

SEQUOIA COMPLEX

Incident Action Plan

CA-SQF-0 02622 P5NG5P (0513)

OPERATIONAL PERIOD

Wednesday—September 9, 2020

Thursday—September 10, 2020

0600 to 0600

Values at Risk

Firefighters and Public Safety

Communities

- Ponderosa
- Camp Nelson
- Pyles Boys Camp
- Rogers Camp
- Sequoia Crest
- Cedar Slope
- Alpine Valley
- Redwood Drive
- Lloyd Meadows
- Mountain Aire
- Pierpoint
- Coy Flat

Infrastructure

- Osa Meadows
- Beck Meadows
- USGS Seismic Station
- High-Use Recreation Areas
- Campgrounds
- Trailheads
- Facilities

Natural Resources & Cultural Values

- Freeman Giant Sequoia Grove
- Little Kern Golden Trout Habitat
- Mountain Yellow Legged Frog Habitat
- Sierra Nevada Bighorn Sheep Habitat
- Archaeological and Cultural Resources
- Riparian Areas

INCIDENT OBJECTIVES	1. Incident Name SEQUOIA COMPLEX	2. Date Prepared 9/8/2020	3. Time Prepared 1600
	4. Operational Period		
September 9, 2020 0600 to September 10, 2020 0600			
5. General Control Objectives for the Incident			
<ul style="list-style-type: none"> • Limit growth of the Castle Fire by establishing a holding line that is safe for firefighters and offers high probability of success to keep the fire: <ul style="list-style-type: none"> ○ North of Durr Wood Camp ○ South of Sequoia Kings Canyon Wilderness Boundary ○ East of Highway 190 to Summit Trail ○ West of Toowa Range to King Fisher Ridge to 22S05 Road • Monitor the spread/growth of the Shotgun Fire using air operation assets. • Protect and minimize impacts to identified values at risk including the communities of Ponderosa, Camp Nelson, Pyles Boys Camp, Rogers Camp, Cedar Slope, Sequoia Crest, Alpine Valley, Redwood Drive, Lloyd Meadows, Mountain Aire, Pierpoint, and Coy Flat, as well as infrastructure at Freeman Giant Sequoia Grove, Osa and Beck Meadows, trailheads and facilities. • Coordinate with the Sequoia NF Duty Officer on support to any new initial attack. 			
6. Management Objectives			
<ul style="list-style-type: none"> • Implement suppression actions that have a high potential for success, carefully weighing risk exposure to firefighters. • Provide for the safety of firefighters, aviation and public through clear communication. Ensure an understanding of strategies and tactics, including a clearly defined and obtainable end state, in order to facilitate sound risk mitigation decision making. • Implement social distancing and adhere to the “module of one” concept to reduce physical exposure and transmission of COVID-19, to provide for the health and safety of all incident personnel. • Minimize to the extent feasible smoke exposure to firefighters, communities and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure. • Maintain and strengthen relationships with partner agencies, stakeholders, cooperators, community leaders, and local agencies utilizing most effective platforms available. • Minimize adverse effects from suppression actions on riparian areas, wetlands, Little Kern Golden Trout, Mountain Yellow Legged Frog, and Sierra Nevada Bighorn Sheep habitats. • Minimize impacts to Wilderness areas; use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines. 			
7. Commander’s Intent			
<ul style="list-style-type: none"> • Safety: Address fire fighter, public, and aviation safety through hazard/exposure mitigation. • Communication: We will keep the Agency Administrators informed of significant accomplishments and issues. • Risk Management: We will use a robust risk assessment process to mitigate unnecessary risk to fire fighters and update and/or revise decisions as necessary. • Human Resources: We will ensure that all incident personnel be treated with dignity and respect. We have a zero tolerance for harassment, alcohol, or illegal drug use. • Operations: We will make informed tactical decisions engaging the fire in the right locations with the appropriate resources. • Public Information: We will provide timely and accurate information through the press, meetings, trap lines, briefings, and social media. • Stakeholders: We will coordinate with the delegating agencies to identify key partners and keep them effectively informed of progress and to use their local knowledge. • Finance: We will establish and monitor cost effective methods for accomplishing incident objectives.

SAFETY AND HUMAN HEALTH MESSAGE

Accountability: What is it?

Accountability- Refers to an obligation or willingness to accept responsibility for one's actions. ... When individuals are accountable, they understand and accept the consequences of their actions for the areas in which they assume responsibility.

Accountability- eliminates the time and effort you spend on distracting activities and other unproductive behavior. When you make people **accountable** for their actions, you're effectively teaching them to value their work. When done right, **accountability** can increase your team members' skills and confidence.

Accountability=Trust!

What Does Accountability Look Like?

Leaders can be pacesetters and demonstrate accountability by exhibiting the following behaviors:

Discipline - staying on track and not getting derailed by competing priorities or desires.

Integrity – being honest about the likelihood of delivering on commitments and acknowledging when you might come up short.

We are a team; we have all accepted the assignment; we're being tested right now. All of us.

We need you guys here; we need you to follow the guidelines. We need every person we can get right now to do this job. We need you healthy. Take the time to consider your part in the accountability chain and how you/we/us can improve.

FIRE WEATHER FORECAST

FORECAST NO: 16
PREDICTION FOR: Sept 9-10, 2020 0600-0600

INCIDENT NAME: Sequoia Complex

UNIT: CA-SQF
SIGNED: *Dan Byrd*

TIME AND DATE
FORECAST ISSUED: Tue, Sep 8 @ 2000 hours

Incident Meteorologist – Dan Byrd

WEATHER DISCUSSION: The upper low will continue to be centered over the four corners region to the east of the fire today, but will slowly begin to move northeast tonight into Thursday. Today will be the coolest day of the week, with the ridge winds becoming southwesterly later this morning or early afternoon. High pressure ridging will begin to move into the region on Thursday and re-establish itself over the region by Thursday night into Friday. Expect temperatures to become hotter, with more diurnally driven winds Friday into the weekend.

SKY/WEATHER TODAY (WEDNESDAY): Sunny, cooler, dry and smoky. Depending on the smoke from the Creek Fire, expect an inversion break by 1300-1400.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT: 80 to 86 degrees (Down 5-7 Degrees) / 15 to 20% (Down 2-4%)

7000 FT: 70 to 77 degrees (Down 5-7 Degrees) / 20 to 25% (Down 2-4%)

EYE LEVEL WINDS:

Slope/Valley: Morning drainage winds will become south to southwest after 1200-1300 with speeds 4 to 6 gusts to 10 G16 mph. Winds will continue to be heavily impacted by local terrain and shading from the smoke.

Ridges: Northwest 5 to 10 mph becoming southwest 5 to 10 G15 mph in the early afternoon.

MIXING HEIGHT...8,000 FT AGL **VENTILATION...** Good

TRANSPORT WIND...Northwest around 5 mph in the morning, shifting to the southwest in the afternoon 10 to 15 mph.

CWR (0.10")...0% **LAL...**1 **HAINES...**4

SKY/WEATHER TONIGHT (WEDNESDAY NIGHT): Mostly clear and cooler with heavy smoke in the Kern River Valley. North to northeast 3 to 6 mph. Squirrely winds could occur near the confluence of the Little Kern/Kern Rivers. Overnight RH recoveries will remain poor.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT: 53 to 58 degrees (Down 4-6) / 20 to 25% (Steady)

7000 FT: 55 to 60 degrees (Down 4-6) / 20 to 25% (Steady)

EYE LEVEL WINDS:

Slope/Valley: North to northeast 3 to 6 mph.

Ridges: Northwest 10 mph.

CWR (0.10")...0% **LAL...**1

THURSDAY: Inversion lifting by 1100-1200. Mostly sunny, warming temperatures but smoky, with continued low RH.

Max Temps: 75 to 89. **Min RH:** 12 to 17%. **Winds:** **Slope/Valley:** Morning drainage winds becoming south to southwest 5-10 G14 mph in the afternoon. **Ridge:** Northwest 5 to 8 mph becoming southwest 5 to 10 G15 mph in the afternoon.

LAL: 1 **CWR (0.10"):** 0% **MIXING HEIGHT:** 8,000 FT AGL **HAINES:** 4

OUTLOOK for FRIDAY Through SUNDAY:

FRIDAY: Mostly Sunny. **High Temp:** 78-94. **Ridge Wind:** S-SW 6-10 mph.

SATURDAY: Mostly Sunny. **High Temp:** 80-97. **Ridge Wind:** SW 8-12 mph.

SUNDAY: Mostly Sunny. **High Temp:** 83-100. **Ridge Wind:** SW 8-12 G20 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 19

TYPE OF FIRE: Wildland

FIRE NAME: Sequoia Complex

OPERATIONAL PERIOD: 9/9/2020: 0600-0600

DATE ISSUED: September 8, 2020

TIME ISSUED: 1800

UNIT: CA-Sequoia National Forest

SIGNED: /s/ David Greathouse FBAN

WEATHER

****A Little Cooler Today, but still smoky****

(See Weather forecast for details)

Weather thresholds for large fire growth: Temp: >83 deg, RH <20%, 20ft winds >7mph

Rule of Thumb – To figure 20' winds, divide the observed eye level winds by .4

FUELS

Fuels- The fuels that dominate the Castle fire are primarily mixed conifer with a heavy component of dead and down material. In the lower elevations and especially in the fire scars, a mix of shrub and grass/shrub can be found. Heavy pockets of beetle killed timber can also be found throughout the fire area. The fuels in the Shotgun fire are primarily grass and grass/shrub. The fuels are very dry for this time of year. The ERC's are currently above the 97th percentile, and the 100-hr and 1000-hr fuels are at 5% and 8%. These indices indicate that all dead fuel will contribute to fire intensity.

Topography- Topography in the fire area is dominated by the Kern River. This river drainage runs north/south and is steep and narrow, roughly bisecting the fire area down the middle. Terrain has played a central role in fire spread, taking the predominantly SW flow and directing it in every way imaginable across the fire area.

FIRE BEHAVIOR

Maximum Fire Potential (Assuming head fire, FDFM 3%, 20' windspeed 6-10mph, 30% slope)

	Max Rate of Spread	Max Flame Lengths
Grass	10-15 ch/hr	6-8'
Grass/Shrub	15-25 ch/hr	5-8'
Timber	12-18 Ch/hr	3-5'

Rule of Thumb: Cut head fire flame lengths in half for flanking fire, backing fire 2'-4' flame lengths

All Divisions: Smoke from the Creek fire should keep fire behavior moderated today. **HOWEVER**, if the skies clear, active fire behavior will be seen on all divisions today. Expect active surface fire spread with occasional single tree and group tree torching. In areas where wind and slope align, short crown fire runs can be observed. Spotting is probable in all fuel types today. Expect burning conditions to increase around 1000, peak between 1600-1700 before moderating after sunset. Spotting can be observed up to ½ mile today with a probability of ignition between 60% - 80%

Div A/Z – Expect the fire to continue to flank west further into the Freeman Creek Sequoia Grove today. The wind is in your favor today, so I do not expect spotting. However, pay attention to the southern end of your fire. Do not let the lower end of the fire outpace the top. If this occurs, you can expect uphill crown fire runs even under the smoke blanket.

Div L – If the smoke clears out, you can expect active fire behavior today in your division. This will push the fire further east towards Beach Meadows and Blackrock Ranger station. **REMEMBER:** the weather forecast calls for a wind shift to the SW later in the day. If this happens and the smoke conditions are favorable. The north end of the finger in Soda Creek will be exposed.

Div B – Expect the fire to continue to move west against the wind. Forward progress by the end of shift could match what was seen yesterday.

Shotgun Fire The fire is following mainly brush fuels with short uphill runs when established on the lower 1/3 of the slope. Spread is not likely to be significant due to the lack of surface fuels.

AIR OPERATIONS

Smoke may have an impact on air operations today

SAFETY

Look Up, Look Down, Look all around! Pay attention to the indicators in the fire environment that cause problem fire behavior! (IRPG page 2)

Work Assignments									
<p>Task: Evaluate fire progression of the slop over between DP 5 and H20, develop a suppression plan and implement. Coordinate suppression actions with Y/Z and B. Take action to prevent fire from moving into the identified areas of values to be protected.</p> <p>Purpose: Keep the fire spread east of Lloyd Meadow Road, north of Ponderosa and Mountain Home community.</p> <p>End State: Limit fire spread into additional values at risk to protect communities and infrastructure.</p>									
Special Instructions									
<ul style="list-style-type: none"> Personnel to notify DIVS of potentially sensitive cultural materials. Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 stage at R Ranch Spike. Castle REMS available to all DIVS. Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments
Task: Provide continuity of operations between day and night shifts. Apply operational surge capacity in Branch I based on day shift tactics and fire behavior.
Purpose: Bridge the gap between day and night shift operations to accomplish critical missions.
End State: Impacts to the resource values at risk have been minimized based on agency and team objectives

- Special Instructions**
- Personnel to notify DIVS of potentially sensitive cultural materials.
 - Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 stage at R Ranch Spike. Castle REMS available to all DIVS.
 - Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments									
<p>Task: Continue to secure the perimeter between DP-1 and DP-2 to prevent fire movement into Lloyd Meadows. Monitor fire behavior in the Freeman Grove while looking for indirect containment opportunities to the west. Monitor and manage fire effects to the extent possible in the Freeman Grove. Continue mop up where appropriate. Monitor the southwest corner of the Division, focusing on the east side of the Kern River.</p> <p>Purpose: Limit fire spread toward values at risk on the west side of the fire.</p> <p>End State: Private property and infrastructure is protected, natural resource impacts are limited, and there are no accidents or injuries to firefighters or the public.</p>									
Special Instructions									
<ul style="list-style-type: none"> Personnel to notify DIVS of potentially sensitive cultural materials. Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 stage at R Ranch Spike. Work Assignments

Task: Prep Blackrock road from Blackrock Ranger Station north. Improve indirect dozer lines. Scout for holding features off the Blackrock road to the west north of Blackrock Ranger Station. Monitor Div X-Ray from the air and utilize air resources as needed to keep green islands from impacting control lines west of H-4. Assess the need to insert personnel into H-4 if fire crosses containment lines. Assist with point protection as needed.

Purpose: Limit impact to values at risk on northern edge within wilderness, limit fire spread on eastern and southern edge of fire.

End State: Values at risk are not impacted by fire. The Spread of fire to the south and east is limited in Divisions L and X-Ray.

Special Instructions

- **A/G Tac for Branch Five: RX169.200, TX 169.200. This needs to be hand programmed.**
- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 stage at R Ranch Spike. Castle REMS available to all DIVS.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments

Task: Patrol and monitor accessible fire area, support water handling operations from prior shifts, mop-up as appropriate based on firefighter safety.

Purpose: Limit fire spread to additional values at risk.

End State: Fire spread limited to existing fire perimeter.

- Special Instructions**
- Personnel to notify DIVS of potentially sensitive cultural materials.
 - Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 stage at R Ranch Spike. Castle REMS available to all DIVS.
 - Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

MEDICAL PLAN (ICS 206 WF)
Controlled Unclassified Information//Basic
ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

Pre-Planning for today's assignment – See Page 2 IRPG

What are the likely hazards that could cause injuries? What kind of severe injuries?		
Who is the likely in-charge DIVS or overhead for an emergency in your assigned area today? (i.e. "Division Zulu")		
Who are the Medical personnel assigned to your part of the incident? What are their capabilities?		
Other Emergency Responders: fire dept, crash rescue, ambulance?		
Communications: Command channel, Air to Ground, Medical helicopters, local rescue/medical?		
Transportation methods available	Ground vehicle, drop point, coordinates, travel route?	
	Aircraft I.D, helispot names, coordinates? Hoist capable, internal transport	
	Other available methods - contingency	
Most likely workforce for evacuation		

Response checklist

Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and conduct rescues.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

Response sequence:

- First, secure the scene and protect responders and patients from further injury.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.
- Notify Communications to initiate Accident Action Plan response.

Information for Communications: (See Medical Incident Report, page 108, IRPG)

- Type and extent of injuries?
- Airway or breathing problems? Serious bleeding?
- Is an EMT present or needed? Are Paramedics (Advanced Life Support) needed?
- Specific location of patients (Lat/Long, access route, DP#, helicopter Landing Zone)?
- What type of transport is needed? Helicopter medevac, hoist, ambulance or ground transport?
- Name of contact person in charge of the scene.
- Do not use names of patients at any time.
- **Medical Emergency Responders confer with Medical Unit Leader and DIVS or designated Overhead to determine if this is a critical emergency and what type of transport is needed.**

Sequoia Complex COVID-19 reminder

California remains an area of high prevalence of COVID-19 disease. You should remain aware of the recognized symptoms of COVID, which include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

In order for you to remain free from COVID and continue fighting fire, you will need to be especially disciplined in the common mitigation practices.

Be aware, though, that 40-50% of persons infected with COVID are completely asymptomatic when spreading the virus to you. **You cannot rely on seeing that someone is sick or discovering that they had a positive test before you engage in distancing, mask wearing and other steps to protect yourself.**

The safe mitigation practices that have been developed for health and safety remain:

- **Maintain "Module as One"**: Avoid unnecessary face-to-face or close contact with persons outside your module
- **Social Distance**: Maintain a minimum of 6 feet spacing whenever possible. Avoid sharing food, utensils or personal items.
- **Mask**: Wear your mask, especially when unable to maintain distancing, even within your module.
- **Hand Hygiene**: Continue regular hand hygiene. Wash hands for 20-30 seconds with soap and water or hand sanitizer.
- **Disinfect and Clean Common Spaces**: Clean and disinfect all areas such as door handles (interior and exterior), dashboards, steering wheel, buttons/knobs and other shared touch surfaces.
- **Regular Monitoring and Self-Assessment**: Daily self-check using the standard symptom list. Maintain awareness of any change in your health. Immediately discuss with your supervisor should you exhibit symptoms.

You should treat these mitigations as **habit** or part of **your routine**, so that you maintain your sharp focus and situational awareness on fireline and operational hazards during your duty hours.

Should a team member develop symptoms and exhibit distress, seek care immediately.

HUMAN RESOURCE MESSAGE

There is zero tolerance for drugs and alcohol on this fire incident.

Everyone you meet is fighting a battle you know nothing about.

Be kind! Be Nice! Always!

Debby Hassel, HRSP (406) 274-7985

hrspfire@gmail.com

REMOTE CHECK-IN

1. Scan the QR code on front of IAP to access the fillable check-in form. If you are unable to scan the code, please call Status/Check-in at **858-204-7419** for assistance.
2. Email qualification cards, manifests, contract, AD paperwork to:
2020.castle.finance@firenet.gov

Are You a TRAINEE?

1. Scan these codes to access the fillable *trainee* information forms. Send photo of qualification cards and task book cover to: **heather.e.grove@usda.gov** or **matthew.boss@usda.gov**

Registration

Check-out

Exit Interview

2. Call Incident Training Specialist 530-394-8076 (Heather) or 951-314-1427 (Matt) with questions from 0600 – 2100 daily.

DEMOBILIZATION IS NOW REMOTE!!

Demobilization Steps:

1. ALL accountable property checked-out from the incident must be returned (i.e. communications, supply). Items may be returned at ICP.
2. Submit all finance documentation (time must be projected for travel home).
 - a. Only 1 representative per resource should go to Finance at ICP.
 - b. Abide by scheduled DMOB time or call Finance for an unscheduled DMOB.
 - c. Government agency resources that would like to close out their time 100% remotely should call **949-591-4123** when they are close to their DMOB date and make necessary arrangements to complete the process.
3. Scan the QR code on the front of the IAP to complete the DMOB process and start your travel home. If you are unable to scan the code to complete travel information, please call Demobilization Unit Leader at **951-235-1568** for assistance.

FINANCE MESSAGE

OPTIONS FOR SUBMITTING TIME:

1. **Fillable PDF CTR/Shift Ticket:** QR code to the fillable forms are included below. If you do not have QR capabilities finance can e-mail you the forms directly.

2. **Hard Copy CTR/Shift Ticket:** Fill out a hard copy CTR, snap a picture and email/text that into finance. If you send in a picture, please make sure it is legible and includes the supervisor's signature at the bottom! Please make sure to include your phone number in the **Remarks** in case we have questions.
3. OR you may turn in your actual hard copy as usual at Whitsett Spike Camp & Troy Meadow.
 - Please try to submit time at least every other day
 - H-Pay justifications are still required on your CTRs – “H = Hazard Pay” is not sufficient

2020.castle.finance@firenet.gov

Finance Main Line: 949-591-4123

Comp/Claims: 949-330-9973

TIP:

*****In order to use fillable pdf forms, you must have some version of Adobe Acrobat downloaded on your device. If you have any issues opening the documents call finance for assistance. *****

FINANCE

➤ **CAN IT BE REPLACED AT SUPPLY?**

1. **General message is needed (ICS 213) with contact information NAME/PHONE #/EMAIL/RESOURCE ORDER # send to Supply at 2020.castle.ordering@firenet.gov**

➤ **IF YOU NEED AN S# FOR REPLACEMENT BECAUSE SUPPLY DOES NOT HAVE IT PLEASE DO THE FOLLOWING**

2. **General message is needed (ICS 213) with contact information NAME/PHONE #/EMAIL/RESOURCE ORDER # a description of property damage or loss and pictures is required send to finance at 2020.castle.finance@firenet.gov**

3. **We have Comp/Claims on site! Please reach out to us with any questions at 949-330-9973**

RESOURCE MESSAGE

The Sequoia Complex, burning in the Western Divide Ranger District, is advancing toward the Freeman Creek Grove, which sits between the fire and the community of Ponderosa, and is the home of the Bush Tree.

Use of bulldozers to construct fire lines when building hand lines is no longer effective within the giant sequoia groves in the path of the Sequoia Complex is approved. This approval includes the zones of influences for the groves as well.

The use of bulldozers in groves MUST have the approval of the Incident Commander and the Agency Administrator.

I expect the following management requirements to be adhered to:

- A Resource Advisor will be on site during all fire line construction when heavy equipment is used and notified immediately when it is determined that felling any giant sequoia tree is necessary.
- The Giant Sequoia National Monument Plan (Monument Plan) limits cutting sequoias larger than 12" dbh except in clear cases of threats to human safety.
- Keep the dozer line at least 10 feet from the drip line of giant sequoia trees greater than 12" dbh in order to avoid damaging the root systems.
- There may come a point where avoiding the drip line may make the fire line ineffective. If possible build hand lines in these situations.
- Where there are areas of very dense giant sequoia trees that are impossible to avoid, whether building line by hand or dozer, giant sequoias may be felled with the approval of the Resource Advisor.
- Tree felling criteria (Monument Plan, pp. 81-82) have been evaluated. The following criterion is applicable for this project.
 - F4. Public Safety: If maintaining one or more standing trees on site would create a public safety hazard. Forest Service policy is to eliminate safety hazards from recreation sites, administrative sites, and the public transportation system of roads and trails, including trees or tree limbs identified as hazardous (FSM 2330.6a).
 - The trees to be felled have been identified as hazards because leaving them standing would create a safety hazard for firefighters; both as potential falling hazards and by reducing the effectiveness of constructed fire lines. No giant sequoias over 12" dbh would be cut without prior approval.

Don't Forget....

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and can cause future issues (i.e. bears looking for food in camps).

Sensitive Areas

- READs will be flagging sensitive areas during the incident.
- By default, please avoid going into these areas.
- The two flagging colors used are a strip of blue and a strip of red.
- For more information, please consult with a READ.

Keep Up the Good Work!

Continue to do good work for cultural and natural resources by doing the following:

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing information and working alongside READs.
- When moving on to a new area, leaving the old area better than you found it.
