12. Prepared By: Print Name: <b>Bryan Vergne</b>  Date/Time Prepared: <b>10/27/2020 1730 PDT</b>		13. Approved By: Print Name: <b>Brian Pisarek</b>  Signature: _____									
14. Date/Time Submitted: <b>10/27/2020 1748 PDT</b>		15. Primary Location, Organization, or Agency Sent To: <b>CA-OSCC</b>									
16. State: <b>CA</b>	17. County / Parish / Borough: <b>Tulare</b>	18. City:									
19. Unit or Other:	20. Incident Jurisdiction: <b>CA-SQF</b>	21. Incident Location Ownership (if different than jurisdiction):									
22. Latitude/Longitude: Latitude: <b>36° 15' 18"</b> Longitude: <b>118° 29' 48"</b>		23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:									
24. Legal Description: Principal Meridian: Township:      Range:      Section: 1/4 Sec: of 1/4 Sec:											
25. Short Location or Area Description (list all affected areas or a reference point): <b>25 miles north of Kernville, CA</b>			26. UTM Coordinates: Zone:      Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): <b>All geospatial data and products are uploaded to FTP site.</b>  <b><a href="https://ftp.nifc.gov/public/incident_specific_data/calif_s/!2020_Incidents/CA-SQF-002622_SQF%20COMPLEX/GIS/Products/">https://ftp.nifc.gov/public/incident_specific_data/calif_s/!2020_Incidents/CA-SQF-002622_SQF%20COMPLEX/GIS/Products/</a></b>											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):											

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

**Active  
Flanking  
Backing  
Creeping**

Narrative:  
**Divisions D/I/N/L/T/Y/Z: Smoldering, creeping, interior islands continue to burn.**  
**Divisions U and E: Active flanking, backing, and short range spotting with single tree torching.**  
**Spotting distances of 300-600 feet and the POI will be 50% at all elevations of the fire.**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)  
Chaparral (6 feet)  
Timber (Grass and Understory)**

Narrative:  
**Fuel models located within the fire area vary with elevation and live fuels are curing. These include stands of dense mixed conifer with heavy brush below timber lines. Fire is burning within areas of significant tree mortality contributing to a high resistance to control efforts.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

**Damage inspection has been completed. The Final Numbers are 10 single residences damaged, and 173 Destroyed, 2 Other minor structures damaged, and 55 destroyed.**

**EVACUATION ORDERS-Communities and Areas under an Evacuation Order:  
-NONE**

**EVACUATION WARNING-Communities and Areas open to Residents ONLY:  
-South Fork Drive past Conley Bridge to Salt Creek Fire Control Road  
-Silver City  
-Mineral King**

**AREA CLOSURES:  
Sequoia National Park- OPEN. Exception: Mineral King area and some wilderness lands, which will remain closed due to wildfire concerns, and facilities that are closed due to the pandemic.**

**Sequoia National Forest- Western Divide (M107)**

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	<b>1,075</b>	<b>10</b>	<b>173</b>
F. Multiple Residences	<b>0</b>	<b>0</b>	<b>0</b>
G. Mixed Commercial / Residential	<b>0</b>	<b>0</b>	<b>0</b>
H. Nonresidential Commercial Property	<b>0</b>	<b>0</b>	<b>0</b>
I. Other Minor Structures	<b>0</b>	<b>2</b>	<b>55</b>

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

<p><b>CLOSED, while the Hume Lake and Kern River Ranger Districts remain OPEN.</b></p> <p><b>Inyo National Forest- OPEN. Exception: All Wilderness Areas in the Sierra Nevada and Monache</b></p> <p><b>ROAD CLOSURE and/or TEMPORARY CONTROL POINTS</b>  <b>(<a href="https://tularecounty.ca.gov/emergencies/">https://tularecounty.ca.gov/emergencies/</a>):</b>  <b>-Mountain Home Demonstration State Forest</b>  <b>-Balch Park Campground</b></p>

<p>33. Life, Safety, and Health Status/Threat Remarks:  <b>Safety and health threats to suppression personnel includes long travel routes of narrow mountain roads through rural, farming, and ranching communities with limited visibility due to smoky conditions. Congested roadways and heavy traffic in and around the incident. Drought, bug kill, &amp; fire Weakened trees all have accident potential. Steep, terrain will bring footing issues, access issues creates alignment and safety issues. The changing weather conditions will affect the work zones.</b></p> <p><b>-Within the last 72 hours, there has been a pattern of non-reportable illnesses: 16 Poison Oak related; 2 Positive Covid Tests</b></p>	<p>34. <p>35. Weather Concerns (synopsis of current and predicted weather; discuss</p>																			

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

<p>related factors that may cause concern):  <b>Easterly winds had already diminished by sunrise while the drier continental air remain in place. Humidity started down 35-70 percent lower than yesterday morning. Minimal clouds and early smoke allowed temperatures to begin recovering from the cold front. The warming and lower dew points combined to keep humidity low today with minimum values 12-20%. Peak winds actually occurred this afternoon under a terrain driven regime. South to southwest gusts reached 15-17 mph. A couple areas of smoke became visible on satellite this afternoon, mainly in areas of minimal concern.</b></p> <p><b>High pressure returns starting Wednesday and brings above normal temperatures and very dry humidity for at least the next several days. There will be very little diurnal changes each day and values largely remain 30 percent and lower. Otherwise, there are no significant fire weather concerns heading into the weekend.</b></p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>I. 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
<b>Active fire mostly confined to the north west corner of the fire in Division U and T around Homers Nose and Cahoon Meadow.</b>	
12 hours:	<b>Fire burning on the north east corner of the fire remains active in several fuel concentrations mostly interior of the fire edge.</b>
24 hours:	<b>Increased surface fire activity on the northwest and northeast corners of the fire due to low RH and increased winds post cold front passage. Potential for fire to threaten the structures in the South Fork Drainage and Three Rivers.</b>
48 hours:	<b>Fire activity will continue to be focused on the northwest and northeast corners of the fire mainly confined to dry surface litter and heavy fuel concentrations. Weather begins to return to seasonal normal. Potential remains for fire to threaten the structures in the South Fork Drainage and the community of Three Rivers.</b>
72 hours:	<b>Warm and dry trend continues. Fire activity will continue to be focused on the northwest and northeast corners of the fire mainly confined to dry surface litter and heavy fuel concentrations. Weather begins to return to seasonal normal. Potential remains for fire to threaten the structures in the South Fork Drainage and the community of Three Rivers.</b>
Anticipated after 72 hours: <b>Warming and drying trend returns</b>	

37. Strategic Objectives (define planned end-state for incident):	
<b>Strategic Framework</b>	
<b>Implement a full suppression strategy on the Castle and Shotgun Fires. Values at risk include human safety, private property and residences, infrastructure, utilities, developed sites, facilities, Giant Sequoia groves and archaeological and cultural sites. Apply tactics that offer the highest probability of success.</b>	
<b>Control Objectives</b>	
<b>To prevent the fires from spreading to private property, surrounding communities, and values at risk, keep the fire:</b>	

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

**-North of Durrwood Camp and the Tule River Reservation to protect communities and infrastructure along the Kern River and within the Reservation.**

**-West of Toowa Range to Kingfisher Ridge to 22S05 Road to protect recreational and administrative infrastructure.**

**-South of Mineral King Road to Lost Canyon to Whitney Meadow to limit fire growth to the north.**

**-East of Springville to Blue Ridge to South Fork to protect communities west of the fire.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Threat to structures: Hockett Meadows Ranger Station, Peck's Cabin, Kern Cabin, Ming Cabin, and Quinn Patrol Cabin. Wilderness values within the Sequoia National Park.**

24 hours: **Threat to structures and critical infrastructure in the South Fork Canyon, Case Mountain Sequoia groves, and wilderness values within the Sequoia National Park.**

48 hours: **Same as 24 hour threats.**

72 hours: **The communities of Silver City, Mineral King, and Three Rivers East.**

Anticipated after 72 hours: **Same as 72 hour threats.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

**2 EMPF  
2 FOBS  
2 TFLD  
1 HEQB  
4 REAF**

12 hours:

24 hours: **Same as 12 hour.**

48 hours: **Same as 12 hour.**

72 hours: **Same as 12 hour.**

Anticipated after 72 hours: **Same as 12 hour.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:  
1) critical resource needs identified above,  
2) the Incident Action Plan and management objectives and targets,  
3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**The fire behavior on the east, south and west sides are expected to be minimal. The uncontained fire's edge to the north and northeast continues to burn. Continue to confine/ contain on the southern edge of**

## Incident Status Summary (ICS-209)

Incident: **SQF COMPLEX**

**the park.**

**Heavy vegetation, snags, and steep terrain make it difficult to access the fires edge and contain. Management Action Points and responses to the MAPs have been developed.**

**Objective concerns are high due the remoteness of fire, proximity to the Giant Sequoia groves, steep terrain, threats to structures, and other areas popular with tourism.**

41. Planned Actions for Next Operational Period:

**Point protection for critical values at risk continue to be evaluated in Div U/I**

**Continue to identify containment opportunities in the north and northeast corners of the fire.**

**Continue direct attack and suppression repair.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): **200,000**

43. Anticipated Incident Containment or Completion Date: **11/01/2020**

44. Projected Significant Resource Demobilization Start Date: **10/29/2020**

45. Estimated Incident Costs to Date: **\$107,511,905.00**

46. Projected Final Incident Cost Estimate: **\$144,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

**Block #9 Cause of both fires was determined to be lightning strike.**

**Block #42 Projected Final Size**

Incident Name	Suppression Strategy	Area	Area Measure	% Ctn/Comp	% Ctn/Comp Measure	Est. Cost to Date	Est. Comp Date	Perimeter
<b>CASTLE</b>	<b>Full Suppression</b>	<b>169,080</b>	<b>Acres</b>	<b>75</b>	<b>Percent</b>	<b>107,511,905</b>	<b>11/01/2020</b>	
<b>SHOTGUN</b>	<b>Full Suppression</b>	<b>841</b>	<b>Acres</b>	<b>100</b>	<b>Percent</b>		<b>10/04/2020</b>
