

SEQUOIA COMPLEX

*Sequoia National Forest / Inyo National Forest /
Sequoia and Kings Canyon National Parks*

OPERATIONAL PERIOD

Saturday September 12, 2020

Sunday September 13, 2020

0600 to 0600

CA-SQF-002541

P5NG2P (0513)

Values

Firefighters and Public Safety

Communities

Ponderosa, Camp Nelson, Pyles Boys Camp, Rogers Camp, Sequoia Crest, Cedar Slope, Alpine Village, Redwood Drive, Lloyd Meadows, Mountain Aire, Pierpoint, Coy Flat

Infrastructure

Osa, Beach, Casa Vieja and Beck Meadows, USGS Seismic Station, Blackrock RS, Quinn RS, Kern RS, Dispersed and developed campgrounds, trailheads and associated facilities

Natural and Cultural Resource Values

Freeman Giant Sequoia Grove, Little Kern Golden Trout Habitat, Mountain Yellow Legged Frog Habitat, Sierra Nevada Bighorn Sheep Habitat, Monache Mountain, Monache Meadow, Pacific Fisher Habitat, and other archaeological and cultural sites

INCIDENT OBJECTIVES	1. Incident Name SEQUOIA COMPLEX	2. Date Prepared 9/11/2020	3. Time Prepared 1600
4. Operational Period			
September 12, 2020 0600 to September 13, 2020 0600			
5. General Control Objectives for the Incident			
<ul style="list-style-type: none"> • Limit growth of the Castle Fire by establishing a holding line that is safe for firefighters and offers high probability of success to keep the fire: <ul style="list-style-type: none"> ○ North of Durr Wood Camp ○ South of Sequoia Kings Canyon Wilderness Boundary ○ East of Highway 190 and to Summit Trail ○ West of Toowa Range to King Fisher Ridge to 22S05 Road • Monitor the spread/growth of the Shotgun Fire using air operation assets. • Protect and minimize impacts to identified values at risk including the communities of Ponderosa, Camp Nelson, Pyles Boys Camp, Rogers Camp, Cedar Slope, Sequoia Crest, Alpine Village, Redwood Drive, Lloyd Meadows, Mountain Aire, Pierpoint, and Coy Flat, as well as infrastructure at Freeman Giant Sequoia Grove, Blackrock Ranger Station; Osa, Beach, Casa Vieja, and Beck Meadows; trailheads and facilities; Monache Mountain, Monache Meadow and other archaeological and cultural sites. • Coordinate with the Sequoia NF Duty Officer on support to any new initial attack. 			
6. Management Objectives			
<ul style="list-style-type: none"> • Implement suppression actions that have a high potential for success, carefully weighing risk exposure to firefighters. • Provide for the safety of firefighters, aviation and public through clear communication. Ensure an understanding of strategies and tactics, including a clearly defined and obtainable end state, in order to facilitate sound risk mitigation decision making. • Implement social distancing and adhere to the “module of one” concept to reduce physical exposure and transmission of COVID-19, to provide for the health and safety of all incident personnel. • Minimize to the extent feasible smoke exposure to firefighters, communities and other affected areas to reduce susceptibility to the consequences from COVID-19 exposure. • Maintain and strengthen relationships with partner agencies, stakeholders, cooperators, community leaders, and local agencies utilizing most effective platforms available. • Minimize adverse effects from suppression actions on riparian areas, wetlands, Little Kern Golden Trout, Mountain Yellow Legged Frog, and Pacific Fisher habitats. • Minimize impacts to Wilderness areas; use minimum impact suppression tactics (MIST) by utilizing trails, streams, ridges and natural barriers when possible for control lines. 			
7. Commander’s Intent			
<ul style="list-style-type: none"> • Safety: Address fire fighter, public, and aviation safety through hazard/exposure mitigation. • Communication: We will keep the Agency Administrators informed of significant accomplishments and issues. • Risk Management: We will use a robust risk assessment process to mitigate unnecessary risk to fire fighters and update and/or revise decisions as necessary. • Human Resources: We will ensure that all incident personnel be treated with dignity and respect. We have a zero tolerance for harassment, alcohol, or illegal drug use. • Operations: We will make informed tactical decisions engaging the fire in the right locations with the appropriate resources. • Public Information: We will provide timely and accurate information through the press, meetings, trap lines, briefings, and social media. • Stakeholders: We will coordinate with the delegating agencies to identify key partners and keep them effectively informed of progress and to use their local knowledge. • Finance: We will establish and monitor cost effective methods for accomplishing incident objectives.

Safety Message

Promoting a Culture of Safety

Safety is the responsibility of everyone. Most presenters at the morning briefing include information about safety along with their daily objectives. Thus, the Incident Action Plan (IAP) becomes a bundle of many safety messages that when taken together, is a very powerful tool.

Incident managers are responsible for sharing information in the IAP with every firefighter. Use these safety messages as a tool to promote dialog about your actions and potential consequences throughout your assignment.

Three techniques for promoting a culture of safety:

- **Include Everyone** – Every member of your team must be included in safety discussions. Even the newest crew member has something to contribute.
- **Use Information** – A lot of people are visual learners. Include real work examples and visual aides to prompt discussion. Story telling is a powerful means to illustrate your key points about safety.
- **Keep it Relevant** – Understand the challenges associated with your daily work assignments. Make your safety message applicable to the work at hand.

Promoting a culture of safety means that with every action taken you recognized there is a safety component to be considered and discussed. Your challenge is to continually bring safety to the forefront of your mind and to your actions.

Be Mindful About Safety in all Your Actions

Dan Cassidy SOF1 NR Team 1

FIRE WEATHER FORECAST

FORECAST NO: 19
PREDICTION FOR: Sept 12-13, 2020 0600-0600

INCIDENT NAME: Sequoia Complex

UNIT: CA-SQF
SIGNED: *Dan Byrd*

TIME AND DATE
FORECAST ISSUED: Fri, Sep 11 @ 2000 hours

Incident Meteorologist – Dan Byrd

WEATHER DISCUSSION: Upper level ridging has strengthened over the area today and with east to southeast flow aloft, the smoke from other fires should remain to our west. With much less dense smoke aloft expect warmer temperatures and lower RH's this afternoon. With more instability expect a Haines of 6 this afternoon also. Strong high pressure ridging will continue for the next few days with mostly sunny skies once again on Sunday. Smoke may begin to shade the fire again on Monday and especially on Tuesday as the upper flow becomes more southwest to westerly.

SKY/WEATHER TODAY (SATURDAY): Mostly sunny, dry and less smoky. Expect the inversion to break by 1100-1200.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

5000 FT: 84 to 90 degrees (Up 4-6) / 8 to 13 (Down 2-4%)
7000 FT: 73 to 78 degrees (Up 4-6) / 11 to 16 (Down 2-4%)

EYE LEVEL WINDS:

Slope/Valley: Morning drainage winds will become southeast to southwest after 1100-1200 with speeds 6 to 8 gusts to 14 mph. Winds will continue to be heavily impacted by local terrain.

Ridges: Northwest 5 to 10 mph becoming southwest 4 to 8 G12 mph in the early afternoon.

MIXING HEIGHT...11,000 FT AGL **VENTILATION...** Excellent
TRANSPORT WIND...Northwest around 5 mph in the morning, shifting to the southwest in the afternoon 5 to 10 mph.
CWR (0.10")...0% **LAL...**1 **HAINES...**6

SKY/WEATHER TONIGHT (SATURDAY NIGHT): Mostly clear with heavy smoke in the Kern River Valley. North to northeast 2 to 4 mph. Squirrely winds could occur near the confluence of the Little Kern/Kern Rivers. Overnight RH recoveries will remain poor.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

5000 FT: 58 to 62 degrees (Up 2-3) / 25 to 30% (Down 5-8%)
7000 FT: 54 to 58 degrees (Up 2-3) / 20 to 25% (Down 5-8%)

EYE LEVEL WINDS:

Slope/Valley: North to northeast 3 to 6 mph.
Ridges: Northeast 4-6 mph.

CWR (0.10")...0% **LAL...**1

SUNDAY: Inversion lifting by 1100-1200. Mostly sunny, not as smoky.
Max Temps: 75 to 91. **Min RH:** 10 to 20%. **Winds: Slope/Valley:** Morning drainage winds becoming south to southwest 5-10 G15 mph in the afternoon. **Ridge:** Northeast 4 to 8 mph becoming southeast to southwest 5 to 10 G14 mph in the afternoon.
LAL: 1 **CWR (0.10"):** 0% **MIXING HEIGHT:** 12,000 FT AGL **HAINES:** 5

OUTLOOK for SUNDAY Through TUESDAY:

MONDAY: Sunny. **High Temp:** 78-93. **Min RH:** 11. **Ridge Wind:** SW 8-12 G18 mph..
TUESDAY: Sunny. **High Temp:** 79-94. **Min RH:** 12. **Ridge Wind:** SW 8-12 G17 mph.
WEDNESDAY: Sunny. **High Temp:** 77-92. **Min RH:** 12. **Ridge Wind:** SW 6-10 G20 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 22

TYPE OF FIRE: Wildland

FIRE NAME: Sequoia Complex

OPERATIONAL PERIOD: 9/12/2020: 0600-0600

DATE ISSUED: September 11, 2020

TIME ISSUED: 1800

UNIT: CA-Sequoia National Forest

SIGNED: /s/ David Greathouse FBAN

WEATHER

****Clear Skies, Warm Temps and Increased Instability****

(See Weather forecast for details)

Weather thresholds for large fire growth: Temp: >83 deg, RH <20%, 20ft winds >7mph

Rule of Thumb – To figure 20' winds, divide the observed eye level winds by .4

FUELS

Fuels- The fuels that dominate the Castle fire are primarily mixed conifer with a heavy component of dead and down material. In the lower elevations and especially in the fire scars, a mix of shrub and grass/shrub can be found. Heavy pockets of beetle killed timber can also be found throughout the fire area. The fuels in the Shotgun fire are primarily grass and grass/shrub. The fuels are very dry for this time of year. The ERC's are currently near the 97th. The 100-hr and 1000-hr fuels are at 6% and 7%. These indices indicate that all dead fuel will contribute to fire intensity.

Topography- Topography in the fire area is dominated by the Kern River. This river drainage runs north/south and is steep and narrow, roughly bisecting the fire area down the middle. Terrain has played a central role in fire spread, taking the predominantly SW flow and directing it in every way imaginable across the fire area.

FIRE BEHAVIOR

Today's maximum fire potential

Timber

	0% Slope	30% Slope	60% Slope
Rate of Spread	6-8 ch/hr	10-12 ch/hr	19-21 ch/hr
Flame Lengths	4-5'	5-8'	8-10'

Brush

	0% Slope	30% Slope	60% Slope
Rate of Spread	3-5 ch/hr	5-7 ch/hr	10-12 ch/hr
Flame Lengths	3-4'	4-6'	6-8'

Rule of Thumb: Cut head fire flame lengths in half for flanking fire, backing fire 2'-4' flame lengths

All Divisions: Today's clearer skies and instability will bring active fire behavior on all flanks. Expect moderate surface fire spread with some occasional torching. In slopes greater than 50%, you can expect head fire to transition into the crown for a short period. Downwind spotting is probable today up to ½ mile, the probability of ignition is 80%-100%. Burning conditions should increase between 1100-1200, peak around 1600-1700 and moderating after dark.

Div - A/Y/Z Expect the fire to continue to flank west further into the Freeman Creek Sequoia Grove today. Expected growth in the bowl will be ¼ to ½ mile. As it comes off Hermit rock to the west, expect the fire to back over the lip of the bowl toward the 50b road. Do not let the bottom of the fire outpace the top. This could lead to strong uphill crown fire runs along with long range spotting.

Div B - The predicted winds may challenge your lines today especially in the afternoon. Active surface fire in those areas not burned out can be expected. Be heads up for spot fires, they could quickly become established. Cooler, light west winds coming up from the San Joaquin valley should arrive in your area late afternoon, early evening. These winds should help moderate fire behavior.

Div L – Expect the uncontained edges on the E and NE side of the fire to continue to back east towards the upside down horseshoe on the 02 road, Watch the fire as it moves closer to the road, wind and terrain could align causing the fire to push north. The fire edge south of the finger to Lions Meadows could potentially make a run to the top of the ridge. This could cause spotting into the area of the 34 road and the Lions Meadow road junction. Lastly, the fire edge between the finger and Jordan Hot Springs may see some activity that hasn't been seen in days.

Shotgun Fire The fire is following mainly brush fuels with short uphill runs when established on the lower 1/3 of the slope. Spread is not likely to be significant due to the lack of surface fuels.

AIR OPERATIONS

Smoke may impact air operations until the inversion lifts, between 1100-1200

SAFETY

"The difference between being a victim and a survivor is often a low level of situational awareness"

-Barry Eisler

Work Assignments										
<p>Task: Identify roads, ridges and natural barriers to be connected to form an indirect containment line west of the Freeman Grove. Do fuels prep on this indirect line to reduce the potential for spotting. Implement firing of this indirect line as directed by Branch 1. Coordinate suppression actions with Y/Z and B.</p> <p>Purpose: Keep the fire spread east of the North Road and north of Ponderosa.</p> <p>End State: Limit fire spread into additional values at risk to protect communities and infrastructure.</p>										
Special Instructions										
<ul style="list-style-type: none"> Personnel to notify DIVS of potentially sensitive cultural materials. Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 stage at Black Rock Ranger Station. Castle REMS1 available to all Branch I divisions. Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments									
<p>Task: Complete the indirect dozer line off the Needle Lookout Road. Continue firing as appropriate in Division Bravo along the North road/indirect containment line north toward DP-6. Secure any spots and mop-up as needed.</p> <p>Purpose: To provide continuity of operations between day/night shifts as well as apply operational surge capacity to implement critical missions as identified by Branch 1 based on tactical needs and fire behavior.</p> <p>End State: Impacts to values at risk have been minimized and critical missions have been successfully implemented safely.</p>									
Special Instructions									
<ul style="list-style-type: none"> Personnel to notify DIVS of potentially sensitive cultural materials. Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 stage at Black Rock Ranger Station. Castle REMS1 available to all Branch I divisions. Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments									
<p>Task: Continue to secure the perimeter on the east side of the 82 Road to prevent fire from progressing south towards Pyles Camp. Monitor fire behavior in the Freeman Grove while looking for indirect containment opportunities to the west. Monitor and manage fire effects to the extent possible in the Freeman Grove. Continue to construct and prep the indirect containment line from the Needles Lookout Road south toward the Ponderosa and east toward the 82 road. Monitor the southwest corner of the division, focusing on the east side of the Kern River.</p> <p>Purpose: Limit fire spread toward values at risk on the west side of the fire.</p> <p>End State: Private property and infrastructure is protected, natural resource impacts are limited, and there are no accidents or injuries to firefighters or the public.</p>									
Special Instructions

Work Assignments

Task: Utilize crews and heavy equipment to prep indirect lines for burn operations along the 21S02 Road from Beach Meadows to Lion Meadows trailhead. Continue to look for opportunities to go direct with crews and equipment on eastern finger of fire north of Beach Meadows. Monitor Div X-Ray from the air and utilize air resources as needed to keep green islands from impacting control lines west of H-4. Assess the need to insert personnel into H-4 if fire crosses containment lines. Assist with point protection as needed.

Purpose: Limit impact to values at risk on northern edge within wilderness, limit fire spread on eastern and southern edge of fire.

End State: Values at risk are not impacted by fire. The Spread of fire to the south and east is limited in divisions L / X X-Ray.

Special Instructions

- **A/G Tac for Branch Five: RX169.200, TX 169.200. This needs to be hand programmed.**
- Personnel to notify DIVS of potentially sensitive cultural materials.
- Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 staged at the Blackrock Ranger Station. Castle REMS 2 available to all branch divisions.
- Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments										
Task: Provide structure defense for the Lloyd Meadows and Pyle's Camp area by continuing mop up of the containment lines along Lloyd Meadow Road and the 67 Road. Continue to assist Division Y/Z with fireline construction and holding west of the Lloyd Meadow Rd and in the vicinity of the Freeman Grove. Complete fuels prep as appropriate near Peppermint Ranch, and initiate structure preparation on the T-T Ranch, Camp Whitsett and Forest Service Campgrounds. Provide mitigation and reasonable protection for nationally significant natural resources within the Freeman Grove. Assist Ponderosa Structure Group and/or Nelson Structure Group as directed by the Operations Section Chief or Branch Director Branch Director.										
Purpose: Protect values at risk from spreading fire by supporting perimeter control operations.										
End State: Values at risk and communities are able to operate in pre-fire condition accounting for public safety.

Work Assignments									
<p>Task: Support division Y/Z with control line prep along the 54 Road and Needles Road system. Implement structure defense plans for Ponderosa and adjoining communities. Support Lloyd Structure Group and/or Nelson Structure Group as requested by Operations Section Chief or Branch Director.</p> <p>Purpose: Protect values at risk from the impacts of wildfire emphasizing perimeter control as a primary plan.</p> <p>End State: Values at risk and communities are able to operate in pre-fire condition accounting for public safety.</p>									
Special Instructions									
<ul style="list-style-type: none"> Personnel to notify DIVS of potentially sensitive cultural materials. Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 stage at Blackrock Ranger Station. Castle REMS 1 available to all structure divisions. Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

Work Assignments
Task: Patrol and monitor accessible fire area, support water handling operations from prior shifts, mop-up as appropriate based on firefighter safety.
Purpose: Limit fire spread to additional values at risk.
End State: Fire spread limited to existing fire perimeter.

- Special Instructions**
- Personnel to notify DIVS of potentially sensitive cultural materials.
 - Castle Ambulance 3 staged at Whitsett Base Camp. Castle Ambulance 2 stage at Blackrock Ranger Station. Castle REMS 1 available to all structure divisions.
 - Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

AIR OPERATIONS SUMMARY 220		Prepared By: Dennis A. Morton		Prepared: 0911/2020		Prepared Time: 2000 hrs.	
1. INCIDENT NAME: SQF COMPLEX		2. OPERATIONAL PERIOD 09/12/2020		START TIME: 0800		END TIME: 2000	
				SUNRISE: 0637		SUNSET: 1906	

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.).

1. Assess mission complexity and the Benefit vs Risk of the mission.
2. Ensure visibility and winds are adequate to safely conduct flight operations.
3. Ensure safe vertical & horizontal separation between aircraft in smoky conditions.
4. Utilize check points and call in and out of the dips.
5. If you see a UAS on your division report it up the chain of command to Air Operations, it may or may not be a friendly!
6. Smoky conditions can hamper our aviation operations adhere to visibility limitations, and DO NOT be pressured into accepting a mission that you know or feel is unsafe!

(Terminate air operations at sunset... use last 1/2 hour for RTB. (exceptions allowed—communicate intent)

Incident Location SEQUOIA NF

County State CA Latitude N Longitude 3-7-77 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

MEDICAL PLAN (ICS 206 WF)
Controlled Unclassified Information//Basic
ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

Pre-Planning for today's assignment – See Page 2 IRPG

What are the likely hazards that could cause injuries? What kind of severe injuries?		
Who is the likely in-charge DIVS or overhead for an emergency in your assigned area today? (i.e. "Division Zulu")		
Who are the Medical personnel assigned to your part of the incident? What are their capabilities?		
Other Emergency Responders: fire dept, crash rescue, ambulance?		
Communications: Command channel, Air to Ground, Medical helicopters, local rescue/medical?		
Transportation methods available	Ground vehicle, drop point, coordinates, travel route?	
	Aircraft I.D, helispot names, coordinates? Hoist capable, internal transport	
	Other available methods - contingency	
Most likely workforce for evacuation		

Response checklist

Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and conduct rescues.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

Response sequence:

- First, secure the scene and protect responders and patients from further injury.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.
- Notify Communications to initiate Accident Action Plan response.

Information for Communications: (See Medical Incident Report, page 108, IRPG)

- Type and extent of injuries?
- Airway or breathing problems? Serious bleeding?
- Is an EMT present or needed? Are Paramedics (Advanced Life Support) needed?
- Specific location of patients (Lat/Long, access route, DP#, helicopter Landing Zone)?
- What type of transport is needed? Helicopter medevac, hoist, ambulance or ground transport?
- Name of contact person in charge of the scene.
- Do not use names of patients at any time.
- **Medical Emergency Responders confer with Medical Unit Leader and DIVS or designated Overhead to determine if this is a critical emergency and what type of transport is needed.**

HUMAN RESOURCE MESSAGE

There is zero tolerance for drugs and alcohol on this fire incident.

Some people might be too tired to smile, so give them one of yours.

Spend your life lifting people up, not putting people down.

Debby Hassel, HRSP (406) 274-7985

hrspfire@gmail.com

REMOTE CHECK-IN

1. Scan the QR code on front of IAP to access the fillable check-in form. If you are unable to scan the code, please call Status/Check-in at **858-204-7419** for assistance.
2. Email qualification cards, manifests, contract, AD paperwork to:
2020.castle.finance@firenet.gov

Are You a TRAINEE?

1. Scan these codes to access the fillable *trainee* information forms. Send photo of qualification cards and task book cover to: **heather.e.grove@usda.gov** or **matthew.boss@usda.gov**

Registration

Check-out

Exit Interview

2. Call Incident Training Specialist 530-394-8076 (Heather) or 951-314-1427 (Matt) with questions from 0600 – 2100 daily.

DEMOBILIZATION IS NOW REMOTE!!

Demobilization Steps:

1. ALL accountable property checked-out from the incident must be returned (i.e. communications, supply). Items may be returned at Whitsett Base Camp or ICP.
2. Submit all finance documentation (time must be projected for travel home).
 - a. BE SURE to call Finance 1 day prior to your scheduled DMOB to ensure time is complete.
 - b. Only 1 representative per resource should go to Finance at ICP.
 - c. Abide by scheduled DMOB time or call Finance for an unscheduled DMOB.
 - d. Government agency resources that would like to close out their time 100% remotely should call **949-591-4123** when they are close to their DMOB date and make necessary arrangements to complete the process.
3. Scan the QR code on the front of the IAP to complete the DMOB process and start your travel home. **DO NOT LEAVE the incident until you have confirmed with Demobilization Unit Leader at 951-235-1568. If you have questions, please call!**

EXTENSIONS & RR

- Extensions or RR's MUST be requested by your incident supervisor and approved by your home unit supervisor prior to being processed.
- Extensions forms can be obtained from DMOB or the plans representative onsite at Camp Whitsett.

FINANCE MESSAGE

OPTIONS FOR SUBMITTING TIME:

1. **Fillable PDF CTR/Shift Ticket:** QR code to the fillable forms are included below. If you do not have QR capabilities finance can e-mail you the forms directly.

2. **Hard Copy CTR/Shift Ticket:** Fill out a hard copy CTR, snap a picture and email/text that into finance. If you send in a picture, please make sure it is legible and includes the supervisor's signature at the bottom! Please make sure to include your phone number in the **Remarks** in case we have questions.
 3. OR you may turn in your actual hard copy as usual at Whitsett Spike Camp & Troy Meadow.
- Please try to submit time at least every other day
 - H-Pay justifications are still required on your CTRs – “H = Hazard Pay” is not sufficient

****CONTRACTED EQUIPMENT PLEASE CONTACT FINANCE IF YOU WANT TO START THE PROCESS OF AN INTERIM PAYMENT****

2020.castle.finance@firenet.gov

Finance Main Line: 949-591-4123

TIP:

*****In order to use fillable pdf forms, you must have some version of Adobe Acrobat downloaded on your device. If you have any issues opening the documents call finance for assistance. *****

FINANCE

S# PROCESS

FEDERAL RESOURCES ONLY

- **PROPERTY LOSS-REPAIR-REPLACE OF NON-NATIONAL FIRE EQUIPMENT SYSTEM (NFES) OR NON-STANDARD CACHE ITEMS**

- **CAN IT BE REPLACED AT SUPPLY?**

1. **General message is needed (ICS 213) with contact information NAME/PHONE #/EMAIL/RESOURCE ORDER # send to Supply at 2020.castle.ordering@firenet.gov**

- **IF YOU NEED AN S# FOR REPLACEMENT BECAUSE SUPPLY DOES NOT HAVE IT PLEASE DO THE FOLLOWING**

2. **General message is needed (ICS 213) with contact information NAME/PHONE #/EMAIL/RESOURCE ORDER #. A description of property damage or loss needs to be documented and pictures of damaged items. Please send to finance at 2020.castle.finance@firenet.gov**

3. **We have Comp/Claims on site! Please reach out to us with any questions at 406-363-8956 or 406-366-3724.**

Things to Know- Resource Message

SQF Complex 9/12/20

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command, or directly inform a READ.

Trash, Litter, and Food

- Please remove all trash, litter, and uneaten food from the fireline. This includes things like hose ties, flagging, and food wrappers.
- Food items left on the line or at camp attract wildlife and cause problems like bears or rodents in camp.

Sensitive Areas

- READs will be flagging sensitive areas during the incident.
- By default, please avoid going into these areas.
- The two flagging colors used are a strip of blue and a strip of red.
- For more information, please consult with a READ.

Keep Up the Good Work!

Continue to do good work for cultural and natural resources by doing the following:

- Picking up trash and litter.
- Removing unused flagging.
- Sharing information and working alongside READs.
- When moving on to a new area, leaving the old area better than you found it.

Tree Identification – Giant Sequoia vs Incense Cedar

Giant Sequoia – The namesake of the forest and the largest tree on Earth, the giant sequoia is an impressive tree. It does not have a very large cone. It is about the size and shape of a chicken egg. Its needles are similar to an incense cedar but are rounded and prickly to the touch. Sequoia bark is red and is soft and shreds easily.

Incense Cedar – Many mistake incense cedar trees for small giant sequoia trees. They, however, do not produce a traditional shaped cone. Instead their seeds are on six cone scales that form a pod-like cone that splits when it dries. Their needles, though scale-like, are flattened and not prickly. Their bark, though red like a sequoia, is hard and doesn't shred.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. <i>(WGS84)</i>
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
