### Dry But Cold With Icy Roads Early This Week

Low pressure that brought the snow to the fire area will move east of the region today with dry, but cold weather prevailing this week. The combination of very cold nights and daytime highs above freezing in many locations will bring daily bouts of snow melt during the afternoon and refreezing to black ice at night over the Creek fire roads causing very dangerous driving conditions. On Saturday the next chance of light rain and snow arrives before exiting the area by Sunday. Winds will be mainly terrain and slope driven as no major weather systems will affect the area.

**MONDAY 0600-1800:** Partly cloudy but cold. **Stability:** Unstable -- well mixed.  
**Transport Wind:** NW 6-10 mph.

Location	Maximum Temperature (F) & Minimum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	30-40                      60-70%	WSW 5-10 mph gusts to 15 mph in the afternoon.
Ridges & Peaks	22-28                      45%	NW 10-15 mph with gusts to 25 mph.

**MONDAY NIGHT 1800-0600 TUE:** Mostly Clear and cold.  
**Stability:** Stable with surface and valley inversions. **Transport Wind:** N 2-6 mph.

Location	Minimum Temperature (F) & Maximum Humidity (%)	20-ft Winds (mph)
Slopes & Valleys	15-20                      80-100%	NNE 5-10.
Ridges + Peaks	10-20                      50-60%	NW 7-12.

## INPUTS

**WEATHER SUMMARY:**      **\*See Fire Weather Forecast for Specifics\***  
**\*\* DRY BUT VERY COLD ACROSS THE FIRE AREA \*\***

### FUELS:

Grass	GR1
Shrub	SH1
Timber	TU1, TU5, TL2, TL4, TL7
DFM (1hr)	10
10-hr (%)	12
100-hr (%)	35
1000-hr(%)	35
Live Fuels	2/3 cured

Spotting receptiveness much reduced due to precipitation  
 FM and RH recovering due to seasonal winter weather

### TOPOGRAPHY:

- Elevation: 3,000-9,500. Higher elevations will see very cold nighttime temps. Nighttime humidity recovery very good to excellent (60-80%).
- Slopes: 10%-50%. Expect NW winds near ridgetops, and terrain driven elsewhere with wind direction and speed greatest when slope and fuels align.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

- Fuel moistures have recovered well with moisture. Live fuels continue critical.
- Snowfall has blanketed fuels and continues to provide moisture
- Combustion continues in heavy jackpots of dead and down. Spotting unlikely due to high moisture in fine fuels. Heavies becoming less receptive.
- Daytime humidity moderating fire activity with overnight recoveries providing suppressing effects.
- Shorter day-lengths will continue to reduce active burn period.

<b>Probability of Ignition (4-8,000')</b> : 20%/20% (Unshaded/Shaded)					
<b>Spotting Potential:</b> Minimal-Low					
<b>Spotting Distance:</b> .10-.20 mile (short range)					
Fuel Model	FL (Ft.)	ROS (Ch/Hr)	NFDR Index	Value	%
TU5	6-11	6-20	ERC	0	0th
TL7	2-4	4-12	BI	43	35th
SH1	2-7	6-25	High Sierra RAWS (44520) Years 2000-2020 (present)		

#### SPECIFIC:

- Middle Fork San Joaquin: Limited activity, some heat remains seated in heavy fuels.
- Pincushion: Heavy fuels continue to consume. Smoke production will continue till moisture extinguishes.
- Cold Creek: Cold Creek area north of Edison Lake much reduced with limited heat still present.
- Timber Knob Area – Limited activity with heavy fuel holding some heat
- Remainder of Fire Area: limited heat remains. Some islands of fuel continue to hold heat,

### SAFETY

*Snags and green trees present a hazard with long term fire in the timber. Heads up working around any standing timber. Compromised root structures and burned soil can result in loss of stability.*

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio.

**Safety Message**  
**Creek Fire**  
**November 9, 2020**

**Never leave your Wing Man or Woman!!!**

- Always have 100% accountability of your firefighters you are responsible for, this includes staging. No body is left behind!
- Make sure anyone outside your division 204 checks in with you and checks out when they leave your division!
- When you send out scouts to the high country on snowy and icy roads to see if there is any repair work we can do, it's good idea to send out firefighters in pairs. Utilize a vehicle that can handle the road conditions. Carry a set of snow chains and a chain saw to cut out down logs on roads!

# AK IMT COVID-19 Purpose and Intent

**If you are feeling COVID like symptoms, first call Medical Unit Leader:**

**925-532-5564**

The Alaska IMT is reminding firefighters to apply the core values of wildland fire management community of “Duty, Respect, and Integrity” to our COVID mitigations. Core values include:

- **Duty:** To provide a workforce safe from known hazards such as disease transmission, and keep us, our fellow firefighters, and the public safe, on and off the clock.
- **Respect:** To demonstrate respect to oneself and to each other by taking routine precautions as guided, such as wearing a mask and social distancing.
- **Integrity:** To do the right thing when at home, while travelling, or on assignment. Undertake the precautions to keep ourselves and the rest of the workforce healthy and able to respond. Ensure we are not the source of an outbreak within the public we are assigned to protect.

## **Essential Mitigations:**

- **Pre-Screening and Regular Monitoring:** Individuals should measure temperature and assess symptoms each day prior to starting work. Ideally, temperature checks should happen before the individual enters the facility or interacts with others on staff or the crew.
- **Social/Physical Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- **Wearing a Mask:** Employees should always wear a facemask or face covering when social distancing cannot be maintained. When facemasks cannot be worn during arduous work tasks, social distancing practices should be implemented.
- **Disinfect and Clean:** Routinely clean and disinfect all areas, particularly “high touch surfaces” such as engine compartments, bathrooms, common areas and shared electronic equipment.
- **Empower** all individuals to ask co-workers to follow social distancing guidelines.

**Concept of “Module as One:** “By insulating as a unit, crews and modules can limit outside viral exposure, safely complete operational tasks in closer proximity, and ride in vehicles without face coverings when working within their “**Module as One**” concept:

- As often as practical, the same team members should travel in the same vehicle, work together in the same space, and ensure module members are conscientious regarding mitigations.
- Identify select individuals on a crew or module that will interact at briefing or with the public, ensuring this person relies on social distancing, wears a cloth face covering, and practices hand hygiene during or after every interaction.
- When the “Module as One” has been established, minimize contact with public and outside community. This is to protect every crew member, their family, and the community we serve.
- Team members, crews, and other resources should use a “Module as One” approach to insulate as one unit and reduce exposure to the public and other crews. If each member within a unit is monitored, screened, and healthy, then proximity, when necessary, is not an issue.
