FIRE WEATHER FORECAST

FORECAST NO: 7
PREDICTION FOR: Aug 31st – Sep 1st 0600

INCIDENT NAME: SQF Complex
UNIT: CA-SQF
SIGNED: *Andrew Gorelow*

TIME AND DATE

FORECAST ISSUED: Sun, Aug 30 @ 1900 hours **Incident Meteorologist –** Andrew Gorelow

WEATHER DISCUSSION: Strong high pressure will build over the interior of California this week leading to hot and dry conditions along with overall lighter winds across the fire. With the high overhead this will also lead to more stable conditions and is likely to keep smoky conditions throughout the day and keeping visibilities lower. RH recoveries will be poor overnight with afternoon min RH dropping into the teens. Temperatures will be in the 80s to mid-90s, but may be held lower due to additional smoke cover. Winds are still expected to be southeast to south in the morning, turning more to the southwest to west after 1400. Winds will continue to be heavily impacted by local terrain.

SKY/WEATHER TODAY (MONDAY): Hot and dry. Valley inversions lifting early afternoon, but smoky conditions are expected to last through much of the day. Morning downlope/downvalley winds will turn southeast to south after 1000 with speeds 3 to 5 mph with occasional gusts to 8 mph. A west wind push is expected in the afternoon after 1500 with winds 3 to 6 mph and gusts to 10 mph which will mainly impact DIVs A, Y, Z, and X. However, winds will be heavily affected by the local terrain.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT: 87 to 92 degrees (Little Change) / 18 to 23% (Down 2-3%)
7000 FT: 76 to 81 degrees (Little Change) / 16 to 21% (Down 1-4%)

EYE LEVEL WINDS:

Slope/Valley: North to northeast drainage winds up to 4 mph through 1000 with winds following the Little Kern and Kern Rivers. Winds will gradually shift to the south after 1100 with speeds 4 to 7 mph gusting to 10 mph. However, southeast winds are possible in DIV Y due to local terrain. Winds shifting to the west with gusts up to 12 mph after 1500.
Ridges: South 4 to 7 mph occasional gusts to 12 mph in the afternoon.

MIXING HEIGHT...11,500 feet AGL **VENTILATION...**Poor morning, Fair in the afternoon.
TRANSPORT WIND...Southeast 5-10 mph.
CWR (0.10")...0% **LAL....**1 **HAINES....**4 (1-Stability/3-Dryness)

SKY/WEATHER TONIGHT (MONDAY NIGHT): Smoky. Inversions developing by 2200. Winds becoming light drainage after 2000 but could remain squirrely near the confluence of the Little Kern/Kern Rivers. Overnight RH expected to be poor.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT: 55 to 60 degrees (Little Change) / 40 to 50% (Down 3-6%)
7000 FT: 60 to 65 degrees (Little Change) / 28 to 33% (Down 4-7%)

20 FOOT WINDS:

Slope/Valley: Northwest to north drainage winds 2 to 5 mph.
Ridges: Northwest 1 to 3 mph.

CWR (0.10")...0% **LAL....**1 **HAINES....**5 (above the inversion)

TUESDAY: Morning smoke then becoming sunny in the afternoon. Slight increase in temperatures and decrease in RH. Little change in wind patterns.

Max Temps: 79 to 94. **Min RH:** 10 to 18%. **Winds:** Morning drainage winds becoming generally upslope/upvalley on in the lower elevations with a southwest wind 5 to 10 mph on the ridges in the afternoon.
LAL: 1 **CWR (0.10"):** 0% **MIXING HEIGHT:** 11,500 feet AGL **HAINES:** 4 (1-Stability/3-Dryness)

OUTLOOK for WEDNESDAY and THURSDAY:

Weather: Hot and dry. Terrain influenced winds each day. Light upper level winds so not much smoke movement.
High Temp: 80-95 **Min RH:** 10-20% **CWR:** 0% **LAL:** 1 **Wind:** Southeast to south 4 to 7 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 10	TYPE OF FIRE: Wildland
FIRE NAME: SQF Complex	OPERATIONAL PERIOD: Aug 31, Day/Night 24 Hr
DATE ISSUED: August 30, 2020	TIME ISSUED: 1800
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Dan O'Connor FBAN/ Lauren Blake FBAN(t)

WEATHER SUMMARY

Hot and dry. Valley inversions lifting early afternoon, but smoky conditions are expected to last through much of the day. Morning downslope/down valley winds will turn southeast to south after 1000 with speeds 3 to 5 mph with occasional gusts to 8 mph.

FIRE BEHAVIOR

GENERAL

Fuels- Fuels involved in the Castle Fire are primarily Fire Behavior Fuel Models (FBFM) timber litter and understory (TU5) in areas without recent fire history, and a mix of grass (GR2) and brush (GS2) in burn scars less than 20 years old. The Shotgun Fire is higher elevation and does not have recent fire history in its current footprint, and is more represented by a grass shrub (GS2) moderate timber litter (TL6).

Topography- Topography in the fire area is dominated by the Kern River. This river drainage runs north/south and is steep and narrow, roughly bisecting the fire area down the middle. Terrain has played a central role in fire spread, taking the predominantly SW flow and directing it in every way imaginable across the fire area.

Weather A west wind push is expected in the afternoon after 1500 with winds 3 to 6 mph and gusts to 10 mph which will mainly impact DIVs A, Y, Z, and X. However, winds will be heavily affected by the local terrain.

	Max Rate of Spread	Max Flame Lengths	Spotting Distances	POI
GR2	89 ch/hr.	5-8'	<100'	80%
GS2	52 ch/hr.	5-8'	<200'	80%
TU5	20 ch/hr.	8-10'	<500'	80%
TL6	17 ch/hr.	4-6'	<500'	80%

SPECIFIC

With predicted Haines of 6, there is an increased change of column development with increased fire activity. Increased fire behavior expected with the low humidity's and poor recovery.

Div. A/B Active backing/ flanking fire into the afternoon winds.

Div. C Active backing/ flanking fire into the afternoon winds but progressions will slow in the 2017 Lions Fire.

Div. G Fire continues to move to the NE towards Kern Peak and Overlook Peak. The fire spotted across the Kern in the Kern Flat area and is moving with terrain and wind alignment towards the east and Osa Meadows.

Div. X Down canyon winds after 2100 will continue to push the fire to the south through alignment with the terrain. The fire is finding its way through the Schaeffer fire scar through available fuels to the east.

Div. Y/Z Periods of morning terrain influenced SE flow offer opportunities for slope/wind/aspect aligned runs towards values at risk west of the fire. Increased fire behavior expected with the low humidity's and poor recovery.

Shotgun Fire The fire continues to progress to the drainages and find available fuel. If slope reversal happens, short terrain/ wind aligned runs may occur.

AIR OPERATIONS

Smoke should lift between 1000-1100 to support air missions.

SAFETY

Maintain situational awareness when the smoke inversion lifts and fire behavior increases.

Incident:
SQF Complex CA-SQF-002622

Date:
8-31-2020

Operational Period:
0600-0600

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Major Hazards and Risks:

- Fire Behavior –Steep Topography and Canyon Systems, monitor fire weather and indicators of extreme fire behavior. Anticipate changes in weather condition.
- Adhere to the Ten Standard Fire Orders and mitigate any of the 18 Watch Out Situations. Use all LCES options available to you.
- Use extra caution when driving due to the extreme congestion and narrow roads. Expect heavy traffic. Keep speed down when driving to & from division assignments and Spike Camp. Wear seatbelts at all times. Adhere to recommended work/rest cycles, especially for drivers.
- Plan on rolling material and spot fires compromising fireline safety and impacting the work site. Post a lookout during the entire shift watching for spot fires and rolling material.

Operational Leadership

In confusing and uncertain situations, a good operational leader will:

- **TAKE CHARGE** of assigned resources.
- **MOTIVATE** firefighters with a “can do safety” attitude.
- **DEMONSTRATE INITIATIVE** by taking action in the absence orders.
- **COMMUNICATE** by giving specific instructions and asking for feedback.

Watch Out Situation

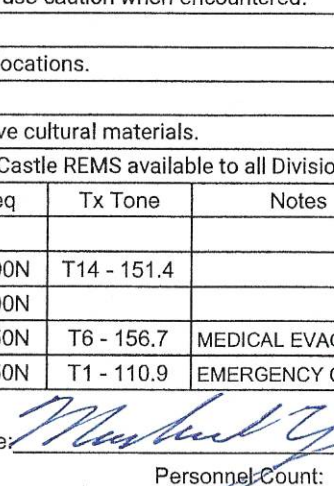

5. UNINFORMED ON STRATEGY, TACTICS AND HAZARDS

Safety Officers

Team Safety Officers: John Nickey SOF2, Paul Tompkins SOF2

6. Work Assignments:
 TASK: Patrol & monitor accessible fire area, support water handling operations from prior shifts, mop-up as appropriate based on FF safety.
 PURPOSE: Limit fire spread to additional values at risk.
 END STATE: Fire spread limited to existing fire perimeter.

7. Special Instructions:
 Use caution when driving on roadways and on the fire line. Be aware of wildlife in the fire area and use caution when encountered.
 Coordinate with Power Company for utility concerns. Backhaul excess equipment and trash.
 Monitor command, air to ground, and respective tactical frequencies. Identify potential Drop Point locations.
 Follow all COVID protocols and precautions, stay safe cover your face and maintain your space.
 Be prepared and supplied to spike in the wilderness. Personnel to notify DIVS of potentially sensitive cultural materials.
 Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 staged at R Ranch Spike. Castle REMS available to all Divisions.

Deviation is assumed to be narrow band unless otherwise noted in the remarks. Mode refers to either "A" (analog), "D" (digital) or "M" (mixed mode). 1/14/14 v.5									

Using your radio with preprogrammed tones

NIFC requires all frequencies used on incidents to be tone guarded on the Receive and Transmit Side.

To make radio use as intuitive as possible we have programmed the correct transmit and receive tones on all frequencies in the incident clone.

There are a few things to remember to make this work properly:

1. **YOU DO NOT NEED TO SELECT TONES ON THE KEYPAD.**
2. Pressing the number zero key will allow the radio to use the preprogrammed tone frequencies.
3. If you are using the old “brick” style radios (dph, gph) your radio squelch knob needs to be turned all the way counterclockwise into the Channel Guard or CG position like in the picture below. There is no change needed for any KNG model radios.

REMEMBER- If you are unsure about your current tone selection just press zero, this will have the correct tone for every channel. You can lock your keypad by holding the function or FCN button, this will help prevent accidental keypresses or tone changes.

Using a linked NIFC repeater system

Our current repeater configuration is known as a “linked” system. Here are a few reminders on the correct use of a linked repeater network.

1. When selecting a command repeater to talk on, use the one that gives you the clearest kick back (squelch tail, kerchunk).
2. **THERE IS NO NEED TO ANNOUNCE THE SPECIFIC COMMAND NUMBER YOU ARE USING.** In a linked system each repeater will retransmit any traffic from all other repeaters in the network.

Please take time to familiarize yourself with your radio’s functions and capabilities. If you have any questions, contact communications at 925-588-6879.

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																											
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other																											
Patient Location		Descriptive Location & Lat. / Long. (WGS84)																											
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																											
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>																											
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>																											
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG PAGE 106</p> <p>Treatment:</p>																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location <i>(if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:</p> <p>Helispot / Extraction Site Size and Hazards:</p>																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrinsication</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">Function</th> <th style="width: 20%;">Channel Name/Number</th> <th style="width: 15%;">Receive (RX)</th> <th style="width: 15%;">Tone/NAC *</th> <th style="width: 15%;">Transmit (TX)</th> <th style="width: 15%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND																													
TACTICAL																													
<p>7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p>																													
<p>8. ADDITIONAL INFORMATION: Updates/Changes, etc.</p>																													
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>																													

Logistics Section Info Board

Basecamp Info:

- Parking: Please park in the assigned parking areas only.
- Laundry: 0600-2200, 24hr turn around. DO NOT take your laundry without checking out with the laundry attendant.
- Police your trash.

Camp Whitsett:

- Laundry: Daily drop off @ 0800. 24hr turn around.
- Meals: Send 1-2 personnel with a box to get your crew's meals. Get back in your vehicle and go to camping spot.
- Flush toilets are working now!

R-Ranch:

- Showers: 0530-2200

SUPPLY: Not Supplying Units at Basecamp. Get supplies at Camp Whitsett.

Freeman Creek Grove Facts

Freeman Creek Grove (4,192 acres), also known as Lloyd Meadow Grove, is the largest unlogged grove outside of a National Park. This grove is the easternmost grove of giant sequoias and is considered to be among the most recently established. The sequoias are mainly south of Freeman Creek with approximately 800 large trees (10 feet in diameter or more). There are several large sequoias to see in this grove. Foremost among these is the President George H.W. Bush Tree. President Bush delivered his presidential proclamation in 1992, setting aside giant sequoia groves on National Forest System lands for protection, preservation and restoration while standing beside a large giant sequoia at the bottom of the grove.

This is the eastern-most grove of Sequoias. There are a couple of trees with 20-foot diameters, more than 100 trees with 15-foot diameters, and over 800 with 10-foot diameters. Note that the trees are almost all very young - perhaps less than 1,000 years old - and there are no fallen giants. Also there are many immature trees around -they are the ones with the feathery, pointy tops which look like inverted icicles. These are the signs of young giant sequoias - unlike the groves in the north.

Tree Identification – Giant Sequoia vs Incense Cedar

Giant Sequoia – The namesake of the forest and the largest tree on Earth, the giant sequoia is an impressive tree. It does not have a very large cone. It is about the size and shape of a chicken egg. Its needles are similar to a incense cedar but are rounded and prickly to the touch. Sequoia bark is red and is soft and shreds easily.

Incense Cedar – Many mistake incense cedar trees for small giant sequoia trees. They, however, do not produce a traditional shaped cone. Instead their seeds are on six cone scales that form a pod-like cone that splits when it dries. Their needles, though scale-like, are flattened and not prickly. Their bark, though red like a sequoia, is hard and doesn't shred.

Finance Message

CTRs/Shift Tickets/ and other finance items will be gathered daily at Whitsett and taken to ICP. Please complete CTRs and shift tickets at least every 2 days. Please include your resource number on CTR

AD hires – Please send a copy of your signed casual hire forms to finance.

Due to Covid-19, Finance staff are working towards minimizing everyone's exposure at incidents. An electronic submission of CTR, Shift ticket, contract, crew manifest, and resource order is encouraged when possible.

Please send the signed documents to the email address below. In the subject line, please put your resource number and the lead's last name.

We accept:

- Photo/image of the traditional hardcopy w/wet signature, or
- PDF w/electronic signature

Human Resource Message

GIVE A HELPING HAND

**PRACTICE RANDOM ACTS
OF KINDNESS!
IT WILL MAKE ANOTHER
PERSON'S DAY!
IT WILL MAKE YOUR DAY!**

If your actions inspire others to dream more, learn more, do more and become more, you are a leader. —*John Quincy Adams*

Feel free to call/text or come by the HRSP trailer if you have questions, concerns, or just want to chat.

Todd Morrow - (HRSP) – (707) 373-0204

SQF COMPLEX TRAINING MESSAGE

A Training Specialist is now assigned to the incident. Registration for Training as a trainee can be done virtually using the QR code in the IAP. Once you register, I will send you a text and/or email with instructions for closing out your assignment when ready. If you have any training questions or need any evaluation records or forms, please feel free to contact me:

HEATHER GROVE, TNSP- (530) 394-8076 or
heather.e.grove@usda.gov

I am available by phone, text, or email from 0600-2100 daily.

Be safe and have a great trainee assignment!

Symptomatic individual guidance

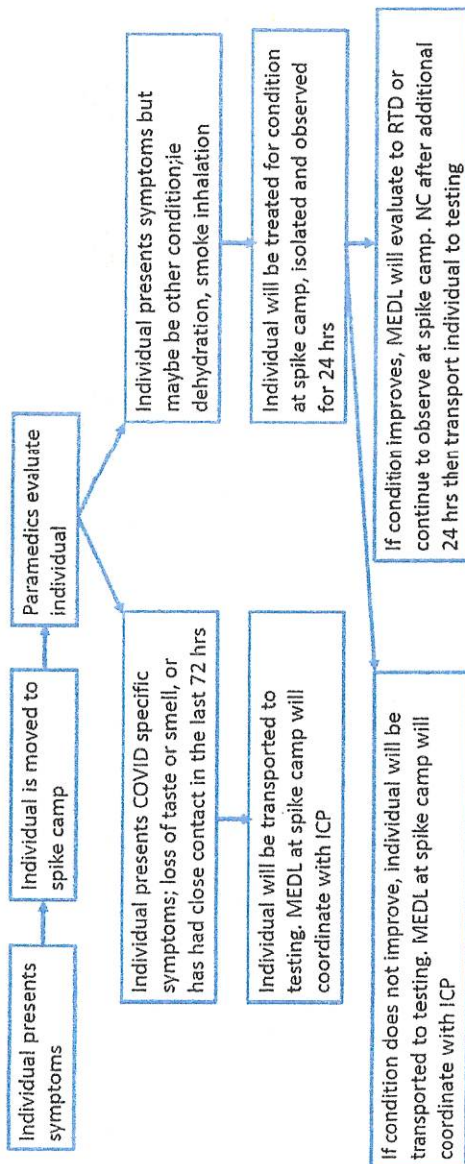

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, guidance has been provided on dealing with symptomatic individuals.

A COVID evaluation process has been published as an attachment. Division Chiefs will be responsible for screening resources daily with module supervisors for COVID.

Personnel must wear masks when in camp and social distancing is not possible. Masks will help to limit the spread of COVID virus. A COVID outbreak in camp will shut down the fire suppression efforts, place colleagues at risk, and potentially have personnel pulled off the fire.

Symptomatic Individual Guidance

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, please follow the procedure outlined below.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL (T) Kevin Elledge @ (661) 510-6117

Smoke Outlook for 8/30 - 8/31
Southern Sierra - Sequoia : SQF Complex
 Issued at: 2020-08-30 07:33 PDT

Fire

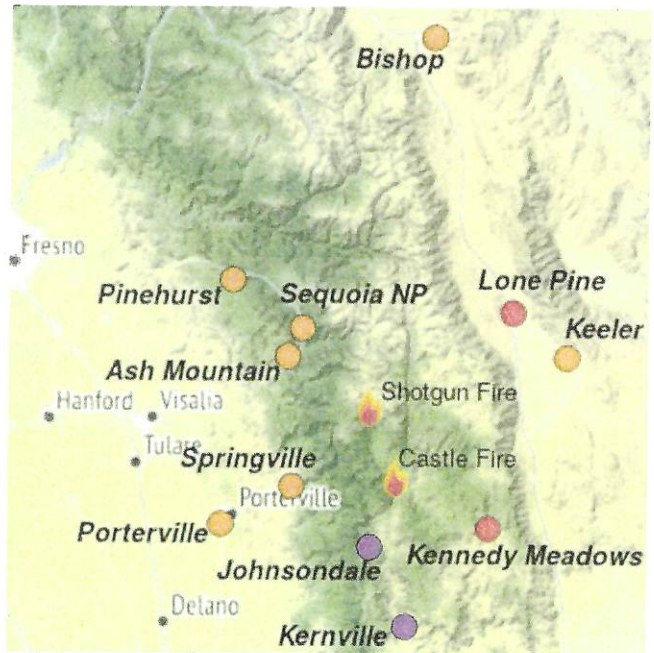

The SQF Complex is 27,549 acres in size, an increase in 2,809 acres. Active fire behavior with isolated torching, wind-driven runs and short-range spotting is occurring in grass, brush, and timber fuels over complex wilderness terrain. For more information visit inciweb.nwcg.gov/incident/7048.

Smoke

Impaired air quality continues today along the Kern River and elevates in much of the outlook area. Kernville and Johnsondale will see Unhealthy to Hazardous conditions from very early morning until the smoke clears mid-afternoon. Kennedy Meadows and Lone Pine will be Unhealthy most of the day. Smoke from this complex and other fires to the north and west impact the west slope of the Sierras.

Notes

This outlook addresses and is based on PM2.5 concentrations due to wildfire smoke only. Missing data at Kernville may result in incorrect display of previous day's AQI.

Daily AQI Forecast* for Aug 30, 2020

Station	Yesterday hourly	Sat 8/29	Forecast* Comment for Today -- Sun, Aug 30	Sun 8/30	Mon 8/31
Pinehurst			Moderate changing to Unhealthy for Sensitive Groups.		
Sequoia NP			Moderate changing to Unhealthy for Sensitive Groups.		
Ash Mountain			Moderate changing to Unhealthy for Sensitive Groups.		
Springville			Moderate changing to Unhealthy for Sensitive Groups.		
Porterville			Moderate changing to Unhealthy for Sensitive Groups.		
Johnsondale			Unhealthy to Hazardous today		
Kernville			Unhealthy to Hazardous today		
Kennedy Meadows			Unhealthy most of the day		
Keeler			Unhealthy for Sensitive Groups today		
Lone Pine			Unhealthy most of the day		
Bishop			Unhealthy for Sensitive Groups today		

Issued 2020-08-30 07:33 PDT by Paul Schlobohm, ARA, pschlobo@gmail.com

Air Quality Index (AQI)	Actions to Protect Yourself
Good	None
Moderate	Unusually sensitive individuals should consider limiting prolonged or heavy exertion.
USG	People within Sensitive Groups* should reduce prolonged or heavy outdoor exertion.
Unhealthy	People within Sensitive Groups* should avoid all physical outdoor activity.
Very Unhealthy	Everyone should avoid prolonged or heavy exertion.
Hazardous	Everyone should avoid any outdoor activity.

***Disclaimer:** This forecast is based on fine particulates only; ozone is not included. Forecasts may be wrong; use at own risk. Use caution as conditions can change quickly. See your health professional as needed. Smoke sensitive groups should take appropriate precautions.
