

INCIDENT ACTION PLAN

FRENCH FIRE

CA-CND-002796

N8RA

Tuesday

OPERATIONAL PERIOD

8/31/2021 0600

to

9/1/2021 0600

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: French Fire	2. Operational Period:	Date From: 8/31/2021 Time From: 0600	Date To: 9/1/2021 Time To: 0600
---	-------------------------------	---	------------------------------------

3. Objective(s):

- Management Objectives**
- Provide for the safety of firefighters and the public through utilization of strategic and deliberate risk assessment processes. Ensure incident within an incident protocols are established.
 - Develop and implement operational objectives based on identified values at risk and highest probability of success limiting fire spread.
 - Follow established guidelines and mitigations regarding COVID and other infectious diseases.
 - Enhance relationships through timely communication and active involvement with the public, stakeholders, and cooperators.
 - Coordinate with the READ's to ensure natural, cultural, and historical values are protected.
 - Maintain fiscal responsibility keeping cost commensurate with the values at risk.
 - Provide initial attack response to new fire starts within the TFR boundary. Assist with initial attack efforts outside the boundary as requested.

- Control Objectives**
- Keep the fire North of Keyesville while providing for structure defense where appropriate.
 - Provide structure defense to the communities of Alta Sierra, Wofford Heights, and other mountain communities while keeping the fire south of the Tulare County line.
 - Keep the fire East of Granite Road while providing for structure defense where appropriate.
 - Provide structure defense to the communities of Kernville, River Kern and other mountain communities while keeping the fire west of Highway 155, Burlando Rd. and Sierra Way Mountain Highway 99.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees with historic mining in the area.

All persons must wear a mask indoors at all times regardless of vaccinated status, as well as outdoors when physical distancing cannot be maintained.

Maintain a module as one, wash your hands, and sanitize surfaces.

5. Site Safety Plan Required? No

Fire Weather Forecast

FORECAST NO: #10
PREDICTION FOR: Tuesday
OPERATIONAL PERIOD: August 31 2021
FORECAST ISSUED: 8/30/2021 at 1900

INCIDENT: French
UNIT: Central California District Office

Incident Meteorologist: Robert Rickey

Weather Discussion: For today, subtropical moisture will slide into the area associated with the remnants of what was Tropical System Nora. This moisture will bring increasing cloud cover and a 20% chance of VERY light rain showers to the area. Despite that, strong west to northwest winds and afternoon humidity near 15% will bring a round of **near critical fire weather conditions** to the fire during the afternoon and early evening. Winds will be a bit stronger than yesterday, with some gusts above 30 mph possible. Although it's very unlikely, if a stray shower does move over the fire, gusty winds from erratic directions is possible. There is no chance for lightning or wetting rainfall.

WEATHER FORECAST

Today:

Weather: Partly cloudy in the morning, becoming mostly cloudy in the afternoon with a 20% chance for rain showers. Expect gusty and erratic winds in the vicinity of any virga or light rain showers.

High Temperatures: Above 5000: 78-84 Below 5000: 85-91

Min RH:

Above 5500: 21-27%

Below 5500: 14-20%

20 FOOT WINDS:

Ridgetops: WNW 6-12 mph through 1300. After 1300, NW 14-20 mph gusting 26-32 mph.

MidSlope/Valleys: Upslope 5-10 mph until 1300. After 1300, NW/down-canyon 14-20 mph gusting 26-32 mph.

Chance of Wetting Rain (≥ 0.10 ")...0% **LAL...**1 **Haines Index...**4 (Low) **Inversion Lift...**1300-1400

Mixing Height...5,000 ft AGL **Transport Wind...**W 10 mph in the morning, NW 20 mph in the afternoon

Tonight:

Weather: Mostly cloudy with thick smoke.

Low Temperatures: 63-69

Max RH: 30-36%

20 FOOT WINDS:

Ridgetops: NW 10-16 mph gusting 20-26 mph through 2100. After 2100, NW 5-10 mph.

MidSlope/Valleys: NW/down-canyon 14-20 mph gusting 20-26 mph through 2100. After 2100, down-slope/down-canyon 4-8 mph.

Chance of Wetting Rain (≥ 0.10 ")....0% **LAL...**1 **Haines Index...**4 (Low)

Outlook for Wednesday:

Weather: Sunny with thick smoke.

High Temperatures: Above 5000: 74-80 Below 5000: 81-87

Min RH: 14-20%

Ridgetops: WNW 6-12 mph through 1300. After 1300, NW 12-18 mph gusting 24-30 mph.

MidSlope/Valleys: Upslope 5-10 mph until 1300. After 1300, NW/down-canyon 12-18 mph gusting 24-30 mph.

Chance of Wetting Rain (≥ 0.10 ")...0% **LAL...**1 **Haines Index...**3 (Very Low)

Extended Outlook for Thursday:

Weather: Sunny with thick smoke.

High Temperatures: Above 5000: 74-80 Below 5000: 81-87

Min RH: 10-16%

Ridgetops: W 4-8 mph through 1400. After 1400, WNW 7-13 mph gusting 17-23 mph.

MidSlope/Valleys: Upslope 5-10 mph until 1400. After 1400, W/down-canyon 7-13 mph gusting 17-23 mph.

Chance of Wetting Rain (≥ 0.10 ")...0% **LAL...**1 **Haines Index...**3 (Very Low)

Nearby Observations

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12	TYPE OF FIRE: Vegetation
FIRE NAME: French	OPERATIONAL PERIOD: Aug 31 st 24 Hour
DATE ISSUED: August 30 th	TIME ISSUED: 2000
UNIT: CND/SQF French	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

Fire areas include a range of conifer systems in the upper elevations above 5000', transitioning into scrub oak, sage, and annual grasses on the eastern slope down to Lake Isabella. Areas to the West of the fire transition from timber up top to a mix of chaparral, Oak and annual grass understory. Anticipate heavy fuel loading, drought stress, bug kill, and a lack of fire history throughout the fire area, with some grazing to the West of the Forest boundary.

The area is currently classified as 'Exceptional' drought by the US Drought Monitor, with Energy Release Components exceeding the 90th percentile, not far off all time high levels. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day. Fine dead fuel moisture is calculated at 3% or less.

EXPECTED FIRE BEHAVIOR: Based on the Warmest, Driest, Windiest Conditions Forecasted

Maximum Spotting Distance	Fuel Type/Model	Maximum SURFACE Rate of Spread (chains/hour)	Maximum Flame Length (feet)
Grass/Shrub 0.5 miles Timber/Heavy brush 0.8 miles	Timber litter and understory TU5/TL6	Head 20-25 ch/hr Flank 12-15 ch/hr	Head 12-16 ft Flank 8-12 ft
Probability of Ignition 90 %	Grass/Shrub GS2/SH5	Head 60-80 ch/hr Flank 40-60 ch/hr	Head 17-20 ft Flank 10-12 ft

Div. A/E As the fire backs down from timber into a heavy brush fuel model, in places its only burning the understory and has potential to reburn as a slope driven run in the canopies. Terrain heavily influences direction of travel for these upslope runs. Afternoon winds are primarily upslope/SW but expect squirrely winds along the bottom of the drainage.

H/K Gusty winds and low RH will put these areas to the test yet again, but great job in this very rough terrain with extensive snag challenges.

Alta Sierra/Wofford Structure Groups Drought stressed vegetation and soils will create long term smoldering and creeping with the occasional torching/spotting event within the communities.

Div. M/N Limited spread potential remains with all the good work securing these divisions, but gusty afternoon winds could support rapid spread rates outside containment lines.

O/R Lots of good work on the ground has halted fire spread; be heads up for interior spotting lofting embers across lines as well as fire weakened trees in work areas.

Div. Y Critical holding piece is holding due to the strong work and good decision making of Night/Day resources. Long duration burn down of fuels will keep the threat of SE movement up if gusty NW winds surface today.

Div. Z Active backing supported by the clean, dry, gusty winds from the West. Watch for fires to find sideways alignment that could spot moderate distances over containment lines and push towards and below Divisions Alpha and Yankee.

Night Divisions: Focus area will likely again be the SW portion of the fire with daytime spread rates and spotting distances until the winds let up or RH recovers.

AIR OPERATIONS:

Anticipate smoke to clear enough to support air missions by 1000 or earlier

SAFETY:

We have a wildcard in the mix today with tropical moisture bringing the threat of erratic outflow winds. We know what the fire wants to do with West winds but game out wind scenarios from different directions today.

Health & Safety Message

Incident: French Fire CA-CND-002796	Date/Op Period: Day/Night Shift 8/31 to 9/1/21
---	--

Hazards & Risks

Is your truck S.E.C.U.R.E.?

- S Set parking brake
- E Environmental hazards mitigated
- C Chock the wheels
- U Under carriage inspected
- R Roll up windows
- E Ensure equipment is safe to leave

What do you look for in a fireline parking spot? Look up, look down, look all around.

- o Look for cold black, bare soil, sparsely vegetated areas, plowed fields, or other natural or humanmade barriers. Be careful to not get stuck in soft soils.
- o Complete a walk around looking for ash pits, penetrating stobs, unburned adjacent fuel, snags, or other hazards that may damage the apparatus.
- o Do not block the access or egress of others. Be careful to not block dozer lines, safety zones, or helispots. Back in and face your danger when turning around. Chock your tires.

Safety Zones: A safety zone is an area where a firefighter can survive without a fire shelter. The separation distance between firefighter and flames should be at least **4X the maximum flame height. This is based on flat terrain and no wind conditions. Safety Zones that are downwind and/or upslope from the fire will require larger separation distances.** Reference your IRPG for detailed safety zone size calculations. Ensure your **escape route** is clear of hazards and known to all.

6. Work Assignments:
 Hold and improve existing control lines from the Y/R and Y/Z division breaks.
 Mop up and secure to the extent necessary to keep the fire within existing containment lines.
 Complete construction of contingency lines from Rancheria Rd. East along the 26S04 Rd to Bradshaw Rd and North to Borderline Rd.

7. Special Instructions:
 Red and white candy-striped flagging represents natural and cultural resource areas to be avoided by dozers.
 Contact the REAF's or Lead READ for questions or any additional information needed.
 Utilize REAF's to identify mine hazards along to the 26S04 Rd.

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location *(if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication :

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Nick Stepanian @ (909) 908-4778

Communication is a two-lane highway.

Working an assignment, especially if this is your first one may be exciting and stressful experience. If you run across an area for improvement, please make use of your chain of command to address the situation. If you do not feel comfortable speaking to your first line supervisor, the HRSP door is always open.

FRENCH FIRE COVID TESTING CLINIC

Location: 7158 Lake Isabella BLVD.
Lake Isabella, CA 93240

Daily Hours of Operation: 07:00 – 12:00 and 16:00 – 20:00

What to expect:

- Wear your mask at all times.
- Be ready with Resource Number upon arrival
- Estimated Time at Testing Location: 1 hour
- Guided testing: You will be guided through the self-test process.
 - Results in 15 minutes after sample is collected
