14. Date/Time Submitted: 10/01/2020 0556 PDT		15. Primary Location, Organization, or Agency Sent To: OSSC									
16. State: CA	17. County / Parish / Borough: Tulare	18. City:									
19. Unit or Other:	20. Incident Jurisdiction: CA-SQF	21. Incident Location Ownership (if different than jurisdiction):									
22. Latitude/Longitude: Latitude: 36° 15' 18" Longitude: 118° 29' 48"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:									
25. Short Location or Area Description (list all affected areas or a reference point): 25 miles north of Kernville, CA			26. UTM Coordinates: Zone: Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): All geospatial data and products are uploaded to FTP site. https://ftp.nifc.gov/public/incident_specific_data/calif_s/!2020_Incidents/CA-SQF-002622_SQF%20COMPLEX/GIS/Products/											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):											

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

Smoldering
 Narrative:
West Castle Zone: Minimal overnight humidity recovery as well as warm and dry conditions, allowed fire activity to continue to smolder heavily above in in the thermal belt located at 3,500± elevation. Humidity recover was poor in the upper elevations. Below 3,500± elevation, minor humidity recovery occurred, but hot material continued to smolder. Heat from the heavy dead down logs and fire weakened timber continues to produce an abundance of smoke, adding to the already thick inversion layer found in the canyons and valleys

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):
Timber (Litter and Understory)
Chaparral (6 feet)
Timber (Grass and Understory)
 Narrative:
Fuel models located within the fire area vary with elevation and some have limited fire history. These include stands of dense mixed conifer with heavy brush below timber lines. The McNally burn scar (2002), Pier burn scar (2017), and Schaefer burn scar (2017) contain a mixture of grass, brush and snags which are all supporting fire spread. Fire is burning within areas of significant tree mortality contributing to significant fire resistance to control efforts.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):
Damage inspection has been completed. The Final Numbers are 10 single residences damaged, and 173 Destroyed, 2 Other minor structures damaged, and 59 destroyed.
Mandatory Evacuations Locations:
-Alpine Village
-Cedar Slope
-Doyle Springs
-Ponderosa
-Pyles Boys Camp
-Redwood Drive
-Sequoia Crest
-East of Sequoia National Forest Boundary, from the intersection of Hwy 190 and Balch Park, Bear Creek Road and
-Rancheria Fire Road
Upper Tule River Corridor: Camp Nelson, Pierpoint, Coy Flat, Mountain Aire, and points between
Voluntary Evacuation Warning:
-Silver City

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

<p>33. Life, Safety, and Health Status/Threat Remarks: Safety and health threats to suppression personnel includes long travel routes of narrow mountain roads through rural, farming, and ranching communities with limited visibility due to smoky conditions. Congested roadways and heavy traffic in and around the incident. Drought, Bug Kill, & Fire Weakened trees all have accident potential. Steep, terrain will bring footing Issues, access issues creates alignment and Safety Issues. The changing weather conditions will affect the work zones.</p> <p>Nine National Forests in California remain closed: Angeles NF, Cleveland NF, Los Padres NF, Inyo NF, Klamath NF, San Bernardino NF, Sequoia NF, Sierra NF, and Six River NF</p> <p>Sequoia National Park is closed to ALL visitors. Closures are due to the current air quality and smoke conditions.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): East Castle Zone:</p> <p>High pressure over the area provided another unseasonably warm day. Light transport winds resulted in high concentrations of smoke, so in spite of the warm temperatures, greater shading muted the both the temperature and Rh. Highs ranged from the lower 70s to the upper 80s, down 3 degrees from yesterday. Rh minimums ranged from 16 to 19%, up 3% from yesterday. Winds were terrain driven 5 to 15 mph. Concerns the next several days will be focused around poor visibility due to higher smoke concentrations. High pressure over the area is resulting in very light transport winds. Deeper mixing and instability may allow for somewhat better ventilation during the afternoon, but smoke will settle to near ground level at night.</p> <p>West Castle Zone:</p> <p>SThermal belts overnight were deep as inversions were fairly shallow. Low temperatures on the midslopes of the fire didn't recover better than a 20 percent RH and temperatures stayed in the mid 70s. The amount of smoke over the fire continued to decrease as the atmosphere became a little more unstable allowing better</p>	<p>34. Life, Safety, and Health Threat Management:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 85%;"></th> <th style="width: 15%;">Active?</th> </tr> </thead> <tbody> <tr><td>A. Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

<p>dispersion. High temperatures were again 5 to 10 degrees above average with highs near 90 in the lower elevations and near 80 in the upper elevations. RHs bottomed out in the teens in the afternoon as well.</p> <p>Thermal belts will again develop tonight with lows very similar to previous nights and RHs not recovering above 20 percent in some locations along the thermal belt. Low level inversions will be fairly shallow.</p> <p>Terrain driven winds will continue with high pressure remaining in control of the region through Saturday. Temperatures will stay 5 to 10 degrees above average through the week with highs near 90 in the lower elevations and near 80 in the upper elevations. Both locations can expect RHs to dip into the teens during the afternoon.</p>	
---	--

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

East Zone:

Almost all threats from fire have been abated. Threats from secondary fire effects such as hazard trees and soil erosion remain across the entire fire.

12 hours:

West Castle Zone: Minimal fire growth is expected overnight. Fire located within and above the thermal belt at 3,500± elevation will be the most active areas
Shotgun Fire:

Minimal fire growth is expected.

East Castle Zone:

Almost all threats from fire have been abated. Threats from secondary fire effects such as hazard trees and soil erosion remain across the entire fire.

West Castle Zone:

24 hours:

Warm and dry conditions will again be present over the Zone. Backing fires will continue off of Dennison Mountain down into the South Fork area. Rolling material will test containment lines, and continue to spread hot material into the bottoms of the drainages and across roadways. Deep seated heat in stump holes in the logged areas, and fire weakened timber will continue to be a location for ember production. Humidity will be in the mid-teens, allowing for active burning, and smoke production to continue. Interior islands will continue to burn out, and could exhibit active fire runs.

Shotgun Fire:

Minimal fire growth is expected.

East Castle Zone:

48 hours:

Almost all threats from fire have been abated. Threats from secondary fire effects such as hazard trees and soil erosion remain across the entire fire.

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

West Castle Zone:

Fire activity will increase as the inversion clears and humidity lowers. Humidity is expected to be in the teens, allowing for a drying of fine fuels to occur and increase its ignition factor. This heating and drying will also increase the fires Probability of Ignition, Rates of Spread, and Spotting Distance considerably. Heavy fuels continuing to burn out, active ground fire, burning snags near control lines, and occasional flare ups when fuel jackpots burn.

Shotgun Fire:

Minimal fire growth is expected.

East Castle Zone:

Almost all threats from fire have been abated. Threats from secondary fire effects such as hazard trees and soil erosion remain across the entire fire.

West Castle Zone:

72 hours: Heavy fuels and stump holes will continue to burn out. Hot dry weather will increase fires activity in all unsecured areas. Spotting distances will increase to over .5 miles, and the Probability of Ignition will rise to levels above 80%. Roll out will continue to aid fire spread and test control lines.

Shotgun Fire:

Minimal fire growth is expected.

Continued secondary threats, however, hazard tree removal efforts to expedite
Anticipated after 72 hours: repopulation will reduce a significant number of hazard trees adjacent to values at risk.

37. Strategic Objectives (define planned end-state for incident):

West Castle zone:

- Keep the fire South of Hwy 198- Sierra Dr. / Milk Ranch peak / Paradise Peak**
- Empire Mtn.**
- Keep the Fire East of Springville / Yokhol Valley / Blue Ridge.**
- Keep the fire North of the Pier Fire dozer contingency line**

East Castle Zone:

To prevent the fires from spreading to private property, surrounding communities, and values at risk, keep the fire:

North of Durrwood Camp to protect communities and infrastructure along the Kern River.

West of Toowa Range to Kingfisher Ridge to 22S05 Road to protect recreational and administrative infrastructure.

South of East Castle Fire containment lines to limit fire growth to the north.

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

East of Tule River Reservation.

Within perimeter of Shotgun fire to limit fire growth.

-Provide point protection of values at risk within communities and associated infrastructure to minimize loss of structures, utilities, and developed sites and facilities including:

The communities of:

- Mountain Home**
- Balch Park,**
- Doyle Springs,**
- Camp Wishon,**
- Camp Nelson,**
- Pyles Boys Camp,**
- Rogers Camp,**
- Cedar Slope,**
- Sequoia Crest,**
- Alpine Village,**
- Redwood Drive,**
- Lloyd Meadows,**
- Mountain Aire,**
- Ponderosa,**
- Pierpoint**
- Three Rivers,**
- Springville,**
- Coy Flat,**
- Silver City, and**
- Mineral Springs.**

-Ash Mountain Headquarters Facility for the Sequoia and Kings Canyon National Park (\$300 million in infrastructure)

-Infrastructure at Freeman Giant Sequoia Grove, Dillonwood Grove, and other groves; Blackrock, Kern, Quinn Ranger Stations; Osa, Beach, and Casa Vieja;

-Tule River Municipal Watershed; private inholdings; roads, bridges, utilities, trailheads, developed and dispersed recreation sites and facilities trailheads and facilities; Case Mountain Repeater site (Kings and Tulare County Emergency service communication site).

-Monache Mountain, Monache Meadow and other archaeological and cultural sites.-

-Continue to hold and establish control lines that are safe for firefighters and provide a high probability of success to keep the fire north of Durr Wood Camp and west of Toowa Range to King Fisher Ridge to 22S05 Road.

-Monitor the spread/growth of the Shotgun Fire using air operation assets

-Coordinate with Duty Officers from the Sequoia and Inyo NFs, Sequoia and Kings Canyon NPs, and the Tule River Indian Reservation on support to any new initial attack.

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

EAST CASTLE ZONE:

Limited fire spread across the entire east branch.

Values at Risk include communities, such as:

- Tule River Indian Reservation
- Pyles Camp
- Ponderosa
- Sequoia Crest
- Alpine Village
- Redwood Drive
- Lloyd Meadows
- Cedar Slope
- Camp Nelson
- Rogers Camp
- Mountain Aire
- Pierpoint

Resources, such as:

- Cattle and valuable grazing land especially west of North Road
- Numerous cultural/historical sites such as the Soda Springs and the Painted Rock
- Various archeological sites
- Tribal municipality headwaters that occur on USFS lands for the Tule River

Infrastructure and facilities, such as:

- 12 hours: -Highway 190 from the intersection of County Highway 208 south and east to Mahogany Flat Coy, Meadows, and Ponderosa
- Forks of the Kern Trailhead
 - Jerkey Mountain Trailhead
 - Facilities and Trails within Trout Meadow
 - Structures and facilities along the Lloyd Meadow Road
 - George H W Bush Tree
 - Camp Whitsett, featuring numerous Native American archeological values
 - Peppermint Fire Station
 - The Eagle Mountain Casino
 - The Tule River Indian Health Center

Threatened and Endangered and/or federally listed species that are threatened by the SQF Complex Incident include:

- California Condor
- Mountain Yellow Legged Frog
- California Red Legged Frog
- Sierra Nevada Yellow Legged Frog
- Little Kern Golden Trout
- Pacific Fisher
- Goshawk
- California Spotted Owl
- Sierra Nevada Bighorn Sheep

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

-Giant Sequoia tree groves

WEST CASTLE ZONE:

Timber holdings, economical significant grazing and agricultural area, the Case Mountain Extensive Recreation Management Area. Areas of critical environmental concern and wilderness study area. Areas that contain the only giant sequoia grove managed by BLM and wilderness in Sequoia and Kings Canyon National Park.

Threatened and Endangered (TE) state and/or federal listed species that are threatened by the SQF Complex Incident include:

- California Condor**
- Pacific fisher**
- Goshawk**
- CA Spotted Owl**
- California Red legged Frog**
- Sierra Nevada yellow-legged frog,**
- Little Golden Kern Trout**
- Sierra Nevada Bighorn Sheep.**

Critical habitats for these species are also being threatened.

Giant Sequoian Groves that are threatened include

- The Dillionwood,**
- Garfield,**
- south fork,**
- Dennison,**
- Devils canyon,**
- Case Mountain,**
- Eden creek,**
- and multiple other Giant Sequoia Groves are threatened with trees estimated to be 2,300 to 3,000 years old.**

Smoke from the fire is affecting Sequoia NP, Kings Canyon NP, Kaiser and John Muir Wilderness class 1 air sheds.

EAST CASTLE ZONE: Same as 12 hour threats

24 hours:

WEST CASTLE ZONE: Same as 12 Hour Values at risk

EAST CASTLE ZONE: Same as 12 hour threats

WEST CASTLE ZONE: Same as 24 hours values at risk

48 hours:

- Mt. Home State Park,**
- Tule River Reservation,**
- BLM land, all with structures and other values at risk.**

-Ash Mountain National Parks Headquarters Facility for the Sequoia and Kings Canyon National Parks (\$300,000,000 asset for the NSP).

72 hours: **EAST CASTLE ZONE: Same as 12 hour threats**

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

WEST CASTLE ZONE:

Values at risk include communities of:

- Mineral King**
- Silver City**
- Cherokee Oaks**
- Mt. Home State Park,**
- Case Mountain Repeater (emergency communications for kings and Tulare communications) and residents to the west and southwest of the state park,**
- SEKI - Kern Canyon,**
- Quinn and Hockett Ranger Stations,**
- historic cabins in meadows,**
- trailheads**
- and other NPS, Local, State and federal Facilities.**

Values at risk include

- Quinn and Hockett Ranger Stations,**
- historic cabins in meadows,**
- trailheads**
- and other NPS, Local, State and federal Facilities.**

-Ash Mountain National Parks Headquarters Facility for the Sequoia and Kings Canyon National Parks (\$300,000,000 asset for the NSP).

EAST CASTLE ZONE: Same as 12 hour threats

Anticipated after 72 hours:

WEST CASTLE ZONE: Same as 72 hour threats

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

East Castle Zone:

- 12 hours:
- 4 T2IA or greater**
 - 5 Engines**
 - 6 DIVS**
 - 4 TFLD**
 - 2 FMOD**
 - EQMG**
 - 4 SOF2**
 - 2 Drivers**
 - 3 Faller Modules**
 - 3 Excavators**

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

24 hours: **Same as 12 hour**

48 hours: **Same as 12 hour**

72 hours: **Same as 12 hour**

Anticipated after 72 hours: **Same as 12 hour**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
1) critical resource needs identified above,
2) the Incident Action Plan and management objectives and targets,
3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Fire in both zones will present challenges due to highly difficult terrain and limited critical resources. Minimal fire activity mostly in the northeast part of the fire. High political concerns exist with smoke impacts to local communities. Area closures are impacting local ranchers, timber sales, tourism, and private inholdings. Objective concerns are high due to remoteness of fire, proximity to historic Giant Sequoia groves, steep terrain, and other areas popular with tourism.

West Castle Zone:

Crews in all divisions will continue with patrol, and suppression repair identification and activities.

41. Planned Actions for Next Operational Period:

EAST CASTLE ZONE:

Branch I - Resources will continue to monitor, and hold completed lines. Watch for and quickly attack any spot fires on the east side of the Kern River Canyon. Resource shortage is limiting containment effort. We will be completing some suppression repair and mitigating hazards affected repopulation.

WEST CASTLE ZONE:

Crews in all divisions will continue with patrol, and suppression repair identification and activities.

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: **10/10/2020**

44. Projected Significant Resource Demobilization Start Date: **10/07/2020**

45. Estimated Incident Costs to Date: **\$74,444,278.00**

46. Projected Final Incident Cost Estimate: **\$80,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

Castle Fire started on 8/19. Shotgun Fire started on 8/18. Both fires were started by lightning and were made into a complex on 8/24.

decrease in Acres due to improved fire perimeter mapping

Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

Block #42 Projected Final Size and #43 Anticipated Containment Date are dependent on resource availability of which we are currently limited with several unstaffed divisions due to fire requiring a shift in tactics from building containment line to point protection. Critical needs for resources continue and if received a sooner containment date and projected final size could be estimated.

CAL FIRE IMT 6 in Command of West Castle Zone, and will transition command to California IMT 2 on 10/01/2020 at 0700 PST

California IMT 2 in Command of East Castle Zone

Incident Name	Suppression Strategy	Area	Area Measure	% Ctn/Comp	% Ctn/Comp Measure	Est. Cost to Date	Est. Comp Date	Perimeter
