Sequoia National Forest / Inyo National Forest / Sequoia Kings Canyon National Park

EAST CASTLE ZONE SQF COMPLEX

INCIDENT ACTION PLAN

CA-SQF-002541 P5NG2P (0513)

Values

Firefighters and Public Safety

Communities: Ponderosa, Camp Nelson, Pyles Boys Camp, Rogers Camp, Sequoia Crest, Cedar Slope, Alpine Village, Redwood Drive, Lloyd Meadows, Mountain Aire, Pierpoint, Coy Flat

Infrastructure & Physical Assets: Tule River Municipal Watershed, Osa, Beach, Casa Vieja and Beck Meadows, USGS Seismic Station, Blackrock RS, Quinn RS, Kern RS, roads, bridges, utilities, other agency structures, private inholdings, dispersed and developed recreation sites

Cultural Sites: Monache Mountain, Monache Meadow, and other archaeological & cultural sites

Sequoia Groves: Freeman Giant Sequoia Grove, Dillonwood Grove, and other groves

TES Habitat: Pacific Fisher, Little Kern Golden Trout, Mountain Yellow Legged Frog, CA Spotted Owl, Goshawk, Sierra Nevada Bighorn Sheep

OPERATIONAL PERIOD

Friday, September 18, 2020 Saturday, September 19, 2020 0600 to 0600

INCIDENT OBJECTIVES

1. Incident Name

EAST CASTLE ZONE SQF COMPLEX

2. Date Prepared 9/17/2020

3. Time Prepared 1530

4. Operational Period

September 18 to September 19, 2020 0600 - 0600 DAY AND NIGHT SHIFT

5. General Control Objectives for the Incident

- Provide point protection of values at risk within communities and associated infrastructure to prevent loss of structures, utilities, and developed sites and facilities including:
 - The communities of Camp Nelson, Pyles Boys Camp, Rogers Camp, Cedar Slope, Sequoia Crest, Alpine Village, Redwood Drive, Lloyd Meadows, Mountain Aire, Ponderosa, Pierpoint, and Coy Flat,
 - Infrastructure at Freeman Giant Sequoia Grove and other groves; Blackrock, Kern, and Quinn Ranger Stations; Osa, Beach, Casa Vieja, and Beck Meadows; Tule River Municipal Watershed; private inholdings; roads, bridges, utilities; and developed and dispersed recreation sites.
 - Monache Mountain, Monache Meadow and other archaeological and cultural sites.
- Continue to hold and establish control lines that are safe for firefighters and provide a high probability of success to keep the fire north of Durr Wood Camp and west of Toowa Range to King Fisher Ridge to 22S05 Road.
- Monitor the spread/growth of the Shotgun Fire using air operation assets.
- Coordinate with Duty Officers from the Sequoia and Inyo NFs, Sequoia and Kings Canyon NPs, and the Tule River Indian Reservation on support to any new initial attack.

6. Management Objectives

- Establish and implement common objectives and strategies under unified command with Cal Fire Team 6.
- Implement suppression actions that have a high potential for success, carefully weighing risk exposure to firefighters.
- Provide for the safety of firefighters, aviation and public through clear communication. Ensure an understanding of strategies
 and tactics, including a clearly defined and obtainable end state, in order to facilitate sound risk mitigation decision making.
- Implement social distancing and adhere to the "module of one" concept to reduce physical exposure and transmission of COVID-19, to provide for the health and safety of all incident personnel.
- Minimize to the extent feasible smoke exposure to firefighters, communities and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure.
- Maintain and strengthen relationships with partner agencies, stakeholders, cooperators, community leaders, and local
 agencies utilizing most effective platforms available.
- Minimize adverse effects from suppression actions on riparian areas, wetlands, Little Kern Golden Trout, Mountain Yellow Legged Frog, Goshawk, California Spotted Owl, Pacific Fisher, and Sierra Nevada Bighorn Sheep habitats.
- Minimize impacts to Wilderness areas; use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines.

7. Commander's Intent

- Safety: Address fire fighter, public, and aviation safety through hazard/exposure mitigation.
- Communication: We will keep the Agency Administrators informed of significant accomplishments and issues.
- **Risk Management:** We will use a robust risk assessment process to mitigate unnecessary risk to fire fighters and update and/or revise decisions as necessary.
- **Human Resources**: We will ensure that all incident personnel be treated with dignity and respect. We have a zero tolerance for harassment, alcohol, or illegal drug use.
- Operations: We will make informed tactical decisions engaging the fire in the right locations with the appropriate resources.
- **Public Information**: We will provide timely and accurate information through the press, meetings, trap lines, briefings, and social media.
- **Stakeholders:** We will coordinate with the delegating agencies to identify key partners and keep them effectively informed of progress and to use their local knowledge.
- Finance: We will establish and monitor cost effective methods for accomplishing incident objectives.

SAFETY MESSAGE SNAGS

Snags are dead, standing trees without leaves or needles in the crowns and present a significant threat to firefighter safety. Snags may burn through more quickly than green trees and can fall without warning. Live, structurally compromised green trees weakened by insects, disease, weather, fire, and age can also fall without notice.

Sawyers and crews should operate with increased awareness regarding hazard trees during low visibility or night operations. Night saw operations should include discussions involving minimizing falling operations due to reduced visibility and the reduction of situational awareness of immediate surroundings.

Environmental conditions that increase risk from hazard trees:

- Strong or gusty winds from storm cells.
- Air operations water or retardant drops, rotor wash from helicopters.
- Steep slopes with rolling material.
- Diseased or bug-killed areas (Mountain Pine Beetle).
- Fire weakened timber.
- Reduced visibility from smoke, fog or darkness.

Things to consider when assessing the potential danger of hazard trees in an area:

- Timbered areas that have been burning for an extended period.
- High-risk tree species (those that are known for rot and shallow root systems) in the area.
- Numerous downed trees or tree parts in the area.
- Broken tops and dead limbs overhead or an accumulation of downed limbs around tree boles (stems).
- Signs of tree decay including: cavities, splits, cracks, lack of needles, mechanical damage, missing bark, insect infestation, mushrooms or fungus growing from tree.
- Root damage from equipment, fire, or erosion.
- Steep slopes for rolling debris, reduced personnel mobility, and more difficult size-up.
- Weather forecast with high winds or wind impacting the tree canopy.

Identify mitigation measures to reduce risk from hazard trees:

- Identify, communicate, establish, and monitor No-Work-Zones (NWZ) in all high-risk areas until the hazard has been mitigated.
- Assign qualified sawyers and Falling Bosses based on the complexity of the hazard.
- Consider ordering in higher complexity fallers in advance.
- Use heavy equipment or explosives to avoid placing sawyers under hazards.
- Plan quick and safe escape routes.
- Minimize exposure time at the stump by employing efficient felling procedures.
- Minimize impacts to the hazard tree from wedge pounding or other felling operations in the area.
- Do not turn your back on a falling tree or known hazard.
- Use lookouts and /or road guards to maintain secure felling areas.
- Also reference pages 22-23 in the IRPG

FIRE WEATHER FORECAST

FORECAST NO: 26

PREDICTION FOR: Sept 18-19, 2020 0600-0600

INCIDENT NAME: East Castle Zone SQF Complex

UNIT: CA-SQF

SIGNED: Dan Byrd

TIME AND DATE

FORECAST ISSUED: Thu, Sep 17 @ 2000 hours Incident Meteorologist – Dan Byrd

Gusty West-Southwest at the Ridges Today

WEATHER DISCUSSION: An upper trough will move across the region today, with gusty southwest to west winds. Rh's will be higher today and temperatures will be cooler. Rh recovery will be good tonight with decreasing winds. Skies will clear by Saturday with even cooler temperatures and higher RH values. High pressure ridging will build back in on Sunday with warming temperatures and lower Rh's. Upper ridging will continue into early next week.

SKY/WEATHER TODAY (FRIDAY): Mostly cloudy becoming partly cloudy later this afternoon. Cooler with gusty winds at the ridges. Expect the weak inversion to break by 1000-1100 outside of heavy smoke.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

79 to 84 degrees (Down 5) / 18 to 23 (Up 10-12%) 5000 FT: 7000 FT: 74 to 79 degrees (Down 5) / 22 to 27 (Up 10-12%)

EYE LEVEL WINDS:

Slope/Valley: Morning drainage winds will become South to southwest after 1000-1100 with speeds 7

to 12 gusts to 18 mph. Stronger winds in southwest to northeast aligned drainages and

canyons.

Ridges: West-southwest 12 to 18 G20-25 mph.

MIXING HEIGHT...7,000 FT AGL VENTILATION... Excellent

TRANSPORT WIND... West-southwest 12-18 mph. CWR (0.10")....0% LAL....1 HAINES....2

SKY/WEATHER TONIGHT (FRIDAY NIGHT): Mostly Clear with heavy smoke in the Kern River Valley. Overnight RH recoveries will be much improved.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT: 50 to 55 degrees (Down 4-6) / 50 to 60% (Up 30-40%) 7000 FT: 51 to 56 degrees (Down 4-6) / 45 to 55% (Up 30-40%)

EYE LEVEL WINDS:

Slope/Valley: North to northeast 3 to 6 mph.

West-southwest 8 to 12 G17 mph decreasing overnight. Ridaes:

CWR (0.10")....0% **LAL....**1

SATURDAY: Inversion lifting by 1100-1200. Mostly Sunny and smoky.

Max Temps: 70 to 85. Min RH: 16 to 25%. Winds: Slope/Valley: Morning drainage winds becoming South to southwest 4-8 G15 mph in the afternoon. Stronger winds in Southwest to Northeast drainages and canyons. Ridge: West-southwest to west 8-12 G18 mph.

CWR (0.10"): 0% **MIXING HEIGHT:** 6,000 FT AGL **HAINES:** 3 LAL: 1

OUTLOOK for SUNDAY Through TUESDAY:

SUNDAY: Mostly sunny. High Temp: 71-85. Min RH: 12. Ridge Wind: S-SW 6-10 G17 mph. MONDAY: Mostly sunny. High Temp: 72-86. Min RH: 14. Ridge Wind: S-SW 8-12 G20 mph. TUESDAY: Mostly sunny. High Temp: 70-84. Min RH: 15. Ridge Wind: S-SW 5-8 G15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 28 Day	TYPE OF FIRE: Wildland					
FIRE NAME: East Castle Zone SQF Complex	OPERATIONAL PERIOD: 9/18/2020 0600-2000					
DATE ISSUED: September 17, 2020	TIME ISSUED: 0600					
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Brian Anderson FBAN					

WEATHER

Westerly winds

(See Weather forecast for details)

Weather thresholds for large fire growth: Temps greater than 83°, RH's less than 20%, 20ft winds greater than 7mph

Rule of Thumb - To figure 20' winds, divide the observed eye level winds by .4

FUELS

<u>Fuels-</u> There are three primary fuels in the fire area. In the higher elevations above 5000' mixed conifer fuel types with a heavy load of dead and down dominate the fire area. At the mid elevations the fuels transition into more of a brush type. This will include most burn scars in the area. At the lower elevations, grass is the dominate fuel. There is a heavy component of beetle killed timber in the grey stage throughout the fire area. These pockets could lead to increased dead fuel loads in these areas. The fuels are very dry for this time of year. The ERC's are currently near the 97th. The 100-hr and 1000-hr fuels are at 6% and 7%. These indices indicate that all dead fuel will contribute to fire intensity.

<u>Topography-</u> Topography in the fire area is dominated by two features. The Kern river valley runs north/south and bisects the fire can produce diurnal up/down slope winds that can be strong enough to overpower the prevailing winds. The Tule River Canyon on the west side of the fire runs from the San Joaquín valley to east to about Ponderosa. This canyon can affect the winds and associated fire spread, especially at night.

FIRE BEHAVIOR

Tonight's maximum fire potential (Head Fire, 2%-4% fine dead fuel moisture)

REMEMBER: These are rates of spread for surface fire only, crown fire and spotting will increase the overall rates of spread

	Timb	oer	
	0% Slope	30% Slope	60% Slope
Rate of Spread	10-12 ch/hr	14-18 ch/hr	19-21 ch/hr
Flame Lengths	4-7'	6-8'	8-10'
	Bru	sh	
	0% Slope	30% Slope	60% Slope
Rate of Spread	3-5 ch/hr	5-7 ch/hr	10-12 ch hr
Flame Lengths	3-4'	4-6'	6-8'

Rule of Thumb: Cut head fire flame lengths and rate of spread in half for flanking fire, backing fire 2'-4 flame lengths with rates of spread of 3-4 ch/hr

<u>All Divisions:</u> Humidity recoveries are expected to be better than last night but are still not favorable. If winds remain light, expect the fire behavior to be slightly less intense than yesterday. However, if gusts materialize watch for increased spread rates with spotting of up to ½ mile.

<u>DIVS A – Westerly winds will likely push fire west of DP7 towards the Ponderosa community.</u> Fuels continue to be receptive to spotting with minimal fire behavior.

<u>DIVS B – Winds</u> will be favorable to push fire from the West Fork Bear Creek back into itself. However, if fire becomes established in the Tule drainage bottom, predicted winds could accelerate and push fire toward Camp Nelson.

<u>DIVS Y/Z -</u> The forecasted winds have the potential to scour across the face of the needles ridge and push the fire that is already established to the east, moving toward the Kern river. Up canyon winds from the Kern river will likely overpower the westerly winds pushing fire northerly, away from unburned fuels to the south.

AIR OPERATIONS

Westerly winds may scour the smoke out and support air operations.

SAFETY

Keep your heads on a swivel, today is a day of change for wind direction and speed. Spread direction may catch you by surprise.

Task: Assess opportunities and implement point source protection to values in the Ponderosa, Quaking Aspen and Peppermint work center areas where feasible and safe to engage. Continue to utilize aircraft to limit fire spread around values. Implement firing operations as directed by Branch 1. Coordinate suppression actions with DIV Y/Z.

Purpose: Minimize fire impacts to values within the mountain communities located within the DIV.

End State: Limit fire spread into additional values at risk to protect communities and infrastructure.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Medic Team 1 available to all Branch I divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the
 discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions
 would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the
 IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Task: Implement point source protection to values in Ponderosa, Pyles Camp, Lloyd Meadows and Freeman Grove. Scout for direct and indirect containment opportunities along the southern edge and continue to improve existing indirect containment lines. Monitor and manage fire effects to the extent possible in the Freeman Grove. Coordinate with DIV A - Ponderosa Structure Group.

Purpose: Minimize impacts to values and limit fire spread to the southwest.

End State: Fire impacts to private property and infrastructure is minimized to the extent possible, natural resource impacts are limited, and there are no accidents or injuries to firefighters or the public.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Medic Team 1 available to all Branch I divisions.
- · Crews be prepared to spike.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the
 DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a
 significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions
 will be coordinated with and approved by the OSC whenever possible.

Task: Prep the Crawford Road east to the 107 Road. Develop a firing plan focused on limiting fire effects and be prepared to implement to prevent the negative impacts of high intensity fire. Coordinate with Tule River Fire personnel on any line construction on reservation ground. Coordinate with DD to connect the Black Mtn Ridge with the Cow Mountain FCR.

Purpose: Protect the municipal water shed and other important tribal values from high intensity fire.

End State: Values at risk are not negatively impacted by high intensity fire or heavy handed suppression action

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station.
 Medic Team 1 available to all Branch I divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the
 discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These
 actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated
 at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever
 possible.

Task: Maintain readiness and structure protection in: Bonita Meadow, West Meadow, Beach Meadow and Blackrock Work Center. Recon and develop a structure protection plan for Monache. Continue to go direct with crews and equipment on eastern finger of fire north of Beach Meadows. Monitor division X-Ray from the air and utilize air resources as needed to keep green islands from impacting control lines west of H-4. Assist with point protection as needed.

Purpose: Limit impact to values at risk.

End State: Values at risk are not impacted by fire. A plan to protect values at risk is developed for the Monache area. The spread of fire to the south and east is limited in divisions L/X

- A/G Tac for Branch Five: RX169.200, TX 169.200. This needs to be hand programmed.
- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at the Blackrock Ranger Station. Castle REMS 2 available to all branch divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the
 DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a
 significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions
 will be coordinated with and approved by the OSC whenever possible.

Task: Implement point source protection around values in Pierpoint, Camp Nelson and Coy Flat where feasible. Utilize aerial resources to limit fire spread around values at risk. Utilize direct and indirect tactics to work toward containing spread and evaluate opportunities for indirect containment lines farther to the south. Coordinate with division A to ensure an integrated strategy. Coordinate all actions with Cal Fire Team 6.

Purpose: Minimize impacts to surrounding communities and limit fire spread to the south and west.

End State: Impacts to local communities and infrastructure was kept to a minimum.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Medic Team 1 available to all Branch I divisions.

Task: Support line divisions with fireline perimeter control as instructed by Branch Director or Operations Section Chief. Reinforce structure protection plans with hose lays, static water supply and hazard mitigation as instructed by Group Supervisor for values at risk in Camp Nelson, Cedar Slope, Apline Village, Sequoia Crest and Pierpoint. Assist Ponderosa Structure Group as requested by Operations Section Chief or Branch Director.

Purpose: Protect values at risk from wildfire impacts with emphasis on supporting fireline perimeter control well in advance of direct threats to communities and improvements.

End State: Values at risk and communities are able to operate in pre-fire condition accounting for public safety.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Black Rock Ranger station. Medic Team 1 available to all structure divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Task: Support divisions/groups assigned to night shift as directed by night operations. Implement firing as needed to protect values and secure any spots if safe to do so. Prepare for firing to protect values at risk and for perimeter control.

Purpose: To protect values at risk and provide perimeter control to impacted communities.

End State: Impacts to values at risk have been minimized and critical missions have been successfully implemented safely.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station.
 Castle REMS1 available to all Branch I divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the

DIVISION ASSIGNMENT LIST

Task: Provide perimeter control support and structure defense for the community of Ponderosa when conditions allow. Provide mitigation and reasonable protection for nationally significant natural resources to the extent possible while maintaining firefighter safety. Assist other Night Divisions as directed by Night Operations.

Purpose: Minimize fire spread to protect values at risk by supporting perimeter control operations.

End State: Values at risk and communities are defended to the extent possible while maintaning firefighter safety as our highest priority.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Castle REMS 1 available to all structure divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the
 discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These
 actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at
 the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Task: Patrol and monitor from Ponderosa over to Pyles Camp. Support the defense of Ponderosa as requested. Continue operations from day shift as conditions allow. Mop-up as appropriate based on firefighter safety.

Purpose: Limit fire spread to additional values at risk.

End State: Fire spread limited to existing fire perimeter.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Castle REMS 1 available to all structure divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the
 discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These
 actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at
 the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Task: Provide perimeter control support and structure defense for Camp Nelson, Pierpoint, Cedar Slope, Coy Flat and Ponderosa when conditions allow. Provide mitigation and reasonable protection for nationally significant natural resources to the extent possible while maintaining firefighter safety. Assist night divisions as directed by Night Operations.

Purpose: Protect values at risk from spreading fire by supporting perimeter control operations.

End State: Values at risk and communities are defended to the extent possible while maintaning firefighter safety as our highest priority.

Special Instructions

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Castle REMS 1 available to all structure divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

AIR OPERATIONS SUMMARY 220	Prepared By: Dennis A. Morton	Prepared: 09/17/2	2020	Prepared Time: 2000 hrs.		
1. INCIDENT NAME: SQF COMPLEX	2. OPERATIONAL PERIOD 09/18/2020	START TIME: 0800	END TIME : 2000	SUNRISE : 0641	SUNSET: 1858	

- 3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.).
- 1. Smoky conditions can hamper our aviation operations adhere to visibility limitations, and DO NOT be pressured into accepting a mission that you know or feel is unsafe!
- 2. Ensure visibility and winds are adequate to safely conduct flight operations.
- 3. Ensure safe vertical & horizontal separation between aircraft in smoky conditions.
- 4. Utilize check points and call in and out of the dips.
- 5. If you see a UAS on your division report it up the chain of command to Air Operations, it may or may not be a friendly!
- 6. Assess mission complexity and the Benefit vs Risk of the mission.

(Terminate air operations at sunset...use last ½ hour for RTB. (exceptions allowed—communicate intent)

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

Pre-Planning for today's assignment – See Page 2 IRPG

What are the likely l What kind of severe	hazards that could cause injuries? injuries?	
	-charge DIVS or overhead for an emergency in oday? (i.e. "Division Zulu")	
Who are the Medica What are their capab	al personnel assigned to your part of the incident?	
Other Emergency R	esponders: fire dept, crash rescue, ambulance?	
Communications: C helicopters, local res	ommand channel, Air to Ground, Medical scue/medical?	
	Ground vehicle, drop point, coordinates, travel route?	
Transportation methods available	Aircraft I.D, helispot names, coordinates? Hoist capable, internal transport	
	Other available methods - contingency	
Most likely workfor	ce for evacuation	

Response checklist

Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and conduct rescues.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

Response sequence:

- First, secure the scene and protect responders and patients from further injury.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If <u>not</u>, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.
- Notify Communications to initiate Accident Action Plan response.

Information for Communications: (See Medical Incident Report, page 108, IRPG)

- Type and extent of injuries?
- Airway or breathing problems? Serious bleeding?
- Is an EMT present or needed? Are Paramedics (Advanced Life Support) needed?
- Specific location of patients (Lat/Long, access route, DP#, helicopter Landing Zone)?
- What type of transport is needed? Helicopter medevac, hoist, ambulance or ground transport?
- Name of contact person in charge of the scene.
- Do not use names of patients at any time.
- Medical Emergency Responders confer with Medical Unit Leader and DIVS or designated Overhead to determine if this is a critical emergency and what type of transport is needed.

HUMAN RESOURCE MESSAGE

There is zero tolerance for drugs and alcohol on this fire incident.

I survive because the fire within me burns brighter than the fire around me.

Never Give Up!

Debby Hassel, HRSP (406) 274-7985 hrspfire@gmail.com

COVID-19 Reminders

Make prevention part of your routine!

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24hrs, have you had any of the following symptoms?

Symptoms:

Cough?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside that expected for your level of exertion?

Sore throat?

New loss of taste or smell?

Excessive fatigue?

Headache?

Congestion or runny nose?

Nausea or vomiting

Diarrhea?

Take temperature with no-touch thermometer, if available

What to do if you are experiencing COVID-19 symptoms?

- Put on a mask if not already wearing one.
- Notify your supervisor and selfisolate from others immediately.
- Notify Line Medic or Medical Unit to evaluate symptoms.
- Document contacts you had the two days before your symptoms began.
- Wait for further instructions from the Medical Unit and COVID Team.

How do I know if I am a 'close contact' of a person who is presumptive positive or has tested positive for COVID-19?

For COVID-19, a **close contact** is anyone who was withing 6 feet of an infected person for at least 15 minutes. An infected person can spread COVID-19 starting from 48 hours (or 2 days) before the person had any symptoms or tested positive for COVID-19.

*Approximately 40-50% of people with COVID-19 will not show any symptoms. It's important to utilize preventative strategies (masks, spacing, hand hygiene) prior to someone displaying symptoms.

Do your part to minimize the spread of COVID-19 and reduce your risk of exposure.

- Maintain 6 ft or greater spacing between you and others.
- Wear a mask, especially when unable to maintain social distancing, in public settings, including briefings.
- Frequently wash your hands with soap and water or a hand sanitizer that is at least 60% alcohol.
- Wash/sanitize frequently touched surfaces.

The best way to prevent illness and continue to fight fire is to avoid being exposed to this virus.

COVID questions or concerns?

Call the COVID Hotline

949-330-9973

FINANCE MESSAGE

OPTIONS FOR SUBMITTING TIME:

1. <u>Fillable PDF CTR/Shift Ticket:</u> QR code to the fillable forms are included below. If you do not have QR capabilities finance can e-mail you the forms directly.

- **2.** <u>Hard Copy CTR/Shift Ticket:</u> Fill out a hard copy CTR, snap a picture and email/text that into finance. If you send in a picture, please make sure it is legible and includes the supervisor's signature at the bottom! Please make sure to include your phone number in the **Remarks** in case we have questions.
- **3.** OR you may turn in your actual hard copy as usual at Whitsett Spike Camp & Troy Meadow.
- Please try to submit time at least every other day
- H-Pay justifications are still required on your CTRs "H = Hazard Pay" is not sufficient

CONTRACTED EQUIPMENT PLEASE CONTACT FINANCE IF YOU WANT TO START THE PROCESS OF AN INTERIM PAYMENT

2020.castle.finance@firenet.gov

Finance Main Line: 949-591-4123

TIP:

**In order to use fillable pdf forms, you must have some version of Adobe Acrobat downloaded on your device. If you have any issues opening the documents call finance for assistance. **

REMINDER

- BE SURE to call Finance <u>1 day</u> prior to your scheduled DMOB to ensure time is complete at <u>949-591-4123</u>
- Only 1 representative per resource should go to Finance at ICP to officially close out time.

DEMOBILIZATION IS NOW REMOTE!!

Demobilization Steps:

- 1. ALL accountable property checked-out from the incident must be returned (i.e. communications, supply). Items may be returned at Whitsett Base Camp or ICP.
- 2. Submit all finance documentation (time must be projected for travel home).
 - a. Abide by scheduled DMOB time or call Finance for an unscheduled DMOB.
 - b. Government agency resources that would like to close out their time 100% remotely should call **949-591-4123** when they are close to their DMOB date and make necessary arrangements to complete the process.
- 3. Scan the QR code on the front of the IAP to complete the DMOB process and start your travel home. DO NOT LEAVE the incident until you have confirmed with Demobilization Unit Leader at 951-235-1568. If you have questions, please call!

EXTENSIONS & RR

- Extensions or RR's <u>MUST be requested by your incident supervisor</u> and approved by your home unit supervisor prior to being processed.
- Extensions forms can be obtained from DMOB or the plans representative onsite at Camp Whitsett.

Are You a TRAINEE?

1. Scan these codes to access the fillable *trainee* information forms. Send photo of qualification cards and task book cover to: matthew.boss@usda.gov

Registration

Check-out

Exit Interview

<u>FINANCE</u>

S# PROCESS

FEDERAL RESOURCES ONLY

- PROPERTY LOSS-REPAIR-REPLACE OF NON-NATIONAL FIRE EQUIPMENT SYSTEM (NFES) OR NON-STANDARD CACHE ITEMS
 - > CAN IT BE REPLACED AT SUPPLY?
- 1. General message is needed (ICS 213) with contact information NAME/PHONE #/EMAIL/RESOURCE ORDER # send to Supply at 2020.castle.ordering@firenet.gov
 - ➤ IF YOU NEED AN S# FOR REPLACEMENT BECAUSE SUPPLY DOES NOT HAVE IT PLEASE DO THE FOLLOWING
- 2. General message is needed (ICS 213) with contact information NAME/PHONE #/EMAIL/RESOURCE ORDER #. A description of property damage or loss needs to be documented and pictures of damaged items. Please send to finance at 2020.castle.finance@firenet.gov
- 3. We have Comp/Claims on site! Please reach out to us with any questions at 406-363-8956 or 406-366-3724.

Things to Know - Resource Message

SQF Complex 9/16/20

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command, or directly inform a READ.

Trash, Litter, and Food

- Please remove all trash, litter, and uneaten food from the fireline.
- Food items left on the line or at camp attract wildlife like bears, skunks, and rodents.

Sensitive Areas

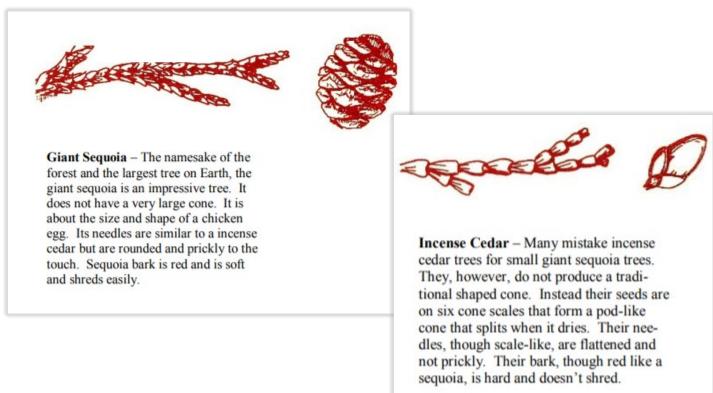

- REAFs will be flagging sensitive areas during the incident.
- Please avoid going into these areas.
- The two flagging colors used are a strip of blue and a strip of red.
- For more information, please consult with a REAF.

Keep Up the Good Work!

Continue to do good work for cultural and natural resources by doing the following:

- Picking up trash and litter.
- Removing unused flagging.
- Sharing information and working alongside REAFs.
- When moving on to a new area, leaving the old area better than you found it.

Tree Identification – Giant Sequoia vs Incense Cedar

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

0 5	e the lollowing	g items to comin	nunicate situati	on to communication	ns/urspaten.		
1. CONTACT	COMMUNICATIONS / I	DISPATCH (Verify correct	frequency prior to starting	report)
