SQF COMPLEX - INCIDENT OBJECTIVES

Strategic Framework

Implement a full suppression strategy on the Castle and Shotgun Fires. Values at risk include human safety, private property and residences, infrastructure, utilities, developed sites, facilities, Giant Sequoia groves and archaeological and cultural sites. Apply tactics that offer the highest probability of success.

Leaders Intent

Provide the highest level of customer service to all involved with, or impacted by, the Castle and Shotgun Fires. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct and timely/effective communications.
- Personal safety and the safety of others, includes driving slowly, safely and defensively.
- Fatigue management by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing module of one concept.
- Effective management of incident costs by planning strategies and tactics toward a high probability of success in meeting incident objectives.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Reduce the threat to private property, residences and infrastructure through the application of effective suppression tactics.
- Reduce the impacts to Wilderness values by ensuring minimum impact suppression tactics (MIST) are applied. Utilize historic fire control lines, trails, streams, ridges and natural barriers when possible for control lines.
- Coordinate suppression activities with assigned incident resource advisors to minimize adverse effects to natural and cultural resources, on riparian areas, watersheds, Spotted Owl and Goshawk PACs, Fisher, Little Kern Golden Trout, Mountain Yellow Legged Frog, and Sierra Nevada Bighorn Sheep Habitats.
- Mop up as safety allows to reduce the threat of fire spread outside of containment lines.
- Conduct suppression repair activities to prevent long term damage to resources.
- Utilize suppression resources in the removal of fuel hazards in support of community repopulation.

Control Objectives

To prevent the fires from spreading to private property, surrounding communities, and values at risk, keep the fire:

- North of Durrwood Camp and the Tule River Reservation to protect communities and infrastructure along the Kern River and within the Reservation.
- West of Toowa Range to Kingfisher Ridge to 22S05 Road to protect recreational and administrative infrastructure.
- South of Mineral King Road to Lost Canyon to Whitney Meadow to limit fire growth to the north.
- East of Springville to Blue Ridge to South Fork to protect communities west of the fire.

FIRE WEATHER FORECAST

FORECAST NO: 43
PREDICTION FOR: Oct 5-6, 2020 0700-0700

INCIDENT NAME: SQF Complex

UNIT: CA-SQF
SIGNED: *Phil Manuel*

TIME AND DATE

FORECAST ISSUED: Sun, Oct 4 @ 1800 hours **Incident Meteorologist** – Phil Manuel

WEATHER DISCUSSION: High pressure over the area will gradually weaken this week with temperatures cooling a few degrees each day. In spite of the cooling, it will remain dry. There will also be scattered cloud cover, mainly high level cloudiness (thin cirrus) associated with an upper level low along the California coast. Transport winds aloft are still extremely light, favoring high concentrations of smoke. Transport winds are expected to increase by mid-week allowing for better ventilation and transport of smoke out of the area. A strong cold frontal passage is expected for the weekend.

SKY/WEATHER TODAY (MONDAY): Partly Cloudy. Continued smoky. Valley inversion lifting between 1000-1100, but expect a subsidence inversion aloft to maintain smoky conditions.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

| | |
|-----------------|---|
| 3000 FT: | 84 to 89 degrees (Down 1-2) / 14 to 18% (Little Change) |
| 5000 FT: | 82 to 87 degrees (Down 1-2) / 12 to 15% (Little Change) |
| 7000 FT: | 70 to 75 degrees (Down 1-2) / 9 to 13% (Little Change) |

20-FT WINDS:

Slope/Valley: Winds upslope/upvalley 4 to 8 mph gust up to 15 mph in the afternoon.
Ridges: Northeast 2 to 5 mph until 1000. South 4 to 8 mph 1000-1400. West 6 to 12 mph with gusts 17 mph after 1400.

FIRE BEHAVIOR

GENERAL: Once again a smoke blanket will moderate the fire behavior. Most of the fire continues to be in a backing alignment where there is open line. All fuels are available to burn and will be receptive to spotting. Expect single and group tree torching in the denser stands of timber and brush fields in the interior. Spotting distances will be short to mid range 100 to 200 feet. Rates of spread on slopes will be 8-12 chains per hour with 4-8 foot flame lengths in the timber. For backing fire, multiple forward rate of spread by .3. If you see clear skies expect the fire behavior to increase.

Branch I: No forward fire progression expect mainly smoldering and creeping in the interior. Some interior heat still exists but is not expected to challenge containment.

Branch II: Most of the Branch is in a backing alignment. In Div D there is some heat near the line above DP 60. Keep a heads up for short intense runs, watch the column direction as an indicator for potential spot fires. Div T potential for reburn still exists. For crews working the north end the fire, the fire will continue to slowly back into the Kaweah River drainage. As the fire gets closer to the river keep a heads up for spot fires across the drainage.

Branch III: The fire has backed down to and spotted across the South Fork of Kaweah. In Div. U the fire has the potential to will make a slope aligned run towards Homers Nose. Rock screes will slow fire spread however there is a significant amount of bug kill timber on the upper third of the slope which will increase spotting and the potential for crown runs. Expect smoke to limit air operations.

Night: Expect the fire to remain active in thermal belts or until the RH recovers above 25-30%. In Branch II expect the RH to drop after midnight and fire behavior to increase in the interior.

AIR OPERATIONS

Inversion layer with smoke will be present until at least the 1000-1100hr time period.
Do not base your plan on air they might not be able to get there.

SAFETY

Fire will become active at RH% below 25% and clear skies. Slope and heavy fuels will enhance fire intensity.

Remember tragedies often occur on quite sections of line.

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):

- Smoky conditions can hamper our aviation operations adhere to visibility limitations, and DO NOT be pressured into accepting a mission that you know or feel is unsafe!
- Ensure visibility and winds are adequate to safely conduct flight operations.
- Ensure safe vertical & horizontal separation between aircraft in smoky conditions.
- Utilize check points and call in and out of the dips.
- If you see a UAS on your division report it up the chain of command to Air Operations. It may or may not be a friendly!
- Assess mission complexity and the Benefit vs Risk of the mission.

(Terminate air operations at sunset...use last 1/2 hour for RTB. (exceptions allowed—communicate intent))

SQF COMPLEX Safety Message

October 5, 2020 - OCTOBER 6, 2020

As the pace slows down and activity lessens, we tend to get complacent. Complacency leads to compliance and compliance leads to loss of **active** leadership. If you take a second to think about it, everything about **complacency** is opposite of **leadership**.

Leadership inspires energy; **complacency** saps energy.

Leadership enlivens attitudes; **complacency** dulls them.

Leadership energizes you to think hard; **complacency** is a brain drain.

Leadership challenges you with high expectations; **complacency** is content with "good enough."

So, to help fight complacency today, ask yourself these following questions:

1. What is the leadership decision I need to make today that will ensure that I will finish my shift in a truly accountable manner?
2. What task must I live up to today so that I am ensuring to leave my division/taskforce/strike team/crew in a stronger place?
3. What hard work must I tackle head-on? Is there a tough conversation I need to have, but have been avoiding?
4. Finally, what relationships could I build in this organization with a peer or colleague so that we can work more effectively together?

If you are complacent, chances are you are not doing this sort of stuff and it is making you weaker as a leader.

Complacency Kills! Be a leader not a bleeder!

Poison Oak Treatment

Poison oak has poisonous sap (urushiol) in its roots, stems, leaves and fruit.

Urushiol is what causes the itch and rash.

- Wash exposed areas with soap and water within 10 minutes of being exposed (if possible)
- Go to medical and get treatment
- Shower and wash, trade in your clothes to keep from getting re-exposed. Once the sap is in your clothing/gear/boots it can sit for weeks/months if you do not clean them.

INCIDENT MESSAGE BOARD

Human Resource Message

When is a Joke – Not a Joke?

1. When it embarrasses someone,
2. When it is negative humor,
3. When it is a put-down because of sex, race, color, National origin, age, religion, mental or physical handicap or sexual orientation.

Humor and fun need to be part of our teamwork picture, but not when it is at the expense of others.

Communications

The Communications Shop has a new phone number! Keep in touch!

949-330-9979

If you are from a state that requires a COVID test prior to re-entry please call the COVID information line (**601-376-8273**), or email vinci.keeler@usda.gov at least 48 hours prior to demob.

The **Demob Process** includes turning in all of your checked-out equipment (including anything from Supply and Communications), getting inspected at Ground Support (if needed according to your resource type and agency affiliation), completing a finance package, and completing the travel information on the Demob Form QR code. **If you skip a step, you will not be released from the incident!** For more instructions, see the pages related to Finance and Demob in this IAP.

Training Specialist Message

The Incident Training Specialist will be performing duties remotely.

ATTENTION: If you registered with the TNSP before CIIMT2 arrived (9/23), you need to re-register. Sorry for the inconvenience.

To ensure proper documentation for your assignment:

- Scan the incident QR Code
- Go to the Training Folder
- Complete the Trainee Registration Form

At the end of your assignment:

1. *Trainee:* Complete the exit interview found in the Training Folder. Use the incident QR code to access the document.
2. *Trainer:* Fill in the Position Task Book as completely as possible for this incident.
3. *Trainer:* Complete the ICS-225 Performance Evaluation and discuss with your Trainee. Make sure it is signed by both the Trainer and the Trainee. Take a picture/copy of the ICS-225 and email it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided.

For training-related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email to imt2training@gmail.com.

Federal Interagency and Tribal Lands Suppression Repair Guidelines

Scan QR code for detailed Suppression Repair Plan

Fire Line

- Restore natural contour.
- To prevent erosion: construct waterbars, pull back vegetation with excavator, use straw bale, etc.
- De-compact fire line, pull back vegetation with excavator.
- Attempt to conceal or hide the entrance & exit using the landscape & available materials.
- To prevent access to Off Highway Vehicles (OHV) where fire lines intersect roads or trails, block intersections with large rocks, large trees, or walls of brush.
- Concentrations of slash along commonly used areas such as roadways, developed recreation areas, & structures should be chipped & dispersed.

Heli-spots, Drop Zones, Sling & Medi-vac Sites

- Use standards like fire line repair to repair these activity areas. If available, use cleared vegetative material for soil cover. Place waterbars where appropriate.

Line in or through Watercourses

- Restore preexisting streamflow & remove any deposited debris not present before suppression.

Water Drafting Sites

- Restore water sources used or developed as draft sites to original condition. Remove any dams, dikes, or other impoundments created for fire suppression activities. Backhaul any trash.

Concentrations of Slash

- Concentrations of slash created by fire suppression activities along commonly used areas such as roadways, developed recreation areas, & structures should be chipped & spread across the landscape. Chip piles should not exceed six inches in depth. Lop & scatter concentrations of slash not to exceed 18 inches in height.

Roads

- Road repair should follow the existing design of the road prism. Repair damage to pavement, gates, cattle guards, & culverts. Remove soil pushed into cattle guards.
- Remove all slash & debris created by fire suppression from culvert inlets and outlets.
- Clean & grade ditch lines, rolling dips, & lead off ditches to repair function.

- Physically close off all unauthorized routes/roads opened during suppression
- Place rocks / logs to disguise the entrance to prevent unauthorized OHV.

Litter, Trash, and Flagging Removal

- Remove all litter, trash, & flagging from all suppression areas; this includes micro-trash.

Wilderness & Wilderness Study Areas (WSA)

- Areas of fire suppression in wilderness will follow many of the *General Repair Guidelines* previously discussed, but with an emphasis on restoring wilderness aesthetics & characteristics. One way to think of this is to “make it look like we were never there.”
- The use of mechanized equipment may require special authorizations to repair the area. Verify with the appropriate land manager before use of equipment in wilderness or WSA's.

Tree Disposal from Dozer-lines & Roadside Hazard Mitigation

- Reduce fuel loadings along access roads, accessible dozer-lines & cleared areas following suppression.
- Fallen trees will be yarded & decked.
- Do not stockpile fuels against standing live or dead trees.
- Locate decks in disturbed areas where trees can be safely processed.
- Use low impact machinery on improved surfaces.
- Locations for roadside hazard tree & fire line tree disposal will be determined by assigned Resource Advisors or agency personnel.
- The locations will be recorded on the Suppression Repair Map, which will be provided to the assigned Equipment Managers & equipment operators completing this work.
- Do not enter known archeological sites with heavy equipment or skid logs across arch sites.
- Felled trees within archaeological sites must be left in place unless they can be removed without skidding (i.e. full suspension).
- Where it is feasible, equipment can reach into an arch site and pluck the tree (or portion of a tree) up without skidding.
- If it is necessary for equipment to pass through a known site, raise the blade or other attachments while within the site boundaries.

Contact Agency Personnel or Resource Advisors with any questions or for additional solutions.

REMOTE DEMOB PROCEDURES

We are doing a remote demob of resources; **please complete all steps below on your smart phone/tablet and through email.** There will be no ICS-221 for you to obtain physical signatures; the ICS-221 will be completed in a virtual environment.

After your supervisor makes you available for demob:

Step 1: On the date you are scheduled to demob, ensure all supplies and equipment are returned to **SUPPLY** and **COMMS**, as appropriate.

Step 2: Email your remaining CTRs and shift tickets to **FINANCE**, including the travel day CTR and shift ticket, to 2020.castle.finance@firenet.gov. Please be prompt in submitting your final finance package; you will not be released from the incident until you get the final documentation and Finance notifies Demob.

Step 3 (Only applies if you are at Porterville-ICP): Proceed to **GROUND SUPPORT** for vehicle inspection. AFTER inspection, proceed to **WEED WASH** (adjacent to Ground Support). Additionally, visit **FINANCE** to close your financial package.

Step 4: Scan the QR Code below, click on "Demob Folder" and enter your DEMOB travel information in the form provided.

Failure to follow all of these steps will keep you attached to this fire and subsequently unavailable for future fires.

Note: Email all non-finance documentation to 2020.castle.plans@firenet.gov (Unit Logs, ICS-213s, etc.). Take a picture and attach to email.

Questions? Contact DEMOB at 951-235-1568.
