FRENCH FIRE

CA-CND-002796

N8RA

Thursday

Forever Legend

LA

OPERATIONAL PERIOD

9/2/2021 0600

to

9/3/2021 0600

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: French Fire	2. Operational Period:	Date From: 9/2/2021	Date To: 9/3/2021
		Time From: 0600	Time To: 0600

3. Objective(s):

- Management Objectives**
- Provide for the safety of firefighters and the public through utilization of strategic and deliberate risk assessment processes. Ensure incident within an incident protocols are established.
 - Develop and implement operational objectives based on identified values at risk and highest probability of success limiting fire spread.
 - Follow established guidelines and mitigations regarding COVID and other infectious diseases.
 - Enhance relationships through timely communication and active involvement with the public, stakeholders, and cooperators.
 - Coordinate with the READ's to ensure natural, cultural, and historical values are protected.
 - Maintain fiscal responsibility keeping cost commensurate with the values at risk.
 - Provide initial attack response to new fire starts within the TFR boundary. Assist with initial attack efforts outside the boundary as requested.

- Control Objectives**
- Keep the fire north of Keysville to Lackey Place.
 - Keep the fire south of its currently identified perimeter.
 - Keep the fire east of White Mill Road to 25S01 Road.
 - Keep the fire west of its currently identified perimeter.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees with historic mining in the area.

All persons must wear a mask indoors at all times regardless of vaccinated status, as well as outdoors when physical distancing cannot be maintained.

Maintain a module as one, wash your hands, and sanitize surfaces.

5. Site Safety Plan Required? No

Fire Weather Forecast

FORECAST NO: #12
PREDICTION FOR: Thursday
OPERATIONAL PERIOD: September 2 2021
FORECAST ISSUED: 9/1/2021 at 1900

INCIDENT: French
UNIT: Central California District Office
Incident Meteorologist: Robert Rickey

Weather Discussion: For today, expect a round of very dry and breezy conditions, with afternoon humidity as low as 10% below 5500 ft. Above 5500 ft, the lowest humidity will occur during the morning, with gradually increasing humidity throughout the day. For tonight, ridgetop winds will decrease after 2000, with typical downslope/down-valley winds within drainages. Expect poor overnight humidity recoveries at all elevations. Above 5500 ft, the highest humidity will occur during the late evening, before dropping to around 20% during the morning hours. Below 5500 ft, the highest humidity will occur during the early morning hours like normal, but humidity may not rise above 30%. Very dry conditions will persist on Friday and Saturday, but winds will be lighter.

WEATHER FORECAST

Today:

Weather: Sunny and hazy.

High Temperatures: Above 5000 ft: 73-79 Below 5000 ft: 80-86

Above 5500: 10-16% in the morning. Increasing to 28-35% through the day.

Below 5500: 9-15%

20 FOOT WINDS:

Ridgetops: W 4-8 mph through 1200. After 1200, WNW 11-17 mph gusting 21-27 mph.

MidSlope/Valleys: Upslope 5-10 mph until 1300. After 1300, W/down-canyon 11-17 mph gusting 21-27 mph.

Chance of Wetting Rain ($\geq 0.10''$)...0% LAL...1 Haines Index...3 (Very Low) Inversion Lift...1100

Mixing Height...5,000 ft AGL Transport Wind...W 10 mph in the morning, WNW 20 mph in the afternoon

Tonight:

Weather: Clear and hazy.

Low Temperatures: 58-64

Max RH:

Above 5500: 28-35% during the late evening. Decreasing to 18-24% by the morning.

Below 5500: 20-26%

20 FOOT WINDS:

Ridgetops: WNW 11-17 mph gusting 21-27 mph through 2000. After 2000, NW 5-10 mph.

MidSlope/Valleys: W/down-canyon 11-17 mph gusting 21-27 mph through 2000. After 2000, down-slope/down-canyon 4-8 mph.

Chance of Wetting Rain ($\geq 0.10''$)...0% LAL...1 Haines Index...3 (Very Low)

Outlook for Friday:

Weather: Sunny and hazy.

High Temperatures: Above 5000 ft: 74-80 Below 5000 ft: 81-87

Min RH: 9-15%

Ridgetops: W 4-8 mph through 1400. After 1400, WNW 5-10 mph gusting 15-20 mph.

MidSlope/Valleys: Upslope 4-8 mph until 1400. After 1400, W/down-canyon 5-10 mph gusting 15-20 mph.

Chance of Wetting Rain ($\geq 0.10''$)...0% LAL...1 Haines Index...3 (Very Low)

Extended Outlook for Saturday:

Weather: Sunny and hazy.

High Temperatures: Above 5000 ft: 78-84 Below 5000 ft: 85-91

Min RH: 10-16%

Ridgetops: W 4-8 mph through 1400. After 1400, WNW 5-10 mph gusting 15-20 mph.

MidSlope/Valleys: Upslope 4-8 mph until 1400. After 1400, W/down-canyon 5-10 mph gusting 15-20 mph.

Chance of Wetting Rain ($\geq 0.10''$)...0% LAL...1 Haines Index...3 (Very Low)

Nearby Observations

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: Vegetation
FIRE NAME: French	OPERATIONAL PERIOD: Sept 2 nd 24 Hour
DATE ISSUED: September 1 st	TIME ISSUED: 2000
UNIT: CND/SQF French	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

Fire areas include a range of conifer systems in the upper elevations above 5000', transitioning into scrub oak, sage, and annual grasses on the eastern slope down to Lake Isabella. Areas to the West of the fire transition from timber up top to a mix of chaparral, Oak and annual grass understory. Anticipate heavy fuel loading, drought stress, bug kill, and a lack of fire history throughout the fire area, with some grazing to the West of the Forest boundary.

The area is currently classified as 'Exceptional' drought by the US Drought Monitor, with Energy Release Components exceeding the 90th percentile, not far off all time high levels. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day. Fine dead fuel moisture is calculated at 3% or less.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u>	Fuel Type/Model	Maximum SURFACE Rate of Spread (chains/hour)	Maximum Flame Length (feet)
Grass/Shrub 0.3 miles Timber/Heavy brush 0.5 miles	Timber litter and understory TU5/TL6	Head 15-20 ch/hr Flank 10-15 ch/hr	Head 11-15 ft Flank 6-10 ft
<u>Probability of Ignition</u> 85 %	Grass/Shrub GS2/SH5	Head 50-70 ch/hr Flank 30-40 ch/hr	Head 12-15 ft Flank 8-12 ft

Another day of near critical fire weather conditions for the fire.

Div. A/E As the fire backs down from timber into a heavy brush fuel model, in places its only burning the understory and has potential to reburn as a slope driven run in the canopies. Terrain heavily influences direction of travel for these upslope runs. Afternoon winds are primarily upslope/SW but expect squirrely winds along the bottom of the drainage.

H/K Gusty winds and low RH will put these areas to the test yet again, but great job in this very rough terrain with extensive snag challenges.

Alta Sierra/Wofford Structure Groups Drought stressed vegetation and soils will create long term smoldering and creeping with the occasional torching/spotting event within the communities.

Div. M/N Limited spread potential remains with all the good work securing these divisions, but gusty afternoon winds could support rapid spread rates outside containment lines.

O/R Lots of good work on the ground has halted fire spread; be heads up for interior spotting lofting embers across lines as well as fire weakened trees in work areas.

Div. Y Critical holding piece is holding due to the strong work and good decision making of Night/Day resources. Long duration burn down of fuels will keep the threat of SE movement up if gusty NW winds surface again today.

Div. Z Active backing supported by the clean, dry, gusty winds from the West. Watch for fires to find sideways alignment that could spot moderate distances over containment lines and push towards and below Divisions Alpha and Yankee.

Night Divisions: Focus area will likely again be the SW portion of the fire with daytime spread rates and spotting distances until the winds let up or RH recovers.

AIR OPERATIONS:

Anticipate smoke to clear enough to support air missions by 1000 or earlier

SAFETY:

Transition is occurring- help the incoming Divisions build SA in our highly complex fire environment so they can keep the good momentum going.

Health & Safety Message

Incident: French Fire CA-CND-002796	Date/Op Period: Day/Night Shift 9/2/2021 to 9/3/21
---	--

FRENCH FIRE HAZARDS RECAP

Since August 18th, you have been faced with these HAZARDS:

Hazard Trees, Mine Shafts, Extreme Fire Behavior, Steep Terrain, Rocky Terrain, Inaccessible Terrain, Steep Roads, Winding Roads, Extreme Weather Conditions, Rolling Rocks, Rolling Logs, Burned Out Snags, Fatigue, Firing Operations, Heavy Equipment, Night Flying Operations, Structure Protection, Evacuations, Wildlife Encounters, Poison Oak, Ash Pits, Stump Holes, Extended Shifts, Heavy Smoke, High Temperatures, COVID, Camp Crud, Spot Fires, Crown Fire, Retardant Drops, Water Drops, TFR Incursions, Laser Flashes, Communication Problems, Boring Safety Officer.....

The List Goes On! Renew your commitment to Safety for yourselves and your fellow crewmembers every shift.

Transition Days Ahead: With demobilization of personnel and equipment underway along with a transition of command in the coming days, it can be easy to get lost in the shuffle and be unclear on your work assignments. Pay attention to briefings and study you IAP closely. If in doubt, ask questions. Be sure to understand the Who, What, Where, When of your assignment.

Chipper Operations: Loud, noisy chippers can be a distraction. Assign cutters, draggers & feeders of the beast. Watch where the chip-spray nozzle is being pointed. Have traffic control in place and road guards posted if working along a roadway. Be careful of loose clothing!! Wear all your PPE, especially eye and hearing protection. Use a trained and qualified operator.

6. Work Assignments:
 Task: Hold and improve existing control lines from the Y/R and Y/Z division breaks. Mop up and secure to the extent necessary to keep the fire within existing containment lines.
 Purpose: To identify and secure any heat sources that could threaten existing control lines.
 End State: Values at risk and fire perimeter are secured.

7. Special Instructions:
 Red/white candy striped flagging represents natural or cultural resource areas to be avoided by dozers. Please contact the REAFs in the field or the lead READ for questions or any additional information needed.
 Utilize REAF's to identify mine hazards along the 26S04 Rd to Bradshaw Rd and North to Borderline Rd.

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2nd - 3rd burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2nd - 3rd burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication :

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Nick Stepanian @ (909) 908-4778

MEDL (T) Brandon Bennewate @ (805) 813-3858

The only Weed allowed is a visit to Weed, CA.
Just a reminder that even though marijuana may be legal in the state of California. While employed and working a Federal incident, you are not allowed to make use of it or visit any dispensaries.

Patrick Aceves

FRENCH FIRE COVID TESTING CLINIC

Location: 7158 Lake Isabella BLVD.
Lake Isabella, CA 93240

Daily Hours of Operation: 07:00 – 12:00 and 15:00 – 19:00

What to expect:

- Wear your mask at all times.
- Be ready with Resource Number upon arrival.
- Estimated Time at Testing Location: 1 hour
- Guided testing: You will be guided through the self-test process
 - Results in 15 minutes after sample is collected
- Provide patient information using registration link below (required for reporting to California Public Health).

PRE-REGISTER HERE

<https://forms.gle/qEzVeb69bHGhj8DP7>

** Free testing is available for individuals assigned to this incident.

Suppression Repair Plan – French Fire

1. OBJECTIVES:

To minimize resource impacts and return the areas affected by suppression efforts to conditions like those that existed prior to the incident. The major concern is potential erosion resulting from the construction of dozer lines.

2. REPAIRS:

Dozer Line: Dozer line constructed on existing roads and trails should have rolling dips re-established according to the standards below. Dozer line constructed off roads and trails should have water bars. Rolling dips for dozer lines should be constructed by unless otherwise directed by a Resource Advisor (See Figures below). Sediment basins should be repaired or reconstructed if damaged. Where dozer lines intersect roads, construct large, non-OHV accessible water bars, and spread brush/fell snags across line for 200ft. away from intersection to discourage OHV use of the dozer line. For dozer line located more than 200ft. from roads brush should be pulled back onto the line to prevent erosion.

Handlines: Construct water bars according to the standards below. Underslung handlines do not require rehabilitation. Where handlines intersect roads, construct non-OHV accessible water bars, and spread brush/fell snags across line for 200ft. away from intersection to discourage OHV use of the handline.

Hazard Trees: Fell and lop-scatter or chip hazard trees along roads within the fire perimeter.

3. STANDARDS AND GUIDELINES

Rolling Dips

- Drain should be relatively flat in relation to existing grade, allowing water to slow down and drop sediment before it exits the trail
- Drain should be out-sloped 2%-5% to drain effectively.
- Sediment basins for flow dispersal devices may be necessary to prevent erosion.
- Both the drain and berm should be nearly square (90 degrees) to the direction of travel.
- The intent is to create a drainage structure that the vehicle flows through rather than one with abrupt changes in grade that the vehicle must negotiate.

PERSPECTIVE VIEW

NOTE: Construct dips perpendicular to trail.

Water Bars: When locating and building water bars, place them the right **distance** apart (see chart below), at a **diagonal** to the fire line, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them high enough to be durable.

Fireline Slope	Max Waterbar Spacing
20-40%	50 feet
>41%	25 feet

- Install water bars on all fire lines with slopes greater than 20%.
- Space a maximum of 50 feet on slopes 20-40%, and max 25 feet apart on slopes greater than 41%.
- Minimum height for dozer lines 18"-24"; minimum height for handline 10"-15".
- Where feasible, drain into the unburned area.
- Where feasible, place water bars at points where energy from the water can be effectively dissipated, (e.g., rocky areas, heavy brush, etc.).
- Keep the ends of water bars open to allow water to flow out and distribute over the undisturbed area.
- Where water bars drain toward a creek, place slash or rocks downhill of the outlet to help dissipate energy and filter sediment.
- Logs, rocks, and other material (if available) can be used to dissipate the water diverted by the water bar. Use primarily those logs and rocks that have been disturbed during hand line or dozer line construction.

Other Repair Standards

- Berms: Pull berms back onto the line (except in areas to prevent OHV trespass). Avoid channeling water.
- Brush Piles: Break-up piles and scatter over the line if appropriate. Chip piles located along roads and trails. Do not chip into ditches, culverts or other locations that will clog or block drainage features other than to dissipate energy as water leaves the feature
- Safety Zones, Staging Areas, and Heli-spots: Pull soil from berms back onto the disturbed area. Spread brush over the area to provide a seed source and provide cover.
- Water Sources: Remove dams, restore as needed.
- ICP/Base Camp and Heli-base: Restore Camp 9 and any other spike camps to conditions like those that existed prior to the incident, complying with any land-use agreements that apply.

Fire Information

California Team 12 - Fire Information is at your service. Not only do we provide service and information for our public during an incident but, we also provide a service to our Team, and all the personnel assigned. These services include and are not limited to the following:

Lost and Found: If you have lost it and someone has found stop by our trailer up front by security and claim it. Let us know that you lost something come by, fill out an S213 with your contact information and if it is found and brought to us we will contact you.

Mail: CAIIMTeam-12 can/will provide mail services for you during your

deployment: If you need to send or receive mail, please see the change in mailing address below. Sending letters or cards to your loved ones or mailing bills. Please, stamp your mail and it will be taken to the Post Office for you, if you don't have a stamp, we will provide one.

The mailing address is:

**Name and Resource Order – or crew name
C/O CAMP 9
8547 Sierra Way
Kernville, CA 93238**

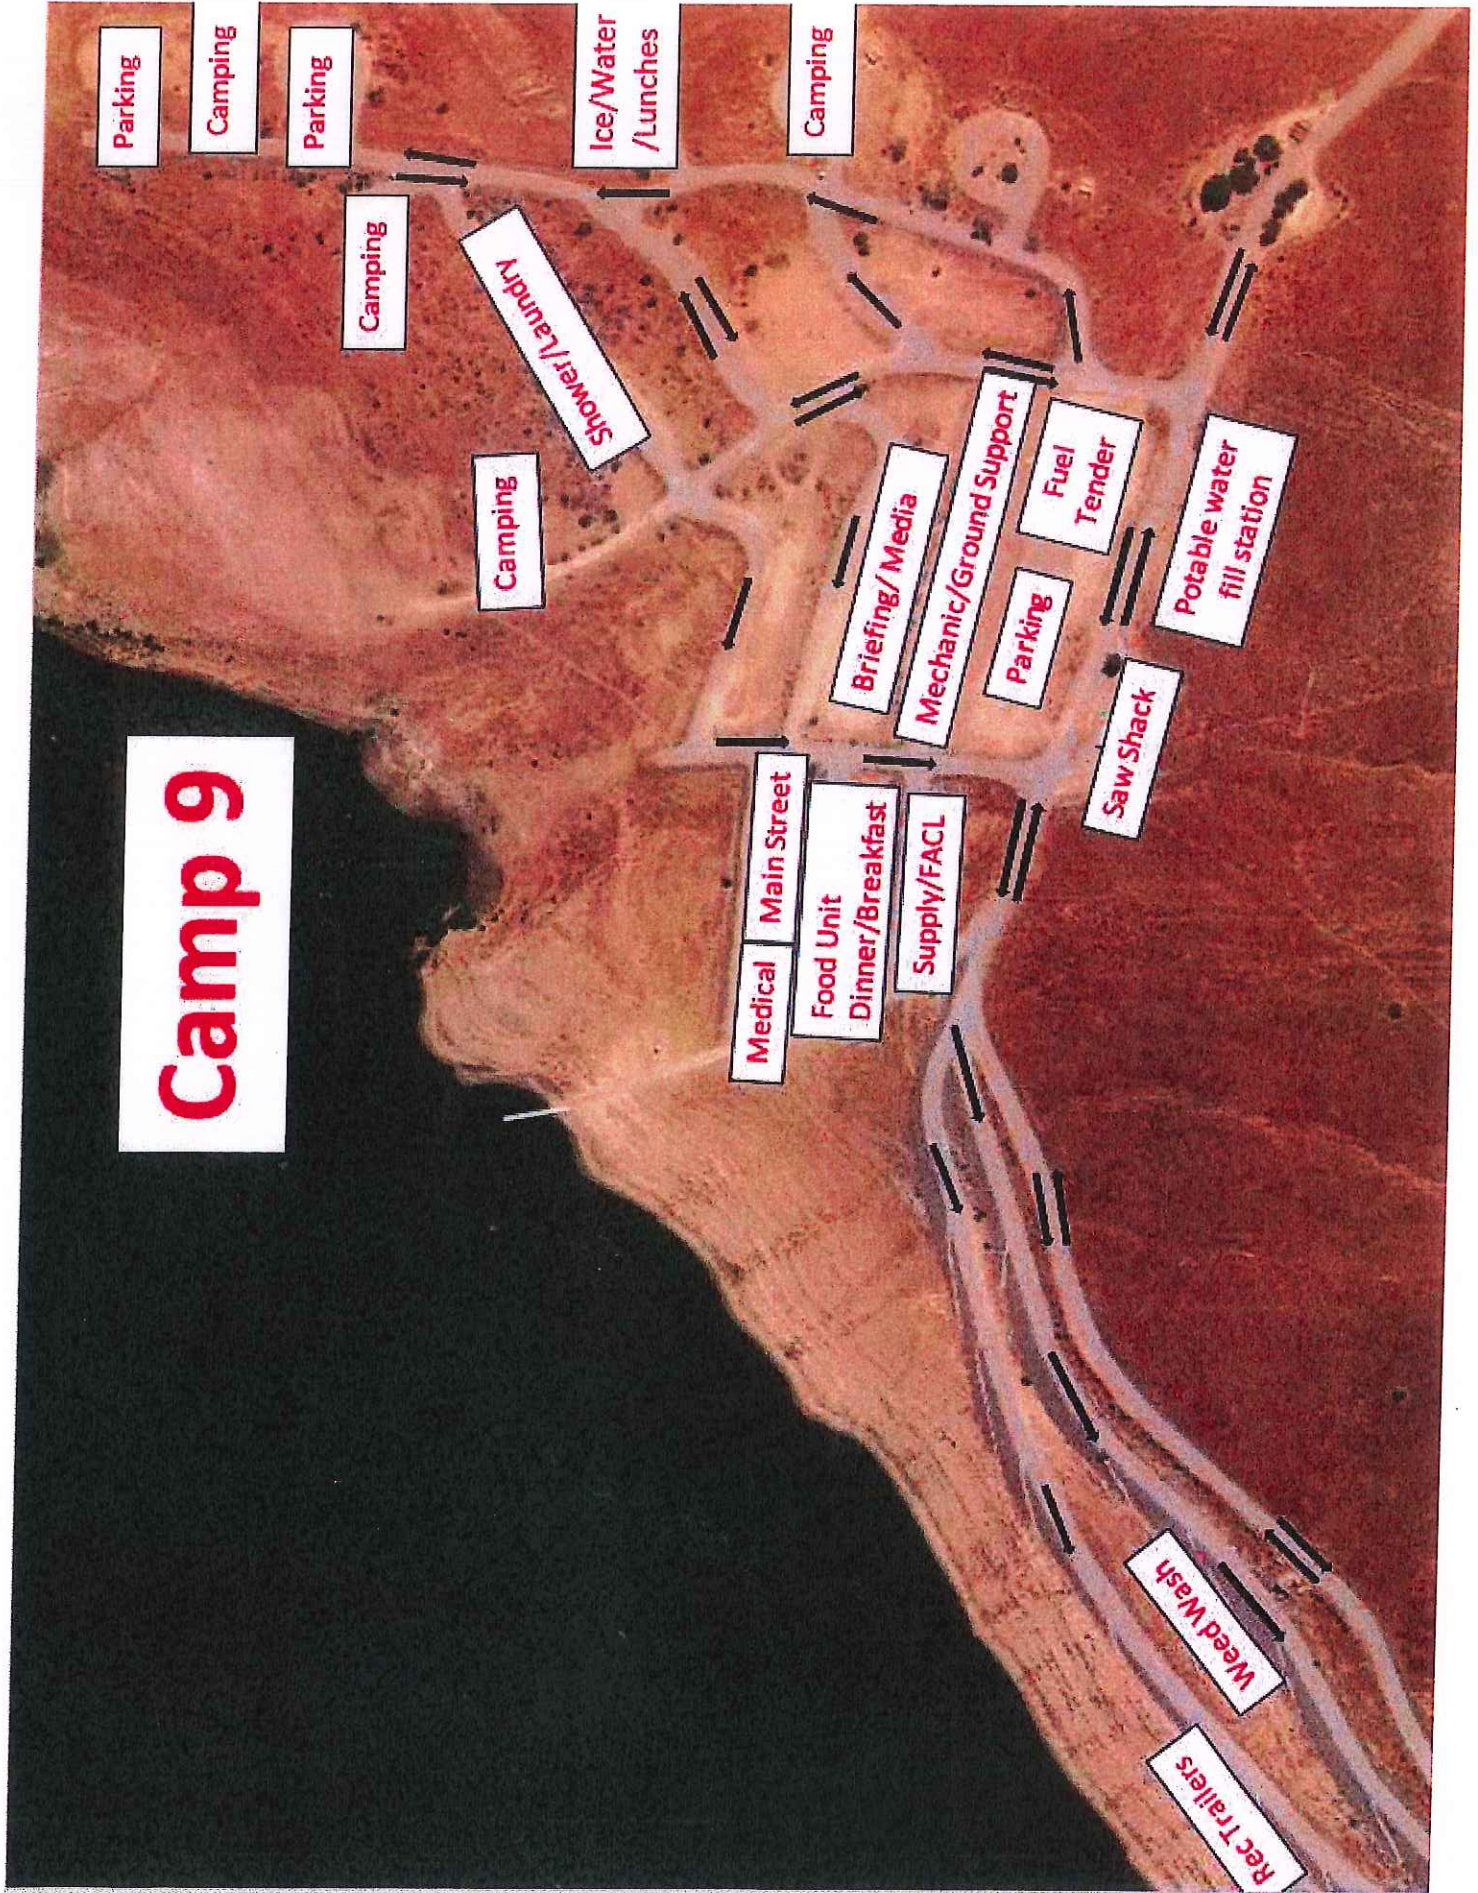

Photos: To help us tell the story of the **FRENCH FIRE** and we appreciate photos but, **please do not** lose your situational awareness just for that one photo.

You can bring the photos by our shop or email them to: 2021.French@firenet.gov

THANKYOU FOR YOUR SUPPORT and BE SAFE OUT THERE... 10's & 18
