					
Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-20	ERC	77	90th
TL7	2-4	4-12	BI	71	90th
SH1	2-7	6-25	High Sierra RAWS (44520) Years 2000-2020 (present)		

SPECIFIC:

- Timber Knob Area – Fire activity reduced, edged in by rocks at higher elevations where fire is following green vegetation and timber stringers, some potential to move towards Lillian Lake and Lady Lake
- Middle Fork San Joaquin: Activity continues between Middle Fork and Fish Creek, spotting and spreading intermittently through the rocks and patchy fuels. Individual and group tree torching and spotting factor for all of DIV M; smoldering/creeping in areas with less fuels or slope.
- Pincushion: Activity continues with individual and group tree torching being problematic. Ground spread dependent on alignment with slope and wind.
- Vermillion Cliffs: Cold Creek area north of Edison Lake will remain most active with spread to the NE. Spread dependent on terrain will primarily to the E-NE.
- Remainder of Fire Area: limited heat remains. Some islands of fuel continue to consume, POTENTIAL still exists for wind and residual heat to result in spread from quiet area,

SAFETY

Snags and green trees present a hazard with long term fire in the timber. Heads up working around any standing timber. Compromised root structures and burned soil can result in loss of stability.

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio.

Human Resource Message
November 4, 2020**

What Makes Communication Difficult

Words Mean Different Things to Different People

Look up 500 different words in a dictionary and you will find over 2,500 meanings and/or definitions for those same words. To communicate effectively, both the speaker and the listener must have a mutual understanding of the words they use.

The Presenting Problem May Not Be the Major Concern

People often are hesitant to talk about what is really bothering them. The “real issues” are what they tend to hide most carefully. Trying to solve minor problems while the real problems are not clearly understood does not work. Doing this is a major source of ineffectiveness.

Filters Distort What People Hear and Say and Emotions Are Blinding

Our own expectations, experiences, values, biases, self-images, beliefs, ideas, worldview, etc. create a “zone of distortion”, the filter that distorts our interpretation of another person’s message. People are often unaware of how their emotions affect communications with others and emotions can literally put some people out of control and prevent them from communicating effectively.

Here’s what to do to improve communication:

Stand in the other person’s shoes. You have stood in the other person’s shoes when you repeat their point of view back to their satisfaction.

Drop your point of view long enough to take another way of seeing things.

Remember the point of communication is not to win or be right, but to either bring people together or clarify their differences.

Founder of the Forest Service, Gifford Pinchot, said that where conflicting interests must be reconciled, the question shall always be answered from the standpoint of the greatest good of the greatest number in the long run.

AK IMT COVID-19 Purpose and Intent

If you are feeling COVID like symptoms, first call Medical Unit Leader:

925-532-5564

The Alaska IMT is reminding firefighters to apply the core values of wildland fire management community of “Duty, Respect, and Integrity” to our COVID mitigations. Core values include:

- **Duty:** To provide a workforce safe from known hazards such as disease transmission, and keep us, our fellow firefighters, and the public safe, on and off the clock.
- **Respect:** To demonstrate respect to oneself and to each other by taking routine precautions as guided, such as wearing a mask and social distancing.
- **Integrity:** To do the right thing when at home, while travelling, or on assignment. Undertake the precautions to keep ourselves and the rest of the workforce healthy and able to respond. Ensure we are not the source of an outbreak within the public we are assigned to protect.

Essential Mitigations:

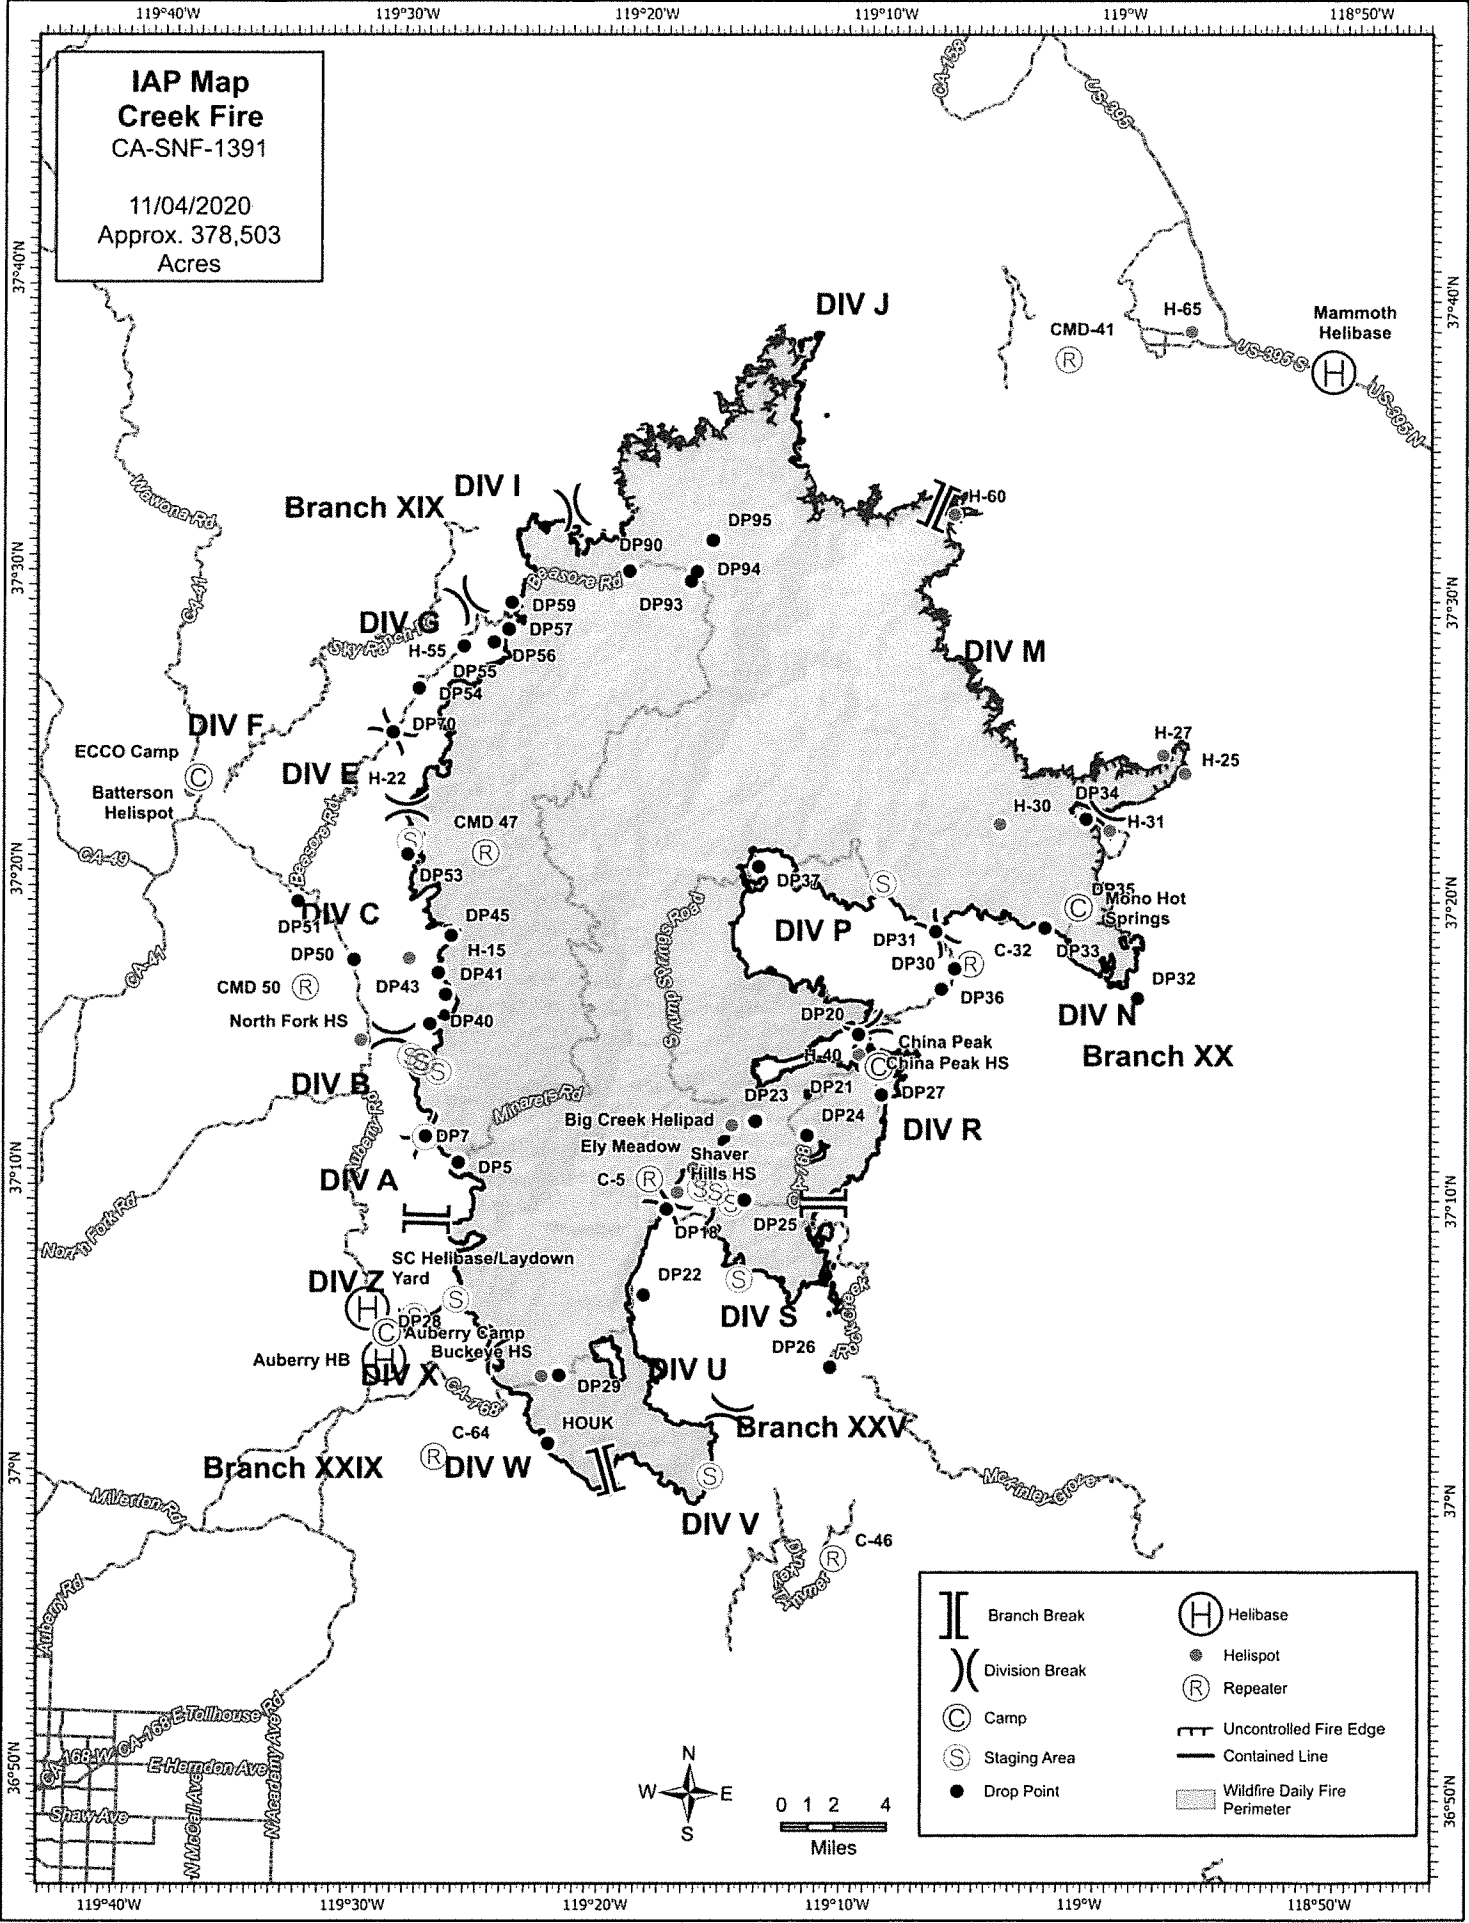

- **Pre-Screening and Regular Monitoring:** Individuals should measure temperature and assess symptoms each day prior to starting work. Ideally, temperature checks should happen before the individual enters the facility or interacts with others on staff or the crew.
- **Social/Physical Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- **Wearing a Mask:** Employees should always wear a facemask or face covering when social distancing cannot be maintained. When facemasks cannot be worn during arduous work tasks, social distancing practices should be implemented.
- **Disinfect and Clean:** Routinely clean and disinfect all areas, particularly “high touch surfaces” such as engine compartments, bathrooms, common areas and shared electronic equipment.
- **Empower** all individuals to ask co-workers to follow social distancing guidelines.

Concept of “Module as One: ”By insulating as a unit, crews and modules can limit outside viral exposure, safely complete operational tasks in closer proximity, and ride in vehicles without face coverings when working within their “**Module as One**” concept:

- As often as practical, the same team members should travel in the same vehicle, work together in the same space, and ensure module members are conscientious regrading mitigations.
- Identify select individuals on a crew or module that will interact at briefing or with the public, ensuring this person relies on social distancing, wears a cloth face covering, and practices hand hygiene during or after every interaction.
- When the “Module as One” has been established, minimize contact with public and outside community. This is to protect every crew member, their family, and the community we serve.
- Team members, crews, and other resources should use a “Module as One” approach to insulate as one unit and reduce exposure to the public and other crews. If each member within a unit is monitored, screened, and healthy, then proximity, when necessary, is not an issue.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
