INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	8/24/2021	Date To:	8/25/2021
1. incloent Name: French Fire	z. Operanonal Period:	Time From:	0600	Time To:	0600
3. Objective(s):		Time Fivili.	5000	10110-10.	0000
Management Objectives				WW. 1100	
Provide for the safety of firefighters and the publi incident within an incident protocols are establish		egic and deliberate	e risk assessm	ent process	es. Ensure
 Develop and implement operational objectives be spread. 	ased on identified values at	risk and highest pr	robability of su	ccess limitin	g fire
- Follow established guidelines and mitigations reg	garding COVID and other in	fectious diseases.			ĵ
- Enhance relationships through timely communica	ation and active involvemen	t with the public, st	akeholders, a	nd cooperate	ors.
- Coordinate with the READ's to ensure natural, co	ultural, and historical values	are protected.			
- Maintain fiscal responsibility keeping cost commo	ensurate with the values at	risk.			
 Provide initial attack response to new fire starts v requested. 	within the TFR boundary. As	ssist with initial atta	ack efforts outs	ide the bou	ndary as
Control Objectives	23 V	<u>e:</u>			
- Keep the fire North of Keysville while providing fo	or structure defense where	appropriate.			
Keep the fire out of the communities of Alta Siem	a and Wofford Heights and	south of the Way E	Burn Scar.		
- Keep the fire East of Granite Road while providir	ng for structure defense whe	ere appropriate.			64 %
- Keep the fire West of Wofford Blvd (Highway 155	5) while providing for structu	re defense where	appropriate.		
1 .

Fire Weather Forecast

FORECAST NO: #3

PREDICTION FOR: Tuesday

OPERATIONAL PERIOD: August 24 2021

FORECAST ISSUED: 8/23/2021 at 1900

INCIDENT: French

UNIT: Central California District Office

Incident Meteorologist: Robert Rickey

Weather Discussion: For today, expect slightly warmer and drier conditions that yesterday. Below 5500 ft, afternoon humidity will drop into the low teens. Above 5500 ft, the lowest humidity will occur in the morning, with humidity rising to around 40% during the afternoon. Light southeast winds in the morning will become breezy westerly winds after 1400.

For tonight, light ridgetop winds will develop after 2300, with typical downslope/down-valley winds within drainages. Expect poor overnight humidity recoveries at all elevations. Above 5500 ft, the highest humidity will occur during the late evening, before dropping below 20% during the morning hours. Below 5500 ft, the highest humidity will occur during the early morning hours like normal, but humidity may not rise above 40%.

The warming and drying trend will continue on Wednesday and Thursday, but unstable conditions will combine with very low afternoon humidity to produce a Haines of 5 both days.

WEATHER FORECAST

Today:

Weather: Clear skies with thick smoke.

High Temperatures: Above 5000: 80-86 Below 5000: 87-93

Above 5500: 17-23% at 0900, increasing to 37-43% through the day.

Below 5500: 11-17%

20 FOOT WINDS: SE 4-8 mph through 1400. After 1400, increasing to W 9-15 mph with gusts 19-25 mph.

Chance of Wetting Rain (>=0.10")...0% LAL...1 Haines Index...4 (Low)

Mixing Height...6,000 ft AGL Transport Wind...W 10 mph Inversion Lifting...1200-1300

Tonight:

Weather: Clear skies with thick smoke.

Low Temperatures: 59-65

Max RH:

Above 5500: Increasing to 44-50% by 2100. After 2100 decreasing to 10-16% by 0900.

Below 5500: 31-37%

20 FOOT WINDS: W 9-15 mph with gusts 19-25 mph through 2000. After 2000, decreasing to NW 5-10 mph. After 2300, variable ridgetop winds 3-6 mph, with downslope/down-valley winds 5-10 mph in drainages.

Chance of Wetting Rain (>=0.10")....0% LAL...1 Haines Index...4 (Low)

Outlook for Wednesday:

Weather: Clear skies with thick smoke.

High Temperatures: Above 5000: 81-87 Below 5000: 88-94

Min RH: 8-14%

20 FOOT WINDS: SW 5-10 mph through 1400. After 1400, increasing to W 11-17 mph with gusts 21-27 mph.

Chance of Wetting Rain (>=0.10")...0% LAL...1 Haines Index...5 (Medium)

Mixing Height...6,000 ft AGL Transport Wind...W 10 mph

Extended Outlook for Thursday:

Weather: Clear skies with thick smoke.

High Temperatures: Above 5000: 83-89 Below 5000: 90-96

Min RH: 8-14%

20 FOOT WINDS: SW 5-10 mph through 1400. After 1400, increasing to W 9-15

mph with gusts 19-25 mph.

Chance of Wetting Rain (>=0.10")...0% LAL...1 Haines Index...5 (Medium)

Mixing Height...5,000 ft AGL Transport Wind...W 5 mph

Nearby Observations

TYPE OF FIRE: Vegetation OPERATIONAL PERIOD: Aug 24th 24 Hour
OPERATIONAL PERIOD: Aug 24th 24 Hour
TIME ISSUED: 2000
SIGNED: Dan O'Connor
Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

Fire areas include a range of conifer systems in the upper elevations above 5000', transitioning into scrub oak, sage, and annual grasses on the eastern slope down to Lake Isabella. Anticipate heavy fuel loading, drought stress, bug kill, and a lack of fire history to the west of the fire, with a mix of Ponderosa Pine, White Fir, and Incense Cedar.

The area is currently classified as 'Exceptional' drought by the US Drought Monitor, with Energy Release Components exceeding the 90th percentile, not far off all time high levels. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day. Fine dead fuel moisture is calculated at 3% or less.

EXPECTED FIRE BEHAVIOR: Based on the Warmest.	. Driest. Windiest Conditions Forecasted

Maximum Spotting Distance	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
0.5 miles Probability of Ignition 85 %	Timber litter and understory	Head 20-25 ch/hr	Head 12-16 ft
	TU5/TL6	Flank 12-15 ch/hr	Flank 8-12 ft
	Grass/Shrub	Head 25-30 ch/hr	Head 5-8 ft
	GR2/GS2	Flank 15-20 ch/hr	Flank 4-6 ft

Specific

- **Div.** A The flank that runs SW will continue actively backing, seeking opportunities for slope reversal runs within Alder and Bear Creek drainages.
- **Div. E** The spot to the West of Alta Sierra will continue to cause issues for the structures within the community. Lateral movement is possible again with additional upslope runs and long-range spotting to the east. Long burn down times and complete consumption of heavies is likely due to the drought conditions.
- **Div. M** The fire wakes up with the sun and we're seeing two distinct burn periods here each day. The mornings see dry upslope winds and hot slope alignment to get the fire moving early. Once the afternoon winds kick in, Westerly flow will again have the fire looking for routes East, especially through spotting or rollout into Shirley or Ice House Creek drainages. New spots could find some wind blockage from the upper ridge along Rancheria Road, but more exposed areas will support active growth downslope towards Wofford Heights.
- Div. N/O/R Lots of good work on the ground has halted fire spread; be heads up for interior spotting lofting embers across lines as well as fire weakened trees in work areas.
- **Div. Y** This area had very large spread potential and threat to values at risk to the east; for several days gusty afternoon winds kept pushing the fire aggressively. Great job putting in containment lines.
- **Div. Z** As fire continues to back down and roll out into Lumreau Creek, be heads up for slope reversed runs with the afternoon alignment of aspect, wind and slope.

Night Division: Anticipate daytime burning conditions to continue well into the night, seeing relief with a decrease in winds and/or relative humidity recovery.

AIR OPERATIONS:

Sunrise 0620 Civil Twilight 1957

SAFETY:

Persistent weather pattern will bring consistent, active to very active fire behavior for us. Mornings will bring dry flow from the east with slope and sun alignment, afternoons will turn downslope with the infamous Lake Isabella/Highway 155 gusty winds from the west.

Health & Safety Message

Incident: French Fire Date/Op Period: Day/Night Shift CA-CND-002796 B-24 to 8-25-21

Hazards & Risks

<u>Smoke Exposure:</u> Line personnel that are involved in direct attack, line holding and mop up have the highest smoke exposures. Symptoms of over-exposure start with headaches & visual impairment, then impaired decision making, altered levels of consciousness and in extreme exposure cases, death from carbon monoxide poisoning. Consider rotating resources in and out of smoky areas & consider exposure time when developing mop up standards.

Ash Pit Hazards: Stump holes are abundant in the fire area. Use caution when using water to mop up and avoid straight streaming directly into the ash pit as scalding steam can suddenly erupt from the hole and burn you. Things to LOOK OUT for:

- Extensive root systems of trees and shrubs.
- Deep duff or peat, the organic layer covering mineral soil.
- Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards, or decking areas.
- Small rodent holes that have become filled with decadent, combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
- White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
- With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground.
- Ash pits often give off the smell of incomplete combustion or of creosote burning.

The Five Communication Responsibilities for Firefighters: 1. Brief others as needed 2. Debrief your actions 3. Communicate hazards to others 4. Acknowledge messages. 5. Ask if you don't know

MEDICAL PLAN (ICS 206 WF) CIIMT 12

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF C PERSONNEL AS NECES	
	BSARY.
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMI "MEDICAL EMERGENCY" TO INITIATE RESPONSE FR	
Use the following items to communicate situs	tion to communications/dispatch.
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting Ext. "Communications, Div. Alpha. Stand-by for Emergency Traffic." 2. INCIDENT STATUS: Provide incident summary (including number of patients) and commander. Communications, I have a Red priority patient, unconscious, struck by a falling tree. Red Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."	ing report)
☐RED / PRIORITY 1 Life or limb threatenin Ex: Unconscious, difficulty breathing, bleeding	
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist
Patient Location	Ground Ambulance / Other Descriptive Location & Let. / Long.
Incident Name	(WGS84) Geographic Name + "Medical"
On-Scene Incident Commander	(Ex: Trout Meadow Medical) Name of on-scene IC of Incident within an
Patient Care	Incident (Ex: TFLD Jones) Name of Care Provider
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start	(Ex: EMT Smith)
Patient Assessment: See IRPG PAGE 106	with the most severe petrent)
Treatment:	
4. TRANSPORT PLAN:	
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.)	or Lat. / Long.) Patient's ETA to Evacuation Location:
Helispot / Extraction Site Size and Hazards:	The second section of the section
	4 (1) (1) (1) (1) (1) (1) (1) (1) (1) (1)
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:	
Example: Paremedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s	s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication:
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital	
Function Channel Name/Number Receive (RX) Tone/NAC *	Transmit (TX) Tone/NAC *
AIR-TO-GRND	
TACTICAL	,
TACTICAL	
7. CONTINGENCY: <u>Considerations</u> : If primary options fall, what actions can be implement ahead.	nted in conjunction with primary evacuation method? Be thinking
8. ADDITIONAL INFORMATION: Updates/Changes, etc.	
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of Declaively	f training. Be Alert. Keep Calm. Think Clearly. Act

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Difficulty breathing
 - Loss of taste or smell
 - o Fever
 - o Chills
 - o Sore throat
 - o Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least <u>SIX</u> feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Nick Stepanian @ (909) 908-4778

MEDL (T) Brandon Bennewate @ (805) 813-3858

Yesterday is History.
Tomorrow is Mystery.
Today is a Gift.
That is why we call it the
The "Present"

Please take the time to thank the people you work with.
