FIRE WEATHER FORECAST

FORECAST NO: 5

PREDICTION FOR: Aug 29th - Aug 30th 0600

INCIDENT NAME: SQF Complex

UNIT: CA-SQF SIGNED: Andrew Gorelow

TIME AND DATE

FORECAST ISSUED: Fri, Aug 28 @ 1900 hours

Incident Meteorologist - Andrew Gorelow

WEATHER DISCUSSION: Dry conditions will remain over the fire for the next several days. Morning RH recoveries in the 40-50% range will drop into the teens and possibly into the upper single digits once the inversion lifts between 0900-1000. When the inversion lifts winds will shift to the south to southwest, but also be affected heavily by the local terrain which may cause some southeast winds along the far western section of the fire. Wind speeds will generally be 6 to 10 mph with occasional gusts to 15 mph. Winds will remain gusty through 2000 before decreasing the becoming downslope/downvalley. The inversion is expected to develop by late evening.

SKY/WEATHER TODAY (SATURDAY): Smoky in the morning with some clearing by early afternoon. Inversion breaking between 0900-1000 with south to southwest winds increasing to 6 to 10 mph with gusts to 15 mph. Winds will be heavily impacted by the local terrain which could cause some southeast winds up to 10 mph one the western edges of the fire. Just a few clouds over the higher peaks.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT:

88 to 94 degrees (Little Change) / 10 to 15% (Down 2-4%)

7000 FT:

78 to 83 degrees (Little Change) / 9 to 14% (Down 2-3%)

EYE LEVEL WINDS:

Slope/Valley:

North to northeast drainage winds up to 4 mph in the morning through 1000 with winds

following the Little Kern and Kern Rivers. Winds will gradually shift to the south to southwest after 1200 with speeds 4 to 7 mph gusting to 12 mph. Those south to

southwest winds will generally align with the local terrain. Winds shifting to the west with

gusts up to 15 mph after 1600.

Ridges:

Southwest 4 to 7 mph occasional gusts to 10 mph in the afternoon, winds expected to

shift more westerly after 1600.

MIXING HEIGHT...10,500 feet AGL VENTILATION...Poor morning, Excellent in the afternoon.

TRANSPORT WIND... Southeast around 5 mph in the morning, southwest 10 to 15 mph in the afternoon.

CWR (0.10")....0%

LAL...1

HAINES....5 (2-Stability/3-Dryness)

SKY/WEATHER TONIGHT (SATURDAY NIGHT): Clear. Winds becoming light drainage after 2000 but could remain squirrelly near the confluence of the Little Kern/Kern Rivers. Valleys to become very smoky by morning. Overnight RH expected to be poor to moderate.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT:

57 to 62 degrees (Little Change) / 40 to 50% (Down 2-4%)

7000 FT:

55 to 60 degrees (Little Change) / 28 to 33% (Down 2-4%)

20 FOOT WINDS:

Slope/Valley:

Light drainage winds developing after 2000, especially following the Little Kern and Kern

Rivers.

Ridges:

Northwest 1 to 3 mph.

CWR (0.10")....0%

LAL....1

SUNDAY: Morning smoke then becoming mostly sunny in the afternoon. Slight increase in temperatures and decrease in RH. Little change in wind patterns.

Max Temps: 78 to 93. Min RH: 13 to 23%. Winds: Morning drainage winds becoming generally upslope/upvalley on in the lower elevations with a southwest wind 5 to 10 mph on the ridges in the afternoon.

CWR (0.10"): 0% MIXING HEIGHT: 11,500 feet AGL HAINES: 5 (2-Stability/3-Dryness) LAL: 1

OUTLOOK for MONDAY and TUESDAY:

Weather: Smoky morning with mostly sunny afternoon. Minimal changes in temperature and RH. High Temp: 78-91

Min RH: 18-25% CWR: 0% LAL: 1 Wind: Southwest 4 to 7 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 8	TYPE OF FIRE: Wildland
FIRE NAME: SQF Complex	OPERATIONAL PERIOD: Aug 29, Day/Night 24 Hr
DATE ISSUED: August 28, 2020	TIME ISSUED: 1800
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Dan O'Connor FBAN/ Lauren Blake FBAN(t)

WEATHER SUMMARY

Dry conditions will remain over the fire for the next several days. Morning RH recoveries in the 40-50% range will drop into the teens and possibly into the upper single digits once the inversion lifts between 0900-1000. When the inversion lifts winds will shift to the south to southwest, but also be affected heavily by the local terrain which may cause some southeast winds along the far western section of the fire.

FIRE BEHAVIOR

GENERAL

<u>Fuels</u> The Fire is burning in an area of the SQF backcountry that doesn't have a lot of recent fire history. To the East and South of the fire is the 2002 McNally and 2017 Schaeffer burn scars, to the West the Pier (2017), the Lion (2017) to the north, and directly adjacent is the smaller George Fire (2012). The Pier, Lion, and Schaeffer should offer solid opportunities to slow fire spread.

<u>Topography</u> Complex terrain features of the Golden Trout Wilderness will highly influence fire spread direction and speed. Higher terrain will be exposed to SW flow, while the drainages will see more Southerly up drainage afternoon winds and Northerly down drainage winds at night.

Weather: Smoky in the morning with some clearing by early afternoon. Inversion breaking between 0900-1000 with south to southwest winds increasing to 6 to 10 mph with gusts to 15 mph. Winds will be heavily impacted by the local terrain which could cause some southeast winds up to 10 mph one the western edges of the fire.

	Max Rate of Spread	Max Flame Lengths	Spotting Distances	POI
Head	80 ch/hr.	10-14'	<500'	80%
Flanking	24-30 ch/hr.	6-8'	<100	80%
Backing	2-4 ch/hr.	1-3'	0	80%

SPECIFIC

Div. A/B Active backing/ flanking fire into the afternoon winds.

Div. C Active backing/ flanking fire into the afternoon winds but progressions will slow in the 2017 Lions Fire. **Div.** G Fire continues to move to the NE towards Kern Peak and Overlook Peak. On the eastern flank the fire is slowly backing towards the Kern. Where the fire crosses the Kern River on the east, expect slope reversal runs where wind and terrain align.

Div. X Down canyon winds after 2100 to move the fire towards the Forks of the Kern confluence. 2017 Schaeffer fire is slowing spread rates but the southwest side has more fuel to make small terrain driven runs. **Div.** Y/Z Periods of morning terrain influenced SE flow offer opportunities for slope/wind/aspect aligned runs towards values at risk west of the fire. Increased fire behavior expected with the low humidity's and poor recovery.

Shotgun Fire: Fire has a large rock component to the north and east. To the southwest is the 2011 Lion Fire and the Southeast is the 2017 Lion Fire. While heat is still detected there has been no significant fire growth.

AIR OPERATIONS

Smoke should lift between 1000-1100 to support air missions.

SAFETY

Maintain situational awareness of the complex terrain features that will influence fire spread direction. This may be different than general afternoon wind flow from the SW.

Health & Safety Message

Incident: SOF Complex CA-SOF-002622 Date/Op Period: Day/Night Shift

0600-0600

08/29-30/ 2020

RISKS & HAZARDS

Remember the Fundamentals!: The Ten Standard Fire Orders and the 18 Watchout Situations came about from some tough lessons learned. Use these as a guide to good decision making and sound risk analysis of your work assignments. Evaluate all you tasks within the framework of the Risk Management process outlined in your IRPG.

Fire Weather & Behavior: Continue to monitor weather trends in the daily forecast. Sling hourly weather when out on the line and broadcast that information for all to hear. Watch for increased fire activity at the height of the burning period, especially the unexpected sleeper that suddenly comes to life. Know the extreme fire behavior thresholds that are documented for the area you're working in. Review the fire behavior forecast in the IAP and validate predictions through the course of the operational period.

Fire Camp Safety: We usually don't think of Fire Camp as a dangerous place but camp has a few hazards to look out for:

- Trip hazards such as stairs, tent stakes, cables and wires are abundant.
- Vehicle traffic in and around parking areas and driving through camp.
- Electrical shock from all the power cords and power strips plugged in our tents, kitchen area, hand wash stations and shower unit.
- Wildlife and insects.
- Walking and talking or texting on our cell phones.
- Sharp objects such as scissors, tacks, saws and nails.
- Adverse weather; to name just a few Fire Camp Watch Outs.
- Hazard trees and widow makers: Watch where you pitch your tent. So pay attention to your surroundings and avoid distractions!

BE COVID 19 SMART!

#### Using your radio with preprogrammed tones

NIFC requires all frequencies used on incidents to be tone guarded on the Receive and Transmit Side. To make radio use as intuitive as possible we have programmed the correct transmit and receive tones on all frequencies in the incident clone.

There are a few things to remember to make this work properly:

#### 1. YOU DO NOT NEED TO SELECT TONES ON THE KEYPAD.

- 2. Pressing the number zero key will allow the radio to use the preprogrammed tone frequencies.
- 3. If you are using the old "brick" style radios (dph, gph) your radio squelch knob needs to be turned all the way counterclockwise into the Channel Guard or CG position like in the picture below. There is no change needed for any KNG model radios.

**REMEMBER-** If you are unsure about your current tone selection just press zero, this will have the correct tone for every channel. You can lock your keypad by holding the function or FCN button, this will help prevent accidental keypresses or tone changes.

## Using a linked NIFC repeater system

Our current repeater configuration is known as a "linked" system. Here are a few reminders on the correct use of a linked repeater network.

- 1. When selecting a command repeater to talk on, use the one that gives you the clearest kick back (squelch tail, kerchunk).
- THERE IS NO NEED TO ANNOUNCE THE SPECIFIC COMMAND NUMBER YOU ARE
   <u>USING.</u> In a linked system each repeater will retransmit any traffic from all other
   repeaters in the network.

Please take time to familiarize yourself with your radio's functions and capabilities. If you have any questions, contact communications at 925-588-6879.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Severity of E	Emergency / Transport Priority	Ex: Unconscious, diffice YELLOW / PRIORITY Ex: Significant trauma,	culty breathing, bleeding sev ' <b>2 Serious Injury or illn</b> unable to walk, 2° – 3° burn	injury or illness. Evacuation erely, 2° – 3° burns more than 4 pa ess. Evacuation may be DEI s not more than 1-3 palm sizes. Non-Emergency transport	Ilm sizes, heat stroke, disoriented.  LAYED if necessary.

unction	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act

Decisively.

CTRs/Shift Tickets/ and other finance items will be gathered daily at Whitsett and taken to ICP. Please complete CTRs and shift tickets at least every 2 days. Please include your resource number on CTR

Due to Covid-19, Finance staff are working towards minimizing everyone's exposure at incidents. An electronic submission of CTR, Shift ticket, contract, crew manifest, and resource order is encouraged when possible.

Please send the signed documents to the email address below. In the subject line, please put your resource number and the lead's last name.

### We accept:

- Photo/image of the traditional hardcopy w/wet signature, or
- PDF w/electronic signature

# Human Resource Message SQF Complex Saturday, August 29, 2020

#### HUMAN RESOURCE MESSAGE

## Keep Your Head in the Game....And a Level Head

The demands expected of the people assigned to incidents are complex, different, exhausting, and exciting. No matter what our particular assignment to the incident is, there is a common expectation placed on each of us - our readiness to take on the assignment.

To maintain this readiness throughout the incident, we need to continue focusing on the objectives. We must not be distracted by unacceptable conduct that adversely affects personnel and their readiness.

"Get on the field! Let's go! Get your heads in the game!!"

Feel free to call/text if you have questions, concerns, or just want to chat.

Todd Morrow - (HRSP) - (707) 373-0204

## SQF COMPLEX TRAINING MESSAGE 08/29/2020

A Training Specialist is now assigned to the incident. Registration for Training as a trainee can be done virtually using the QR code in the IAP. Once you register, I will send you a text and/or email with instructions for closing out your assignment when ready. If you have any training questions or need any evaluation records or forms, please feel free to contact me:

HEATHER GROVE, TNSP- (530) 394-8076 or heather.e.grove@usda.gov

I am available by phone, text, or email from 0600-2100 daily.

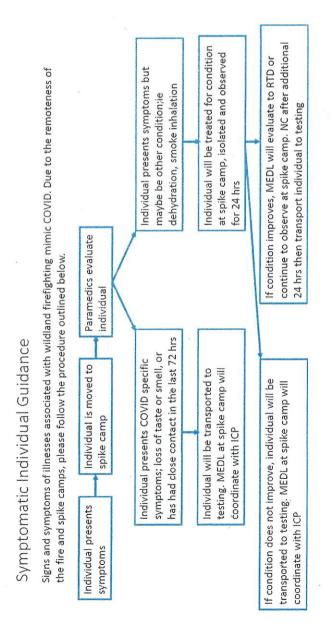

Be safe and have a great trainee assignment!

#### Symptomatic individual guidance

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, guidance has been provided on dealing with symptomatic individuals.

A COVID evaluation process has been published as an attachment. Division Chiefs will be responsible for screening resources daily with module supervisors for COVID.

Personnel must wear masks when in camp and social distancing is not possible. Masks will help to limit the spread of COVID virus. A COVID outbreak in camp will shut down the fire suppression efforts, place colleagues at risk, and potentially have personnel pulled off the fire.

#### Fire and COVID-19 Briefing Checklist

#### Self-Awareness / Screening

- Notify supervisor if you or others experience:
  - o Cough, more than expected
  - o Difficulty breathing
  - o Loss of taste or smell
  - o Fever
  - o Chills
  - o Sore throat
  - o Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

#### Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

#### Social distancing and protective equipment

- · Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- · Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

#### Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL (T) Brandon Bennewate @ (805) 813-3858 MEDL (T) Kevin Elledge @ (661) 510-6117

Issued at: 2020-08-28 07:21 PDT

#### Fire

The SQF Complex is 23,625 acres in size, an increase of 2191 acres. Active fire behavior with backing, flanking, and uphill runs is expected in grass, brush, and timber fuels over a complex wilderness landscape. Reduced available fuels due to previous fires in the area are limiting growth in some areas. For more information visit

https://inciweb.nwcg.gov/incident/7048/.

#### Smoke

Improving air quality was measured yesterday in the foothills of the eastern San Joaquin Valley. Generally Moderate conditions will continue again today from Pinehurst to Porterville. The Kern river drainage from the fire south to Kernville and the Kennedy Meadows area east of the fire will again see impaired conditions for most of the day. On the east side, Keeler and Lone Pine will have Unhealthy conditions most of the day.

#### Notes

This outlook addresses and is based on PM2.5 concentrations due to wildfire smoke only.

Daily AQI Forecast* for Aug 28, 2020

	Yesterday	Thu	Forecast*	Fri	Sat	
Station	hourly	8/27	Comment for Today Fri, Aug 28	8/28	8/29	
	6a noon 6p					
Pinehurst			Moderate most of the day.			
Sequoia NP	No.		Moderate most of the day.		0	
Ash Mountain			Moderate most of the day.		0	
Springville	1		Moderate most of the day.		0	
Porterville			Moderate most of the day.		0	
Johnsondale			Very Unhealthy conditions today	0	0	
Kernville		0	Very Unhealthy conditions today	0	0	
Kennedy Meadows			Unhealthy conditions today			
Keeler	- The state of the		Unhealthy conditions today		0
