August 30, 2020

To: Geographic Area Coordinating Group Chairs
From: National Multi Agency Coordinating Group
Subject: Tactical Pause—Focus on Risk Management

We are in the height of the 2020 Western fire season and we have been reminded that the wildland fire environment is dangerous whether you are on the ground or in the air. Along with the increase in fire activity, there has been an increase in close calls, serious accidents, injuries, and fatalities. Please honor those that have fallen, most recently our aviators, by actively managing risk. It is now late August and long-term fatigue is setting in, which exacerbates the complexity of a fire season made even more difficult by COVID-19.

We ask you to take a tactical pause at some point on Wednesday, September 2ND to discuss current risks to which you are exposed. The timing and length of this tactical pause is at your discretion. During this time stop, think, and talk about how you assess and mitigate risk. Ask yourself, your coworkers, or your crew what, if anything, is different from your previous experience and how are you dealing with it? What is concerning you specifically when it comes to your safety and those you work with or lead? What might you be missing? It is all too easy to be task oriented so take this opportunity to discuss some simple reminders or measures you can take to reduce your exposure to the inherent hazards of our occupation or COVID-19, which can reduce the probability of the next accident or illness.

Use references such as the Incident Response Pocket Guide (IRPG) to aid you in your discussions. The latest interagency wildland fire COVID-19 information can be found on the [Medical and Public Health Advisory Team \(MPHAT\) webpage](#). The value of this tactical pause will be in the discussions you engage in so make it count.

We also recommend that you review and discuss *Planning for Medical Emergencies* (page #2) and the *Medical Incident Report* (page #118-119), also referred to as the "8-Line", in your IRPG. Reviewing and discussing these job aids will better prepare you to respond to an accident or medical emergency if one does occur.

Finally, NMAC wants to be clear that we care about the health and welfare of our responders. We are asking you to take this time to discuss risk management and do everything possible to ensure you return home safely at the end of each shift and each fire assignment.

/s/ Joshua Simmons
NMAC Chair

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: SQF COMPLEX	2. Operational Period:	Date From: 9/2/2020 Time From: 0600	Date To: 9/3/2020 Time To: 0600
-----------------------------------------	-------------------------------	----------------------------------------	------------------------------------

3. Objective(s):

Management Objectives

- Provide for firefighter and public safety as the highest priority through sound risk management and life first principles
- Minimize adverse effects from suppression actions on riparian areas, watersheds, Little Kern Golden Trout, Mountain Yellow Legged Frog and Sierra Nevada Bighorn Sheep habitats
- Minimize impacts to Wilderness areas. Use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines
- Minimize, to the extent feasible, smoke exposure to firefighters, communities, and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure
- Effectively manage cost of the incident by planning strategies and tactics toward a high probability of success in meeting incident objectives
- Provide accurate and timely information to agencies, stakeholders, backcountry users, and the public

Control Objectives

- Keep the fire North of Durr Wood Camp
- Keep the fire South of Sequoia Kings Canyon Wilderness Boundary
- Keep the fire East of Highway 190 to Summit Trail
- Keep the fire West of Toowa Range to King Fisher Ridge to 22S05 Road

COVID Mitigations

- Module of 1, six foot social distancing and wear a mask
- Wash your hands and sanitize surfaces

5. Site Safety Plan Required? Yes No

FIRE WEATHER FORECAST

FORECAST NO: 9
PREDICTION FOR: Sep 2nd – Sep 3rd 0600

INCIDENT NAME: SQF Complex
UNIT: CA-SQF
SIGNED: *Andrew Gorelow*

TIME AND DATE
FORECAST ISSUED: Tue, Sep 1 @ 1900 hours

Incident Meteorologist – Andrew Gorelow

WEATHER DISCUSSION: High pressure overhead will lead to hot, dry and more stable conditions over the next few days. With the more stable conditions smoke may remain in the valleys through much of the day keeping lower visibility in place. North to northeast drainage winds before 1000 with speeds 2 to 5 mph will become southeast to south and increase to around 4 to 9 gusts to 15 mph. After 1500, look for winds to shift to the southwest to west with speeds 4 to 7 gusts to 15 mph. Winds will continue to be heavily impacted by local terrain. Temperatures will be in the 80s to mid-90s, but may be held lower due to additional smoke cover. Poor overnight RH recoveries above the inversion.

SKY/WEATHER TODAY (WEDNESDAY): Hot and dry. Valley inversions lifting by early afternoon, but smoky conditions are expected to last through much of the day keeping lower visibilities. Morning downslope/downvalley winds will turn southeast to south after 1000 with speeds 4 to 9 mph with occasional gusts to 15 mph. A southwest to west wind push is expected in the afternoon after 1500 with winds 4 to 9 gusts to 15 mph. However, winds will be heavily affected by the local terrain.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT: 89 to 94 degrees (Up 1-2 Degrees) / 11 to 16% (Down 1-3%)
7000 FT: 79 to 84 degrees (Up 1-2 Degrees) / 13 to 18% (Little Change)

EYE LEVEL WINDS:

Slope/Valley: North to northeast drainage winds up to 4 mph through 1000. Winds will gradually shift to the southeast to south after 1000 with speeds 4 to 9 mph gusting to 15 mph. Winds shifting to the west with gusts up to 15 mph after 1500. Winds will continue to be heavily impacted by local terrain.

Ridges: Southwest 4 to 7 mph occasional gusts to 12 mph in the afternoon.

MIXING HEIGHT...8,000 AGL **VENTILATION...**Poor morning, fair in the afternoon.
TRANSPORT WIND...Northeast around 5 mph in the morning, shifting to the west in the afternoon 5 to 10 mph.
CWR (0.10")...0% **LAL...**1 **HAINES...**4 (1-Stability/3-Dryness)

SKY/WEATHER TONIGHT (WEDNESDAY NIGHT): Smoky. Inversions developing by 2200. Winds becoming drainage 3 to 5 mph after 2000 but could remain squirrely near the confluence of the Little Kern/Kern Rivers. Overnight RH above the inversion will be poor, but good below the inversion.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT: 55 to 60 degrees (Little Change) / 55 to 60% (Down 2-3%)
7000 FT: 60 to 65 degrees (Little Change) / 23 to 28% (Down 1-3%)

EYE LEVEL WINDS:

Slope/Valley: Northwest to north drainage winds 2 to 5 mph.

Ridges: Northwest 1 to 3 mph.

CWR (0.10")...0% **LAL...**1 **HAINES...**4 (above the inversion)

THURSDAY: Morning smoke then becoming sunny in the afternoon. Slight increase in temperatures and decrease in RH. Little change in wind patterns.

Max Temps: 80 to 96. **Min RH:** 10 to 18%. **Winds:** Morning drainage winds becoming generally southeast to south 4-7 mph with gusts to 10 mph. Becoming southwest to west with gusts to 15 mph after 1500.

LAL: 1 **CWR (0.10"):** 0% **MIXING HEIGHT:** 8,000 AGL **HAINES:** 4 (1-Stability/3-Dryness)

OUTLOOK for FRIDAY and SATURDAY:

Weather: Hot and dry. Terrain influenced winds each day. Light upper level winds so not much smoke movement. A few clouds developing on the higher peaks.

High Temp: 83-97 **Min RH:** 10-20% **CWR:** 0% **LAL:** 1 **Wind:** Southwest to west 5 to 15 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12	TYPE OF FIRE: Wildland
FIRE NAME: SQF Complex	OPERATIONAL PERIOD: Sept. 2, Day/Night 24 Hr
DATE ISSUED: September 1, 2020	TIME ISSUED: 1800
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Dan O'Connor FBAN/ Lauren Blake FBAN(t)

WEATHER SUMMARY

High pressure overhead will lead to hot, dry and more stable conditions over the next few days. With the more stable conditions smoke may remain in the valleys through much of the day keeping lower visibility in place.

FIRE BEHAVIOR

GENERAL

Fuels- Fuels involved in the Castle Fire are primarily Fire Behavior Fuel Models (FBFM) timber litter and understory (TU5) in areas without recent fire history, and a mix of grass (GR2) and brush (GS2) in burn scars less than 20 years old. The Shotgun Fire is higher elevation and does not have recent fire history in its current footprint, and is more represented by a grass shrub (GS2) moderate timber litter (TL6).

Topography- Topography in the fire area is dominated by the Kern River. This river drainage runs north/south and is steep and narrow, roughly bisecting the fire area down the middle. Terrain has played a central role in fire spread, taking the predominantly SW flow and directing it in every way imaginable across the fire area.

Weather Hot and dry. Valley inversions lifting by early afternoon, but smoky conditions are expected to last through much of the day keeping lower visibilities. Haines is predicted to be a 4.

	Max Rate of Spread	Max Flame Lengths	Spotting Distances	POI
GR2	89 ch/hr.	5-8'	<100'	80%
GS2	52 ch/hr.	5-8'	<200'	80%
TU5	20 ch/hr.	8-10'	<500'	80%
TL6	17 ch/hr.	4-6'	<500'	80%

SPECIFIC

Branch I

Div. A/B/Z- When smoke cover clears, the fire will continue to actively chomp into the afternoon winds where rollout and terrain presents opportunity. West winds will follow terrain which could present as NW and SW winds on the fireline.

Div. C/G- The 2017 Lion fire continues to slow the fire progression but the fire is working its way around on both sides to the north up Leggett and Grasshopper Creek.

Div. Y- Periods of morning terrain influenced SE flow offer opportunities for slope/wind/aspect aligned runs towards values at risk west of the fire. As west wind follows terrain in the afternoon, possible W/NW winds may present on the fireline.

Branch V

Div. I/L/N/U- Fire continues to move to the NE towards Kern Peak and Overlook Peak thru Chinquapin Basin. Westerly winds along with terrain pushes the fire towards the east to Soda Flat, Long Canyon, Osa Meadows, and Lion Meadow.

Div. X- Down canyon winds after 2100 will continue to push the fire to the south through alignment with the terrain. The fire worked its way through the Schaeffer fire scar through available fuels to the east.

Shotgun Fire The fire slowly continues to progress to the drainages and find available fuel. If the fire finds its way across the creek bottom, expect a slope reversal and short terrain/ wind aligned runs.

AIR OPERATIONS

Smoke should lift between 1200-1300 to support air missions.

SAFETY

Maintain situational awareness when the smoke inversion lifts and fire behavior increases. Predicted wind directions may present different on the ground due to terrain influence.

Health &

Safety

Message

Incident: SQF Complex CA-SQF-002622	Date/Op Period: Day/Night Shift 0600-0600 09/02-03/2020
-----------------------------------------------	-------------------------------------------------------------------

RISKS & HAZARDS

Smoke Exposure: Line personnel that are involved in direct attack, line holding and mop up have the highest smoke exposures. Symptoms of over-exposure start with head aches & visual impairment, then impaired decision making, altered levels of consciousness and in extreme exposure cases, death from carbon monoxide poisoning. Consider rotating resources in and out of smoky areas & consider exposure time when developing mop up standards.

Ash Pit Hazards: Stump holes are abundant in the fire area. Use caution when using water to mop up and avoid straight streaming directly into the ash pit as scalding steam can suddenly erupt from the hole and burn you. Things to LOOK OUT for:

- Extensive root systems of trees and shrubs.
- Deep duff or peat, the organic layer covering mineral soil.
- Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards, or decking areas.
- Small rodent holes that have become filled with decadent, combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
- White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
- With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground.
- Ash pits often give off the smell of incomplete combustion or of creosote burning.

6. Work Assignments: TASK: Construct direct line from the Div Z / A break along the Castle Mtn ridge. Crews to be prepared to spike. PURPOSE: Protect values at risk through structure defense and line construction measures. END STATE: Limit fire spread to values at risk on the Southwest corner of the fire.							
7. Special Instructions: Use caution when driving on roadways and on the fire line. Be aware of wildlife in the fire area and use caution when encountered. Coordinate with Power Company for utility concerns. Backhaul excess equipment and trash. Monitor command, air to ground, and respective tactical frequencies. Identify potential Drop Point locations. Follow all COVID protocols and precautions, stay safe cover your face and maintain your space. Be prepared and supplied to spike in the wilderness. Personnel to notify DIVS of potentially sensitive cultural materials. Castle Ambulance 1 staged at Whitsett Base Camp. Castle Ambulance 2 staged at R Ranch Spike. Castle REMS available to all Divisions.

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

SQF COMPLEX TRAINING MESSAGE

09/02/2020

A Training Specialist is assigned to the incident. Registration and Training Check Out as a trainee can be done virtually using the QR Codes Below. Follow the instructions carefully in the registration/ checkout for required documentation to submit to me. If you have any training questions or need any electronic evaluation records or forms, please feel free to contact me: HEATHER GROVE, TNSP- (530) 394-8076 or heather.e.grove@usda.gov

I am available by phone, text, or email from 0600-2100 daily.

Be safe and have a great trainee assignment!

Trainee Registration

Training Check-Out

Exit Interview

Symptomatic individual guidance

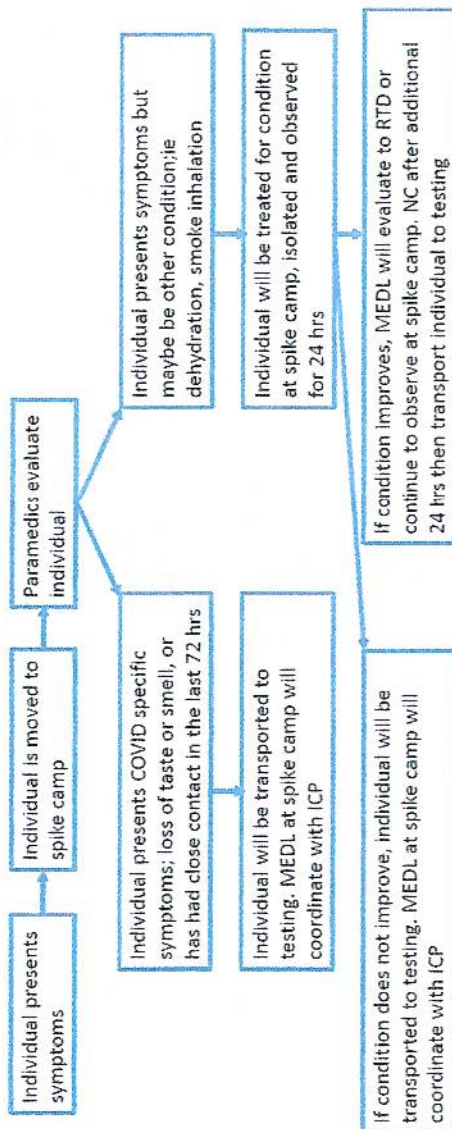

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, guidance has been provided on dealing with symptomatic individuals.

A COVID evaluation process has been published as an attachment. Division Chiefs will be responsible for screening resources daily with module supervisors for COVID.

Personnel must wear masks when in camp and social distancing is not possible. Masks will help to limit the spread of COVID virus. A COVID outbreak in camp will shut down the fire suppression efforts, place colleagues at risk, and potentially have personnel pulled off the fire.

Symptomatic Individual Guidance

Signs and symptoms of illnesses associated with wildland firefighting mimic COVID. Due to the remoteness of the fire and spike camps, please follow the procedure outlined below.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Difficulty breathing
 - o Loss of taste or smell
 - o Fever
 - o Chills
 - o Sore throat
 - o Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!
