14. Date/Time Submitted:		15. Primary Location, Organization, or Agency Sent To: <b>CA-OSSC</b>									
16. State: <b>CA</b>	17. County / Parish / Borough: <b>Tulare</b>	18. City:									
19. Unit or Other:	20. Incident Jurisdiction: <b>CA-SQF</b>	21. Incident Location Ownership (if different than jurisdiction):									
22. Latitude/Longitude: Latitude: <b>36° 15' 18"</b> Longitude: <b>118° 29' 48"</b>	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township:    Range:    Section: 1/4 Sec: of 1/4 Sec:									
25. Short Location or Area Description (list all affected areas or a reference point): <b>25 miles north of Kernville, CA</b>			26. UTM Coordinates: Zone:    Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): <b>All geospatial data and products are uploaded to FTP site.</b>  <b><a href="https://ftp.nifc.gov/public/incident_specific_data/calif_s/!2020_Incidents/CA-SQF-002622_SQF%20COMPLEX/GIS/Products/">https://ftp.nifc.gov/public/incident_specific_data/calif_s/!2020_Incidents/CA-SQF-002622_SQF%20COMPLEX/GIS/Products/</a></b>											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):  <b>Active</b>											

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

**Flanking  
Backing  
Spotting**

Narrative:

**Division I: Active flanking, backing and short range spotting. Torching head fire, short slope driven runs when in alignment north of coyote creek.**

**Divisions T: Smoldering, creeping, interior islands burning out.**

**Divisions D, Y, Z, N, L: Smoldering, creeping, interior islands continue to burn.**

**Divisions U and E: Active flanking, backing, and short range spotting.**

**Fixed and rotary wing aircraft were effective in slowing the spread at Homers Nose. With the dry fuels, forward fire progression will continue to the north and east but will be mainly be backing and flanking. Spotting distances of 300-600 feet and the POI will increase into the 80%-90% range unshaded. Single group tree torching will likely occur.**

**Expect the fire to remain active in thermal belts or until the RH recovers above 25-30%. In Divisions D and T, expect the RH to drop after midnight and fire behavior to increase in the interior and on the northern flank.**

**Sustained crown runs to the north from Dennison Ridge in north-south aligned drainages.**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)  
Chaparral (6 feet)  
Timber (Grass and Understory)**

Narrative:

**Fuel models located within the fire area vary with elevation and some have limited fire history. These include stands of dense mixed conifer with heavy brush below timber lines. The McNally burn scar (2002), Pier burn scar (2017), and Schaefer burn scar (2017) contain a mixture of grass, brush and snags which are all supporting fire spread. Fire is burning within areas of significant tree mortality contributing to significant fire resistance to control efforts.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

**Damage inspection has been completed. The Final Numbers are 10 single residences damaged, and 173 Destroyed, 2 Other minor structures damaged, and 55 destroyed.**

**EVACUATION ORDERS-Communities and Areas under an Evacuation Order:**

**-Mountain Home Decoration State Forest  
-Balch Park Campground  
-South Fork Drive, west of Salt Creek Fire Control**

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	<b>1,075</b>	<b>10</b>	<b>173</b>
F. Multiple Residences	<b>0</b>	<b>0</b>	<b>0</b>
G. Mixed Commercial / Residential	<b>0</b>	<b>0</b>	<b>0</b>
H. Nonresidential Commercial Property	<b>0</b>	<b>0</b>	<b>0</b>
I. Other Minor Structures	<b>0</b>	<b>2</b>	<b>55</b>

## Incident Status Summary (ICS-209)

<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):  <b>Heavy layers of heavy smoke from our and the Creek fire were over the fire until the inversion lifted around 1300 and easterly flow helped to thin the smoke. Temperatures peaked in the mid 70s to lower 80s with minimum humidity levels ranging from 9 percent over the far eastern parts of the fire to the 20 to 35% range on the west side. Light and variable winds were found across much of the fire area with the more exposed ridges picking up a light southerly breeze.</b></p> <p><b>Temperatures will peak Thursday and Friday with poor overnight humidity recoveries and very low afternoon minimums. Somewhat improved ventilation is expected as the air mass will be a bit less stable with a bit more of a westerly breeze late each day. A gradual cooling trend will begin Saturday and continue into next week with an even slower improvement in the humidity levels. Westerly flow will increase, resulting in a slightly stronger afternoon breeze.</b></p>																																					

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	<b>The smoke inversion over the fire continues to moderate fire behavior in morning with increasing fire behavior in the afternoon as the inversion breaks. An increase in humidity also is moderating fire behavior.</b>
24 hours:	<b>There is continued potential for fire growth in the north, northwest and northeast, including the potential to threaten the communities of Three Rivers and the structures in the South Fork drainage.</b>
48 hours:	<b>Same as 24 hour.</b>
72 hours:	<b>Same as 24 hour.</b>
Anticipated after 72 hours:	<b>Continuation of suppression repair and indirect containment line construction in Division T/U.</b>
37. Strategic Objectives (define planned end-state for incident):	
<b>Strategic Framework</b>	
<b>Implement a full suppression strategy on the Castle and Shotgun Fires. Values at risk include human safety, private property and residences, infrastructure, utilities, developed sites, facilities, Giant Sequoia groves and archaeological and cultural sites. Apply tactics that offer the highest probability of success.</b>	
<b>Control Objectives</b>	
<b>To prevent the fires from spreading to private property, surrounding communities, and values at risk, keep the fire:</b>	
<b>-North of Durrwood Camp and the Tule River Reservation to protect communities and infrastructure along the Kern River and within the Reservation.</b>	
<b>-West of Toowa Range to Kingfisher Ridge to 22S05 Road to protect recreational and administrative infrastructure.</b>	
<b>-South of Mineral King Road to Lost Canyon to Whitney Meadow to limit fire growth to the north.</b>	
<b>-East of Springville to Blue Ridge to South Fork to protect communities west of the fire.</b>	
38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:	
12 hours:	<b>Threat to structures in the South Fork drainage, including the Hockett Meadows Ranger Station, Peck's Cabin, Kern Cabin, Ming Cabin, and Buffalo Cabin. Wilderness values within the Sequoia National Park.</b>
24 hours:	<b>Threat to structures in the South Fork drainage, critical infrastructure in the Case Mountain Sequoia groves and wilderness values within the Sequoia National Park.</b>
48 hours:	<b>Same as 24 hour threats.</b>
72 hours:	<b>The communities of Silver City, Mineral King, and Three Rivers East.</b>
Anticipated after 72 hours:	<b>Same as 72 hour threats.</b>
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	<b>1 medical support trailer</b>

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

**1 ABRO  
1 ASGS  
1 HLCO  
1 FBAN  
1 SITL  
1 HEQB**

24 hours: **Same as 12 hour.**

48 hours: **Same as 12 hour.**

72 hours: **Same as 12 hour.**

Anticipated after 72 hours: **Same as 12 hour.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**The fire behavior on the east, south and west sides are expected to be minimal. The uncontained fire's edge to the north, northwest and northeast continues to burn actively.**

**Heavy vegetation, snags, and steep terrain make it difficult to access the fires edge and contain. Management Action Points and responses to the MAPs have been developed.**

**Objective concerns are high due the remoteness of fire, proximity to the Giant Sequoia groves, steep terrain, threats to structures, and other areas popular with tourism.**

**Implementation of Slick Rock Spike camp in northwestern area of fire to decrease travel times and increase efficiency.**

**Implementation of additional spike camp in the southeastern area of the fire to facilitate with suppression repair.**

41. Planned Actions for Next Operational Period:

**Strategic aerial and hand ignition to secure fire perimeter in Division T area. Point protection for critical values at risk continue to be evaluated.**

**Continue to identify containment opportunities in the northwest and northeast corners of the fire.**

**Continue repopulation and suppression repair efforts.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): **200,000**

43. Anticipated Incident Containment or Completion Date: **11/01/2020**

44. Projected Significant Resource Demobilization Start Date: **10/29/2020**

45. Estimated Incident Costs to Date: **\$94,427,532.00**

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

46. Projected Final Incident Cost Estimate: **\$100,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

**Block #9 Cause of both fires was determined to be lightning strike.**

**Block #42 Projected Final Size and #43 Anticipated Containment Date are dependent on resource availability of which we are currently limited with several unstaffed divisions and due to fire burning in wilderness with limited access in difficult terrain. Critical needs for resources continue and if received a sooner containment date and projected final size could be estimated. Estimate for Block #42 is in acres.**

Incident Name	Suppression Strategy	Area	Area Measure	% Ctn/Comp	% Ctn/Comp Measure	Est. Cost to Date	Est. Comp Date	Perimeter
<b>CASTLE</b>	<b>Full Suppression</b>	<b>166,925</b>	<b>Acres</b>	<b>70</b>	<b>Percent</b>	<b>94,427,532</b>	<b>11/01/2020</b>	
<b>Shotgun</b>	<b>Full Suppression</b>	<b>841</b>	<b>Acres</b>	<b>100</b>	<b>Percent</b>		<b>10/04/2020</b>	

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
