OPERATIONAL PERIOD

8/28/2020 0600
to
8/29/2020 0600

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">SQF COMPLEX</p>	2. Operational Period:	Date From: 8/28/2020 Time From: 0600	Date To: 8/29/2020 Time To: 0600
---	-------------------------------	---	---

3. Objective(s):

Management Objectives

- Provide for firefighter and public safety as the highest priority through sound risk management and life first principles
- Minimize adverse effects from suppression actions on riparian areas, watersheds, Little Kern Golden Trout, Mountain Yellow Legged Frog and Sierra Nevada Bighorn Sheep habitats
- Minimize impacts to Wilderness areas. Use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines
- Minimize, to the extent feasible, smoke exposure to firefighters, communities, and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure
- Effectively manage cost of the incident by planning strategies and tactics toward a high probability of success in meeting incident objectives
- Provide accurate and timely information to agencies, stakeholders, backcountry users, and the public

Control Objectives

- Keep the fire North of Durr Wood Camp
- Keep the fire South of Sequoia Kings Canyon Wilderness Boundary
- Keep the fire East of 22S82 Road to Freeman Grove to Soda Spring Creek
- Keep the fire West of Toowa Range to King Fisher Ridge to 22S05 Road

COVID Mitigations

- Module of 1, six foot social distancing and wear a mask
- Wash your hands and sanitize surfaces

5. Site Safety Plan Required? Yes No

FIRE WEATHER FORECAST

FORECAST NO: 4
PREDICTION FOR: Aug 28th – Aug 29th 0600

INCIDENT NAME: SQF Complex
UNIT: CA-SQF
SIGNED: *Andrew Gorelow*

TIME AND DATE
FORECAST ISSUED: Thu, Aug 27 @ 1900 hours **Incident Meteorologist – Andrew Gorelow**

WEATHER DISCUSSION: Dry conditions will remain over the next several days with only minimal changes in temp and RH. Northerly drainage winds in the morning are expected 2-4 mph and are likely to follow the Little Kern and Kern Rivers. There is potential for those winds to be more northeasterly at the confluence of both rivers with speeds up to 5 mph through 1000. Winds will begin to switch back to the south to southwest between 1100 and 1200 with daytime heating. Wind speeds around 3 to 6 mph in the lower valleys with occasional gusts to 10 mph in the afternoon. Ridgetop winds will generally increase to 7 to 9 mph with gusts up to 12 mph. Transport winds are expected to push the winds northeast through the afternoon.

SKY/WEATHER TODAY (FRIDAY): Smoky in the morning with some clearing by early afternoon. Sunny with just a few clouds over the higher peaks. Light drainage winds in the morning, becoming south to southwest in the afternoon. Winds will shift to more to a westerly direction after 1600.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT: 88 to 94 degrees (Little Change) / 14 to 19% (Down 2-3%)
7000 FT: 78 to 83 degrees (Little Change) / 16 to 21% (Down 2-3%)

EYE LEVEL WINDS:

Slope/Valley: North to northeast drainage winds up to 4 mph in the morning through 1000 with winds following the Little Kern and Kern Rivers. Winds will gradually shift to the south to southwest after 1200 with speeds 4 to 7 mph gusting to 12 mph. Those south to southwest winds will generally align with the local terrain.

Ridges: Southwest 4 to 7 mph occasional gusts to 10 mph in the afternoon, winds expected to shift more westerly after 1600.

MIXING HEIGHT...10,500 feet AGL **VENTILATION...**Poor morning, Excellent in the afternoon.
TRANSPORT WIND...East around 5 mph in the morning, southwest 10 to 15 mph in the afternoon.
CWR (0.10")...0% **LAL....**1 **HAINES....**5 (2-Stability/3-Dryness)

SKY/WEATHER TONIGHT (FRIDAY NIGHT): Clear. Winds becoming light drainage after 2000, especially following the Kern and Little Kern Rivers. Valleys to become very smoky by morning. Overnight RH expected to be good.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT: 57 to 62 degrees (Little Change) / 55 to 60% (Up 2-4%)
7000 FT: 55 to 60 degrees (Little Change) / 36 to 41% (Up 2-4%)

20 FOOT WINDS:

Slope/Valley: Light drainage winds developing after 2000, especially following the Little Kern and Kern Rivers.

Ridges: Northwest 1 to 3 mph.

CWR (0.10")...0% **LAL....**1

SATURDAY: Morning smoke then becoming mostly sunny in the afternoon. Slight increase in temperatures and decrease in RH. Little change in wind patterns.
Max Temps: 78 to 93. **Min RH:** 18 to 30%. **Winds:** Morning drainage winds becoming generally upslope/upvalley on in the lower elevations with a southwest wind 5 to 10 mph on the ridges in the afternoon.
LAL: 1 **CWR (0.10"):** 0% **MIXING HEIGHT:** 11,500 feet AGL **HAINES:** 5 (2-Stability/3-Dryness)

OUTLOOK for SUNDAY and MONDAY:

Weather: Smoky morning with mostly sunny afternoon. Minimal changes in temperature and RH. **High Temp:** 78-91
Min RH: 18-25% **CWR:** 0% **LAL:** 1 **Wind:** Southwest 4 to 7 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: Wildland
FIRE NAME: SQF Complex	OPERATIONAL PERIOD: Aug 28, Day/Night 24 Hr
DATE ISSUED: August 27, 2020	TIME ISSUED: 1800
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Dan O'Connor FBAN/ Lauren Blake FBAN(t)

WEATHER SUMMARY

Dry weather can be expected over the district for the next several days. Little diurnal change in temperatures will occur into next week with slightly lower humidities and generally light, terrain driven winds. There is a possibility of a warming trend by the middle of next week.

FIRE BEHAVIOR

GENERAL

Fuels The Fire is burning in an area of the SQF backcountry that doesn't have a lot of recent fire history. To the East and South of the fire is the 2002 McNally and 2017 Schaeffer burn scars, to the West the Pier (2017), the Lion (2017) to the north, and directly adjacent is the smaller George Fire (2012). The Pier, Lion, and Schaeffer should offer solid opportunities to slow fire spread.

Topography Complex terrain features of the Golden Trout Wilderness will highly influence fire spread direction and speed. Higher terrain will be exposed to SW flow, while the drainages will see more Southerly up drainage afternoon winds and Northerly down drainage winds at night.

Weather: Smoky in the morning with some clearing by early afternoon. Sunny with just a few clouds over the higher peaks. Inversions expected to lift by late morning. Light drainage winds in the afternoon becoming south to southwest in the afternoon. Winds will shift to more to a westerly direction after 1600.

	Max Rate of Spread	Max Flame Lengths	Spotting Distances	POI
Head	80 ch/hr.	8-12'	<400'	80%
Flanking	24-30 ch/hr.	6-8'	<100	80%
Backing	2-4 ch/hr.	1-3'	0	80%

SPECIFIC

Div. A/B Fire will continue backing/ flanking into the afternoon winds. The NW progression from Trout Meadows to Round Meadow is at about 2000' per day, backing/flanking West towards Jerkey Meadow at about 1000' per day. The 2017 Lion Fire still seems to be slowing fire spread.

Div. C Fire progression has slowed in the 2017 Lion Fire scar.

Div. G Fire continues to move to the NE towards Kern Peak and Overlook Peak. On the eastern flank the fire is slowly backing towards the Kern. Where the fire crosses the Kern River on the east, expect slope reversal runs where wind and terrain align.

Div. X Down canyon winds after 2100 to move the fire towards the Forks of the Kern confluence. 2017 Schaeffer fire is slowing spread rates but the southwest side has more fuel to make small terrain driven runs.

Div. Y/Z Periods of morning SE flow offer opportunities for slope/wind/aspect aligned runs towards values at risk west of the fire.

Shotgun Fire: Fire has a large rock component to the north and east. To the southwest is the 2011 Lion Fire and the Southeast is the 2017 Lion Fire. While heat is still detected there has been no significant fire growth.

AIR OPERATIONS

Smoke should lift between 1000-1100 to support air missions.

SAFETY

Maintain situational awareness of the complex terrain features that will influence fire spread direction. This may be different than general afternoon wind flow from the SW.

Health & Safety Message

Incident: SQF Complex CA-SQF-002622	Date/Op Period: Day/Night Shift 0600-0600 08/28-29/ 2020
---	--

RISKS & HAZARDS

Lookouts: Posting Lookouts is an invaluable tool for gathering information on fire behavior & weather and it's potential impacts to crews working on the fireline. Lookouts should be experienced, competent & trusted. They should have knowledge of crew locations, escape routes, safety zones, trigger points and possess a map, weather kit, watch & IAP.

Good communications with crews is essential!

Safety Zones: A safety zone is an area where a firefighter can survive without a fire shelter. The separation distance between firefighter and flames should be at least **4X the maximum flame height. This is based on flat terrain and no wind conditions. Safety Zones that are downwind and/or upslope from the fire will require larger separation distances.** Reference your IRPG for detailed safety zone size calculations.

Standard Fire Order #4: Identify escape routes and safety zones and make them known.

Annotate safety zones on your maps and get them printed on the Ops maps.

Human Factors to S.A.: Personalities, fatigue, stress factors are a few reasons that interfere with humans' abilities to gather and react to situational awareness. Key Barriers include:

- Low experience level with local factors
- Distraction from primary task
- Fatigue
- Stress reactions
- Hazardous attitudes

Conduct a self-assessment of yourself. Are any of these barriers affecting you and your ability to do your job or decision-making? Refer to your IRPG and make a conscious effort to mitigate some of these factors.

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient!)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Hellspot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

COVID-19 PLAN	1. INCIDENT NAME SQF COMPLEX	2. DATE PREPARED 08/27/20	3. TIME PREPARED 1500	4. OPERATIONAL PERIOD 08/28/20 - 08/29/20 24HR

Symptomatic individual guidance

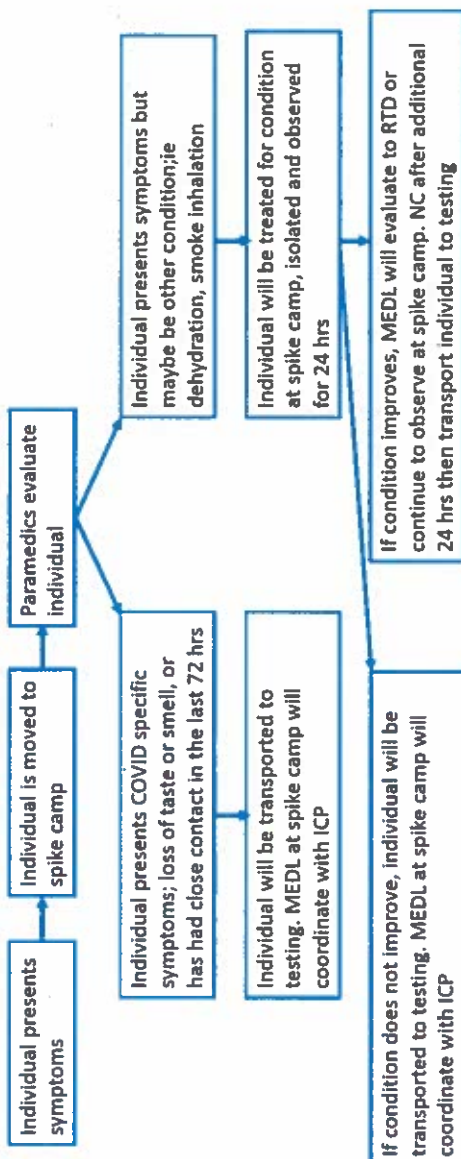

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, guidance has been provided on dealing with symptomatic individuals.

A COVID evaluation process has been published as an attachment. Division Chiefs will be responsible for screening resources daily with module supervisors for COVID.

Personnel must wear masks when in camp and social distancing is not possible. Masks will help to limit the spread of COVID virus. A COVID outbreak in camp will shut down the fire suppression efforts, place colleagues at risk, and potentially have personnel pulled off the fire.

Symptomatic Individual Guidance

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, please follow the procedure outlined below.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Difficulty breathing
 - o Loss of taste or smell
 - o Fever
 - o Chills
 - o Sore throat
 - o Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL (T) Brandon Bennewate @ (805) 813-3858
MEDL (T) Kevin Elledge @ (661) 510-6117

Human Resource Message SQF Complex Friday, August 28, 2020

HUMAN RESOURCE MESSAGE

Communication is a two-way street. When communication becomes a one-way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- It can be like the telephone game. It starts with specific information and by the time it gets to the end it very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

“The single biggest problem in communication is the illusion that it has taken place”....by George Bernard Shaw

Feel free to call/text if you have questions, concerns, or just want to chat.

Todd Morrow - (HRSP) – (707) 373-0204

Smoke Outlook for 8/27 - 8/28
Southern Sierra - Sequoia Complex
 Issued at: 2020-08-27 07:18 PDT

Special Statement

This outlook addresses and is based on PM2.5 concentrations due to wildfire smoke only.

Fire

The Sequoia Complex is 20,979 acres in size, an increase of 2799 acres. Active fire behavior will continue in a mix of grass, brush, and timber fuels over complex backcountry terrain. Reduced available fuels due to previous fires in the area are limiting growth in some areas. For more information visit <https://inciweb.nwcg.gov/incident/7048/>

Smoke

Overnight down canyon drainage under an inversion along the Kern river will create impaired conditions from the fire's location to Lake Isabella. Monitors at Johnsondale and Kernville are indicating Unhealthy to Hazardous conditions from dawn to early afternoon under this pattern. This smoke will also contribute to the pool of smoke from other fires in the state gathering in the San Joaquin Valley, impacting communities from Porterville to Pinehurst. Once the inversion breaks around mid-day, smoke will lift and flow northeast into the Owens Valley, with increased impacts from Keeler to Bishop in the late afternoon. With the inversion lift, the Kern river drainage may see some improvement in air quality until about midnight when this pattern begins again.

Daily AQI Forecast* for Aug 27, 2020

Station	Yesterday hourly			Wed 8/26	Forecast* Comment for Today – Thu, Aug 27	Thu 8/27	Fri 8/28
	6a	noon	6p				
Pinehurst					Unhealthy for Sensitive Groups throughout the day.		
Sequoia NP					Unhealthy for Sensitive Groups throughout the day.		
Ash Mountain					Unhealthy for Sensitive Groups throughout the day.		
Springville					Unhealthy for Sensitive Groups throughout the day.		
Porterville					Unhealthy for Sensitive Groups throughout the day.		
Johnsondale					Very Unhealthy conditions today		
Kernville					Very Unhealthy conditions today		
Kennedy Meadows					Unhealthy conditions today		
Keeler					Unhealthy for Sensitive Groups changing to Unhealthy in the afternoon.		
Bishop					Moderate conditions most of the day.		

Issued 2020-08-27 07:18 PDT by Paul Schlobohm, ARA, pschlobo@gmail.com

Air Quality Index (AQI)	Actions to Protect Yourself
Good	None
Moderate	Unusually sensitive individuals should consider limiting prolonged or heavy exertion.
USG	People within Sensitive Groups* should reduce prolonged or heavy outdoor exertion.
Unhealthy	People within Sensitive Groups* should avoid all physical outdoor activity.
Very Unhealthy	Everyone should avoid prolonged or heavy exertion.
Hazardous	Everyone should avoid any outdoor activity.

*Disclaimer: This forecast is based on fine particulates only; ozone is not included. Forecasts may be wrong; use at own risk. Use caution as conditions can change quickly. See your health professional as needed. Smoke sensitive groups should take appropriate precautions.

Pronóstico de Humo para 27/08 - 28/08

Actualizado: 2020-08-27 08:24 PDT

Aviso Especial

Este pronóstico se basa en concentraciones de PM2.5 procedentes solamente de el humo de incendios forestales.

Incendio

El conjunto de fuegos Sequoia tiene un tamaño de 20,979 acres, luego de haber crecido 2,799 acres. El comportamiento de fuego activo continuará con combustibles que incluyen pasto, matorrales y madera en terrenos de campo complicados. La reducción de combustibles disponibles, debido a incendios anteriormente vistos en el área, está limitando el crecimiento del fuego en algunas áreas. Para obtener más información, visite <https://Inciweb.nwcg.gov/Incident/7048/>

Humo

Durante la noche, el drenaje del cañón a lo largo del río Kern estará bajo una inversión que creará el deterioro de las condiciones desde la ubicación del incendio hasta Lake Isabella. Bajo este patrón, los monitores en Johnsondale y Kernville están mostrando condiciones entre Insalubres y Peligrosas, desde el amanecer hasta las primeras horas de la tarde. El humo de este conjunto de fuegos también contribuirá a la nube de humo de otros incendios en el estado que se concentra en el Valle de San Joaquín, lo que afectará a comunidades desde Porterville hasta Pinehurst. Una vez que la inversión se rompa, alrededor del mediodía, el humo se levantará y fluirá hacia el noreste, hacia el valle de Owens, aumentando el impacto desde Keeler hasta Bishop al final de la tarde. Con la elevación de la inversión, el drenaje del río Kern puede ver una pequeña mejoría en la calidad del aire hasta aproximadamente la medianoche, cuando este patrón comienza de nuevo.

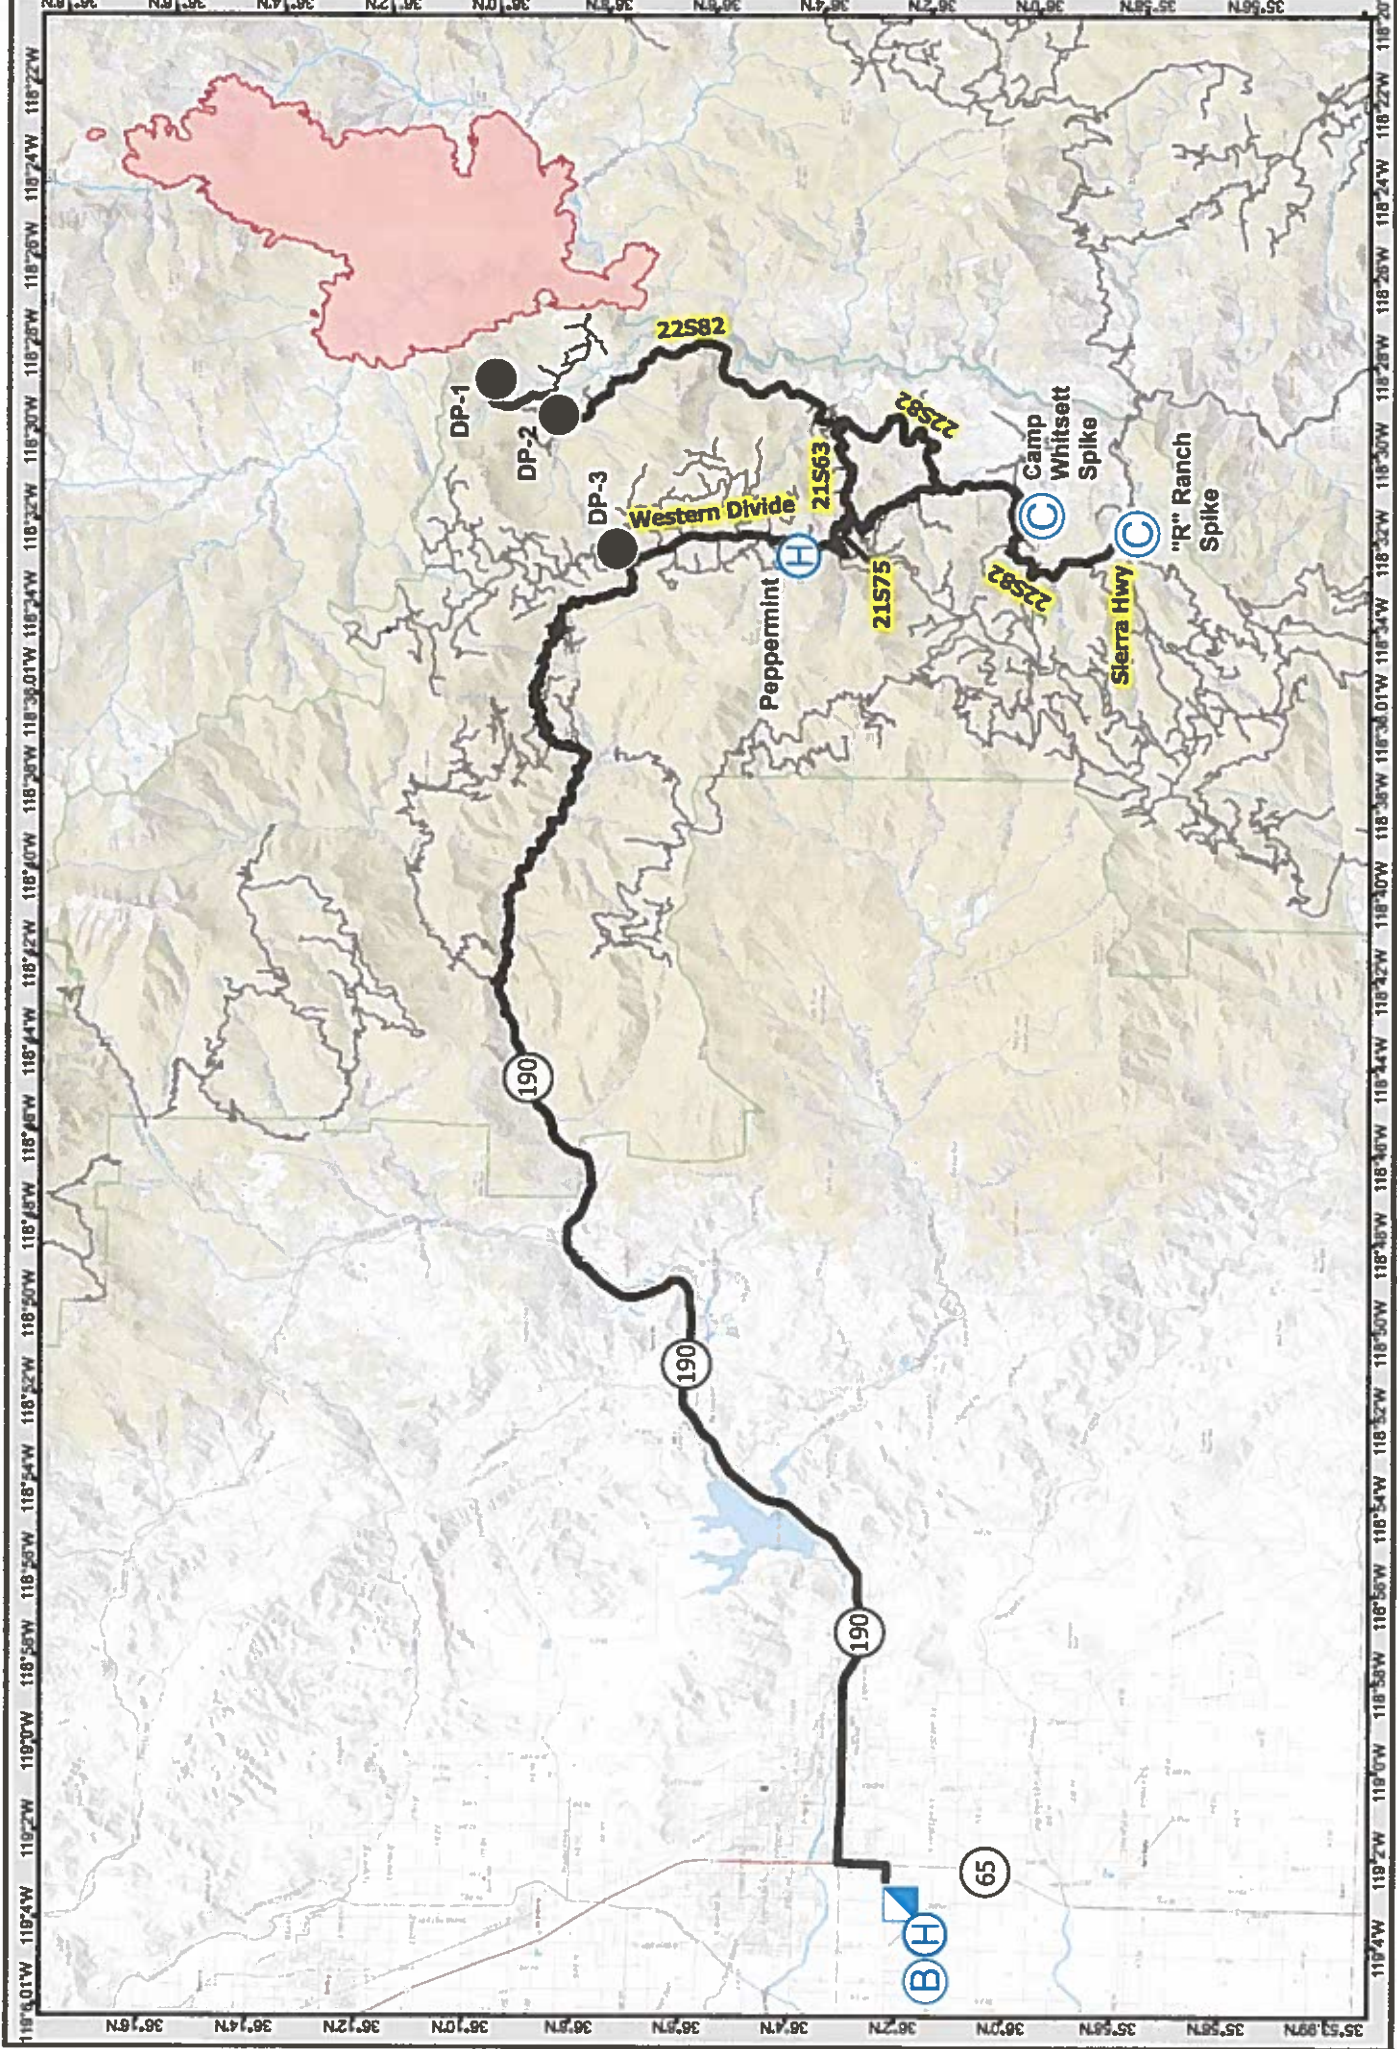

Pronóstico del ICA* para 27 de agosto de 2020

Estación	Ayer		mié 26/08	Pronóstico para hoy -- Jue, 27 de agosto	Pronóstico*	
	hora por hora	6a noon 6p			Jue 27/08	vie 28/08
Pinehurst				Insalubre para Grupos Sensitivos (IGS) durante todo el día.		
Sequoia NP				Insalubre para Grupos Sensitivos (IGS) durante todo el día.		
Ash Mountain				Insalubre para Grupos Sensitivos (IGS) durante todo el día.		
Springville				Insalubre para Grupos Sensitivos (IGS) durante todo el día.		
Porterville				Insalubre para Grupos Sensitivos (IGS) durante todo el día.		
Johnsondale				Condiciones Muy insalubres hoy		
Kernville				Condiciones Muy insalubres hoy		
Kennedy Meadows				Condiciones Insalubres hoy		
Keeler				Insalubre para Grupos Sensitivos (IGS), cambiando a Insalubre por la tarde.		
Bishop				Condiciones Moderadas la mayor parte del día.		

Emitido 2020-08-27 08:24 PDT por Paul Schlobohm, ARA, pschlobo@gmail.com

Índice de Calidad del Aire (ICA)	Acciones para protegerse
Buena	No se anticipan impactos a la salud.
Moderada	Personas extraordinariamente sensitivas deben considerar limitar esfuerzos físicos excesivos y prolongados al aire libre.
IGS	Personas en Grupos Sensibles* deben reducir esfuerzos físicos excesivos y prolongados al aire libre.
Insalubre	Personas en Grupos Sensible* deben evitar todo esfuerzo físico excesivo y prolongado al aire libre.
Muy Insalubre	Todos deben evitar el esfuerzo físico excesivo y prolongado al aire libre.
Peligrosa	Todos deben evitar toda actividad al aire libre.

*Relieve de responsabilidad: Este pronóstico se basa solo en partículas finas; el ozono no está incluido. Los pronósticos pueden ser incorrectos; usar bajo su propio riesgo. Tenga cuidado ya que las condiciones pueden cambiar rápidamente. Consulte con su profesional médico cuando sea necesario. Grupos sensibles al humo deben tomar precauciones.
