#### **INCIDENT OBJECTIVES**

1. Incident Name

EAST CASTLE ZONE SQF COMPLEX

2. Date Prepared 9/18/2020

3. Time Prepared 1730

#### 4. Operational Period

September 19 to September 20, 2020 0600 - 0600 DAY AND NIGHT SHIFT

#### 5. General Control Objectives for the Incident

- Provide point protection of values at risk within communities and associated infrastructure to prevent loss of structures, utilities, and developed sites and facilities including:
  - The communities of Camp Nelson, Pyles Boys Camp, Rogers Camp, Cedar Slope, Sequoia Crest, Alpine Village,
     Redwood Drive, Lloyd Meadows, Mountain Aire, Ponderosa, Pierpoint, Doyle Springs, Mahogany and Coy Flat.
  - Infrastructure at Freeman Giant Sequoia Grove and other groves; Blackrock, Kern, and Quinn Ranger Stations; Osa, Beach, Casa Vieja, and Beck Meadows; Tule River Municipal Watershed; private inholdings; roads, bridges, utilities; and developed and dispersed recreation sites.
  - Monache Mountain, Monache Meadow and other archaeological and cultural sites.
- Continue to hold and establish control lines that are safe for firefighters and provide a high probability of success to keep the fire north of Durr Wood Camp and west of Toowa Range to King Fisher Ridge to 22S05 Road.
- Monitor the spread/growth of the Shotgun Fire using air operation assets.
- Coordinate with Duty Officers from the Sequoia and Inyo NFs, Sequoia and Kings Canyon NPs, and the Tule River Indian Reservation on support to any new initial attack.

#### 6. Management Objectives

- Establish and implement common objectives and strategies under unified command with Cal Fire Team 6.
- Implement suppression actions that have a high potential for success, carefully weighing risk exposure to firefighters.
- Provide for the safety of firefighters, aviation and public through clear communication. Ensure an understanding of strategies and tactics, including a clearly defined and obtainable end state, in order to facilitate sound risk mitigation decision making.
- Implement social distancing and adhere to the "module of one" concept to reduce physical exposure and transmission of COVID-19, to provide for the health and safety of all incident personnel.
- Minimize to the extent feasible smoke exposure to firefighters, communities and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure.
- Maintain and strengthen relationships with partner agencies, stakeholders, cooperators, community leaders, and local agencies utilizing most effective platforms available.
- Minimize adverse effects from suppression actions on riparian areas, wetlands, Little Kern Golden Trout, Mountain Yellow Legged Frog, Goshawk, California Spotted Owl, Pacific Fisher, and Sierra Nevada Bighorn Sheep habitats.
- Minimize impacts to Wilderness areas; use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines.

#### 7. Commander's Intent

- Safety: Address fire fighter, public, and aviation safety through hazard/exposure mitigation.
- Communication: We will keep the Agency Administrators informed of significant accomplishments and issues.
- **Risk Management:** We will use a robust risk assessment process to mitigate unnecessary risk to fire fighters and update and/or revise decisions as necessary.
- **Human Resources**: We will ensure that all incident personnel be treated with dignity and respect. We have a zero tolerance for harassment, alcohol, or illegal drug use.
- Operations: We will make informed tactical decisions engaging the fire in the right locations with the appropriate resources.
- **Public Information**: We will provide timely and accurate information through the press, meetings, trap lines, briefings, and social media.
- **Stakeholders:** We will coordinate with the delegating agencies to identify key partners and keep them effectively informed of progress and to use their local knowledge.
- Finance: We will establish and monitor cost effective methods for accomplishing incident objectives.

# SAFETY MESSAGE RECOGNIZING TRENDS

In the past 36 hours we have had two incidents involving vehicles as follows:

- A parked, unoccupied engine was struck by a fire weakened green tree.
- A vehicle drove off the road returning to camp from night shift, minor injuries, but vehicle is totaled, and the injuries could have been much worse.

Sometimes accidents happen on large incidents but sometimes trends develop. We went several days without any accidents and then had two in less than 24 hours.

#### Some reminders:

- We are not going to put this fire out during our stay.
- We are all getting fatigued from long hours, smoke and high tempo fire fighting.
- There are long travel times on windy roads with steep drop offs, often in the dark or low visibility conditions.
- We are driving roads in areas that have the potential for snags or rolling debris to impede travel.

The message is, take your time and pay attention to the signals that are being sent. We all have loved ones at home that want to see us return safely.

Have a safe shift

Dan Cassidy SOF1 NR Team 1

#### FIRE WEATHER FORECAST

FORECAST NO: 27

**PREDICTION FOR:** Sept 19-20, 2020 0600-0600

UNIT: CA-SQF

SIGNED: Dan Byrd

TIME AND DATE

FORECAST ISSUED: Fri, Sep 18 @ 2000 hours Incident Meteorologist – Dan Byrd

**WEATHER DISCUSSION:** The upper trough will begin to move to the east today and high pressure ridging will build in tonight into Sunday. Skies will be mostly clear this afternoon with min Rhs around 20 percent. The ridge winds will continue to be out of the west-southwest, but will diminish and become southerly during the afternoon hours. High pressure ridging will continue over the area on Sunday, but a weak upper trough will slowly move across the region on Monday into Tuesday. This trough will mainly be a wind shift from the southwest on Monday to the Northwest on Tuesday. High pressure ridging will build back in on Wednesday and continue through the end of the week.

SKY/WEATHER TODAY (SATURDAY): Mostly sunny and continued cooler. Expect the weak inversion to break by 1100-1200 outside of heavy smoke.

#### **MAX TEMPERATURES / MIN RELATIVE HUMIDITY:**

#### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 29 Day	TYPE OF FIRE: Wildland					
FIRE NAME: East Castle Zone SQF Complex	OPERATIONAL PERIOD: 9/19/2020 0600-2000					
DATE ISSUED: September 18, 2020	TIME ISSUED: 0600					
UNIT: CA-Sequoia National Forest	SIGNED: /s/ Brian Anderson FBAN					

#### **WEATHER**

\*\*Back to Southerly Winds\*\*

(See Weather forecast for details)

Weather thresholds for large fire growth: Temps greater than 83°, RH's less than 20%, 20ft winds greater than 7mph

Rule of Thumb - To figure 20' winds, divide the observed eye level winds by .4

#### **FUELS**

<u>Fuels-</u> There are three primary fuels in the fire area. In the higher elevations above 5000' mixed conifer fuel types with a heavy load of dead and down dominate the fire area. At the mid elevations the fuels transition into more of a brush type. This will include most burn scars in the area. At the lower elevations, grass is the dominate fuel. There is a heavy component of beetle killed timber in the grey stage throughout the fire area. These pockets could lead to increased dead fuel loads in these areas. The fuels are very dry for this time of year. The ERC's are currently near the 97<sup>th</sup>. The 100-hr and 1000-hr fuels are at 6% and 7%. These indices indicate that all dead fuel will contribute to fire intensity.

<u>Topography-</u> Topography in the fire area is dominated by two features. The Kern river valley runs north/south and bisects the fire can produce diurnal up/down slope winds that can be strong enough to overpower the prevailing winds. The Tule River Canyon on the west side of the fire runs from the San Joaquín valley to east to about Ponderosa. This canyon can affect the winds and associated fire spread, especially at night.

#### **FIRE BEHAVIOR**

Tonight's maximum fire potential (Head Fire, 2%-4% fine dead fuel moisture)

REMEMBER: These are rates of spread for surface fire only, crown fire and spotting will increase the overall rates of spread

Timber											
	0% Slope 30% Slope 60% Slope										
Rate of Spread	10-12 ch/hr	14-18 ch/hr	19-21 ch/hr								
Flame Lengths	4-7'	6-8'	8-10'								
	Bru	sh									
	0% Slope	30% Slope	60% Slope								
Rate of Spread	3-5 ch/hr	5-7 ch/hr	10-12 ch hr								
Flame Lengths	3-4'	4-6'	6-8'								

Rule of Thumb: Cut head fire flame lengths and rate of spread in half for flanking fire, backing fire 2'-4 flame lengths with rates of spread of 3-4 ch/hr

<u>All Divisions:</u> As good morning humidity recoveries appear, expect activity to start slower than we have seen over the last week. Due to the dry fuels and warm dry weather, there will be active fire behavior in the afternoon with single tree torching and spotting, especially in the timber fuel types that burned yesterday. With the lower winds from the south, smoke may linger in the fire area raising RHs and decreasing fire behavior slightly. As winds decrease in the afternoon, watch for upslope topographic affects to take over wind direction.

<u>DIVS A –</u> Unburned pockets of fuels west of DP 7 will become active in the afternoon as they clean up from the previous day's activities. Watch for fire to continue backing down the west side of Ponderosa and trying to hook below the community, leading to a wind alignment and fire moving back to the north.

<u>DIVS B –</u> As fire continues to move to the west down Coy creek, wind alignment is likely to occur tomorrow afternoon. Watch for fire to push to the north, toward Coy Flats and Camp Nelson. As winds decrease in the afternoon, topographic winds may dominate fire spread direction.

<u>DIVS Y/Z –</u> Southerly winds combined with up canyon winds should be favorable to keep fire pushing to the north in the Kern river drainage. Spotting will be the greatest threat for fire to cross the river to the east and into unburned fuels.

#### **AIR OPERATIONS**

Heavy smoke is likely to linger in drainages due to light winds, potentially causing issues with aviation.

#### **SAFETY**

Share what fire behavior you are seeing with others; it not only helps them, it keeps your mind sharp as well.

**Task:** Assess opportunities and implement point source protection to values in the Ponderosa, Quaking Aspen and Peppermint work center areas where feasible and safe to engage. Continue to utilize aircraft to limit fire spread around values. Implement firing operations as directed by Branch 1. Coordinate suppression actions with DIV Y/Z.

Purpose: Minimize fire impacts to values within the mountain communities located within the DIV.

**End State:** Limit fire spread into additional values at risk to protect communities and infrastructure.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Medic Team 1 available to all Branch I divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the
  discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions
  would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the
  IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Task: Implement point source protection around values in Pierpoint, Camp Nelson and Coy Flat where feasible. Utilize aerial resources to limit fire spread around values at risk. Utilize direct and indirect tactics to work toward containing spread and evaluate opportunities for indirect containment lines farther to the south. Coordinate with division A to ensure an integrated strategy. Coordinate all actions with Cal Fire Team 6.

Purpose: Minimize impacts to surrounding communities and limit fire spread to the south and west.

End State: Impacts to local communities and infrastructure was kept to a minimum.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Blackrock Ranger Station. Medic Team 1 available to all Branch I divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

**Task:** Support line divisions with fireline perimeter control as instructed by Branch Director or Operations Section Chief. Reinforce structure protection plans with hose lays, static water supply and hazard mitigation as instructed by Group Supervisor for values at risk in Camp Nelson, Cedar Slope, Apline Village, Sequoia Crest and Pierpoint. Assist Ponderosa Structure Group as requested by Operations Section Chief or Branch Director.

**Purpose:** Protect values at risk from wildfire impacts with emphasis on supporting fireline perimeter control well in advance of direct threats to communities and improvements.

End State: Values at risk and communities are able to operate in pre-fire condition accounting for public safety.

- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at Black Rock Ranger station. Medic Team 1 available to all structure divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS.
  Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

	Other available methods - contingency	
Most likely workfor	ce for evacuation	

#### Response checklist

#### Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and conduct rescues.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

#### **Response sequence:**

- First, secure the scene and protect responders and patients from further injury.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If <u>not</u>, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.
- Notify Communications to initiate Accident Action Plan response.

#### Information for Communications: (See Medical Incident Report, page 108, IRPG)

- Type and extent of injuries?
- Airway or breathing problems? Serious bleeding?
- Is an EMT present or needed? Are Paramedics (Advanced Life Support) needed?
- Specific location of patients (Lat/Long, access route, DP#, helicopter Landing Zone)?
- What type of transport is needed? Helicopter medevac, hoist, ambulance or ground transport?
- Name of contact person in charge of the scene.
- Do not use names of patients at any time.
- Medical Emergency Responders confer with Medical Unit Leader and DIVS or designated Overhead to determine if this is a critical emergency and what type of transport is needed.

#### **COVID-19 Reminders**

#### Make prevention part of your routine!

#### WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24hrs, have you had any of the following symptoms?

#### Symptoms:

Cough?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside that expected for your level of exertion?

Sore throat?

New loss of taste or smell?

Excessive fatigue?

Headache?

Congestion or runny nose?

Nausea or vomiting

Diarrhea?

\*Take temperature with no-touch thermometer, if available\*

# What to do if you are experiencing COVID-19 symptoms?

- Put on a mask if not already wearing one.
- Notify your supervisor and selfisolate from others immediately.
- Notify Line Medic or Medical Unit to evaluate symptoms.
- Document contacts you had the two days before your symptoms began.
- Wait for further instructions from the Medical Unit and COVID Team.

# How do I know if I am a 'close contact' of a person who is presumptive positive or has tested positive for COVID-19?

For COVID-19, a **close contact** is anyone who was withing 6 feet of an infected person for at least 15 minutes. An infected person can spread COVID-19 starting from 48 hours (or 2 days) before the person had any symptoms or tested positive for COVID-19.

\*Approximately 40-50% of people with COVID-19 will not show any symptoms. It's important to utilize preventative strategies (masks, spacing, hand hygiene) prior to someone displaying symptoms.

# Do your part to minimize the spread of COVID-19 and reduce your risk of exposure.

- Maintain 6 ft or greater spacing between you and others.
- Wear a mask, especially when unable to maintain social distancing, in public settings, including briefings.
- Frequently wash your hands with soap and water or a hand sanitizer that is at least 60% alcohol.
- Wash/sanitize frequently touched surfaces.

The best way to prevent illness and continue to fight fire is to avoid being exposed to this virus.
