### OPERATIONAL PERIOD

9/1/2020      0600  
to  
9/2/2020      0600

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> SQF COMPLEX	<b>2. Operational Period:</b>	Date From: 9/1/2020	Date To: 9/2/2020
		Time From: 0600	Time To: 0600

**3. Objective(s):**

Management Objectives

- Provide for firefighter and public safety as the highest priority through sound risk management and life first principles
- Minimize adverse effects from suppression actions on riparian areas, watersheds, Little Kern Golden Trout, Mountain Yellow Legged Frog and Sierra Nevada Bighorn Sheep habitats
- Minimize impacts to Wilderness areas. Use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines
- Minimize, to the extent feasible, smoke exposure to firefighters, communities, and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure
- Effectively manage cost of the incident by planning strategies and tactics toward a high probability of success in meeting incident objectives
- Provide accurate and timely information to agencies, stakeholders, backcountry users, and the public

Control Objectives

- Keep the fire North of Durr Wood Camp
- Keep the fire South of Sequoia Kings Canyon Wilderness Boundary
- Keep the fire East of Highway 190 to Summit Trail
- Keep the fire West of Toowa Range to King Fisher Ridge to 22S05 Road

COVID Mitigations

- Module of 1, six foot social distancing and wear a mask
- Wash your hands and sanitize surfaces

**5. Site Safety Plan Required?** Yes  No

**Approved Site Safety Plan(s) Located at:**

**6. Incident Action Plan**

# FIRE WEATHER FORECAST

**FORECAST NO:** 8  
**PREDICTION FOR:** Sep 1<sup>st</sup> – Sep 2<sup>nd</sup> 0600

**INCIDENT NAME:** SQF Complex  
**UNIT:** CA-SQF  
**SIGNED:** Andrew Gorelow

## TIME AND DATE

**FORECAST ISSUED:** Mon, Aug 31 @ 1900 hours    **Incident Meteorologist –** Andrew Gorelow

**WEATHER DISCUSSION:** High pressure building overhead will lead to hot, dry and more stable conditions over the next few days. With the more stable conditions smoke may remain in the valleys through much of the day. North to northeast drainage winds before 1000 with speeds 2 to 5 mph will become southeast to south and increase in the afternoon to around 4 to 9 gusts to 15 mph. After 1500 look for winds to shift to the southwest to west with speeds 4 to 7 gusts to 14 mph. Winds will continue to be heavily impacted by local terrain. Temperatures will be in the 80s to mid-90s, but may be held lower due to additional smoke cover. Winds will continue to be heavily impacted by local terrain.

**SKY/WEATHER TODAY (TUESDAY):** Hot and dry. Valley inversions lifting by mid-afternoon, but smoky conditions are expected to last through much of the day. Morning downslope/downvalley winds will turn southeast to south after 1000 with speeds 5 to 8 mph with occasional gusts to 15 mph. A southwest to west wind push is expected in the afternoon after 1500 with winds 4 to 9 gusts to 15 mph. However, winds will be heavily affected by the local terrain.

## MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

**5000 FT:** 88 to 93 degrees (Up 1-2 Degrees) / 16 to 21% (Down 2-3%)  
**7000 FT:** 78 to 83 degrees (Up 1-2 Degrees) / 14 to 19% (Down 1-3%)

## EYE LEVEL WINDS:

**Slope/Valley:** North to northeast drainage winds up to 4 mph through 1000. Winds will gradually shift to the southeast to south after 1000 with speeds 4 to 7 mph gusting to 14 mph. Winds shifting to the west with gusts up to 12 mph after 1500. Winds will continue to be heavily impacted by local terrain.

**Ridges:** Southwest 4 to 7 mph occasional gusts to 12 mph in the afternoon.

**MIXING HEIGHT...**8,000 AGL    **VENTILATION...**Poor morning, Fair in the afternoon.

**TRANSPORT WIND...**Northeast around 5 mph in the morning, shifting to the west in the afternoon 5 to 10 mph.

**CWR (0.10")...**0%    **LAL....**1    **HAINES....**4 (1-Stability/3-Dryness)

**SKY/WEATHER TONIGHT (TUESDAY NIGHT):** Smoky. Inversions developing by 2200. Winds becoming drainage 2 to 4 mph after 2000 but could remain squirrely near the confluence of the Little Kern/Kern Rivers. Overnight RH expected to be poor.

## MIN TEMPERATURES / MAX RELATIVE HUMIDITY

**5000 FT:** 55 to 60 degrees (Little Change) / 40 to 50% (Down 3-6%)  
**7000 FT:** 60 to 65 degrees (Little Change) / 28 to 33% (Down 4-7%)

## EYE LEVEL WINDS:

**Slope/Valley:** Northwest to north drainage winds 2 to 5 mph.

**Ridges:** Northwest 1 to 3 mph.

**CWR (0.10")...**0%    **LAL....**1    **HAINES....**5 (above the inversion)

**WEDNESDAY:** Morning smoke then becoming sunny in the afternoon. Slight increase in temperatures and decrease in RH. Little change in wind patterns.

**Max Temps:** 79 to 94. **Min RH:** 10 to 18%. **Winds:** Morning drainage winds becoming generally southeast to south 4-7 mph with gusts to 10 mph.

**LAL:** 1    **CWR (0.10"):** 0%    **MIXING HEIGHT:** 8,000 AGL    **HAINES:** 4 (1-Stability/3-Dryness)

## **OUTLOOK for THURSDAY and FRIDAY:**

**Weather:** Hot and dry. Terrain influenced winds each day. Light upper level winds so not much smoke movement.

**High Temp:** 80-95 **Min RH:** 10-20% **CWR:** 0% **LAL:** 1 **Wind:** Southeast to south 4 to 7 mph in the afternoon.

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 11	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> SQF Complex	<b>OPERATIONAL PERIOD:</b> Sept. 1, Day/Night 24 Hr
<b>DATE ISSUED:</b> August 31, 2020	<b>TIME ISSUED:</b> 1800
<b>UNIT:</b> CA-Sequoia National Forest	<b>SIGNED:</b> /s/ Dan O'Connor FBAN/ Lauren Blake FBAN(t)

## WEATHER SUMMARY

Hot and dry. Valley inversions lifting by mid-afternoon, but smoky conditions are expected to last through much of the day. Morning downslope/downvalley winds will turn southeast to south after 1000 with speeds 5 to 8 mph with occasional gusts to 15 mph.

## FIRE BEHAVIOR

### GENERAL

**Fuels-** Fuels involved in the Castle Fire are primarily Fire Behavior Fuel Models (FBFM) timber litter and understory (TU5) in areas without recent fire history, and a mix of grass (GR2) and brush (GS2) in burn scars less than 20 years old. The Shotgun Fire is higher elevation and does not have recent fire history in its current footprint, and is more represented by a grass shrub (GS2) moderate timber litter (TL6).

**Topography-** Topography in the fire area is dominated by the Kern River. This river drainage runs north/south and is steep and narrow, roughly bisecting the fire area down the middle. Terrain has played a central role in fire spread, taking the predominantly SW flow and directing it in every way imaginable across the fire area.

**Weather** A southwest to west wind push is expected in the afternoon after 1500 with winds 4 to 9 gusts to 15 mph. However, winds will be heavily affected by the local terrain. Haines of 4 today.

	Max Rate of Spread	Max Flame Lengths	Spotting Distances	POI
<b>GR2</b>	89 ch/hr.	5-8'	<100'	80%
<b>GS2</b>	52 ch/hr.	5-8'	<200'	80%
<b>TU5</b>	20 ch/hr.	8-10'	<500'	80%
<b>TL6</b>	17 ch/hr.	4-6'	<500'	80%

### SPECIFIC

**Branch I**

**Div. A/B/Z-** When smoke cover clears, the fire will continue to actively chomp into the afternoon winds where rollout and terrain presents opportunity. West winds will follow terrain which could present as NW and SW winds on the fireline.

**Div. C/G-** The 2017 Lion fire continues to slow the fire progression but the fire is working its way around to the north side toward the Sequoia National Park.

**Div. Y-** Periods of morning terrain influenced SE flow offer opportunities for slope/wind/aspect aligned runs towards values at risk west of the fire. As west wind follows terrain in the afternoon, possible W/NW winds may present on the fireline.

**Branch V**

**Div. I/L/N/U-** Fire continues to move to the NE towards Kern Peak and Overlook Peak. Westerly winds along with terrain pushes the fire towards the east to Soda Flat, Long Canyon, Osa Meadows, and Lion Meadow.

**Div. X-** Down canyon winds after 2100 will continue to push the fire to the south through alignment with the terrain. The fire worked its way through the Schaeffer fire scar through available fuels to the east.

**Shotgun Fire** The fire slowly continues to progress to the drainages and find available fuel. If slope reversal happens, short terrain/ wind aligned runs may occur.

### AIR OPERATIONS

Smoke should lift between 1200-1300 to support air missions.

### SAFETY

**Maintain situational awareness when the smoke inversion lifts and fire behavior increases. Predicted wind directions may present different on the ground due to terrain influence.**

**Health &**

**Safety**

**Message**

<b>Incident:</b> SQF Complex CA-SQF-002622	<b>Date/Op Period:</b> Day/Night Shift 0600-0600 09/01-02/2020
---	---

**RISKS & HAZARDS**

**Helicopter Extraction Operations:** The intent of a helicopter extraction operation is to insert qualified personnel into inaccessible areas to extract a patient for transport to the nearest medical facility. These operations are not meant to be a medical transport resource but a way to move the patient off the fireline and bring to a waiting air or ground ambulance for direct transport to a medical facility.

Some considerations:

- Establish communications with aircrew. Provide information regarding known hazards (on approach path or in LZ), terrain, wind speed & direction and patient updates.
- Choose the extraction site away from the fireline or black edge.
- Ensure the area is clear of debris and nonessential equipment or personnel.
- Rotor wash may affect overhead hazards and blowing dust can create "brown out" conditions. Protect the patient from blowing dust.
- Aerial supervision is a valuable for coordinating aviation medevac missions.
- The aircrew makes the final decision regarding the safety of the mission. **Always have a contingency plan in case the helicopter cannot be used.**
- Don't get caught up in the urgency of the situation and disregard basic fireline and aviation safety procedures.

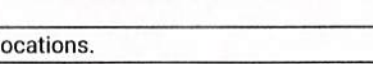

**Night Operations:** Many unseen hazards await the night shift. Besides darkness; dust, smoke and headlight glare can further reduce visibility. Attempt to drive and scout out your work area in daylight. Use flagging and chemsticks to identify travel routes and hazards. Manage firefighter fatigue by taking short naps if possible. Post lookouts. Use appropriate lighting on your vehicles, especially when working along roadsides.

### Using your radio with preprogrammed tones

**NIFC requires all frequencies used on incidents to be tone guarded on the Receive and Transmit Side.** To make radio use as intuitive as possible we have programmed the correct transmit and receive tones on all frequencies in the incident clone.

There are a few things to remember to make this work properly:

1. **YOU DO NOT NEED TO SELECT TONES ON THE KEYPAD.**
2. Pressing the number zero key will allow the radio to use the preprogrammed tone frequencies.
3. If you are using the old “brick” style radios (dph, gph) your radio squelch knob needs to be turned all the way counterclockwise into the Channel Guard or CG position like in the picture below. There is no change needed for any KNG model radios.

**REMEMBER-** If you are unsure about your current tone selection just press zero, this will have the correct tone for every channel. You can lock your keypad by holding the function or FCN button, this will help prevent accidental keypresses or tone changes.

### Using a linked NIFC repeater system

Our current repeater configuration is known as a “linked” system. Here are a few reminders on the correct use of a linked repeater network.

1. When selecting a command repeater to talk on, use the one that gives you the clearest kick back (squelch tail, kerchunk).
2. **THERE IS NO NEED TO ANNOUNCE THE SPECIFIC COMMAND NUMBER YOU ARE USING.** In a linked system each repeater will retransmit any traffic from all other repeaters in the network.

**Please take time to familiarize yourself with your radio’s functions and capabilities. If you have any questions, contact communications at 925-588-6879.**

# MEDICAL PLAN (ICS 206 WF) CIIMT 12

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening Injury or illness. Evacuation need is IMMEDIATE</b> Ex: Unconscious, difficulty breathing, bleeding severely, 2 <sup>o</sup> – 3 <sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> Ex: Significant trauma, unable to walk, 2 <sup>o</sup> – 3 <sup>o</sup> burns not more than 1-3 palm sizes. <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness Mechanism of Injury	.	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	.	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	.	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	.	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	.	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	.	Name of Care Provider (Ex: EMT Smith)

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

File Code: 5130

Date: August 28, 2020

Subject: SQF Complex – Use of Dozers in Giant Sequoia Groves

To: Acting District Ranger, Western Divide

The SQF Complex, burning in the Western Divide Ranger District, is advancing toward the Freeman Creek Grove, which sits between the fire and the community of Ponderosa, and is the home of the Bush Tree. I am approving the use of bulldozers to construct fire lines when building hand lines is no longer effective within the giant sequoia groves in the path of the SQF Complex. This approval includes the zones of influences for the groves as well. The use of bulldozers in groves has to have the approval of the Incident Commander and the Agency Administrator.

I expect the following management requirements to be adhered to:

1. A Resource Advisor will be on site during all fire line construction when heavy equipment is used, and notified immediately when it is determined that felling any giant sequoia tree is necessary.
2. The Giant Sequoia National Monument Plan (Monument Plan) limits cutting sequoias larger than 12" dbh except in clear cases of threats to human safety.
3. Keep the dozer line at least 10 feet from the drip line of giant sequoia trees greater than 12" dbh in order to avoid damaging the root systems.
4. There may come a point where avoiding the drip line may make the fire line ineffective. If possible build hand lines in these situations.
5. Where there are areas of very dense giant sequoia trees that are impossible to avoid, whether building line by hand or dozer, giant sequoias may be felled with the approval of the Resource Advisor.
6. Tree felling criteria (Monument Plan, pp. 81-82) have been evaluated. The following criterion is applicable for this project.

**F4. Public Safety:** If maintaining one or more standing trees on site would create a public safety hazard. Forest Service policy is to eliminate safety hazards from recreation sites, administrative sites, and the public transportation system of roads and trails, including trees or tree limbs identified as hazardous (FSM 2330.6a).

- The trees to be felled have been identified as hazards because leaving them standing would create a safety hazard for firefighters; both as potential falling hazards and by reducing the effectiveness of constructed fire lines. No giant sequoias over 12" dbh would be cut without prior approval.

TERESA BENSON  
Forest Supervisor

# **SQF Complex - Wilderness Spike Camp MIST**

## **Campsite Considerations**

### **Site Location**

- Coordinate with the Resource Advisor in choosing a site with the most reasonable qualities of resource protection and safety concerns.
- Good campsites are found, not made. If existing campsites are not available, select campsites not likely to be observed by visitors
- Evaluate short-term low impact camps such as coyote or spike versus use of longer-term higher impact camps.
  - When there are small groups try to disperse use.
  - In the case of larger camps: concentrate, mitigate, and rehabilitate.
- New site locations should be on impact resistant and naturally draining areas such as rocky or sandy soils, or openings with heavy timber.
- Avoid camps in meadows, along streams or on lakeshores. Locate at least 200 feet from lakes, streams, trails, or other sensitive areas.
- Consider impacts on both present and future users.

### **Camp Layout**

- Use “leave no trace” camping techniques.
- Lay out the camp components carefully from the start. Define cooking, sleeping, latrine, and water supply.
- Consider fabric ground cloth for protection in high use areas such as around cooking facilities.
- Constantly evaluate the impacts which will occur, both short and long term.
- Do not use nails in trees.
- Prepare bedding and campfire sites with minimal disturbance to vegetation and ground.
  - Do not clear vegetation or trench to create bedding sites.
- Minimize the number of trails and ensure adequate marking.
- Monitor travel routes for damage and mitigate by:
  - Dispersing on alternate routes or concentrating travel on one route and rehabilitate at end of use.

### **Personal Sanitation:**

- Carry water and bathe away from lakes and streams. Personnel must not introduce soaps, shampoos or other personal grooming chemicals into waterways.
  - Designate a common area for personnel to wash up. Provide fresh water and biodegradable soap.
  - Do not introduce soap, shampoo or other chemicals into waterways.
  - Dispose of wastewater at least 200 feet from water sources.
- Toilet facilities
  - Use commercial portable toilet facilities where available. If these cannot be used a latrine hole should be utilized.
  - Toilet sites should be located a minimum of 200 feet from water sources.
  - Holes should be dug 6-8 inches deep.
  - If more than 1 crew is camped at a site strongly consider portable toilets and remove waste.

### **Food Storage**

- Place all food in bear proof containers and/or have a camp manager monitoring food at all times.
- Store food so that it is not accessible to wildlife, away from camp and in animal resistant containers.
- Do not let garbage and food scraps accumulate in camp.
- Keep a clean camp and store food and garbage so it is unavailable to bears. Ensure items such as empty food containers are clean and odor free, never bury them.
- Don't burn plastics or aluminum – “pack it out” with other garbage.

### **Campfires**

- Use stoves for cooking, when possible.
- If a campfire is built, leave no trace of it and avoid using rock rings. Built either a “pit” or “mound” type.
- If a campfire is used limit to one site and keep it as small as reasonable. Use dead and down wood for the fire and scatter any unused firewood.
- Do not burn plastics or metal.

# Finance Message

CTRs/Shift Tickets/ and other finance items will be gathered daily at Whitsett and taken to ICP. Please complete CTRs and shift tickets at least every 2 days. Please include your resource number on CTR

Due to Covid-19, Finance staff are working towards minimizing everyone's exposure at incidents. An electronic submission of CTR, Shift ticket, contract, crew manifest, and resource order is encouraged when possible.

Please send the signed documents to the email address below. In the subject line, please put your resource number and the lead's last name.

We accept:

- Photo/image of the traditional hardcopy w/wet signature, or
- PDF w/electronic signature

## Human Resource Message

# FIRE

- Fatigue..... Be aware of fatigue having a negative impact on your conduct and speech
- Integrity..... Integrity and Honesty are vital on a fire. If you mess up, fess up, whatever you did can most likely be fixed if you report it as soon as you are aware of it.
- Respect..... Treat others as you would like to be treated
- Example..... Set an example. Realize you influence others around you, therefore, always conduct yourself in a professional and competent manner, but still have fun!

Feel free to call/text or come by the HRSP trailer if you have questions, concerns, or just want to chat.

<b>ICS COVID-19 206</b>	9. PREPARED BY (MEDICAL UNIT LEADER) NICK STEPANIAN, MEDL(T)	10. REVIEWED BY (SAFETY OFFICER) PAUL TOMPKINS SOF2

## Symptomatic individual guidance

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, guidance has been provided on dealing with symptomatic individuals.

A COVID evaluation process has been published as an attachment. Division Chiefs will be responsible for screening resources daily with module supervisors for COVID.

Personnel must wear masks when in camp and social distancing is not possible. Masks will help to limit the spread of COVID virus. A COVID outbreak in camp will shut down the fire suppression efforts, place colleagues at risk, and potentially have personnel pulled off the fire.

## Fire and COVID-19 Briefing Checklist

### Self-Awareness / Screening

- Notify supervisor if you or others experience:
  - o Cough, more than expected
  - o Difficulty breathing
  - o Loss of taste or smell
  - o Fever
  - o Chills
  - o Sore throat
  - o Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

### Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

### Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

### Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

**MEDL (T) Nick Stepanian @ (909) 908-4778**

**Smoke Outlook for 8/31 - 9/01**  
**Southern Sierra - Sequoia : SQF Complex**  
 Issued at: 2020-08-31 07:19 PDT

**Fire**

The SQF Complex is 35,674 acres in size, an increase in 8,125 acres. Active fire behavior with isolated torching, backing and flanking is occurring in grass, brush, and timber fuels over complex wilderness terrain. For more information visit [inciweb.nwcg.gov/incident/7048](https://inciweb.nwcg.gov/incident/7048).

**Smoke**

Unhealthy air quality continues today along the Kern River and Kennedy Meadows. Kernville and Johnsondale will see Unhealthy to Hazardous conditions from early morning until late afternoon. Kennedy Meadows will be Unhealthy most of the day. The best time to be outside will be from early evening until midnight. Keeler and Lone Pine will see Unhealthy conditions during the day. Smoke from fires to the north will begin to impact the outlook area today degrading the remaining monitor locations to USG.

**Notes**

This outlook addresses and is based on PM2.5 concentrations due to wildfire smoke only. Missing data at Kernville may result in incorrect display of previous day's AQI.

Daily AQI Forecast\* for Aug 31, 2020

Station	Yesterday			Sun 8/30	Comment for Today -- Mon, Aug 31	Forecast*
