INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: CREEK	2. Operational Period: Date From: 11/7/2020 Date To: 11/7/2020 Time From: 0700 Time To: 1900															
3. Objective(s): <ul style="list-style-type: none"> • Provide for firefighter and public safety by assessing and mitigating risk in order to develop and implement sound tactical operations. Ensure all resources have a clear understanding of assignments and associated hazards. • Protect critical infrastructure, commercial timber, and natural and cultural resources by proactively engaging agencies and incident resource advisors. • Maintain and enhance long-term strategic plan by identifying and implementing suppression options considering probability of success, firefighter exposure, risk mitigation, seasonality, and resource prioritization and allocation. • Develop and implement a long-term repair strategy in a coordinated and systematic manner considering repair priorities, seasonal access, and equipment and personnel availability. Repair area impacted by fire suppression activities to minimize potential for excessive erosion, reduce visual impacts, and protect natural and cultural resources from further damage. • Maintain and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated. • Follow CDC, local, state, and federal COVID-19 mitigation guidance and protocols to reduce exposure and protect firefighters and the public from virus spread. • Treat all personnel with dignity and respect by providing a harassment free, zero-tolerance work environment. • Ensure financial and documentation packages are prepared in accordance with agency requirements and agreements are closed out when no longer necessary. 																
4. Operational Period Command Emphasis: Use delay strategies as needed, and re-engage only after access to work areas have been scouted, communication tested, and medical response is in place. Lower elevations may be accessible; consider this for your work planning.																
General Situational Awareness Roads may be slippery with the rain and snow. Traffic will be high as public use increases for the weekend. The fresh snow up high will be a tourist attraction! Watch for snow spectators on weekend drives. Be prepared with cold weather gear in case you become stuck, and ensure your vehicle is equipped for snow. Take advantage of this work delay to catch up on rest. It's been a long season.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 61	TYPE OF FIRE: Wildfire
FIRE NAME: Creek Fire	OPERATIONAL PERIOD: Day Shift 11/07/20 0700-1900

INPUTS

WEATHER SUMMARY: *See Fire Weather Forecast for Specifics*
**** SNOW AND RAIN SHOWERS ACROSS THE FIRE AREA ****

FUELS:

Grass	GR1
Shrub	SH1
Timber	TU1, TU5, TL2, TL4, TL7
FDFM (1hr)	7
10-hr (%)	8
100-hr (%)	11
1000-hr(%)	8
Live Fuels	2/3 cured

Very low fuel moistures (FM) increase spotting receptiveness.

Seasonal low FM and amplified by critically low Rh.

TOPOGRAPHY:

- Elevation: 3,000-9,500. Higher elevations will see very cold nighttime temps. Nighttime humidity recovery very good to excellent (80-100%).
- Slopes: 10%-50%. Expect SSW winds near ridgetops, and terrain driven elsewhere with wind direction and speed greatest when slope and fuels align.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- All fuel classes continue very dry, dead fuels remain single digit, live fuel moistures are at critical levels, entire fuel profile available
- Atmospheric moisture beginning to impact fuels. Lighter fuels will fall out first. Heavy fuels will support combustion for some time until sufficient moisture is present
- Combustion continues in heavy jackpots of dead and down. Some spotting into like fuels is possible but becoming more unlikely.
- Daytime humidity starting to moderate fire activity with overnight recoveries providing suppressing effects.
- Shorter day-lengths will continue to reduce active burn period.

Probability of Ignition (4-8,000') : 40%/40% (Unshaded/Shaded)					
Spotting Potential: Minimal-Low					
Spotting Distance: .10-.20 mile (short range)					
Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-20	ERC	62	80th
TL7	2-4	4-12	BI	63	85th
SH1	2-7	6-25	High Sierra RAWS (44520) Years 2000-2020 (present)		

SPECIFIC:

- Middle Fork San Joaquin: Limited activity as fire continues to consume heavy fuels. Some forward movement pushed by wind and very short range spotting below Pumice Butte.
- Pincushion: Heavy fuels continue to consume. Smoke production will continue till moisture extinguishes.
- Cold Creek: Cold Creek area north of Edison Lake much reduced with limited heat still present. Limited spread potential through ground fuels
- Timber Knob Area – Fire activity reduced, edged in by rocks at higher elevations where fire is following green vegetation and timber stringers, some potential to move towards Lillian Lake and Lady Lake
- Remainder of Fire Area: limited heat remains. Some islands of fuel continue to consume, POTENTIAL still exists for wind and residual heat to result in spread from quiet area.

SAFETY

Snags and green trees present a hazard with long term fire in the timber. Heads up working around any standing timber. Compromised root structures and burned soil can result in loss of stability.

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio.

Human Resource Message
November 7, 2020

The Ten Commandments of Human Relations

1. **SPEAK TO PEOPLE.** There is nothing so nice as a cheerful word of greeting.
2. **SMILE AT PEOPLE.** It takes 72 muscles to frown and only 14 to smile.
3. **CALL PEOPLE BY NAME.** The sweetest music to anyone's ears is the sound of his/her own name.
4. **BE FRIENDLY AND HELPFUL.** If you have friends, be a friend.
5. **BE CORDIAL.** Speak and act as though everything you do is a genuine pleasure.
6. **BE GENUINELY INTERESTED IN PEOPLE.** You can like almost everybody if you try.
7. **BE GENEROUS WITH PRAISE.** Cautious with criticism.
8. **BE CONSIDERATE WITH THE FEELINGS OF OTHERS.** There are usually three sides to every controversy; yours, the other fellow's and the correct side.
9. **BE ALERT TO GIVE SERVICE.** What counts most in life is what we do for others.
10. **ADD TO THIS A GOOD SENSE OF HUMOR...**a big dose of patience, a dash of humility and you will be rewarded many fold.

AK IMT COVID-19 Purpose and Intent

If you are feeling COVID like symptoms, first call Medical Unit Leader:

925-532-5564

The Alaska IMT is reminding firefighters to apply the core values of wildland fire management community of “Duty, Respect, and Integrity” to our COVID mitigations. Core values include:

- **Duty:** To provide a workforce safe from known hazards such as disease transmission, and keep us, our fellow firefighters, and the public safe, on and off the clock.
- **Respect:** To demonstrate respect to oneself and to each other by taking routine precautions as guided, such as wearing a mask and social distancing.
- **Integrity:** To do the right thing when at home, while travelling, or on assignment. Undertake the precautions to keep ourselves and the rest of the workforce healthy and able to respond. Ensure we are not the source of an outbreak within the public we are assigned to protect.

Essential Mitigations:

- **Pre-Screening and Regular Monitoring:** Individuals should measure temperature and assess symptoms each day prior to starting work. Ideally, temperature checks should happen before the individual enters the facility or interacts with others on staff or the crew.
- **Social/Physical Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- **Wearing a Mask:** Employees should always wear a facemask or face covering when social distancing cannot be maintained. When facemasks cannot be worn during arduous work tasks, social distancing practices should be implemented.
- **Disinfect and Clean:** Routinely clean and disinfect all areas, particularly “high touch surfaces” such as engine compartments, bathrooms, common areas and shared electronic equipment.
- **Empower** all individuals to ask co-workers to follow social distancing guidelines.

Concept of “Module as One: ”By insulating as a unit, crews and modules can limit outside viral exposure, safely complete operational tasks in closer proximity, and ride in vehicles without face coverings when working within their “**Module as One**” concept:

- As often as practical, the same team members should travel in the same vehicle, work together in the same space, and ensure module members are conscientious regarding mitigations.
- Identify select individuals on a crew or module that will interact at briefing or with the public, ensuring this person relies on social distancing, wears a cloth face covering, and practices hand hygiene during or after every interaction.
- When the “Module as One” has been established, minimize contact with public and outside community. This is to protect every crew member, their family, and the community we serve.
- Team members, crews, and other resources should use a “Module as One” approach to insulate as one unit and reduce exposure to the public and other crews. If each member within a unit is monitored, screened, and healthy, then proximity, when necessary, is not an issue.
