FIRE WEATHER FORECAST

FORECAST NO: 3

PREDICTION FOR: Aug 27th - Aug 28th 0600

INCIDENT NAME: SQF Complex

UNIT: CA-SQF

SIGNED: Andrew Gorelow

TIME AND DATE

FORECAST ISSUED: Wed, Aug 26 @ 1900 hours

Incident Meteorologist - Andrew Gorelow

WEATHER DISCUSSION: Dry conditions will remain over the next several days with only minimal changes in temp and RH. Light mainly drainage winds in the morning will gradually become upslope/upvalley through 1100. After 1100. look for south to southwest winds to increase to around 3 to 6 mph in the lower valley with occasional gusts to 10 mph in the afternoon. Ridgetop winds will generally increase to 7 to 9 mph with gusts up to 12 mph. After 1600, winds are expected to turn more westerly with little change in wind speed. Transport winds are expected to push the winds northeast through the afternoon.

SKY/WEATHER TODAY (THURSDAY): Smoky in the morning with some clearing by early afternoon. Sunny with just a few clouds over the higher peaks. Inversions expected to lift by late morning. Light drainage winds in the afternoon becoming south to southwest in the afternoon. Winds will shift to more to a westerly direction after 1600.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT:

88 to 94 degrees (Little Change) / 22 to 28% (Little Change)

7000 FT:

78 to 83 degrees (Little Change) / 17 to 22% (Little Change)

EYE LEVEL WINDS:

Slope/Valley:

Light drainage in the morning, winds will begin to shift to more of an upslope component

around 1100 and then becoming south to southwest 4 to 7 mph with occasional

gusts to 12 mph in the afternoon. After 1500 winds will turn more westerly with speeds 3

to 5 mph.

Ridges:

Southwest 6 to 8 mph occasional gusts to 12 mph in the afternoon, winds expected to

shift more westerly after 1500.

MIXING HEIGHT...10,000 feet AGL VENTILATION...Poor morning, Excellent in the afternoon.

TRANSPORT WIND...Northwest around 5 mph in the morning, southwest 10 to 15 mph in the afternoon.

CWR (0.10")....0%

LAL....1

HAINES....5 (2-Stability/3-Moisture)

SKY/WEATHER TONIGHT (THURSDAY NIGHT): Clear, Winds becoming light drainage after 2000. Valleys to become very smoky by morning. Overnight RH expected to be good.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT:

57 to 62 degrees (Little Change) / 55 to 60% (Up 2-4%)

7000 FT:

55 to 60 degrees (Little Change) / 32 to 35% (Up 1-3%)

20 FOOT WINDS:

Slope/Valley:

Light drainage winds developing after 2000.

Ridges:

Northwest 1 to 3 mph.

CWR (0.10")....0%

LAL....1

FRIDAY: Morning smoke then becoming mostly sunny in the afternoon. Slight increase in temperatures and decrease in RH. Little change in wind patterns.

Max Temps: 78 to 93. Min RH: 18 to 30%. Winds: Morning drainage winds becoming generally upslope/upvalley on in the lower elevations with a southwest wind 5 to 10 mph on the ridges in the afternoon.

LAL: 1

CWR (0.10"): 0% MIXING HEIGHT: 11,500 feet AGL HAINES: 5

OUTLOOK for SATURDAY and SUNDAY:

Weather: Smoky morning with mostly sunny afternoon. Minimal changes in temperature and RH. High Temp: 78-91 Min RH: 18-25% CWR: 0% LAL: 1 Wind: Southwest 4 to 7 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildland
FIRE NAME: SQF Complex	OPERATIONAL PERIOD: Aug 27, Day/Night 24 Hr
DATE ISSUED: August 26, 2020	TIME ISSUED: 1800
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Dan O'Connor FBAN/ Lauren Blake FBAN(t)

WEATHER SUMMARY

Dry conditions will remain over the next several days with only minimal changes in temp and RH. Light mainly drainage winds in the morning will gradually become upslope/upvalley through 1100. After 1100, look for south to southwest winds to increase to around 3 to 6 mph in the lower valley with occasional gusts to 10 mph in the afternoon. Ridgetop winds will generally increase to 7 to 9 mph with gusts up to 12 mph. After 1600, winds are expected to turn more westerly with little change in wind speed. Transport winds are expected to push the winds northeast through the afternoon.

FIRE BEHAVIOR

GENERAL

<u>Fuels</u> The Fire is burning in an area of the SQF backcountry that doesn't have a lot of recent fire history. To the East and South of the fire is the 2002 McNally and 2017 Schaeffer burn scars, to the West the Pier (2017), the Lion (2017) to the north, and directly adjacent is the smaller George Fire (2012). The Pier, Lion, and Schaeffer should offer solid opportunities to slow fire spread.

<u>Topography</u> Complex terrain features of the Golden Trout Wilderness will highly influence fire spread direction and speed. Higher terrain will be exposed to SW flow, while the drainages will see more Southerly up drainage afternoon winds and Northerly down drainage winds at night.

<u>Weather:</u> Smokey in the morning with some clearing by early afternoon. Sunny with just a few clouds over the higher peaks. Inversions expected to lift by late morning. Light drainage winds in the afternoon becoming south to southwest in the afternoon. Winds will shift to more to a westerly direction after 1600.

	Rate of Spread	Flame Lengths	Spotting Distances	POI
Head	40 ch/hr.	8'	<400'	80%
Flanking	24-30 ch/hr.	6-8'	<100	80%
Backing	2-4 ch/hr.	1-3'	0	80%

SPECIFIC

- **Div. A** Expect the fire to flank where southerly winds align with terrain and move toward Jerky and Burnt Corral Meadows. The 2017 Lion Fire still seems to be slowing fire spread.
- **Div.** G Fire continues to move to the NE towards Kern Peak and Overlook Peak. On the eastern flank the fire is slowly backing towards the Kern. Where the fire crosses the Kern River on the east, expect slope reversal runs where wind and terrain align.
- **Div. M** Down canyon winds after 2100 to move the fire towards the Forks of the Kern confluence. 2017 Schaeffer fire is slowing spread rates but the southwest side has more fuel to make small terrain driven runs. **Division. Z** fire will continue as winds follow the drainages in a southerly alignment but otherwise should continue minimal backing into Southwest flow.

Shotgun Fire: Fire has a large rock component to the north and east. To the southwest is the 2011 Lion Fire and the Southeast is the 2017 Lion Fire. While heat is still detected there has been no significant fire growth.

AIR OPERATIONS

Smoke should lift between 1000-1100 to support air missions.

SAFETY

When the smoke lifts out expect the fire behavior to increase dramatically.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Major Hazards and Risks:

- ➤ ROLLING MATERIAL- Be prepared for snags, rocks and other fire weakened material to fall or roll downhill. Post lookouts as needed and assure LCES is place before engaging. Avoid night operations in high risk areas if possible. Have an escape plan.
- ➤ MEDICAL EMERGENCIES- Do you know what to do in case of a medical emergency? Review Medical Plan (ICS 206) and become familiar with the "Line Emergencies" procedures checklist. Your actions may be what save a life.
- ➤ CUMULATIVE FATIGUE: This is an active fire season with folks working long hours on back-to-back assignments. This can lead to serious cumulative fatigue. Monitor yourself, your subordinates, and others for fatigue. Take frequent short rest breaks, eat balanced meals, and get as much quality sleep as possible, stay hydrated.

Watch Out Situation of the Day

3. SAFETY ZONES AND ESCAPE ROUTES NOT IDENTIFIED

Aviation Awareness:

- Good communication with aircraft
- Approved Helispots known and ready
- No trash in Helispot landing areas
- Watch for rotor wash on tank or bucket drops
- Trained Longline Personnel for crew cargo
- Medical Emergency Hoist Operations Lat/Long
- Aerial Retardant stay clear and watch for rolling rocks, tree limbs and tops
- Paracargo Operations make known where the drop zone is and stay clear of drop zone area

Safety Officers

Team Safety Officers: John Nickey SOF2, Paul Tompkins SOF2..

INCIDENT SAFETY ANALYSIS 215a

SQF Complex CA-SQF-002622 - Thursday, August 27, 2020

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ICP/ Spike Camps	Driving & Traffic	 Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters & Honk horn to alert personnel when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). Always use headlights. Yield to pedestrians and bicycles. Observe posted speed limits. Use the 3 second rule for following distance when driving. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, radio). Ensure that windshields are kept clean of dust and bugs. Refer to "Smoke and Transportation Safety" IRPG Pg 31 Refer to "Roadside Response Safety" IRPG Pg 26
ALL	Helicopter Operations	 Ensure positive communication with all air resources. Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-Out Situations" IRPG Pg 46. Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58. Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62. Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. Monitor A-G communications.
ALL	Fireline Hazards	 Refer to "Fireline Location" considerations, IRPG Pg 84 Do not work directly above or below personnel during firing and mop-up operations. Watch for falling and rolling debris on steep slopes. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Avoid stepping over debris that could roll by walking around object. Avoid radiant heat by wearing appropriate PPE correctly. Use correct tool for task assigned. Flag and isolate all HAZMAT and alert all personnel working in Division. Follow WUI recommendations, IRPG Pg 12.
ALL	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts IRPG Pg 7
ALL	Chain Saw Operations	 Follow "Hazard Tree Safety" guidelines, IRPG Pg 22 Follow "Procedural Felling Operations" IRPG Pg 85. Look up, Look down, Look around for hazard tree indicators. Only fell and buck trees within your expertise, and training. Do not fall trees during high wind events. Ensure proper use of all required PPE.

INCIDENT SAFETY ANALYSIS 215a

ALL	Heat Related Illness (HRI)& Dehydration	~ Refer to Heat Ralated Illness information, IRPG Pg 109
ALL	Extreme Fire Behavior	 Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions IRPG Pg 1. Refer to "Common Denominators of Fire Behaior Tragedy Fires" IRPG Pg 5. Refer to "Alighnments & Patterns for Dangerous Fire Behavior" IRPG Pg 73
ALL	Mop-up & Rehab	~ Do not work above or below personnel during rehab/mop-up operations.
ALL	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.
ALL	Wildlife & Livestock	 Watch out for wildlife & livestock inside fire area and along roadways. Clean up all debris and trash during each operational period.
ALL	Heavy Equipment Operations	~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area and increase it to 1.5 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.
Ponderosa Strc Group	Structure Protection & HAZMAT	 Review "Wildland Urban Interface Firefighting" considerations, IRPG Pg 12-16 Use "Structure Assessment" checklist, IRPG Pg 13 Refer to "Structure Hazard Marking System" IRPG Pg 41 Follow "HAZMAT Incident Operations" IRPG Pg 36
ALL	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
ALL	Spike Camp	~ Keep a clean camp. ~ Ensure communications are in place. ~ Review and observe "Line Spike" considerations, IRPG Pg. 95
ALL	Night Operations	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazard.

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 - Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of E	mergency / Transport Priority	Ex: Unconscious, diffice YELLOW / PRIORITY Ex: Significant trauma, GREEN / PRIORITY:	culty breathing, bleeding seve 2 Serious Injury or Iline unable to walk, 2° – 3° bums	ijury or Illness. Evacuati rely, 2° – 3° burns more than 4 iss. Evacuation may be 1 not more than 1-3 paim sizes. Non-Emergency transpo	palm sizes, heat stroke, discriented. DELAYED if necessary.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Human Resource Message SQF Complex Thursday, August 27, 2020

HUMAN RESOURCE MESSAGE

ATTITUDE

The longer I live, the more I realize the impact of attitude on my life. Sometimes it is more important than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It will make or break a person, a business or a home. The remarkable thing is we have a choice every day regarding the attitude we will embrace for that day.

"I am convinced that life is 10% what happens to me, and 90% how I react to it.

And so it is with you. You are in charge of your attitude." ~ Anonymous ~

Thought of the Day

"A bad attitude is like a flat tire, you can't go anywhere until you change it."

Feel free to call/text me if you have questions, concerns, or just want to chat.

Todd Morrow - (HRSP) - (707) 373-0204

Smoke Outlook for 8/26 - 8/27 Southern Sierra - Sequoia Complex

Issued at: 2020-08-26 07:35 PDT

Special Statement

This outlook addresses and is based on PM2.5 concentrations due to wildfire smoke only.

Fire

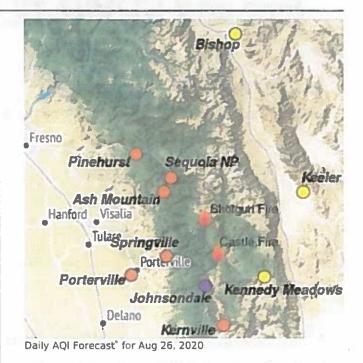

The Sequoia Complex is now 15,400 acres, an increase in 400 acres. Active fire behavior will continue in a mix of grass, brush, and timber fuels over complex backcountry terrain. For more information visit https://inciweb.nwcg.gov/incident/7048/.

Smoke

Overnight down canyon drainage under the inversion will impact primarily johnsondale and Kernville but also contribute to the pool of smoke from other fires in the state in the San Joaquin Valley. Once the inversion breaks around mid-day, the plume will lift and flow northeast into the Owens Valley, with increased impacts from Keeler to Bishop in the afternoon. With the inversion lift, the Kern river drainage may see some improvement in air quality until late evening when this pattern begins again

Notes

In areas experiencing sustained dense smoke even healthy people will start feeling effects from the smoke. Limit outdoor activities and watch out for each other.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - o Fever
 - o Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least <u>SIX</u> feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:
